(f) Mersey Docks, &c.—Revenue Account.—Col. 10.—Including last year's Balance as transferred to Sinking Fund Account. Col. 23.—The amount of money raised in the first instance was 4,107,837 l. - s. 10 d., of which the sum of 3,218,747 l. 17 s. 9 d. has been applied both to the renewal of expired Loans and the reduction of the Debt, leaving a Balance of 889,089 l. 12 s. 3 d. to be added to the Secured Debt Account as the money actually borrowed during the year. This Return only shows the Revenue and Conservancy Accounts.

(g) Middleborough Dock, &c.—Col. 2.—This Balance differs from that given in at the close of last year's Account.

(h) Newquay Pier and Quay.—Col. 19.—Expended on the Tram Road and other Works.

(i) Penzance Harbour.—Col. 18.—Dividends to Shareholders.

(j) Penzance Harbour.—Col. 19.—Including the Balance remaining of this Account as transferred to the Borough Fund.

(k) Plymouth Great Western Dock Company.—Cols. 5, 6, 7, and 8 included in Col. 4.

## ACCOUNT OF Tolls and Dues levied under the Authority of Parliament in respect of Harbours, and of the Expenditure

BILLINGSGATE MARKET.

RETURN to an Order of the Honourable The House of Commons,  
dated 7 June 1867;—for,

RETURN “of the Area of BILLINGSGATE MARKET, and of the Quantity of FISH Sold there in the Years 1865 and 1866 respectively, distinguishing that brought by the River and that by Railway or other Land Carriage; also, of the REVENUE received by the Treasurer of the City of London in the above-mentioned Years from the said Market, and of the EXPENDITURE of the same (in continuation of Parliamentary Paper, No, 326, of Session 1865).”

BILLINGSGATE MARKET.

| YEARS      | REVENUE.                       |            |             | Expenditure. |
|------------|--------------------------------|------------|-------------|--------------|
|            | Standings, Rents,<br>and Dues. | Tolls.     | TOTAL.      |              |
|            | £. s. d.                       | £. s. d.   | £. s. d.    |              |
| 1865 - - - | 5,578 14 11                    | 1,055 4 4½ | 6,633 19 3½ | 2,108 19 7   |
| 1866 - - - | 5,626 19 3                     | 1,011 12 7 | 6,638 11 10 | 1,872 19 1   |

The tolls of Billingsgate Market are received upon the vessels, boats, vans, or other conveyances taking fish to the market, and not upon the fish that may be contained therein, so that the quantity of fish sold cannot be ascertained.

The number of boats and other conveyances upon which toll has been received during the years 1865 and 1866 is as follows:—

| YEARS      | Vessels and<br>Boats containing<br>Fish. | Oyster Boats. | Waggons, Vans,<br>or Carts. |
|------------|------------------------------------------|---------------|-----------------------------|
| 1865 - - - | 3,258                                    | 1,101         | 15,680                      |
| 1866 - - - | 2,764                                    | 1,181         | 14,916                      |

The area of the market is 2 roods and 12 poles.

C. Childhall, 6 July 1867.

Ferd. Brand, Comptroller.

## BILLINGSGATE MARKET.

RETURN of the Area of BILLINGSGATE MARKET, and of the Quantity of Fish Sold there in the Years 1865 and 1866; also, of the REVENUE received by the Treasurer of the City of *London* in the above-mentioned Years from the said Market, and of the EXPENDITURE of the same; &c. (in continuation of Parliamentary Paper, No. 326, of Session 1865).

(*Mr. Leffevre.*)

## EAST LONDON WATERWORKS COMPANY.

---

RETURN to an Order of the Honourable The House of Commons,  
dated 31 May 1867;—for,

COPY “ of REPORT by Captain *Tyler* to the Board of Trade on the Quantity and Quality of the WATER supplied by the EAST LONDON WATERWORKS COMPANY, and of the MEMORIAL from certain Inhabitant Householdors of the East of *London* upon which the Inquiry was made.”

---

### REPORT of Captain *Tyler* to the Board of Trade, in regard to the EAST LONDON WATERWORKS COMPANY.

---

Sir,

1, Whitehall, 27 May 1867.

I HAVE now the honour to report, for the information of the Lords of the Committee of Privy Council for Trade, that I have, pursuant to the provisions of the “Metropolis Water Act, 1852,” made inquiry into the complaints contained in the Memorial, signed by certain inhabitant householders of the East of London, which was forwarded to their Lordships on the 13th November 1866, and was referred to me on the 19th of that month, concerning the quantity and quality of the water supplied by the East London Waterworks Company.

After a preliminary meeting at this office on the 27th November, of the Memorialists and the representatives of the Water Company, I proceeded, according to arrangement, to inspect on the 3rd and 4th of December, the works of the company at Old Ford and Lea Bridge, and the channels leading to them. I then adjourned the inquiry, at the request of the Memorialists, until I heard again from them, on the 26th January, that they were prepared to resume it. I attended, as suited the convenience of both parties, at the vestry hall, Bancroft-road, Mile End Old Town, on the 6th, 13th, 15th, 26th, and 27th of February, and the 1st of March; and at the offices of the East London Water Company, St. Helen's-place, on the 5th, 9th, 12th, 16th, and 19th of March. I inspected the covered reservoirs at Old Ford, which had been emptied as far as they could be for that purpose, on Sunday the 24th February. I visited certain portions of the district, to which special attention was directed, with both parties, on the 29th of March and the 2nd of April. I attended at St. Helen's-place on the 6th April; and it was understood on that day that the inquiry had terminated. But on consideration of a part of the evidence in regard to water analysis, to which I had directed their special attention, and on consultation with an eminent chemist who had been one of their witnesses, the Water Company subsequently requested that I would hear him further. I consented to do so on the condition that arrangements should be made for the attendance at the same time of the Memorialists, and of the chemical witness on their behalf, whose evidence it was the object of the company to rebut. And I held a further and final meeting under these circumstances on the 25th of May.

During the inquiry, the Memorialists were represented by Mr. Thomas Price the vestry clerk of Mile End Old Town; and the Water Company by Mr. Clerk, as counsel, and by Messrs. Bircham & Co., of 46, Parliament-street, as solicitors. The several witnesses on both sides were examined and cross-examined in the usual way, and I beg to enclose the evidence which I thus took down in writing, together with the printed and other matter which was handed in at different

stages of the proceedings, and which was, it will be observed, of a voluminous character.

The allegations contained in the Memorial were to the following effect:—

1. That the Company's Works at Lea Bridge, "from whence the whole water supply of this portion of London is derived, were situated at a point where the water had been contaminated by the sewage of Broxbourne, Hoddesdon, Bishop's Stortford, Enfield, Ware, and many other places, comprising a population of many thousand inhabitants."
2. That at the Works of the Water Company (at Old Ford), there was an underground reservoir several feet below the River Lea, which was immediately contiguous to it, and that the water from the river, "which was no better than an open sewer," found its way into this reservoir.
3. That at the same works there were two open ponds, "where no sufficient care was taken to protect the water against impurity," and that water had been admitted from those ponds into the underground reservoir.
4. That water "so used" had been "the principal, if not the sole, cause of the fearful mortality from the cholera at the East of London."
5. That the water supply was deficient in quantity.

I have divided these allegations, for the sake of greater simplicity, into five instead of three, separating for that purpose the second paragraph of the Memorialists into those numbered above, 2, 3, and 4; and I have, as a matter of convenience, transposed Nos. 1 and 5. I have found it necessary, in the course of the inquiry, to take evidence also in regard to two questions of primary importance, which, though they might be included in No. 5, are better classed under the separate headings of:—

6. Sunday supply.
7. Constant supply.

The River Lea is principally formed from and supplied by six tributary streams. The Lea proper, which is the most westerly, rises near Luton in Bedfordshire 45 miles along its valley, exclusive of sinuosities, from the Thames. The Maran or Mimram, the Beane, and the Rib, flow from the Chiltern Hills, on the north of Herefordshire. The Ash, to the east of the Rib, is the smallest, and the Stort is the most easterly of these tributaries.

The New River flows from Balance Engine, about a mile below Hertford, and 24 miles from the Thames; and the New River Company take their Lea water under ordinary circumstances from that point. They have power to take 2,500 cubic feet per minute, or 22,500,000 gallons a day, from the Lea at Balance Engine; and they have an engine-house for taking a supply at Tottenham Mills, which they use in dry seasons.

The total watershed of the Lea is computed at 500 square miles, of which 244 square miles go to supply the New River. The East London Company draw partly upon the surplus water of this latter area, and partly upon 216 square miles independently of it. The water from the remaining 40 square miles flows into an intercepting drain, four miles long, which was constructed in 1852-3 by the East London Company, with assistance from the New River Company, between Tottenham and Enfield Mill. There are about 25 inches of rainfall annually over this area, and the river is largely supplemented by springs of pure water between Ware and Broxbourne. It is estimated from the census of 1861 that 64,296 persons reside on the 244 square miles which supply the New River, and 51,890 below the source of the New River, as far as the northern boundary of the parishes of Waltham Abbey and Enfield. The population of the principal towns in this latter part of the watershed is as follows:—

|                           |   |   |   |   |   |   |   |                    |
|---------------------------|---|---|---|---|---|---|---|--------------------|
| Hoddesdon with Broxbourne | - | - | - | - | - | - | - | 2,663              |
| Cheshunt                  | - | - | - | - | - | - | - | 6,592              |
| Sawbridgeworth            | - | - | - | - | - | - | - | 2,701              |
| Stortford                 | - | - | - | - | - | - | - | 5,390              |
| Ware                      | - | - | - | - | - | - | - | 5,397              |
|                           |   |   |   |   |   |   |   | <hr/> 22,743 <hr/> |

The intercepting drain above referred to cuts off the sewage of a further population of above 52,000; and the East London Company were applying to Parliament, at the commencement of the present Session, for power to extend the intercepting system for a distance of three miles along the valley, and in two arms for a total length of eight miles. They would thus have cut off the sewage of a numerous population, without losing any material quantity of water. But they have withdrawn this part of their Bill, pending proposals for a larger scheme of sewerage for the district. There would still have remained a distance of 10 miles along the valley, between Balance Engine and the termination of the intercepting effects of the proposed drains, in which the towns above enumerated, containing 22,743 inhabitants, must be included. It is obviously very desirable that some measure should be adopted for the purification of this further portion also of the river. The system of legislation which was adopted last year in regard to the Thames might with still greater advantage be extended to the Lea, and a good scheme for the interception of sewage should, at the same time, be carried out. A far greater proportion of the total quantity of water with a stronger proportional admixture of sewage is daily drawn for domestic use from the latter than from the former river. The condition of the Stort at Bishop's Stortford is described by Mr. Knight, the chief surveyor to the Vestry of Mile End Old Town, as being especially disgusting; and a Water Supply Committee wrote strongly on the subject to the Poplar Board of Works, in a report which was furnished to their Lordships last December.

There is no doubt of the truth of the allegation, which I have numbered 1, of the Memorialists, that the River Lea is much contaminated by sewage before it reaches the Company's Works at Lea Bridge. The Company suffer from such contamination as well as the public; and they ought to receive, in the interest of a quarter of the population of the metropolis, all the assistance that Parliament can afford towards its alleviation.

The East London Company may be said to take their water from the Lea at Higham Hill, inasmuch as they own and have control of the channels to that point. The flow of the water they use is mostly conducted through the Walthamstow millstream into their storage reservoirs at the Copper Mills. But it was commonly received up to 1863, and may still be received, also, through the Tottenham millstream. The storage reservoirs at the Copper Mills, constructed between 1861 and 1866, have a water area of 110 acres, and an average depth of 11 feet. They contain a total capacity for 220,000,000 gallons, or about 170,000,000 gallons capable of being drawn upon, and available for eight days of total supply. The Company has found them most beneficial in equalising the supply, and, by improving the quality of the water, in decreasing the work and cost of filtration. The full level of these reservoirs is the level at the head of the Tottenham and Copper Mills, and is about three feet above the surrounding country. Their low level is the tail level of those mills. The Company prefer to take the water from the higher level, and through the reservoirs, in order to obtain the advantage of allowing the water to deposit in the reservoirs. They take water at the tail level when they require to draw upon the Tottenham Mill, which belongs to the New River Company.

These reservoirs were constructed in a stratified soil of clay, gravel, and clay, and were made tight artificially by a continuous vertical puddle-wall six feet thick, carried down everywhere to a natural clay bottom. They are divided by puddle-walls into three portions, with sluice connections; and any one of these portions may be emptied for cleansing or repair, as is required. The Company are now seeking powers to add 100 acres of water area north and south of them, by which they hope to obtain storage for 500,000,000 gallons, equal to a total supply for 25 days. They would thus be better prepared in seasons of drought, and they would be able, at the commencement of each flood, when the river is at its worst, to shut it out from their works for a longer period, and then, after drawing for a few days upon their stored supply, to re-admit it as its condition improved.

From the Copper Mills reservoirs to the filtering station at Lea Bridge, the water is conducted through a feeding channel a mile and a quarter long, with a sectional area of rather more than 100 feet, and with a slight fall towards Lea Bridge. At Lea Bridge there are a large steam-engine of 250 horse-power, and a smaller one of 50 horse-power, as well as two water-wheels which work as long

as there is surplus water to turn them. The Company are constructing two additional engines of 150 horse-power each, to be completed in the spring of next year. There are here 12 acres of filter beds, and the Company are seeking powers to obtain land for six additional acres of filtering area. Part of the water filtered at Lea Bridge passes through cast-iron pipes, 48 inches in diameter, and  $2\frac{1}{2}$  miles in length, to the works at Old Ford, and the remainder is pumped out direct to the district.

At Old Ford there are two engines of about 70 horse-power, and four larger engines, altogether of 560 horse-power. There are also at these works two covered reservoirs, measuring at the upper surface of the water when they are full about  $2\frac{1}{2}$  acres, and containing together about 6,000,000 gallons. There are walls of separation between them, with a connecting channel through the walls, but these walls are five feet under water when they are full. These reservoirs were constructed in 1807, and were first used in 1809. From the latter date up to the year 1829, the Company took their whole supply from the River Lea at Old Ford. The reservoirs were filled by sluices with brick channels, which were opened at high water, and the river was thus emptied twice a-day. But little has since been done to the reservoirs except that they were covered over in 1854-55 by piers and arches of brickwork. They were kept dry for several months while this operation was going on, and the only soakage into them that was then observed was, as far as the engineers of the Company remember, supposed to come from the sluices, and it was collected in channels and pumped out. They are stated to have been at times nearly emptied for examination since 1855, without any soakage being discovered. The latest date at which such examination occurred is believed to have been six or seven years ago. They have never been cleansed since 1855.

It was, of course, impossible to come to any satisfactory conclusion as to the truth or otherwise of the allegation, which I have numbered 2, of the Memorialists—that the water of the Lea found its way into these reservoirs—without actual examination when the water was pumped out of them, and I therefore intimated to the Company my desire to make such an examination. They did not at first see their way to it without interfering with the supply of the district, but at length they were good enough to appoint Sunday, the 24th of February, as being the least inconvenient day for the purpose; and the reservoirs were emptied in 36 hours, between Saturday morning at 6 a.m., and Sunday evening at 6 p.m., to within about a foot of the bottom, which was as far as the engines would draw the water from them. I devoted three hours on the Sunday afternoon to wading about in the water, and thus making the best examination which the circumstances would permit. I found a spurt of water issuing from the brickwork across an old sluice through which water had formerly been admitted to one of the reservoirs from the river, and I saw water issuing from more than one of the piers by which the arched covering was supported. I observed also a considerable amount of soakage into the reservoir from the slopes of the brickwork at its side, and from the gravel at the foot of the brickwork, over a distance of 210 or 215 feet. In one part there was a tolerably distinct line of soakage some six feet above the foot of the slope. There were also, as it were, springs issuing below the level of the water, and producing motion at the surface, which became more visible as the water decreased in depth; and it was impossible to avoid the conclusion that if more of the bottom could have been laid bare, more of these issues would have been seen, and a greater quantity of water would have been found to enter the reservoir. There was much discoloration in different places, where the water entered, which appeared to indicate a want of purity, though the water itself appeared to the eye, when taken in a glass from the spurts from the brickwork, to be bright and sparkling. It was less agreeable to the taste than the Company's filtered water. Samples were handed by the Company to Dr. Letheby for analysis, and the results may be seen in the following table, in comparison with samples from the Company's main at the London Hospital on the next day, and on the 9th of August 1866, and from the uncovered reservoirs (to be presently described) on the 9th of August 1866:—

| Label on Sample.                                            | College Main,<br>London<br>Hospital. | Old Ford<br>Uncovered<br>Reservoir. | Water<br>in Covered<br>Reservoir<br>at end<br>of Inquiry. | Spurt from<br>Wall in Old<br>Sluice. | Spurt from<br>Stone at<br>North End. | College Main,<br>London<br>Hospital. |

| Of which loss by incineration -                             | 1.76                                 | 1.89                                | 3.3                                                       | 3.4                                  | 2.5                                  | 2.5                                  |
| Of which organic (as tested by<br>permanganate of potash) - | 0.48                                 | 0.56                                | 1.28                                                      | 1.12                                 | 0.56                                 | 0.80                                 |
| Hardness (degrees) - - -                                    | 12.5                                 | 13.5                                | 14.5                                                      | 16.5                                 | 15.5                                 | 13.5                                 |
| Ditto after boiling - - -                                   | 4.0                                  | 4.0                                 | 4.0                                                       | 8.5                                  | 5.0                                  | 6.0                                  |

A small sample was also taken, with a view to its analysis by Professor Frankland, but it proved to be insufficient for the purpose. Professor Frankland stated, however, that he had the fullest confidence in the results of Dr. Letheby's analysis, as he had always found they agreed substantially on previous occasions, excepting that he objected to Dr. Letheby's mode of calculating organic matter in waters, on the assumption that the whole of that organic matter was oxidized by permanganate of potash. Neglecting in the first instance the results so obtained, and comparing the different samples under the heading "loss by incineration," it would appear that the water in the covered reservoir at the end of my inquiry, contained organic and other volatile matters to an unusual extent. There were, in fact, 3.3 grains of such matters lost by that process per gallon, against 1.1, the average by the same chemist for the Company's filtered water for nine months, from April to December 1866; against 2.5 for the water in the main at the London Hospital on the next day; against 1.76 for the water in the Company's main on the 9th of August 1866; and against 1.89 for the water in the uncovered reservoir at the same date. It will further be observed that the water left in the covered reservoir on the evening of the 24th of February was nearly as bad by this test as that which issued from the wall in the old sluice, and was worse than that which spurted from the slope at the north end of the reservoir. But the result of the test by permanganate of potash, relied upon by Dr. Letheby, who appeared for the Company, and objected to by Professor Frankland, who appeared for the Memorialists, is still worse. According to that test, the water which remained in the reservoir was the worst of all, showing 1.28 grains of organic matter per imperial gallon, against 1.12 grains in the spurt from the old sluice; 0.56 grains in the spurt from the slope; the same in the uncovered reservoir, on the 9th of August 1866; .48 in the London Hospital main at that date, .80 in the main at the London Hospital on the 25th of February, and .55 as the general average of the Company's filtered water for the seven months, April to December 1866. The question then arises, how did the water in the covered reservoirs become, at the end of the inquiry, so strongly tainted with organic matter? How could it become, in the case of the first test, nearly as bad as the water leaking through the old sluice, and worse than that leaking from the slope; and in the case of the second test, worse than the water issuing from either of those places? The only answer that I can make to these questions is, that there must have been, if these tests are to be relied on, means of contamination worse than those supplied by the particular issues of water which were tested; that as the filtered water with which the reservoirs had been filled was pumped out, the remaining mass of the water was contaminated, either by something at the bottom of the reservoir, or by water soaking into it. During the investigation, I noticed a strong and disagreeable odour, confined within narrow local limits, in two places near the surface of the water, but I was unable to trace it in either case to any source. And there was a considerable amount of deposit from the water in all parts of the reservoir, wherever such deposit could find a resting-place. But this deposit, which was analyzed by both Dr. Letheby and Professor Frankland, was found, as taken from the

brickwork, about half-way down the slope, to be innocuous. It contained, according to Dr. Letheby, only 0·7 per cent. of organic matter; it consisted principally of carbonate of lime; and it was, according to Professor Frankland, such a deposit as might have been expected from a hard water stored in a reservoir lined with brickwork in mortar. I am therefore driven back to the conclusion that there must have been some soakage through some part of the bottom of the reservoirs, of a more hurtful character than the water which issued from the points at which samples were taken. And I must not omit to mention, in connection with this point, that Mr. Knight, the Surveyor to the Vestry of Mile End Old Town, dug up from below the gravel in one part of the reservoirs, a substance which was offensive to the smell.

I learn that the ordinary pond level of the River Lea, at Old Ford, is two feet below Trinity high-water mark, and that the river stood at or near that level during the above examination. The water in the reservoirs pumped down to a depth of about one foot, would have been 10 feet below the level of the water then in the river. The river may rise in extreme flood to 1' 6" or 2' above Trinity high-water mark, and it would in that case be above the full level of the water in the reservoirs, which is ordinarily the same as that of the pond level in the river. The bottom of one reservoir is about 12, and that of the other about 13 feet deep below Trinity high-water mark. They are filled every night, and pumped down about five feet every day; and they are thus, taking into account their irregular shape, emptied daily of about one-half of their contents. About 11,000,000 gallons of water are delivered daily from Old Ford to the district, all passing through these reservoirs. Of this quantity, about 8,000,000 gallons is drawn through them from Lea Bridge; and out of 6,000,000 gallons which they contain each morning, 3,000,000 gallons is drawn upon during the day, the same quantity remaining in them in the evening, though at times much less water would remain in them. The water in these reservoirs may thus be above that in the river in the morning, and would be below it every evening. The sources of contamination above referred to would come into play as the depth of the water in the reservoirs decreased during the day, but they would be very much diluted, and they would not in the practice of daily working have operated so strongly as on the 24th of February, inasmuch as it was necessary to remove some of the brickwork to enable the engine to draw the water down to so low a level, and the pumping was prolonged at a slow rate to an unusual extent.

The 210 or 215 feet over which the soakage into the reservoirs was observed, was not in the portion of the reservoirs nearest to the river. Measuring from the high level of the water in the reservoirs to the wall of the river, the minimum distance between the river and the east reservoir was 40 feet, and between the river and the west reservoir was 33 feet, but the distances from the river to the northern and south-east point of soakage were 57 and 56 feet respectively. It would appear that the portions of the reservoirs where this soakage occurred, must have been excavated in less tenacious material than the remainder, and the liability to soakage has doubtless increased since the channel of the river was deepened a few years ago.

Under all the circumstances of the case, I am of opinion that the allegation numbered 2 of the Memorialists has been proved, and that the water of the Lea finds its way into these covered reservoirs. There is no doubt as to the impure quality of that water. It would be more or less naturally filtered in making its way through soil and gravel, and the proportion of contamination would be very small in the ordinary operations of the Company, though it would increase as the level of the water in the reservoirs diminished. But it is evidently desirable that the Company should make the earliest possible arrangements for increasing their engine-power and their filtering area, with a view to their becoming less dependent on these reservoirs. They cannot at present, I fear, continue the full supply to their district, without using them for storage each night, but they may reduce the evil to very narrow limits, by keeping them always as nearly as possible full, and drawing upon them each day to a moderate extent only. They have now proposed to Parliament, in consequence of the soakage observed during the above examination, to fill up the easternmost of these two reservoirs completely, and to abandon it; and to fill up the westernmost reservoir to a height

height of four feet, to render it perfectly water-tight, and to continue to use it in that condition. It is desirable that these works should be carried out with as little delay as possible.

In addition to the above covered reservoirs, there are, at Old Ford, two open reservoirs, which were formerly used as depositing reservoirs, in connection with an aqueduct by which they were supplied until 1855. The one (northern) open reservoir contains four, the other (southern) about five acres of water. There was a sluice from the latter to the covered reservoirs, which was otherwise applied in 1855; and a sluice from the former to the covered reservoirs, which was used occasionally up to September 1866. The smaller open reservoir receives by night the surplus water, when there is any, from the covered reservoirs. It would run in frequently, but not in great quantity. The sluice into it from the old canal or aqueduct has been opened since 1855, but rarely. The rain goes to supply loss by evaporation. The mass of the water in it is therefore unfiltered, and if the soil below it be permeable, the water from the river would, when differences in level permit, leak into it.

Communication was retained between the smaller open and the covered reservoirs after 1855 as a possible resource in case of emergency; and the water from the open reservoir might, before the sluice was filled up in September 1866, have been drawn by the engines and supplied to the district without passing through the covered reservoirs, but this has never been done. The engineer of the Company admits that water from the open reservoir was used during a time of drought in 1864, but he does not believe that it was used in 1865, and he has no knowledge of its having been used more than three times in 1866. He considers that about three inches of water, or 300,000 gallons, would have been drawn from it on each of those three occasions; and this would have been done to maintain such a level in the covered reservoir as was required to keep both of the engines going. The engineer of the Company was aware at the time that water from the open reservoirs was sent out to the district in March 1866, but he was not personally aware of its being so used later in the year.

The foreman of the works at Old Ford, who entered the Company's service on the 23rd February 1866, received explanations from the engineer of the Company as to the use of that sluice at that time, and therefore considered the water in the open reservoir available as a reserve in the event of the water getting low in the covered reservoir, to prevent the engine with the higher suction from being damaged. He made no notes on the subject, but he allowed water to run with that view from the open to the closed reservoir, he believes not more than three times during the year 1866. He thinks that those times would have been at the latter end of March, the latter end of June, and some time in the early part of July. He is certain that the sluice of the open reservoir was never opened after cholera broke out in the district. He had no fear of its doing harm. But it so happened that it was not required. He might, of course, have stopped the engine, to prevent it from being damaged, instead of admitting water from the open to the covered reservoir, "but that would not have supplied the district. The extra water from the open reservoir was wanted to complete the supply."

A carpenter at Old Ford, who has been there for 24 years, and assists generally in the engine-houses and on the works, appears to have been the only man who worked the sluice between the open and the closed reservoirs. He opened that sluice frequently in 1864, frequently in 1865, and three times in 1866. In March 1866 he was in or near the engine-house when the engine began to draw air, and he was ordered by the engineer of the Company to open the sluice, which he did. He left it open for two hours to two and a-half hours. About 2 p.m. on some day in the latter part of June he was about the yard when the engine-driver called to him, and "ordered him to let him have some water." He went to the foreman, who ordered him to open the sluice. He did so, and left it open for about the same length of time. Early in July the foreman again gave him orders to open the sluice, and he opened it and left it open for about the same length of time at the same period of the day. These were the only occasions in which he worked that sluice in 1866. He considered the water in the open reservoir to be very good, and often drank it.

Such is the evidence which I have received in regard to the allegation numbered 3 of the Memorialists. The truth of it is admitted by the officers and servants of the Company. The use of such unfiltered water so stored in an uncovered reservoir is indefensible, and was a distinct infringement of the provisions of the Metropolis Water Supply Act of 1852. That Act directs (clause 2) that every reservoir within five miles of St. Paul's Cathedral in which water for the supply for domestic use of the metropolis is stored or kept shall, after 1855, be roofed or covered over; and (clause 4) that every Company shall, after 1855, effectually filter all water supplied by them within the metropolis for domestic use, before the same shall pass into the pipes for distribution, excepting any water which may be pumped from wells into a covered reservoir or aqueduct without exposure to the atmosphere, and which shall not be afterwards mixed with unfiltered water.

A clay bank, 40 feet thick, was placed, however, in front of the sluice in the open reservoir in September 1866, and it has been no longer possible since that date to resort to that reservoir in aid of the supply.

The Company now propose, by a clause lately introduced into their Bill before Parliament, to fill up completely the southernmost of these reservoirs, and to fill up the northernmost except for an area of about one acre. This is to be retained as a receptacle for the overflow of surplus filtered water, but not to be otherwise connected with, or to be in any way used for supply; and it is even to be emptied by artificial means.

The next allegation, numbered 4 of the Memorialists, that water "so used" had been "the principal if not the sole cause of the fearful mortality from choleraic at the East of London," has been the subject of much conflicting evidence. In the present state of our knowledge it would be very difficult in any case absolutely to prove its truth. The most that could be done would be to show (1) that the water had the means of becoming contaminated with choleraic impurities; and (2) that the use of water with such opportunities of contamination had been followed by distinct and simultaneous outbreaks of the disease in the districts through which it was distributed, varying in intensity and duration according to local conditions, but obviously traceable to this common origin.

Numerous well-authenticated instances have been adduced from time to time to prove that cholera has directly resulted from the imbibition of water contaminated with choleraic impurities, and the "rice-water" secretions of cholera patients have generally been considered to be the most active medium, but there is no positive knowledge as to the mode of propagation. It is not known whether the poison is conveyed to the system by an organic germ which would be in suspension, or by matter which might be held in solution in contaminated water; or what proportion of choleraic matter in a given quantity of water will suffice to reproduce the disease; or how long such matter will retain its fatal influence under different given conditions; or what circumstances would combine to keep it in a latent condition or to render it active. The disease sometimes fails to succumb before extremes of temperature. It has, indeed, generally declined with reductions of temperature in this country; but it has been locally active in cold weather here, as well as amidst the snows of Russia; and it has been stated that even the boiling of contaminated water has failed to render it innocuous. It would appear from the letter published by the Registrar General from Professor Frankland in November last, that water may be seriously contaminated by choleraic discharge without its presence being indicated by chemical analysis, and that neither ordinary filtration nor even passage through animal charcoal will completely deprive it of such impurity. It has been shown by such data as are contained in the following table, that the mortality from the disease diminishes in proportion to elevation of ground:—

REGISTRAR GENERAL'S REPORTS.

*Supplement to Weekly Return, No. 39.*

DEATHS from CHOLERA, in the 10 Weeks ending 15th September, to 10,000 Persons living at different Elevations in the Fields of the Water Companies.

| Companies furnishing the greater part of the Water Supply. | Elevation in Feet above Trinity High-Water Mark. |       |       |       |       |       |                 |             |
|------------------------------------------------------------|--------------------------------------------------|-------|-------|-------|-------|-------|-----------------|-------------|
|                                                            | Under 3 Feet.                                    | 3-10  | 10-20 | 20-40 | 40-60 | 60-80 | 80 and upwards. | Not stated. |
|                                                            | Deaths in 10 Weeks to 10,000 Persons living.     |       |       |       |       |       |                 |             |
| Grand Junction, West Middlesex, and Chelsea - - - - -      | 2·04                                             | 2·75  | 1·74  | 1·16  | ·86   | 1·51  | 1·10            | —           |
| New River - - - - -                                        | —                                                | —     | 39·47 | 9·15  | 4·00  | 2·01  | 2·61            | —           |
| East London - - - - -                                      | 192·65                                           | 90·32 | 90·22 | 63·47 | 14·73 | 3·67  | —               | —           |
| Southwark, Lambeth, and Kent - -                           | 2·77                                             | 7·32  | 6·67  | 1·69  | 1·34  | —     | 2·28            | 3·34        |

And it has been concluded from such premises that the choleraic matter being held by water in suspension, and being probably slightly heavier than water, remained chiefly at the lower levels. But it may be said, with reference to this argument, that exceptions may be found even in the table in question; that such diseases have ordinarily less hold for other reasons upon elevated situations; and that there is no proof of all of these different waters having been contaminated.

There were cases of cholera last year, on the 21st of June, in Bethnal Green-road; on the 22nd June in Wellington-place, Holloway, and on the 26th June in Westminster. But the first notable appearance of the disease in the east of London was at No. 12, Priory-street, Bromley, where a man and his wife died on the 27th June. After other isolated cases, the cholera explosion, as it has been called, commenced in Bromley on the 11th July, and at Stepney and Mile End a day or two later. It first showed itself in Whitechapel, on the 10th July, and in Limehouse the first three cases occurred at Nos. 72 and 73, North-street, on the 11th and 13th July. For the 10 weeks ending the 15th September, the total mortality in the sub-districts of London is thus given by the Registrar General :

POPULATION and DEATHS from CHOLERA in the Ten Weeks ending 15th September, in the Sub-Districts of London, arranged according to their Elevation and Water Supply.

| WATER COMPANY.                                         | SUB-DISTRICT.             | Elevation in Feet above Trinity High-Water Mark. | Enumerated Population. |        | Deaths from Cholera in the 10 Weeks ending 15th Sept. |

The disease culminated on the 1st August, and from that date it steadily declined in the metropolis, until, on the 1st September, the daily number of deaths had been reduced from 204 to 23, and on the 1st October the Registrar General reported that the cholera matter was diffused very equally all over London. The following extract, from the Table at page 547 of the Registrar General's Returns, shows also an enormous preponderance of deaths in the districts supplied by the East London Water Works Company, as compared with the deaths in the districts supplied by other companies :—

## DAILY DEATHS from CHOLERA in the FIELDS of the different WATER COMPANIES.

The conclusion appeared from this table to be very strong, that the water of the East London Company must be charged with choleraic poison, and that it was a principal means of disseminating the disease; and the Registrar General naturally directed attention to the subject in the Supplement to his Weekly Return, No. 37. He there recalled to mind the ravages of 1849 and 1854, and pointed out that nearly the whole of the water having then been drawn from rivers polluted with sewage, and distributed in an unfiltered condition, the cholera matter was diffused over London in large quantities, and the disease pursued its course unchecked, save by medical treatment in the early stages of the disease. And he went on to show that the mortality had not, in 1866, approached the dimensions of the previous epidemics until, in the later weeks of July, the outbreak occurred principally in the districts of the East London Company; that after he had called attention to the coincidence of the cholera field with the field of supply of the East London Company, on the 1st of August, and after the engineer of that Company had been roused to action, the decisive declension of the disease immediately occurred. He added: "It strengthens the circumstantial inference that a part of the supply, between the 8th of July and the 1st of August, was drawn from the uncovered reservoirs (at Old Ford); but the unclean matter might of course have entered the water through unknown channels."

The River Lea, at Old Ford, would doubtless have been contaminated by cholera matter at an early stage of the epidemic. The sewage which finds its way into that river would have been charged with such matter. But how could it have found its way from the river into the mains of the Company? The date which is given, *some day early in July*, on which the water of the open reservoir was turned into the closed reservoirs at Old Ford, and so into the Company's mains, to supplement the supply of the district, though rather vague, is certainly most suspicious, and the act was highly improper. But there appear to me to be strong reasons for believing that this was not the cause of the mischief. If it had been so, there would have been apparent in the above return some particular period of simultaneous and excessive increase in the disease following upon the day on which the water was so distributed. But the table above quoted does not give any such indication. Looking at the column headed "East London, including West Ham," there was an almost con-

stantly progressive increase from 3 on the 11th July to 171 on the 31st of that month. That increase, over a period of 20 days, followed by a somewhat similar decline of the disease, would point rather to a less potent but more constantly acting cause than the general distribution of the poison on any one day early in July. There is, again, no proof, as far as I have heard, of the water in the open reservoir having been tainted with the poison. The water of the Lea would not have soaked into the reservoir unless it had been at a higher level than that in the reservoir; and there cannot have been anything like the difference in level of water between the river and the open reservoir as there was between the river and the closed reservoirs, when the latter were partially emptied of an evening for the supply of the district. I have already described the condition of the closed reservoirs when they were pumped down to about a foot of water, and Dr. Letheby's analysis has proved the impure condition, as regards organic matter, of the water that remained in them at the close of my examination on the 24th February. That impure condition proves either that the soakage must have been sufficient to replace a large proportion of the water pumped out, or that a smaller proportion of water finding its way in must have been in a higher state of organic impurity. The whole mass of the water that remained in the reservoir would not otherwise have become so impure. The spurt from the old sluice points to one connection between the River Lea and the closed reservoir, and there appear to have been others somewhat less direct. Cholera poison from the Lea might thus have found its way into the Company's mains through the closed reservoirs directly, though in a condition of excessive dilution, whereas its entrance into the open reservoir, and thus through the system of supply, is not so easily conceivable.

The water of the Company from Old Ford is conducted through several mains of various diameters in every direction, except to the north and north-east, and diffuses itself through the district until it meets the water from Lea Bridge. The direct supply from Lea Bridge passes through a main 30 inches in diameter, in a westerly and south-westerly direction, into the metropolitan part of the district, and meets the water from Old Ford at various points, according to the pressure at the two stations. The Old Ford engines do not, however, work at night or on Sundays. The water from Lea Bridge at those times supplies the whole district, passing by Old Ford, and even to the Essex part of the district. In the ordinary mode of working from day to day, the line of demarcation between the districts respectively supplied from Lea Bridge and Old Ford would run from Victoria Park, through Bethnal Green, and onwards to Spitalfields. But the exact line would probably vary from hour to hour, according to the draught and working of the engines. Bow, Bromley, Poplar, Limehouse, Mile-end Old Town, St. George's, Whitechapel, and the southern part of Bethnal Green would in the ordinary way be supplied on the greater part of week-days from Old Ford, and West Ham would undoubtedly be so.

The mortality in West Ham was specially given by the Registrar General in the Supplement to the Weekly Return, No. 36, in the following Table :

POPULATION 1851, 1861, and 1866, and NUMBER of DEATHS by CHOLERA in the Eight Weeks ending 1st September 1866, in each of the Sub-Districts of *West Ham*.

| SUB-DISTRICTS.        | POPULATION.      |                  |                 | Deaths Registered from Cholera in the Eight Weeks ending 1st September. | Number of Deaths. in the Eight Weeks to 10,000 Persons Living. |
|-----------------------|------------------|------------------|-----------------|-------------------------------------------------------------------------|----------------------------------------------------------------|
|                       | 1851 enumerated. | 1861 enumerated. | 1866 estimated. |                                                                         |                                                                |

Mr. Liddle, the medical officer of health for the Whitechapel district, states that during the prevalence of cholera he observed a vast difference between the inhabitants supplied by the East London Water Company and those supplied by the New River Company. He quotes from the Registrar General's reports, that there were in 23 weeks 3,909 deaths by cholera, and 825 by diarrhœa, among 407,945 people supplied with water chiefly (as was supposed) from the Old Ford reservoir, while not one death from cholera was registered during the same period in the Tower of London, the Trinity, Minorities, Old Tower Without, and St. Catherine's by the Tower, supplied by the New River Company, and inhabited, according to the Census of 1861, by 2,037 people. In the Tower alone there had been in 1849 15 deaths out of 1,107 people. In the same 23 weeks the deaths amongst the population supplied by the New River Company in Whitechapel numbered 30 out of 9,224, or 32·5 per 10,000, whilst in the remainder of the district, which was supplied by the East London Company (including those at the London Hospital and the temporary cholera hospital), the deaths numbered 536 out of 68,732, or 77·7 per 10,000. Of the above deaths in the New River part of the district, nine out of 2,103, or 42·7 per 10,000, occurred in Petticoat-lane (or Middlesex-street), and 14 out of 966, or 144·9 per 10,000, in Blue Anchor Yard, containing 1,644 square yards of surface. The number of deaths from cholera per 10,000 in the New River part of the district was increased from 19·3 to 32·5 by the mortality in those two courts. Speaking generally, Mr. Liddle believes that the districts of the East London Company, supplied direct from Lea Bridge, suffered comparatively little, while those supplied from Old Ford suffered considerably from cholera. He assumed, however, in his calculations, that the patients supplied by the New River Company lived for the most part at too great a distance,—from half a mile to a mile,—to be removed to the London Hospital. The addresses of the Whitechapel patients were not given in the London Hospital till the 18th of August, or in the Cholera Hospital between the 21st of August (when it was established) and the 8th of September. Sixty-three of those patients died in the London Hospital before, and 17 after, the 18th of August, and of the latter number none had been supplied from the New River: 28 patients died in the Cholera Hospital before, and 93 after the 8th of September. Of these latter, only one was from the part of the district supplied from the New River. At the same time Blue Anchor Yard, the most fatal place supplied from the New River, in which 14 deaths occurred, contrasts unfavourably with Glass House-street and the adjoining courts, with an equally dense population, supplied by the East London Company, in which eight deaths occurred.

Dr. Corner, who has been acting medical officer of health for Mile End Old Town for 10 months, considers that the increase of cholera in his district was due rather to deficiency of supply than to any defect in the quality of the East London Company's water. He had seen and carefully investigated 100 fatal cases with special reference to the theory that the East London Company's water had been a cause of cholera, but had "never seen or read a single reliable fact to support that theory." He had always been able to trace the exciting cause to accumulation of refuse, and decomposition of organic matter; and he believed the want of better drainage in the district had a considerable effect in localising the disease. At the same time he admitted that the cholera was worse in the districts supplied by the East London Company than in those supplied by other water companies.

Mr. Orton, who has been medical officer of health to the Limehouse Board of Works for seven or eight years, was in the first instance inclined to the belief expressed in the Registrar General's reports, that the cholera was attributable to the water supply of the East London Company, but was induced, as the result of subsequent inquiries, to forego that conclusion. He first changed his opinion on finding that the deaths from cholera occurred principally amongst the poor who did not drink water—amongst the half-starved, the drunkards, the dissipated, and those who lived in badly-built houses, where fever had been prevalent. Whatever its course, these classes of people would, he admitted, be first and principally affected; bad water would predispose them to cholera, but he believed they did not drink water (though their children did), even in sultry weather, except in tea. He made some inquiries in the month of August amongst the teetotal societies. He did not know positively what water they drank, but he found that amongst many hundreds in the City of London Temperance

Society there had been very little cholera. He sent one of his inspectors of nuisances, and learnt through him from the secretary of the Sons of the Phoenix Temperance Society, that there had been only two deaths from cholera in that society, numbering 1,250 members in the East London company's field of supply. He found that at 14, Love-lane, Ratcliff, three of a family who were not drinkers of water died, while five children (who might be presumed to be water-drinkers) escaped even from diarrhœa. He believed the cholera to have been produced by a particular condition of the atmosphere, and localised by the foul condition of the Bow Creek, the Lea Cut, and the Regent's Canal, and by the sewage works then going on near Old Ford. As the result mainly of his own observations, and partly of information derived from others, he did not consider that the spread of cholera was in any way due to the quality of the water supplied by the East London Company. Supposing "that water to be ever so bad, still it was not, in his opinion, the cause of cholera." I may here mention also the case of the Limehouse Union Schools. They were in the midst of the suffering district, and were supplied with Old Ford water. Out of 400 children drinking freely and constantly of that water, not one suffered from cholera or diarrhœa.

Dr. Letheby, the well-known Professor of Chemistry to the London Hospital, and the medical officer of health for the last 12 years to the City of London, has had great experience in analysing the waters of the different companies, and has devoted his attention for many months especially to the question of the connection, if any, of the water supply with the presence of epidemic cholera. He found as the result of his analysis, that the water of the East London Company contained less than a third of organic matter in the month of June, when the cholera first made its appearance in London, than in the following December. It varied from '33 parts of a grain per imperial gallon in June to '40 in July, '56 in August, '39 in September, '68 in October, '72 in November, and 1'16 in December. He had not in the course of his analysis been able to discover in the water of the East London Company anything which could conduce to cholera; but he admits, as all chemists must do at present, that "the germs of zymotic diseases, such as cholera, typhus fever, typhoid fever, may exist in water without being discoverable by chemical means, those germs being as yet entirely unknown." The water here referred to which he analysed he took from the main that supplies the college at the London Hospital. It cannot be ascertained with certainty whether at the periods at which it had been taken it was coming from Lea Bridge or Old Ford.

Dr. Letheby states, with regard to the London Hospital, that out of 844 patients brought in with cholera or choleraic diarrhœa, 321 died; that two nurses who were attendants in the hospital, and lived out of it, died of the disease; but that there was not a single case during the epidemic amongst the residents in the hospital, about fifty in number; and that, so far as he was aware, there was no outbreak amongst the 400 ordinary patients in the hospital; though the only water supplied to them was generally from Old Ford; from the main of the East London Company, and that water was not filtered at the hospital. At the East London Union Workhouse, with about 300 inmates using the East London Company's water, there was only one case of cholera, brought from a distance. In the City of London Union Workhouse, at Bromley, there were 27 deaths from cholera amongst 700 inmates, of whom 20 died in one week; but they used water from their own pump, and were not supplied by the East London Company. The cholera had, however, been in that district from the beginning of July. Of 103 deaths in the City of London, of which Dr. Letheby named the localities, only two occurred at a house supplied by the East London Water Company. In the Eastern divisions of the City, the East London Company supply 161 houses, with 1,732 inhabitants, out of a total of 4,495, with 40,673 inhabitants. Out of those 161 houses there was only one in which cholera occurred, as above, while there were 62 deaths in the remaining houses supplied by the New River Company. Of these 62 deaths, 25 occurred in the cholera ward, New-street, Bishopsgate, and none of these patients came from the East London Company's field of supply. Dr. Letheby did not hear from his inspectors of any deaths in that field of supply, or from it, except the two in Somerset-street. The whole of the houses in which there was cholera in the East London Union covered a very small area, chiefly near Bishopsgate-street and Aldgate, and the deaths in that area were in that part of the New River field nearest to the East London field. After referring to the mortality already mentioned in Petticoat-lane and Blue Anchor-yard, supplied by the New River

River Company, Dr. Letheby quotes the statement of Dr. Tripe, the medical officer of health for the Hackney district, in his letter of the 4th September to the Registrar General, that there was no perceptible difference between the East London (Lea Bridge) and the New River Company's water as regarded the spread of cholera, and that the earliest cases were reported from other districts; and the statements of Dr. Woodford, medical officer of health for Bow, at p. 566 of the Registrar General's reports—"I am unable to ascribe the rapid spread of cholera to any cause," and "many cases occurred among those who were not water drinkers, and in whom, therefore, the choleraic poison could not thus have found an entrance into the system." Gathering day by day the mortality returns, Dr. Letheby found, that the greatest mortality in this, as in preceding epidemics, occurred on the Tuesday, and the least on the Sunday and Monday, and he infers, not that water has anything to do with the spread of the epidemic, but that some other cause has affected it, beginning on the Saturday, culminating on the Tuesday. Supposing the East London Company's water charged with choleraic poison to have been distributed over a large area, he would expect to find a coincidence throughout that area in the time, in the intensity, and in the duration of the outbreak. But he observes that the outbreak was in Bethnal Green in the week ending July 14, in Mile End New Town in the week ending July 21, in Spitalfields in the week ending July 28; while the cholera ended in Mile End Old Town on the 29th September, in Bethnal Green a month later, October 27th, in Spitalfields on the 10th November. The periods of maximum intensity were in Hackney-road, Bethnal Green, Whitechapel Church, Goodman's Fields, Mile End Old Town, in the week ending August 4; in Spitalfields, Mile End New Town, St. George's-in-the-East, a week later, ending August 11; in Limehouse, Bow, and Poplar, in the week ending July 28. There was "little or no cholera" in Stamford Hill and Clapton, supplied exclusively from Old Ford. The mortality per 10,000 of the population for the following districts, supplied by East London water, was:—

|                                                                   | Mortality per 10,000. |
|-------------------------------------------------------------------|-----------------------|
| 161 houses of eastern part of City, before referred to, - - - - - | 5·7                   |
| Goodman's Fields - - - - -                                        | 48·0                  |
| Mile End Old Town - - - - -                                       | 69·0                  |
| St. George's-in-the-East - - - - -                                | 78·0                  |
| Poplar - - - - -                                                  | 97·0                  |
| Mile End New Town - - - - -                                       | 98·0                  |
| Ratcliff - - - - -                                                | 101·0                 |
| Bow - - - - -                                                     | 115·0                 |
| Limehouse - - - - -                                               | 126·0                 |
| Spitalfields - - - - -                                            | 145·0                 |

And there was thus, he believed, no relation between the intensity of the disease and the distribution of water.

He observed, in looking at the map, that the streets of greatest mortality ran east and west in the majority of cases. The disease had been worst in the low-lying, and least in the high districts; as, for instance, Stamford Hill against Poplar, both drinking the same water. There had been great mortality at the works of the Commercial Gas Company, and the district supplied by that Company had been the very district in which cholera had been so fatal.

It was Dr. Letheby's firm conviction, after careful examination into all the facts of the case, and without being prejudiced by any theory, that the condition of the water of the East London Company had nothing whatever to do with the appearance or spread of the epidemic; but the district in which cholera was most fatal was that in which the main drainage system had not been completed. He was aware of other cases in which well waters had much to do with the origin and spread of cholera, and had no difficulty in discovering sewage pollution in those waters, by the amount of organic matter, by the odour of the water when heated, and by the presence of ammonia. He had sought for similar indications in the East London Company's water all through the epidemic, without finding them. The proportion of ammonia in that water had been quite insignificant. He believed that in those cases of well water it was choleraic and not ordinary sewage that had done the mischief, though ordinary sewage in water might give diarrhoea which might, in a time of cholera, assume a choleraic type.

I have thought it right, in fairness to the East London Company and to the

Memorialists, to give thus at considerable length, though I demur to many of them, the facts and arguments that have been adduced on both sides in regard to this most important question. It is one that admits of a much longer discussion. Chemical analysis, unable to detect this poison, the presence of which is only known by its effects upon the human system, affords no assistance. The poison is uncertain in its action, and mysterious as to its condition, and filtration has been stated not to deprive water of its presence. It takes effect principally upon individuals weakened by excess, dissipation, and drunkenness; upon the sickly and the infirm; upon the inhabitants of badly-built houses, on unhealthy sites, with bad sanitary arrangements, in ill-drained low-lying localities. But its action, even under these conditions, is by no means certain. The disease was, undoubtedly, very fatal during the visitation of last autumn in the metropolis, in the East London Company's field of water supply, and especially in the districts which drew principally from the Old Ford reservoir. There were, on the other hand, other localities, chiefly on high ground and of a better class, such as Stamford Hill, Leytonstone, Wanstead, Woodford, Buckhurst Hill, and Walthamstow, parts of which are supplied exclusively from that reservoir, which were nearly or quite free from it. Silvertown and North Woolwich were exceptions, the former in the early part, the latter throughout the epidemic. All the houses in these latter places are on constant supply from the North London Company; and the disease was very fatal in certain localities near the East London Company's field of supply, where no water that they supplied could have been an exciting cause. The want of better drainage had, no doubt, much to do with the intensity and duration of the epidemic; but the mortality declined from the 1st, and still more from the 9th of August; while the Metropolitan Board of Works commenced their pumping operations\* to divert sewage from the River Lea and the Linchouse Cut into the northern outfall sewer, only on the 24th August. The Lea must have been contaminated at Old Ford at an early period of the epidemic. The covered reservoirs at Old Ford may have received from the river at different times, as they were partially emptied, some of the poison; and the water supply of some of the districts drawn from those reservoirs may thus at different times have been to some extent infected. Considering this possibility of infection, and looking to the effects which were only too apparent in the general field of supply from Old Ford, a case of grave suspicion exists against the water supplied by the East London Company from Old Ford, and that proximity to absolute proof at which I hinted in commencing this subject, has thus been nearly reached. But any poison so distributed would have been in a condition, if it were soluble in water, of considerable dilution; and I am not prepared on that account, as well as in consideration of the deplorable state in other respects of their district, to go so far as the Memorialists, in asserting that this water was "the principal, if not the sole cause of the fearful mortality from cholera." I believe, however, that if, as is possible, choleraic poison did find its way into the Company's mains, it must have passed directly from the River Lea into the closed reservoirs; and I have no reason to believe that it was distributed in the water which was so improperly supplied to the district from the open reservoir.

I next proceed to consider the complaint, which I have numbered 5, of the Memorialists, that the water supply of the district was deficient in quantity. The first case brought forward in support of that complaint was that of the Whitechapel Workhouse, and the witnesses with reference to it were Mr. Mayer, the master, and Mr. Bodimeade, the engineer of the establishment.

At the Whitechapel Workhouse, fitted up for constant supply, there are two cisterns 30 feet, two upwards of 40, and two upwards of 60 feet above the pavement. There is also a hot-water cistern in the kitchen, supplied either from the Company's main or from the laundry cistern, which latter is one of those at a height of 30 feet, at pleasure. The laundry cistern is supplied by a pipe  $1\frac{1}{2}$  inch in diameter, and the upper cisterns by a pipe stated to be 3 inches in diameter

---

\* Mr. Edinger, the inspector of the East London Waterworks Company, is a member of the Poplar Board of Works, and he formed one of a deputation to the Metropolitan Board of Works in the autumn of 1865, to call attention to the defective state of the sewage of Bromley, and the non-completion of the low-level main drainage, with reference to the then expected approach of cholera. They said that if the temporary pumping station here referred to were not established, they should expect the cholera to be bad in the district.

diameter. But I observed on the spot that there was 9 feet in length of pipe near the main only  $2\frac{1}{2}$  inches in diameter. Mr. Bodimeade states that the cisterns have been unaltered during the six or seven years that he has been engineer to the workhouse; that six years ago the supply was very fair to all the cisterns high and low; that four years ago the supply became very irregular, and they were obliged to use a hand-pump every morning. They then got a full supply into the cisterns 40 feet high, and pumped by hand-labour into the higher cisterns. But three years ago the supply began to fail in the cisterns 30 and 40 feet high; and since last November they ceased for that reason to pump by hand. Mr. Bodimeade adds, speaking of the six months preceding February 1867, "We were without water in the main, sometimes once a fortnight, sometimes once in two or three days, for five hours at a time." Having a cock on every floor from the Company's main, he can always tell the height of the water within two or three feet, and he usually finds it at 15 or 20 feet above the crown of the road between 8 a.m. and noon. The pressure then increases, and it stands above the level of the laundry cistern between 3 and 5 p.m. He had never known the water to go to the level of the highest cisterns for the last two years, though he was unable to say what it might have done at night; and the communication from the Company's main to those cisterns had been regularly opened every afternoon, to take advantage of any water that might flow into them before 8 o'clock the next morning. In consequence of the failure of a full supply from the Company, a steam-engine was erected at the workhouse towards the end of last year, and all the cisterns except the laundry and the kitchen cisterns are now supplied by its aid from a well on the premises. The engine is kept at work from 8 a.m. to 3 or 4 p.m. daily, but the water from this well is too hard for washing and cooking.

The master of the workhouse, Mr. Mayer, confirms generally the above evidence of Mr. Bodimeade, and adduces instances from his journal, from November 1865, to July 1866, in which the boilers are said to have been endangered for want of water, or the supply had been short for several days at a time. Mr. Mayer says, "We have occasionally, but not often, been short of water in the kitchen, but we have constantly been short of water in all other parts of the house."

The water at the workhouse is paid for by meter, at the rate of sixpence per 1,000 gallons, on the scale for large consumers, under Clause 79 of the Company's Act of 1853; and this is payment for ordinary service up to a level of 20 feet above the pavement, as defined in Clause 78. The Company allege that though they have not done anything to prevent the water from rising to the cisterns which are more than 40 feet above the pavement, they do not undertake to fill those cisterns. They have never received extra payment for the cisterns 30 feet high, and have made no particular effort to supply them; but they last year laid down a new main 12 inches in diameter, to improve the supply to the workhouse and to neighbouring consumers. That main, as well as the old main, ought always to be charged; and the engineer of the Company considers that the water from it ought to run 40 feet above the pavement for the greater part of the day, while for short periods it would fall to 25 feet, and at other times it would rise to 50 feet. When I visited the workhouse on the 29th March, the water flowed into the laundry cistern, 30 feet high, but would not run into another 42 feet high, at 12.23 p.m.

The quantities supplied to the Whitechapel Workhouse were, in

|      |   |   |   |   |   |   |   |   |           |          |
|------|---|---|---|---|---|---|---|---|-----------|----------|
| 1860 | - | - | - | - | - | - | - | - | 1,408,000 | gallons. |
| 1861 | - | - | - | - | - | - | - | - | 2,724,000 | "        |
| 1862 | - | - | - | - | - | - | - | - | 3,284,000 | "        |
| 1863 | - | - | - | - | - | - | - | - | 2,391,000 | "        |
| 1864 | - | - | - | - | - | - | - | - | 2,514,000 | "        |
| 1865 | - | - | - | - | - | - | - | - | 2,239,000 | "        |
| 1866 | - | - | - | - | - | - | - | - | 2,797,000 | "        |

But these quantities are small in comparison with the consumption of some of the works in the neighbourhood. For instance, Mr. Schwartz, sugar-boiler, of Pleasant-place, Albert-street, Mile End New Town, paid 716 *l.* in the year 1866 to the Company for 28,670,000 gallons of water; and Messrs. Bryant and Prideaux, of Church-street, paid 703 *l.* in 1865 for 28,136,000 gallons. Mr. Lescher, starch manufacturer, of Charles-street Whitechapel, whose premises adjoin the workhouse, paid 119 *l.* in 1866 for 4,760,000 gallons, received

in a tank several feet higher than the laundry cistern of the workhouse. When I visited the works of Mr. Schwartz, I found the pressure at 12 to 15 lbs. to the square inch, at 2.30 to 2.40 p.m. on the 29th March; and I was informed that the pressure during the summer of last year was generally 5 lbs., sometimes 10 lbs., and seldom above 15 lbs. At Mr. Lescher's there was no general complaint. At the Metropolitan Chambers, for single men, in Albert-street, the tanks are 50 feet high, and I learnt that the water would rarely run into them by day, though it would generally do so by night; and it was said to have failed last summer two or three times for several days together. At the Metropolitan Buildings, the water ran into a tank 48 feet high. At the Pavilion Theatre, the tanks, 45 feet high were full, but the water would not flow into them on the afternoon of the 29th March. There were no complaints of the supply, but the water was not constantly used. At Messrs. Dakin and Bryant's sugar refinery in Church-street, where, according to the inspector of the Company, 150 gallons of water per minute are used, I was told that it would rise 37 feet high above the pavement during the day, and 60 feet high in the evening.

At Messrs. Wainwright and Gadsden's, a tank 52 feet high was stated to be generally filled at night, though the water failed occasionally for a night or two to rise to that level.

At the sugar works of Messrs. D. Martineau and Son they could not get water occasionally 16 feet above the street without turning it off from the works. They drew water to a height of 32 feet into their pans with a vacuum of 27 inches to assist it. Until within the last two years they received water in a tank 40 feet high, except on Sundays. At Mr. Dame's sugar refinery, water was received from 1859 to 1863 into a tank 56½ feet high, but since 1863 they have pumped it up by steam-power. At Mr. Davis's sugar refinery they had always got water in a tank 20 feet high. At Mr. Gadsden's sugar refinery water always ran into the pan 16 feet above the pavement, but not sufficiently in summer, when, the water being warmer, greater quantities are required. In these tanks, 36 feet high, at the top of the building, they got water sometimes by night, but sometimes not for weeks together. There was, however, in all these cases, difficulty in getting precise information for want of records: and the owners were, in some cases, disinclined to allow their works to be inspected.

I have alluded to them particularly because the company refer to them as their only means of disproving some of the alleged deficiencies at the White-chapel Workhouse. The company's engineer can only explain the statements of the master and engineer of the workhouse by supposing the interruptions to the supply to have occurred during accidents to the pipes, and on such an occasion as the accident which occurred to an engine at Lea Bridge on the 21st September 1866. There were at the workhouse certain aids to obstruction, such as cocks and pipes of smaller diameter interposed in the mains; and there were, as the company's inspector complained, a good many angles and bends in the pipe leading to the laundry cistern. But these would not altogether account for, any more than the counter statements in regard to other buildings would disprove, the distinct allegations of the master and engineer of the workhouse. Setting aside the question of cisterns more than 20 feet high, the engineer says, what I have already quoted in part, "We were without water *in the main*, sometimes once a fortnight, sometimes once in two or three days, for five hours at a time. . . . I examined, myself, continually, on complaints from the kitchen, and found *no water in the main*. I complained to the master very frequently verbally on the subject. . . . Last Saturday fortnight (reckoned from 13th February 1867) we were *without water for eight or nine hours in the main*, and consequently in the laundry cistern."

In the face of the above evidence, I can come to no other conclusion than that the supply at the workhouse from the Company has been at times deficient in quantity, and has failed, not only at heights less than 20 feet above the pavement, but even in the Company's main. The temporary inconvenience which resulted in the district from the accident to the engine at Lea Bridge, in September 1866, and which was felt, I believe, for nearly a fortnight, points to a want of sufficient margin of engine power as a provision against such a contingency; and this deficiency the Company are, as I have already explained, now rectifying by the construction of additional engines.

The next complaint as to deficient quantity was that of Mr. Burgess, the medical officer

officer to the Poor Law Guardians for a part of Bethnal-green. Mr. Burgess complained of his own butts, which are two in number, connected near the top, not being filled, and he stated that the daily supply was not, as a rule, sufficient to fill one of them. He added, that he had the ball-cock under "his own eye, and he knew that the tap had always acted well," but when I went to inspect his premises, I found the ball off the tap, and floating in the water, so that it could not, of course, act at all. William Furness, one of the Company's foremen, went to inspect Mr. Burgess's house, on complaint, last summer. He had the water turned on, and on getting a ladder to look into the butt, he found the ball-cock half open, so that the water could not flow freely. He eased the ball-cock, and found a good supply on the following Monday; but as the first butt fills the ball rises, and it would take a long time, unless the ball were held down, to fill the second butt, because the connection between them is near the top of the butts.

But the complaints of Mr. Burgess, as regards the poor of his district, open up subjects of the highest interest. He quoted Butler's-buildings, in Great George-street, and Gibraltar-gardens, in Church-street, as cases in which a short supply of water was received by the poor in the summer and autumn of 1866. He stated that at Butler's-buildings 250 people lived in 14 houses, and in Gibraltar-gardens 150 people in 20 houses; and the evidence of these people, confirmed by that of the officers of the Water Company, and by a visit to the localities, disclosed a state of affairs which was lamentable in the extreme.

Each of these sets of houses was supplied by one  $\frac{3}{4}$ -inch pipe only, and the regulated time for turning on the water daily was, at Butler's-buildings, 25 minutes,—from 7.10 to 7.35 a.m.; and at Gibraltar-gardens, 20 minutes,—from 4.35 to 4.55 p.m. There would thus have been delivered, as the engineer of the Company admitted, 200 gallons daily at Butler's-buildings, amongst 250 people, or less than a gallon each, and on Sundays none at all. But the Company were paid by the landlord, Mr. Stacey, of Hoxton-square, at the rate of about 10 s. a house, per annum,—the same amount as if there had been a pipe of the same size ( $\frac{3}{4}$ -inch) for each house. And these 250 people in 14 houses, had to divide amongst them, as best they could, the supply that ought to have been received in each house, the landlord preferring to pay the Water Company for water which his wretched tenants did not receive, rather than go to the expense of fittings to enable them to receive the supply for which he was obliged to pay.

Similarly, according to the inspector of the Company, about 132 people in houses Nos. 1 to 22, Gibraltar-gardens, supplied by one  $\frac{3}{4}$ -inch pipe for 25 minutes per day, would get about 300 gallons between them on week-days. This quantity would not flow out of the pipe in the 25 minutes, but some 50 gallons extra would dribble out of the pipe after the water was turned off in the main, because there was no other pipe on that service. In this case, the proper supply for about a house and a half was divided amongst 22 houses. The more fortunate tenants of Nos. 23 to 28, Gibraltar-gardens, were supplied by three pipes of the same dimensions in their back yards. There was formerly a second pipe for the first 22 houses, but it had been out of use for several years. Mr. Chappell is the agent, and Sir John Tyrell is believed to be the landlord of this court.

But a deficient quantity of water was not the worst evil these poor people had to contend with. There was the further difficulty of keeping in a wholesome condition the little they were able to catch.

SARAH BIGMORE, who has lived with her husband at 12 $\frac{1}{2}$  Great George-street, at the corner of Butler's-buildings, for three years, was within ten yards of the "tap." She said, the water "comes on at a quarter-past six to seven, sometimes for twenty minutes, sometimes for half an hour or more. We catch it in pails, and take it indoors. I have a small butt in my room, holding eight or ten pails of water. I fill this every morning with my pail. I am a washerwoman. There is only myself and my husband in my room. Sometimes we get a supply, but very seldom, on Saturday afternoon. Except when there is a fire, it is not turned on on Sunday. Generally we get no water from Saturday morning to Monday morning. The hour is the same in winter as in summer. Many of the poor people in Butler's-buildings have got no proper receptacles for the water; and after cleaning their places on Saturday afternoon, they have no water for Sunday. I have never asked for a butt, because I did not know they gave them. It would be a very great convenience to get water on Sunday morning. If they had proper butts they would not want a Sunday supply. But I

keep my butt in my room. There is a pipe in my water-closet, but it doesn't run in. The landlord has lately put up a cistern, but the water does not get to it. It is only intended for the water-closet. I have no complaint to make as to the supply of water when it does come on."

EDWARD JORDAN, of No. 9, Butler's-buildings, lived eighty yards from the "tap," and had therefore further to go for water. He had a butter-firkin, which held four pailfuls, as his only means of storage. There were three grown-up persons and five children in his house. As the water was only turned on for "half an hour or an hour," the inhabitants of the houses had not all of them time to get a supply. Sometimes while they were waiting for the water, it was suddenly cut off. He had not asked Mr. Stacey for a water-butt. He had asked the turncock to turn the water on longer, but he replied, "If you haven't got your water, you must go without it." This witness added, "It would be of no use to have it (the water) on for three hours if we had not vessels to put it in." . . . "We can't clean our own dwellings, much less the street."

MARY ANN SPAUL, of 8, Gibraltar-gardens, Bethnal-green, had lived there for seven years, and only paid 3s. 6d. a week rent, because there was a drain opposite the house, which smelt badly. She had a butt, and a tub, and a large can, quite enough to hold the water if she could get it. She said the rent-collector had cut off the second pipe, though she did not know why; and there were no complaints when they had two pipes to go to instead of one. Living near the pipe, she generally got enough, but there were many who did not. She had eight people sleeping, five and three, in two rooms. There were many from other districts coming to their one "pump" (pipe), for water, which prevented those who lived near from getting enough. There were three laundresses in the court, and five houses with two families in each.

SARAH SIETHORPE, of Warden-cottage, Gibraltar-gardens, who "took in a good deal of washing," got water from the butts of a public-house near her. But other people, who could not get water from the "pump" (pipe), took water from the same butts, and then she had to go and beg elsewhere for it. Sometimes 14 out of the 28 houses were without water on Sundays.

LAVINIA AGUASS had lived for 47 years—first at No. 22, and then at No. 9, Gibraltar-gardens. She lived opposite the pipe, but could not always catch ten pailfuls of water. Almost every week she was obliged to go and beg water at a distance, and many others were worse off. If she attempted to get as much as 10 pailfuls of water twice a week, she would leave other poor people who lived further from the pipe without any water. The water was turned on irregularly. Sometimes she could not be at home to catch it, and then she had to go without.

The Inspector of the Company stated in his evidence that both of these courts could easily be put on the constant supply if the landlords would pay for "waste-preventers" and for alterations to fittings. The cost, complete, for Butler's-buildings, would be 6*l.*, and 10*s.* a year for maintenance; and the cost for *two* "waste-preventers," with fittings complete, at Gibraltar-gardens, would be 11*l.*, and 1*l.* a year for maintenance. This was 10*s.* per house only for first cost, and less than 1*s.* per house per annum for maintenance. In consequence of the statements which were made in regard to these courts, the landlords were apparently stirred up, the above sums of money were paid, the work was done, and the people are now receiving as much water as they choose to draw at any time of the day, without any increase to the water-rates paid by the landlord; though I heard, in visiting Butler's-buildings afterwards, of an increase of rent being levied on the tenants.

These evils had been going on for a length of time. The only alteration in Gibraltar-gardens during forty years had been from bad to worse. There had been for that period about the same number of inhabitants, with the same intermittent form of supply. But the number of pipes to draw from had been reduced from two to one within the last nine or ten years, and the time during which the water was running had been curtailed. And who was to blame for such a state of things? Clause 27 of the Metropolis Water Supply Act gives power to parish authorities, on finding that a house of the class referred to is without a proper supply of water, first to give notice in writing to the owner or occupier of such house, requiring him within a specified time to obtain such supply, and do the works necessary for the purpose; and then, failing his compliance with their notice, to do the works themselves, and to recover the cost of them. It appears

to me, therefore, that the Water Company and the parish authorities were both to blame; the parish officers and vestries for not compelling such landlords to provide the required fittings; and the Water Company for affording under such circumstances so scant a supply. Considering that they levied a rate upon each of the houses in question, they ought, in my opinion, to have afforded to the inhabitants of such houses the opportunity of obtaining a sufficient supply of water, which they could have done by turning it on more frequently, or by leaving it on for a longer period, instead of contenting themselves for a series of years with dividing a supply proper for one or two houses amongst the inmates of 14 or 22 houses. In this sense they have in these cases furnished a grossly deficient supply.

The next complainant as regards quantity was Dr. TRIPE, the Medical Officer of Health for the Hackney District. During the spring and summer of 1866 he received "an immense number of complaints" as to deficient quantity, but he has never received one in regard to quality. From the 25th of July to the end of August he received 41 complaints respecting the East London Company's supply, of which he kept a record.

He had, in consequence of those complaints, personally inspected much of the district, particularly of Homerton, whence most of them came. They were generally that water was not turned on from Saturday morning to Monday afternoon. He took the time himself on one occasion during which the water was turned on, and found it to be 12 minutes. A 56-gallon butt was then filled; but, on another occasion, he saw the water turned off before such a butt had been filled. He had found the poor very much indisposed to complain, but printed requests had been posted about the district (at the foot of certain cholera notices), inviting them to come forward. The complaints referred to about 170 out of 10,000 houses supplied by the East London Company in that district; the remaining 5,000 or 6,000 houses having been supplied by the New River Company. On investigation of these complaints by the Company, it was found that there were in some cases no water laid on. In the other cases there were respectively three, four, six, nine, ten, or, at Queen's-court, Well-street, as many as 12 houses supplied from one pipe or butt, with defective pipes, and water running to waste. In other cases, again, there were stoppages in the pipes or ferrules, or defective fittings, and in some there was reported to be no cause of complaint.

In most of these cases, the landlords appear to have been to blame, for defective fittings or storage, and the parish authorities for not compelling their improvement; but I was happy to learn from Dr. Tripe that he had caused many hundreds of new water-butts to be put in the houses of the poor, at the expense of the Board of Works—the cost to be recovered, probably, from the landlords—and that provisions of storage, to the extent of 10 gallons per head as a minimum, was being enforced in the district. The following notice was sent, for instance, to the landlord of Queen's-court:—

"Town Hall, Hackney, N.E.,  
13 February 1867.

"Sir,

"I am directed to inform you that the Board of Works for the Hackney District require, under the new Act, provision made for a water supply of at least 10 gallons per head. The water-butt now placed in Queen's-court, Well-street, and the pipes leading thereto, are insufficient for the requirement. I have therefore to request that you will provide additional water-butts and supplies thereto, or, what is much cheaper in the end, a water waste preventer, for the particulars of which we refer you to the East London Water Company.

"I am, &c.

(signed) "John Self,  
Inspector of Nuisances.

"To —— Delamere, Esq.,  
Lower Homerton."

And the result has been that a "waste preventer," with constant service, has since been supplied for the inhabitants of that court.

Dr. TRIPE bears testimony to the East London Company's having given, for the benefit of his district, a gratuitous supply to a dozen stand-pipes (which were supplied at the expense of the Board of Works) during the prevalence of cholera,

as well as a Sunday supply to the poorer neighbourhoods. And he states that he has always found Mr. Greaves, the Engineer of the Company, very prompt in attending to his complaints.

MR. GEORGE HURLOCK, an Inspector of Nuisances under the Limehouse Board of Works, had received during the summer of 1866, "very many complaints from householders of the shortness of their supply of the East London Company's water," and had, in some instances, investigated these complaints: but he had "generally found that they arose in consequence of insufficient storage," for which of course the Company were not responsible. There were general complaints in the summer, but not so much in the winter months, of the want of water on a Sunday, and the water ran from the service pipes more slowly in summer than in winter. It took three minutes to fill a water-cart in March, April, and May, and 20 minutes in June, July, and August. But this latter statement appears to have been made from an experiment in James-street, Limehouse Fields, on the complaint of a carman, and this case must apparently have been exceptional.

MR. KNIGHT, the Surveyor to the Vestry of Mile End Old Town, gives  $3\frac{1}{2}$  to  $3\frac{3}{4}$  minutes in winter, and 5 to  $5\frac{1}{4}$  minutes in summer (except one year when the summer was a wet one), as the time required to fill the water-carts. The inspector of the company stated that these water-carts, containing about 250 gallons each, were filled through 1 inch or  $1\frac{1}{4}$  inch ferrules; and that they ought to take about five minutes to fill under ordinary pressure.

MR. THOMAS RUSHENT, who has been superintendent for eight years of Miss Coutts' establishment in Columbia-square, stated that there were there upwards of 700 inmates supplied with water by the East London Company. There were 16 cisterns, about 46 feet above the level of the pavement, in the upper part of the buildings, supplied by eight three-inch pipes. They had frequently, within the last three years, received a short supply during the summer months; before that time they had been occasionally without water on Sundays. In 1865, they were without water sometimes for a week, sometimes for a fortnight, and sometimes even for three weeks at a time, in some parts of the buildings. They were then obliged to put in a stand-pipe on a level with the ground, and they were entirely dependent upon that stand-pipe for a supply from the 23rd December 1866 to the 27th January 1867. But on the evenings of the 24th and 25th February they were without water even in the stand-pipe, and he could not draw water from a tap in his room in the basement from 4 p.m. to 11 p.m. when he went to bed. In the summer of 1865 the water was shut off in the main after about eight or nine o'clock in the evening, except on Fridays, for weeks at a time. They would use a great deal more water if they could get it. They had been very short on Sundays, particularly in the last two or three years. The water, after coming into the cisterns on the Friday night, or till five or six a.m. on Saturday, ceased running until Monday. But a good supply had been received on Sunday, the 27th January 1867, after the five weeks' stoppage before referred to in the cisterns.

In one of the scales of charges issued by the company, it is stated that an additional charge of 25 per cent. is to be paid for supplies delivered more than 20 feet above the pavement, and that a special agreement must be made for supplies exceeding 40 feet. It appears that no special agreement was made for the supply of Columbia-buildings; but the additional 25 per cent., making  $7\frac{1}{2}d.$  per 1,000 gallons, was paid. The total payments on this scale were from March to March—

|                   |   |   |   |   |   |   | £. | s. |
|-------------------|---|---|---|---|---|---|----|----|
| 1863-4            | - | - | - | - | - | - | 69 | -  |
| 1864-5            | - | - | - | - | - | - | 47 | -  |
| 1865-6            | - | - | - | - | - | - | 66 | 9  |
| 1866 (3 quarters) | - | - | - | - | - | - | 42 | -  |

and Mr. Rushent heard from the Inspector of the Company that he could not by extra payment ensure a better supply. The situation of the cisterns, which are said to be the highest in the district, was fixed upon by Miss Coutts' architect, and the buildings were erected in 1858 to 1862. The East London Company's contractor had executed the works for the supply of water under Miss Coutts' builder.

builder. The Company's Inspector saw them in progress, and Mr. Rushent did not hear any objections as to the height of the cisterns till August 1865. Miss Coutts had been to the expense of putting charcoal filters into the cisterns, and these were rendered useless when it became necessary for the inmates to carry up unfiltered water from the main.

In the summer of 1865, however, a great quantity of water ran to waste, in consequence of a mistake. It was running away for some months through a waste tap which had not been properly closed, and this was the year in which the supply was worst. It is impossible to say how much water was thus lost. Mr. Rushent thought not more than a gallon an hour; but this would have been an insignificant quantity, costing little more than 5 s. a year.

The Engineer of the Company states that they never undertook to supply water at so great a height as 46 feet; and it would, I think, have been much better if some tanks, at all events, in these buildings, had been placed at lower levels. The Inspector of the Company has been about 20 times to inspect them, and believed the supply to be "generally good, always except when the engine had broken down, or the main been shut down for repairs, or for making connections. He had always found the supply good when he went there." The tanks contained altogether about 20,000 gallons.

The complaints in this case refer principally to cisterns at a height greater than that at which the Company can supply regularly, or are bound to supply; but they refer also to the supply in the main, which appears to have failed more frequently than the ordinary occurrence of accidents or repairs would justify.

DR. SARVIS, the Medical Officer of Health for Bethnal Green, has resided in that district for 22 years. His house is on constant supply. He has a very small cistern for his water-closet, and no other means of storage. The cistern is about 30 feet above the pavement, and he has a tap in his bedroom about 25 feet above the pavement. His lowest tap is below the pavement. He pays the Company 3 l. 18 s. per annum for water, including 12 s. for high pressure. During the summer of 1865, and the earlier portion of 1866, he had frequently been without water in his cistern, and on Sunday he hardly ever had water in it, but he has only occasionally been without water in the main. He complained verbally to the Foreman of the district two or three times. The Foreman was most courteous, promised attention, and the supply improved; but it fell off again. The Foreman asked him to erect another cistern in his house, but he "abhorred" cisterns except for water-closets.

In 1865 and the early months of 1866 he received many complaints from the inhabitants of the district generally of deficient supply,—that even the small cisterns they had were not filled; but he did not investigate them at that time. He received further complaints during the cholera epidemic from the north side of Scott-street, and from the south side of Tent-street; and he found, upon personal investigation, that the water was turned on for so short a time that the butts, which would not hold some of them more than 36 gallons, were not filled. In September 1866, he went, on complaint, to 85, Hare-street. He saw there two butts, which were represented to be hardly ever filled, and they were only half filled when he saw them. Thirty-two persons lived in this house. He had seen "*the water coming through a small pipe with a dribble, and all the people waiting round with their small vessels to catch it, and put it under their beds for the night, in Weatherhead Gardens.*" He induced the landlord in that case to supply a water waste preventer.

The Inspector of the Company could not account for Dr. Sarvis's complaint as to his own house. Higher cisterns on the same main appeared to fill readily, and did so in 1865, 1866. There were eight houses on the same main, with the same constant supply. He went to Scott-street and Tent-street, and learnt there from Miss Mary Stennett, who collected the rents for the landlord, Mr. Button, that they had "no complaints to make, nor ever had any, and that during the cholera period the water had been turned on twice a-day for three weeks."

Furness, the Company's Foreman, went also to Scott-street and Tent-street on hearing Dr. Sarvis's complaint, and learnt, at Nos. 1, 4, 7, 13, 17, and 18, Tent-street, that they were satisfied with the supply. Miss Stennett, who lives in the centre of the block of houses comprising the north side of Scott-street and the south side of Tent-street, said she had not made any complaint about the water; but that Dr. Sarvis had called on her at nine o'clock one evening,

and asked if she had not a bad supply. The north side of Tent-street is on constant, the south side on intermittent supply. The Foreman went the same day to Nos. 33, 31, 27, and 17, Scott-street, and learnt that there were no complaints; as also on the south side of Scott-street, at Nos. 30, 26, 22, 16, 8, 2. He could see the water running over from all the butts in both streets, after it had been turned on for, say, a quarter of an hour. Before the cholera set in, the Foreman gave leave for the water to be turned on twice a day in those streets, on account of a fever that broke out in one of them, and he believes this was continued during the cholera epidemic.

This Foreman went also to No. 85, Hare-street, where he learnt that 34 people lived. He found there one butt belonging to the landlord, in which one of the staves was split, so that it would only hold 15 inches, or 20 gallons, instead of 40 to 48 gallons of water; one leaky barrel, which would only hold 18 instead of 36 gallons; and two smaller sound casks, which would hold, the one 18, the other 25 gallons. This double house, which is really Nos. 84 and 85, though called No. 85, belonged to Mr. Jeremiah Long, of Union-street, Hackney-road, a member of the Metropolitan Board of Works; and it is to be hoped he will improve the condition of his tenants in regard to their water-supply. There was only one three-quarter inch pipe shared between it and No. 86, and yet the tenants were in want of storage more than of water. The split butt at No. 85 was the only one they could drink from.

The Company appear to be unable to disprove the complaints made by Dr. Sarvis in regard to his own supply; but his complaints in regard to the district generally are due, when they are valid, to the remissness of the landlords and the parish authorities rather than to any negligence on the part of the Company.

DR. CORNER, to whom I have already referred as the acting Medical Officer of Health for Mile End Old Town, noticed a generally deficient supply in his district, particularly where the cholera prevailed in the poorer localities, at the end of last July and the beginning of August. The receptacles, if filled, were inadequate, and he did not believe, from his own observations, and from the statements of others, that they were filled daily. He had no complaints last February, but in the previous July there had been much inconvenience and, he believed, injury to health from the want of sufficient water for sanitary purposes, and especially from the want of a Sunday supply. He instanced five houses, containing about 40 people, in Birds Buildings, Globe-road, with one supply-pipe for the whole, and no means of storage. When he visited them at the end of July, they said they had only had water turned on for 15 minutes each day for the previous three months; and Crown-court, Canal-road, which he visited at the same time, was a similar case. The houses in about 50 new streets were on constant supply, and the system appeared to answer.

The above are the principal complaints that I have received of deficient supply, and I will now proceed to state the total quantity of water actually distributed by the Company. The *average* daily supply for each month in 1866 was as follows:—

|                | Gallons.   |                 | Gallons.   |
|----------------|------------|-----------------|------------|
| January - - -  | 17,592,000 | July - - -      | 20,524,885 |
| February - - - | 17,366,000 | August - - -    | 22,558,000 |
| March - - -    | 17,786,000 | September - - - | 20,726,981 |
| April - - -    | 17,945,000 | October - - -   | 20,481,000 |
| May - - -      | 18,357,000 | November - - -  | 19,685,000 |
| June - - -     | 19,000,000 | December - - -  | 19,842,000 |

But this average is computed for every day, including Sunday, on which day only 1-13th of the ordinary weekly amount is delivered; so that the average of the week days was proportionally higher; while the average for each day of the year amounted, in round numbers, to 19,300,000 gallons, of which 5,000,000 gallons were consumed for trade purposes. Taking the number of houses at 90,174, and the population at 7·3 to a house, or 658,270, this would give, including trade consumption, 214 gallons a day to each house, or nearly 30 gallons a day to each man, woman, and child in the district, of which about 8 was for trade, and 22 for domestic supply. The rate at which the supply has increased from year to year will be seen by the following table of the quantity of water pumped annually from 1851 to 1866:—

## QUANTITY OF WATER PUMPED YEARLY.

| Gallons. |   |   |   | Gallons.      |                 |   |   |   |               |
|----------|---|---|---|---------------|-----------------|---|---|---|---------------|
| 1851     | - | - | - | 3,869,020,368 | 1859            | - | - | - | 5,734,693,476 |
| 1852     | - | - | - | 4,201,841,664 | 1860            | - | - | - | 5,786,799,125 |
| 1853     | - | - | - | 4,361,241,274 | 1861            | - | - | - | 6,128,709,230 |
| 1854     | - | - | - | 4,846,888,296 | 1862            | - | - | - | 6,166,638,707 |
| 1855     | - | - | - | 5,373,351,453 | (53 weeks) 1863 | - | - | - | 6,519,178,904 |
| 1856     | - | - | - | 5,300,817,138 | 1864            | - | - | - | 6,326,722,124 |
| 1857     | - | - | - | 5,367,891,157 | 1865            | - | - | - | 6,673,236,695 |
| 1858     | - | - | - | 5,589,382,738 | 1866            | - | - | - | 7,054,589,656 |

It will be observed that the demand has increased in the proportion of 38 to 70, or not very far from doubled, during that period of 15 years; and I may add that the water rates have increased, as between 1863 and 1866, from 109,000 *l.* to 129,300 *l.*, or rather more than twice as fast as the supply. But the year 1866 was exceptional. During the prevalence of cholera the Company acted liberally in giving 20 per cent. extra of supply to their district. They increased their weekly quantity from

134,000,000 in June to 151,000,000 in August.

|             |   |             |   |
|-------------|---|-------------|---|
| 133,000,000 | " | 156,000,000 | " |
| 136,000,000 | " | 163,000,000 | " |
| 131,000,000 | " | 161,000,000 | " |
| 139,000,000 | " | 156,000,000 | " |

In 1864, on the other hand, the greatest drought occurred that they have experienced. They had not more than 20,000,000 gallons to draw from in the river daily for two months. Taking all they could get, and supplementing that quantity from storage, they were obliged to diminish their supply by about 200,000,000 gallons, or more than 10 days' consumption, principally in one month. To effect this they shut off constant supplies during the night, and reduced the pressure over the district. Looking to the continued increase in the district, and in the demand, and to the possible contingency of another dry season, they are naturally apprehensive for the future. They are accordingly applying to Parliament for powers to enable them to supplement their supply, to the extent of 10,000,000 gallons daily, from the Thames; and, as I have already explained, to increase their means of storage in the neighbourhood of the Copper Mills from the Lea, so as to be able to retain there 25 instead of eight days of supply. It is most important, in the interests of the district, that they should obtain both this supplement to their supply and this extra means of storage. They are urgently required as temporary remedies, whatever decision may be arrived at in regard to the more comprehensive schemes which are now before the Royal Commission on the Water Supply of the Metropolis.

In order to afford the above supplies to the district, the pressure at the Old Ford Works is uniformly maintained, summer and winter, at 97 feet, and that at Lea Bridge at 115 feet, extra engine-power being necessarily employed during the hours of maximum delivery. The pressure in the service-pipes would vary usually between 20 and 40 feet, being for six hours at a minimum and 18 hours at a maximum.

But whatever the deficiencies of the Company, or their difficulties in meeting, with their present means, the increasing demands of their district, the greatest evils, as regards the poorer classes, who are in this, as in all things, the principal sufferers, arise from a want of proper appliances for receiving and for storing the water which is or might be supplied to them. I have already cited some very bad cases, illustrative of the miserable condition of the houses in crowded courts and alleys, as regards water supply; and it is only too well known to all who have been in any way connected with the subject. The same defects are apparent on inspection at every turn in these as well as in other of the poorer districts. Pipes bent and broken; taps leaking, stuck fast, or missing; receptacles of every description, butter firkins, tar-barrels, wine-butts, or cisterns, in all conditions of filthiness, leakiness, rottenness, or ill-repair; covers inefficient or absent even where they have been supplied. The water runs sometimes over the side in place of into the butt, and too frequently runs to waste as long as it is turned on. In other cases, where there is a plurality of houses on one pipe—and there are in the East London district 500 cases in which four or more houses depend upon one service-pipe—the supply intended for each is unequally

divided according to the energies and opportunities of their inhabitants amongst the whole. The purest water that can be delivered is hopelessly contaminated directly it leaves the service-pipes by the dirty condition of the receptacles. As instances of the state of things which I saw in the district, I may mention the following :

At Bell-court, Whitechapel, 12 houses were supplied from one butt, from which the water was drawn in cans or other vessels; and at an inner court in the same place, the *end of a pipe* was apparent from a *hole in the wall*, from which two tubs or butts, *chained for security* to the window, were *filled with a pail* by the daughter of the landlady's agent. Three houses were thus supplied.

At 28, St. Mark-street, Whitechapel, *inhabited by six families*, the *only water-butt* was *over the dust-bin, alongside of the water-closet, and behind a gully or drain-hole*.

At No. 6, Lambeth-street, the cistern was over the water-closet, and the water running to waste down it; at No. 7, the pipe was stopped; at No. 8, water was running to waste out of the pipe at the side of the butt; at No. 9, over the top, without going into it. The rooms in these houses were rented at 2 s. 3 d. and 4 s. a week, and the houses fetched about 50 l. a year. They were said to belong to Mr. Gallivant, of Royal Mint-street, under Mr. Hawkins, of the British Museum.

At one part of Jones's-buildings, *an underground tank* had been constructed, from which the water flowed up into the gutter when it was full, and which *received the drainage of the street* through the same opening. The walls of a house over this tank were saturated with moisture from it.

At Wagner's-buildings, some cisterns of a better class had been constructed for 16 houses; but the slates of the roof rested on their edges, and the dirt and droppings from the roofs fell into them without obstruction.

The landlords and the vestries are seriously to blame, in cases of this description, as well as the Water Company. It is not the duty of the Company to provide pipes or storage, or to do anything themselves within the premises of the owners or tenants; but it is their duty to compel the owners to maintain proper fittings. The condition of the district fittings was brought prominently before the Company's Engineer many years since, and in 1861 he organised a complete office and staff for enforcing improvements in that respect. Since that time the whole district has been repeatedly examined, notices have been served where they were required, and very great improvement has resulted. But the warfare is, as he says, continual. On the last complete examination in 1866, the proportion of houses out of order in these respects was in:—

|                             | Per Cent. |
|-----------------------------|-----------|
| Whitechapel - - - - -       | 31·14     |
| St. George's - - - - -      | 27·37     |
| Mile End Old Town - - - - - | 26·0      |
| Limehouse - - - - -         | 22·86     |
| Poplar - - - - -            | 16·11     |
| Hackney - - - - -           | 21·73     |
| Bethnal Green - - - - -     | 27·56     |
| Shoreditch - - - - -        | 27·84     |

the average of the whole having being 23·89 per cent.; and in many of these cases the state of affairs was so bad as to justify the extreme penalty of cutting off the water. This penalty was, however, only resorted to in 12 cases in a year, where the landlords refused to execute repairs. The miserable condition of the East London Company's district, as regards storage, will best be seen by the following figures, showing the proportion of houses, not on constant supply, having either no means of storage, or no better means than an 18-gallon tub :

|                         | Per Cent. |
|-------------------------|-----------|

And

And this brings me directly to the question of Sunday supply. The suffering which the want of that supply engenders may be best inferred from the above figures. The East London Company gave a Sunday supply to those who were not on constant supply during the 20 weeks of cholera epidemic last year; but they have not otherwise given, nor has it been the general custom in London to give, such a supply. The reasons of the East London Company for not affording it are thus stated by their engineer:—It would add considerably to the duties of all the Company's officers, servants, and workmen. It would deprive the Company of the only spare hours for examination and repair of machinery; it would necessitate the employment of a larger staff, more machinery, and increased filtering area; and it could not be done with the appliances now at the Company's disposal. When application was made by the Metropolitan parishes, particularly in 1866, the reply was made by the Company that they disapproved of a Sunday supply, and would prefer to give a constant supply, under the conditions of clause 15 of the Metropolis Water Supply Act of 1852. They desired to have the fittings put in proper order, and would prefer, if that were done, to give constant supply to the whole of their district, rather than to add the Sunday supply on their present system.

These reasons are, no doubt, strong ones. It is desirable that the Company's officers and men should make Sunday, as far as may be, a day of rest; and it is convenient to employ that day for examination and repairs. Any unnecessary increase in their staff, their engines, or their filter-beds is to be deprecated. But, on the other hand, these matters lie very lightly in the scale, when compared with the inconvenience, the suffering, and even the injury to health which thousands upon thousands of people in their district experience from the want of water for Sunday drinking, cooking, and washing, for themselves and their families. Complaints are not unfrequently made in this respect by householders with better storage. But the evil is past description to those who are unable to catch enough, on the Saturday to last them till the Monday, to those who keep the little they can retain under their beds, or in close unhealthy rooms, or in unwholesome vessels; to the multitudes, in fine, who have no proper means of storage. And it appears to me that the Company is bound to keep such a staff, and to possess such means and appliances, as shall enable them to give such a supply, or, at the least, an equivalent for it on the Saturday evening, in cases in which it is so urgently required. Their neglect to do it constitutes, in my opinion, a reasonable ground of complaint of insufficient supply. But when they say they would prefer to give a constant supply under the conditions prescribed in the 15th clause of the Act of 1852, rather than to give a Sunday supply on the intermittent system, it must be admitted on all sides that their predilections and the public interest are in complete accord. This question of constant supply is the division of my subject, No. 6, which I shall next discuss.

The obvious advantage which a system of constant supply affords, in enabling rich and poor alike to draw water fresh from the mains of a water company as they want it, have made it the desired object for many years of all sanitary reformers; and its possession is one of the chief blessings that can be bestowed on a community. But in some towns and cities where it has been applied, the waste has been very great, and this fact has militated most unfortunately against its general adoption. Where the water is supplied by gravitation, as in the city of Glasgow, waste is comparatively unimportant to a water company, but where, as in the case of the Metropolitan Water Companies, the cost of procuring and pumping as well as of purifying the water, is an important item; and especially where, as with the East London Company, the whole available supply may in a dry season be unequal to the demand, there the consideration of waste becomes all important. Under such circumstances, it can be no matter for surprise that the engineers of many water companies, working as they are for profit, have been inclined to limit the possible waste to twenty minutes daily, in place of allowing it over the twenty-four hours. Any attempt to extend the operation of this system will have the better chance of permanent success if it is made in the interest of the company as well as the consumer, in combination with a good scheme for the avoidance of excessive waste, which is fatal to the operations of the one, and is of no benefit to the other.

One means of combining these objects is the "waste-preventer," to which I have already more than once referred. It is worked by a two-way cock, leading,

when in its normal condition, from the supply-pipe to a cast-iron chamber (holding, generally, a bucketful and a half of water), and when the handle is lifted, from that chamber to the outer orifice. The water is forced into the chamber under such pressure as happens to be in the main, is kept there in the best condition in contact with air, and issues forth partially aerated, with corresponding pressure, when the handle is raised. The handle falls of itself on being let go, and the chamber is self-replenished. It takes 20 seconds to empty, and in one minute it is again ready for use. There are now 40 of these "waste-preventers" working in the East London Company's district, and giving satisfaction alike to the company and to those who resort to them. The company are ready to afford a constant supply wherever they are erected, and to maintain them in proper order at a cost of 10 s. a year. They are used, as may be supposed, not only by the inhabitants of the courts in which they are, but by large numbers of people who flock to them from neighbouring localities. They are, in fact, the best possible description of drinking as well as general supply fountains, and they may be fixed against a wall, or at the corner of a street, or anywhere, for about 6 l. complete. They form, altogether, a very perfect arrangement for blocks, rows, courts, or collections of houses unprovided with internal means of supply, and they are for the lowest class of houses infinitely better than the arrangements which generally prevail with internal supply.

As regards constant supply to houses, the East London Company are favourably situated for affording it, the variations of level over their most populous sub-districts being small; and something like one quarter of the whole of their domestic supplies are already on constant service. The exact proportions per cent. of the houses in each sub-district on constant supply are as follows:—

|                       |       |                    |       |
|-----------------------|-------|--------------------|-------|
| Whitechapel - - -     | 8·67  | St. George's - - - | 2·82  |
| Mile End (Old Town) - | 18·16 | Limehouse - - -    | 11·81 |
| Poplar - - -          | 41·20 | Hackney - - -      | 39·78 |
| Bethnal Green - - -   | 19·50 | East of Lea - - -  | 71·32 |

But the greater part of these are new services, only 24 old services having been converted from intermittent to constant supply, of which six were composed of the poorer class of houses. The following is a list of the converted services:—

SERVICES formerly DAILY, now converted into CONSTANT.

|                                   |                                   |
|-----------------------------------|-----------------------------------|

| Great Cambridge-street (part of). | White Post-lane,                  |
| Healthy-place, Homerton.          | "The White Lion," Hackney Wick.   |

The company has in no case refused constant supply upon any, even irregular, requisition, signed by any number of inhabitants. But they have only received two requisitions since 1852, under Clause 15 of the Act of that year, signed by four-fifths of the inhabitants. In addition to these, they applied constant service in 14 cases on the personal application to the inspector of the landlords, and on their paying the cost of alterations. The remaining eight services were placed on constant supply to suit the convenience of the company: as, for instance, Healthy-place, Homerton, which is very poor property, and was near a large manufactory supplied by meter. Suther-street, Hackney Wick, contains poor houses, letting at 6 s. a week each; and they were put on constant supply on the application of the landlord, who was going to build other houses in the street. In that case there were wooden cisterns, lined with zinc, over the water-closets, and the supply was all taken through those cisterns. But water-closet cisterns in poor houses are very unsatisfactory. They are commonly outside the houses; the covers get worn out or lost; the water is exposed to the air, and vegetation takes place rapidly in the sun. The valve is too frequently at the top of the pipe instead of at the bottom of it, so that the foul air from the water-closet contaminates the water in the cistern.

The

The East London Company have never given public notice of their willingness to supply old houses with a constant service, though their intelligent Inspector, Mr. Edinger, to whom I have frequently referred, has been anxious, and they have been willing to do so, upon the terms set forth in the notice which they have issued from time to time since 1853, with annual revisions, in regard to new property. The following is a copy of that notice for 1866 :—

“EAST LONDON WATERWORKS COMPANY.—1866.

“A CONSTANT SERVICE of WATER will be given to NEW STREETS, ROWS of HOUSES, or TERRACES, on condition that the following REGULATIONS are observed :

“EACH party applying for a supply of water, or already using the same, previously to obtaining a constant supply, shall agree not to misuse or wilfully waste the water.

“Every house to which a constant supply is to be given, shall be fitted with the following apparatus :—

“A separate lead pipe for each house,  $\frac{1}{2}$ -inch diameter,  $1\frac{1}{2}$  lb. weight per foot lineal, and  $\frac{1}{2}$ -inch screw union ferrule.

“A screw bottom stop-cock must be placed on the lead pipe at the entrance of each house.

“Every house shall have cocks fitted to sinks, water-closets, and other conveniences, constructed so as to prevent all unnecessary waste, and in every case *the whole of the supply* must be delivered direct into cisterns.

“All the apparatus shall be fitted up and completed to the satisfaction of the officers of the Company, before the water is laid on.

“For the *supply of water-closets*, a flushing apparatus or *cistern must be used*; the cocks or valves to be self-closing. No waste or overflow pipes, nor common stool-cocks, can be allowed on any account whatever.

“All parties applying for a constant service of water, having complied with all the Company's requirements, will, nevertheless, understand that the East London Waterworks Company hold themselves free from any liability for damages that may in any way arise in the houses, by bursting, overflowing, frost, or any other cause; nor will they, by any permission or act, extend their responsibility beyond the limits of the iron pipes.

“Applications may be made in writing, or personally, to the Company's Inspector, Mr. Philip Edinger, any morning from nine till eleven o'clock, at the office, Old Ford, near Bow.

“The Company's charges for attendance, opening the ground, and driving the ferrule, must be paid before the supply is laid on.”

It will be observed that they make it an indispensable condition that *the whole of the supply* must be received through cisterns. Their reason for this stipulation is that they desire, in all cases of constant supply, to avoid the possibility of excessive waste by reducing the rate of delivery. They insert ferrules in the communication or lead pipes, near the small iron pipes leading from the mains, of so small a size as to prevent a pailful of water from being rapidly delivered, and storage is thus required for convenience in drawing upon the supply. But they do not object to a tap on the service-pipe, from which small quantities of water may be drawn direct for drinking purposes. They advocate cistern-storage, also, to obviate inconvenience in the event of temporary or accidental obstructions.

When constant service is applied for by any landlord or owner, the Company require, in the first instance, a payment of 5 s. per house for the alteration of the ferrules. That being paid, they send to the houses to see that the fittings are in good order, and to cause the waste pipes in the lower cisterns to be closed up. They then, as the houses are to receive, say in 20 hours, the quantity of water that they have before received in 20 minutes, insert a ferrule for each of, say,  $\frac{1}{20}$ th part of the previous size. They reduce the ferrules in practice, according to circumstances, from 1" or  $\frac{3}{4}$ " down to  $\frac{1}{8}$ " or  $\frac{1}{24}$ ", which latter is their most common size. Reducing the supply in this way, say to half a gallon a minute, they prevent the possibility of excessive waste; and they are able, without detriment to their own interests, to give a constant, though limited flow of water to their consumers. For the convenient employment of this system of accumulation, large cisterns are not required, as in the case of the intermittent system. Instead of a cistern to catch the daily supply of 200 gallons in 20 minutes, one of six cubical feet, holding 36 to 40 gallons, into which water is constantly

flowing, would suffice for most houses; and for very small houses a cistern holding two cubic feet, or 12 gallons of water, would be sufficient to prevent the inmates from being kept waiting while a pail was being filled. These cisterns would be less expensive than those now required, on account of their reduced size, the larger one costing less than 20 s., and the smaller, to hold 12 gallons, less than 10 s., both in iron. And the cost to the landlords in preparing for constant supply would be in very poor houses, including tank, 10 s.; fixing, 2 s.; ball-cock and tap, 7 s.; lengthening pipe into cistern, 6 s.; three feet of  $\frac{3}{4}$ -inch tubing from cistern, 3 s.; altering ferrule, 5 s.; altogether, 32 s. But this is only for very poor houses, where plastering is not employed in the wash-house, and without provision for a water-closet. In such houses the apparatus of a water-closet is seldom in proper order, and it is probably better to leave it to be flushed by pails of water than to attempt any more complicated arrangement. Five shillings a year per house would suffice for maintenance in such cases.

Mr. Edinger, who has had extensive experience in these matters, would undertake the work at the above rates; but he advocates, for constant supply in the poorer class of houses, when it can be done, placing the cistern in the kitchen, where it will be protected from frost, with a pipe down to a sink, and a tap over the sink. And if the same pipe leads to the water-closet, with a lever-valve, the expense of a second connection-pipe is saved; impure air cannot ascend to the cistern, because the pipe is kept full of water; and any waste flowing from the bottom of the pipe is at once detected by the difficulty of getting water from the tap over the sink.

I have entered into these details because the solution of the constant supply problem depends to a great extent upon the cost at which fittings, satisfactory to the Companies, can be applied to the poorer class of houses. The difficulty decreases as the houses improve, and the fittings for the accumulative system, requiring smaller cisterns, become cheaper than those for the intermittent system. But there is at present much practical difficulty in the way of introducing any system of constant supply. Clause 15 of the Metropolis Water Supply Act prescribes that "No Company shall be bound to provide a constant supply of water to any *district main* until four-fifths of the owners or occupiers of the houses on such *main* shall, by writing under their hands, have required such Company to provide such supply, nor even upon such requisitions, in case it can be shown by any Company objecting to the same, that more than one-fifth of the houses on such *main* are not supplied with pipes, cocks, cisterns, machinery, and arrangements of all kinds for the reception and distribution of water, constructed according to the regulations prescribed by the special Act or by this Act, or which any Company with the approval of the Board of Trade may, from time to time, make in that behalf."

*District main*, in this clause, is too vague a term; the expression should obviously have been *district service*, as there may be a number of services on one main, and it is only necessary that the owners or occupiers on each service should prepare their fittings for this purpose. But of district services only two have, as I have stated, made such a requisition upon the East London Company since the Act was passed, 15 years ago; and the difficulty of inducing owners or occupiers voluntarily to agree in such a matter would probably be an insuperable bar to the extension of the system as it ought to be extended. It would be out of the question to apply it in the existing condition of the fittings, and it would be useless in the case of the metropolis to attempt its introduction, without judicious provision for the avoidance of excessive waste. There is a strong feeling in many minds that a constant supply of water should be afforded direct from the service-pipes without the intervention of cisterns; and this is carried out in practice in many localities. But I fear that any attempt to introduce such a system now in this metropolis would only end in failure, whereas the use of small ferules and accumulating cisterns, in combination with taps for drinking purposes on the service-pipes, would do all that can be required, in the interest alike of the Water Companies and of the public. The East London Company have 27 houses well supplied by a half-inch pipe, with a  $\frac{1}{4}$ -inch ferrule, in this manner. In the Glass-house Buildings, again, where the arrangements for water supply were carried out on their suggestions, there are four tanks on the roof, connected with  
one

one service-pipe, but amply supplying nine houses, containing 54 rooms and 250 people, with constant supply from a tap in every room. The details of such arrangements may be carried out in a variety of ways according to local circumstances, existing appliances, and the views of the officers of different companies; and in the absence of unnecessary restrictions as to such details, improvements would, from time to time, be effected. But the most satisfactory, if not the only, mode by which the inestimable benefit of constant supply could now be afforded to the metropolis would be, in my opinion, by making it incumbent upon the water companies to prepare for it within a reasonable period, by giving them power to put all necessary fittings into the houses for the purpose, and by permitting them to levy a fair extra rate for the cost and maintenance of such fittings as were required. The owner or occupiers might choose from a schedule of prices the class of fittings for which they desired to be rated; and they would be served better and more cheaply in this manner than they are at present, when each man has to employ his own plumber. It would be to the direct interest of the Company to erect and maintain good fittings, so as to avoid waste. And constant service, with convenient arrangements, and a minimum of waste would be to the advantage of all parties. Second only to improved dwellings, a legislative enactment, carrying out such provisions, would be the greatest blessing that could be bestowed upon the working classes and the poor of London.

There is yet one other point to which I ought to refer in connection with the inquiry. I mentioned, near the commencement of this report, that there had been some difference of opinion between two eminent chemists in regard to the analysis of water, and that a final meeting was held on the 25th May for the further elucidation of that question. There are two tests for the presence of organic matters in water—the one by the loss of organic and other volatile matters during the incineration of the solid residue, which was exclusively employed by chemists until within the last two years; the other, by the quantity of oxygen required to oxydize oxydizable matters in the water when treated with permanganate of potash. It is generally believed that by the former test the amount of organic matter may be exaggerated, because certain mineral constituents of the water may at the same time be occasionally expelled; though it would appear from some recent experiments of Professor Frankland, that even with this test the amount of organic matter may in some cases be under-estimated. The permanganate test is thus used by Dr. Letheby:—A known portion of the water is acidulated with a given quantity of dilute sulphuric acid. It is then treated with a known proportion of a standard solution of permanganate of potash, and allowed to stand for three hours, during which time the oxydizable organic matters are undergoing oxydation. At the end of that time, the unused amount of the permanganate is ascertained by means of a standard solution of hyposulphite of soda, and starch, and iodide of potassium; and the proportion of oxygen used by the oxydizable matters in the water is thus determined. This precise process was recommended by Dr. Miller, the professor of chemistry at King's College, in a paper which he read two years ago, before the Chemical Society; and he looks upon the permanganate so used as a valuable *qualitative* test. Professor Abel, also, considers it in the same light, and regards the results, when they are recorded in the simple form of the quantity of oxygen which has been thus required to oxydize oxydizable matters in the water, to be valuable in affording the means of a comparative test between different samples of water. But Dr. Letheby goes further. He multiplies by eight the amount of oxygen so ascertained, and he assumes that the resulting number represents the amount of organic matter contained in the water. Dr. Miller considers the number eight to be arbitrary, and would not be prepared, any more than Professor Abel, to adopt the precise figures so obtained, for the following reasons: The same organic substances are not always present in the water. The number and compounds would be liable to variety almost without limit. Some of them require for oxydation more oxygen than others within wide limits, and no precise figure could, therefore, be expected to give accurate results for all cases. Two different waters might give the same result in this manner, and might yet contain different quantities of different organic matters. Some of these organic matters would not be injurious to health though objectionable in water, while others would be highly injurious; and it is impossible to determine

whether the permanganate has been acted upon by a highly injurious or by a non-injurious organic substance.

Dr. Letheby admits that the number 8 so used as a multiple is entirely empirical, and that he only uses it as the best mode which he possesses at present. But he produces, as confirmatory of the former experience which induced him to adopt it, a table showing the results of analysis made by Dr. Odling, Professor Abel, and himself, of all the waters supplied to the metropolis in the month of January 1867, and taken from the works and mains of the different Companies.

TABLE shewing the Relation between the Loss by INCINERATION, and the Quantity of OXYGEN required to Oxydize the ORGANIC MATTER of the LONDON WATER, in January 1867.

|                         |          | Dr. Odling. | Professor Abel. |         | Dr. Letheby. | Mean of all. | Oxygen required multiplied by 8, Dr. Letheby. |

Comparing the losses so obtained by incineration with the quantities of oxygen required for the different samples, he states the relation at 9.63 of loss by incineration to 1.03 of oxygen required; and he points out that deducting the oxygen of nitrites and nitrates, the proportion is as nearly as possible 8 to 1. This loss of oxygen from nitrites and nitrates he determines by the amount of oxygen which the nitrite or nitrate would evolve in the presence of organic matter. But he assumes, as he believes, that all such oxygen, for about three grains of nitrate, had been given out, though he is unable to say how much organic matter would be required to deoxydize, for instance, three grains of nitrate of potash.

Professor Frankland, after hearing the evidence of the above gentlemen, was still of opinion that the permanganate of potash was for *quantitative* analysis, as regarded the determination of organic matters in water, utterly valueless. It was affected in the first place by inorganic matter when organic matter was altogether absent. It was, in the second place, very slightly affected, as he had proved by experiments (which he had detailed) by putrescible organic matter. It was, in the third place, affected by organic matter in a state of putrescence, in a manner not at all understood. His experiments had been made by adding organic substances in a non-putrescent condition to water, because putrescent substances could not be added to samples of water in known quantities. He founded his opinion on those experiments, and especially on the following experiment with gelatine in its pure state. He added three parts of gelatine to 100,000 parts of water, and then estimating by Dr. Letheby's method, he found only .634 parts indicated; and thus this highly putrescible substance

substance was not, when not putrescent, to be detected to an adequate extent. He inferred that analagous substances would give similar results. And albumen was a substance which might be found in a pure but putrescible condition in potable water very recently contaminated with fresh sewage. He knew, from his own experiments, that the action of one and the same sample of water on successive days upon permanganate of potash was very different; that after standing for two or three days, a sample of water would frequently require considerably more permanganate of potash than it did when first tested. That might, however, arise from either old or new organic matter in the water.

Dr. Miller says on this point, that there might possibly be in potable waters organic matters which might become hurtful to health after putrescence, but which would not, before putrescence, be indicated by the permanganate. But this would only occur in practice in rare cases, because the organic substances are always in contact with the oxygen dissolved in the water, which is continually attacking them and converting them into harmless substances, namely, carbonic acid, water, nitric acid, and ammonia. He believes, therefore, that a water which does not show much action on the permanganate, may safely be sent out to a district without the liability to subsequent putrescence, or to injury from any matter originally contained in it while standing afterwards in butts and cisterns. The permanganate could not, of course, be trusted to indicate choleraic poison, because no one knows what that poison is; nor would it distinguish choleraic from any other organic matter.

Professor Abel also conceives it quite possible that a water might appear one day by the permanganate test to be a good water, and on a subsequent day to be the contrary, in consequence of the presence in it, in considerable quantity, of some putrescible substance. But he does not think this likely to occur, and he does not remember any palpable alteration of this sort in the course of his experience. He would himself consider the indications of the permanganate as a perfect safeguard under all ordinary circumstances of water supply. It is not a good absolute test when taken alone. The Loch Katrine water would, for instance, as well as any other soft peaty water, be rejected from London consumption if tested by the permanganate only. But it is good in combination with other tests to a very considerable extent.

It is, then, generally agreed, that the tests for organic matters by "loss by incineration," and by permanganate of potash, are, with all their imperfections, the best at the disposal of the chemist, and that they may, when they are cautiously employed, and when errors from various sources are otherwise eliminated, be relied on to a considerable extent for indicating *qualitatively* such organic impurities as are most likely to occur in potable waters. But I understand that Professor Frankland is still at work on the subject, and his further researches will no doubt be valuable in further elucidating it. In any case, it would appear to be better, with a view to strict accuracy in the statement of future analysis of water, that the amount of oxygen which has been required for oxydation only should be inserted, and that the attempt to describe a precise amount or proportion of organic matter as having been indicated by the permanganate process should be abandoned.

I have, &c.  
(signed) H. W. Tyler.

The Secretary, Board of Trade.

#### MEMORIAL.

To the Honourable the Board of Trade.

The Memorial of the undersigned inhabitants householders, paying rents for, and supplied with water by the East London Waterworks Company:

Sheweth,

THAT the Committee of the East London Water Supply Association, comprising several of the undersigned, did on the 13th October 1866, address a memorial to the Secretary of State for the Home Department, praying, "That an inquiry may be instituted without delay into the causes of the recent prevalence

of cholera in the East of London, and especially into the alleged connection of the water supply from Old Ford, with such epidemic ;” and have since received a reply from the Secretary of State, referring them to the 9th section of the Act 15 & 16 Vict. c. 84, and stating that the complaint should be made to your honourable Board under that section.

Your memorialists, therefore, do hereby, pursuant to the said section, make complaint of the quantity and quality of the water supplied for domestic use by the East London Waterworks Company, and especially as follows :

1. That the said water supply is within the knowledge of your memorialists deficient in quantity.

2. That as publicly stated by Dr. Frankland in official reports to the Registrar General, and as your memorialists believe, the works of the said Company at Old Ford, comprise two open ponds, where no sufficient care is provided to protect the water against impurity ; and also an underground reservoir, which is several feet below the level of the River Lea, immediately contiguous thereto, and into which water from that river (which is no better than an open sewer) can and does percolate, and which reservoir is in communication by a pipe or pipes, with the said open ponds, so that the water from them may be used in time of emergency by the Company, and as suggested by Dr. Frankland has been so used, and thus been one of the principal, if not the sole cause of the fearful mortality from cholera at this end of London.

3. That the works of the said Company at Lea Bridge, from whence the whole water supply of this portion of London is derived, are situated at a point where the water has been contaminated by the sewage of Broxbourne, Hoddesdon, Bishop’s Stortford, Enfield, Ware and many other places, comprising a population of many thousand inhabitants.

Your memorialists therefore pray your honourable Board, pursuant to the provisions of the 9th and subsequent sections of the said 15 & 16 Vict. c. 84, to appoint a competent person to inquire into and concerning these grounds of complaint, and generally into the connection of the said water supply with the recent epidemic, and to take the steps prescribed by the said Act to require the Company to remove the grounds of such complaints, so as to avert a similar calamity in the future.

## EAST LONDON WATERWORKS COMPANY.

---

RETURN to an Order of the Honourable The House of Commons,  
dated 20 August 1867;—for,

COPY “of CORRESPONDENCE between the BOARD of TRADE and the EAST LONDON WATERWORKS COMPANY with reference to Captain TYLER’s REPORT on the WATER supplied by the Company (in continuation of Parliamentary Paper, No. 339, of the present Session).”

— No. 1. —

(R. 1086.)

Board of Trade to the Secretary to the East London Waterworks Company.

Board of Trade (Railway Department),  
Whitehall, 20 June 1867.

Sir,

I AM directed by the Lords of the Committee of Privy Council for Trade to inform you that on the 13th November 1866 their Lordships received from certain inhabitant householders paying rents for, and supplied with water by the East London Waterworks Company, a memorial complaining of the insufficient quantity and impure quality of the water supplied by the East London Waterworks Company.

In pursuance of the 9th section of the Metropolis Water Supply Act, 1852 (15 & 16 Vict. c. 84), my Lords appointed Captain Tyler to inquire into the grounds of that complaint, and to report to their Lordships thereupon. My Lords have now received from Captain Tyler his report upon the matter so referred to him, and I am to transmit to you herewith a copy of it.

Upon consideration of that report, it appears to their Lordships that the complaint of the memorialists is well founded, and I am therefore directed, in pursuance of the 12th section of the Metropolis Water Supply Act, 1852, hereby to give notice thereof to the East London Waterworks Company, and to point out to you that, after the receipt of this notice, the Company are by the 13th section of the same Act required, within a reasonable time, to remove the grounds of such complaint.

I am to request that the receipt of this notice may be acknowledged, and to state that my Lords will be glad to be informed of the steps which the Company propose to take to remove the grounds of the complaint.

I am, &c.

The Secretary to the  
East London Waterworks Company,  
16, St. Helen’s-place, Bishopsgate-street.

EAST LONDON WATERWORKS COMPANY.

LETTER to the Board of Trade in reply to Captain Tyler’s Report.

Sir,

16, Saint Helen’s-place, 29 July 1867.

I HAVE to acknowledge the receipt of your letter of the 20th ult., in which after referring to the recent inquiry made by Captain Tyler under the provisions

---

*Note.*—The Report by Captain Tyler of the 27th May, above referred to, is to be found in previous House of Commons Paper, No. 339, of the present Session.

sions of the Metropolis Water Supply Act, 1852, in consequence of a memorial presented to the Lords of the Committee of Privy Council for Trade respecting the quantity and quality of the water supplied by this Company, and transmitting a copy of his report, you inform this Company that upon consideration of that report it appears to their Lordships that "the complaint of the memorialists is well founded," and their Lordships require to be informed "what steps the Company propose to take to remove the grounds of the complaint."

The directors of the East London Waterworks Company have considered the report of Captain Tyler and your letter with the most respectful attention, and in doing so have but followed the course which they prescribed to themselves at the commencement of the inquiry, namely, that they should, with a view not merely to the remedy of what might be amiss, but to the quieting of the public mind, throw open their works and proceedings to every scrutiny, consider every reasonable suggestion, give every explanation, and in every way assist the inspector in the performance of his duties.

The directors are prepared in the same spirit to receive and reply to your letter of the 20th ultimo; but at the same time they feel, in fair protection of the interests they represent, constrained to reserve to themselves the right of objecting whenever they consider it necessary—that the inquiry conducted by Captain Tyler travelled in several respects into matter beyond the legal jurisdiction of an inspector appointed by the Board of Trade; that his report, even if it were in all respects properly supported by evidence, is liable to the same objection, and further that the very general and unqualified finding by their Lordships "that the complaint of the memorialists is well founded," goes far beyond the conclusions of Captain Tyler's report.

Having made this necessary saving or protest, I am instructed to reply to your letter without reserve, and to explain what the directors have done and propose to do for the purpose of improving their water supply.

The questions which have been under consideration have naturally and necessarily been questions of quantity and of quality; and I am instructed by the directors to apply myself in the first instance to the former of those questions, and to notice that objections in respect of the sufficiency of the Company's supply in point of quantity were in the inquiry before Captain Tyler, and must in every inquiry of the kind, have reference, either,—

1. To imperfect internal house fittings and appliances.
2. To imperfect works or arrangements by the Company.
3. To absolute shortness of water for meeting the demands of the consumers.

**QUANTITY.**—I. With reference to the first of these heads there was in the inquiry before Captain Tyler abundant proof of instances in which the consumers did not enjoy a proper supply of water by reason of deficient internal appliances.

It is of course understood that as the law at present stands there is no liability on the Company to provide within the property of the consumer internal fittings or receptacles for the receiving of their water; but Captain Tyler appears to be of opinion that the Company's obligations should be in this respect altered, and that they should have the power (which would bring with it in the case of the lower descriptions of property the duty) of putting necessary fittings into the houses, and of levying a fair extra rate for the the cost and maintenance of such fittings.

This Company proposes to take no step to procure any alteration in the law in this respect, inasmuch as the experience of their directors and officers tells them that although it is highly necessary that the supplying Company should have power to regulate the character of the internal fittings and receptacles, it is indispensable that the ownership and maintenance of them should rest with the owners and occupiers, with whom the duty and the interest naturally lie, and with whom the closest power of control and management must inseparably be. In the case of the better description of houses the Company's interference would be considered a nuisance, and in the lower description of properties, which alone require consideration, ceaseless and ineffectual war between the Company and their consumers must result, if the directors were to have the proposed new power and duty thrust on them. Whereas if a public authority (whether such as pointed at in the recent Report of the Select Committee

mittee on Metropolitan Water Supply of the House of Commons or one in more direct local contact with the particular properties) were armed with more direct authority to enforce the provision and maintenance, by and at the expense of the owners and occupiers, of the proper fittings and receptacles, the duty would be performed by those to whom it properly belongs. But if this is to be satisfactorily effected, it must be by making the interference of the selected public authority more certain, its power and remedy more summary, and of such a character that a defaulting owner would find it more to his interest and convenience to comply with a previous notice from the authority than to permit its further action. There is no doubt that the existing law might, in all these respects, be sensibly and easily improved.

Captain Tyler has reported to their Lordships that it is the duty of the Company to compel the owners to maintain proper fittings, and he has with justice added that the Company some years ago organised, and during the last six years have had in action, a special office and staff with the view of compelling improvements in this respect; but he has omitted to report that although by notice and remonstrance the Company has effected much, the Directors have no power "to compel" that which he blames them for not compelling.

The Company's records, voluntarily kept, enabled Captain Tyler to report, and he accordingly brought under their Lordships' notice the fact that an average of 23·89 per cent. of all the houses in the East London district were without proper fittings.

II. The Directors have shown themselves in advance of their duty in their system of inspection; but they are strongly opposed to the proposition that they should be virtually constituted a water police: their duties ought to be, and they are most desirous, to facilitate the operations of the public authorities, of the owners of houses and of the consumers of water, and also to concur in all arrangements by which their supply (for example, in courts by waste-preventers or the like) may be better enjoyed. I am instructed to notice that these waste-preventers are increasing in number in the Company's district. There are now as many as 54 for the service directly of 576 houses. Captain Tyler reports of them that they are "the best possible description of drinking as well as general supply fountains," and "form a very perfect arrangement for blocks, rows, courts, or collections of houses unprovided with internal means of supply, and that they are for the lowest class of houses infinitely better than the arrangements which generally prevail with internal supply." "They are used," as Captain Tyler adds, "not only by the inhabitants of the courts in which they are, but by large numbers of people who flock to them from neighbouring localities."

Whilst the Company is prepared under present conditions and with a view to aid sanitary and social improvement to favour the extension of "waste-preventers," it is sufficiently obvious that this is a course of liberality rather than of duty, and that circumstances might arise in which it would be impossible for the Company to continue a supply open to be used by "large numbers of people flocking from neighbouring localities." Such numbers might become very large indeed, and might be found to include many who were purposely avoiding the putting and keeping of their own appliances and receptacles in order, and might prefer the taking of a supply rent-free to the taking of one only with a little more convenience for which they must pay.

I am to add that the Company, as must now be fully understood throughout their district, are willing, at their own expense, to lay and maintain pipes from their mains to the entrance of any court, so as to give the means of constant supply there, provided only that the owner of the houses will furnish the court adequately with pipeage and such waste preventing apparatus as the Company can approve.

With reference further to the question of quantity, Captain Tyler heard and reported upon cases of alleged insufficient supply due, as it was urged, to imperfect works or arrangements on the part of the Company.

Of these cases some were the complaints of individuals and in respect of isolated and exceptional grievances; and I am instructed to state with respect to them that especial attention has been directed to all these cases, and that no complaint has since reached the Board from the same parties. Such grievances must in so large a service inevitably arise with more or less frequency,

and the only step the Company can take in such and the like cases is to cause the exercise of continued and, if possible, increased vigilance on the part of their officers, and to give the promptest attention whenever any reasonable complaint comes to their knowledge.

Captain Tyler has also, whilst dealing with the question of insufficient quantity, reported that in his judgment the Company is blameable in respect of the quantity of their supply whilst they omit to give a Sunday supply, or "at least an equivalent for it on the Saturday evening."

The Directors have already explained that the giving of an intermittent supply on Sundays would be extremely inconvenient, and that the suggested supplement on a Saturday evening would be still more difficult. I am instructed to state that the Company would prefer to either alternative, the giving of a "constant supply" when the public have made the necessary preparations to receive it, and which Captain Tyler has reported would be in complete accord with the public interest.

It was proved before Captain Tyler, and is stated in his report, that for many years past the Company has by public notice intimated their readiness to give constant supply to new streets, rows of houses, &c. &c., upon specified terms and conditions, and according to specified regulations, the main features of them being the use of small ferrules in the service pipes of the respective houses, and of accumulating cisterns. Of this scheme of supply Captain Tyler has reported that if there be combined with it taps for drinking purposes on the service pipes (to which the Company does not object) all would be done "that can be required in the interest alike of the Water Company and of the public."

That their Lordships may judge how far the arrangements thus offered by the Company have practically extended, I am directed to state that the total number of houses supplied by the Company in 1866 was 91,975, and of these 25,305 were in enjoyment of this constant supply.

The Company's records enable me to state that the per-centage of houses on constant supply has risen from 4.37 per cent. in 1854, to 28.45 per cent. in 1866.

It is quite true that the Company's published notices have extended to the case of new houses alone, but this has been so, not because the Directors have been at any time unwilling to concur in similar arrangements in respect of existing houses, but because although their practice must have been known throughout their district, and the applications in respect of it were frequent in the case of new houses, there has never been any evidence of willingness on the part of owners or occupiers to incur the expense of altering existing fittings so as to put their properties in the condition necessary for the receipt of the improved supply.

Captain Tyler has, however, noticed that several cases of such change have occurred; "that the Company has in no case refused constant supply;" and that, although their public notices are pointed at new houses only, the Company has been willing to supply old houses with a constant service.

The apathy of the owners of property and their determination to avoid any outlay are the real causes why the fittings of old properties have not been more extensively altered.

Before leaving this branch of the subject, viz., possible insufficiency of supply by reason of imperfect arrangements on the part of the Company, I am instructed to notice, although insufficiency of pumping power was not made a charge against the Company before Captain Tyler, yet the Directors are in fact doing much to increase the efficiency of their works in this particular.

At present it being necessary from the physical conditions of their district and of their sources of supply to lift their entire supply by pumping, they have pumps thus employed at their Old Ford establishment of 640 horse power; at their Lea Bridge establishment of 300 horse power; and at Walthamstow of (steam and water) 130 horse power; and they have in construction and approaching completion at Lea Bridge additional buildings, engines, and pumps, estimated to cost 35,000 *l.*, and to furnish a further power of 350 horses.

III. I am next to state what steps the Directors have taken and propose to take for the purpose of preventing any absolute shortness of water for meeting the demands of their consumers.

In the extremely hot and dry season of 1864, the same natural causes which brought the River Lea to an unprecedented low condition, at the same moment raised the demand on the Company to a maximum not theretofore attained. Under these circumstances, and for other reasons the Directors in order to meet the normal increase of their district, have deemed it desirable that the Company should be armed with further means of supply.

The Company had in 1861 already embarked in the formation of considerable storage reservoirs at Walthamstow, and in 1863 they completed and brought into use reservoirs there, extending over an area of 45 acres, and capable of holding 100 million gallons of water. In 1866 they completed and brought into use further adjoining reservoirs extending over an area of 65 additional acres, and raising their total storage capacity to 200 million gallons.

In the present Session of Parliament they have obtained powers to extend these reservoirs yet further. The Company proposes to act without delay upon the powers thus obtained, so that on the completion of the intended works the area of their storage will have risen to more than 200 acres, and its capacity to 500 millions of gallons.

The supply actually given by the Company in 1866 (a wet year, and during which they were under no necessity or temptation to stint the fulness of their supply) reached a daily average of 19,380,000 gallons, and to furnish such a daily average the Company's share of the Lea is, under ordinary circumstances, equal; but it will be observed that the Company's existing reservoirs are equal to the giving of a supplemental daily supply, say during 90 summer days, of nearly  $2\frac{1}{2}$  million gallons daily, and that when the now contemplated reservoirs are added, the Company's storage will be such as to give for, say 100 days, nearly 5 million gallons daily.

Neither, as regards quantity, is this all; for the Company, in the present Session of Parliament, have armed themselves with power to take not exceeding 10 million gallons daily from the ordinary flow of the Thames, and to store flood water therefrom. The Company's point of Thames in-take will be at Sunbury, somewhat above the point at which the other Metropolitan (Thames) Water Companies are taking their supply.

The Directors trust that these explanations of the steps which they have taken and are taking to secure for the inhabitants of their district a proper supply of water in point of quantity are such as will be entirely satisfactory to the Board of Trade.

**QUALITY.—IV.** I am now instructed to bring under notice the question of quality, and it seems convenient that the statements I have the honour to make should be, first, with reference to the special matters investigated by Captain Tyler, and afterwards on the subject more generally.

Into the question raised by the memorialists respecting the connexion of the Company's water with the fearful epidemic of last year, the Directors abstain from entering, not merely because Captain Tyler found it only a "case of grave suspicion," and one in which "proximity to absolute proof" had only been "nearly reached," or because the Directors are conscientiously satisfied that the water neither caused nor continued the mischief, but because it appears to the Directors that this is by no means the real issue, for the Board fully admits, and the public is entitled to expect, that if it were conceded on all hands that the water had no connexion with or bearing upon the epidemic, the duty of protecting it from impurity, and of supplying it in the best practicable condition, would still be imperative.

The Directors do not controvert nor comment upon Captain Tyler's report respecting the Old Ford reservoirs.

Unfiltered water was to some slight extent, and under special and unfrequent circumstances, admitted into the covered reservoirs from the uncovered reservoirs. The fact is to be regretted; although the Directors believe (and in this Captain Tyler acquiesces) that no actual mischief resulted from it. In September last, at all events, any repetition of such a proceeding was rendered impossible by cutting off the connection between the uncovered and the covered reservoirs; and by clauses introduced by the Company into an Act which has now received the Royal assent (see Section 17 of the "East London Water Works (Powers) Act, 1867") provision is made for absolutely filling up the uncovered reservoirs within a limited period

Again, it was suggested that there was involuntary soakage of water from these uncovered reservoirs into the covered reservoirs. This suspicion (which appeared to Captain Tyler not well founded) will of course be at an end by filling up the uncovered reservoirs.

It was further suggested that there was soakage of water under similar circumstances from the River Lea into the covered reservoirs, or one of them, and the Company gave every facility by emptying the reservoir for making the inspection which Captain Tyler desired. The indications which he then observed may or may not support the inferences drawn from them, but the Company at once proceeded to introduce into the same Act a provision (see the section already referred to) of a fully preventive and remedial character, which I will proceed to explain. The covered reservoirs at Old Ford cannot be to any considerable extent interfered with, or their depth or capacity lessened until a further filtering area has been perfected on the Company's supply above them; but the Company has, by the Act I have already quoted, acquired the power and undertaken the duty of forming this further filtering area, and immediately thereupon one of the covered reservoirs at Old Ford is to be filled up, and the depth of the other (which is to be rendered water-tight to the satisfaction of the Board of Trade) is to be considerably lessened.

Observance of all these remedial proceedings has been secured by heavy penalties voluntarily imposed, and the Company will of course perform what it has in this respect undertaken; thus incurring a very considerable outlay, not perhaps necessary for the remedy or prevention of any actual mischief, but, at all events, desirable as cautionary measures, and for quieting the public mind.

Such are the steps which the Directors are taking with reference to the special cases in respect of the quality of the Company's supply, which were discussed before Captain Tyler.

V. On the more general question of quality—that is to say, the contamination of the waters of the Lea by sewage before they reach the Company's works, Captain Tyler has reported that “the Company suffer from such contamination as well as the public; and that they ought to receive in the interest of a quarter of the population of the metropolis all the assistance that Parliament can afford towards its alleviation.”

The grievance has indeed grown to be one which Parliament, acting at the instance of the public interests generally, and not moved to interference by the East London Company, alone can remedy; for it needs correction by the exercise of powers far greater than could reasonably be entrusted to such a Company.

The East London Company has from time to time done much, and at vast expense, to protect the waters of the Lea from pollution. It has expended large sums in the purchase of mills and riparian properties, devoted or likely to be devoted to offensive purposes, in purchasing control over parts of the stream, and in the construction of intercepting drains, by which the sewage of a population (in 1861 52,000) has been kept away from the Company's supply.

They are now about to purchase further properties and control over the river, with the like objects, and having very carefully considered the feasibility of extending their system of interception, they, in the last autumn, deposited in Parliament, plans for making a costly extension of it. In doing so, however, the Directors saw very plainly that the best result which could arise from the execution of such works could only be palliative and imperfect, even if they were prepared to overlook the injustice to the Company of being left to bear the great and increasing expense of them.

Having regard, therefore, to the legislation which in the Session of 1866 followed, in the case of the Thames, the recommendations of the Commissioners appointed to inquire into the best means of preventing the pollution of rivers, and which went to the extent of empowering the Conservators of the Thames to prevent (after the lapse of a period to be allowed for alteration of existing arrangements) the passing of sewage or injurious refuse into the Thames or its tributaries, the Directors in the last autumn made special application to the Commissioners for procuring their immediate consideration of the River Lea.

The Directors expected that the Commissioners would find it their duty to recommend,

recommend, in the case of the Lea, the salutary course which, at their instance, Parliament had with so much promptitude and decision adopted and carried into effect in the case of the Thames, and they have not been disappointed, for the Commissioners having completed the necessary inquiries have made their report, and have recommended the construction of a Board of Conservators of the Lea, and,—

“That after the lapse of a period to be allowed for alteration of existing arrangements, it should be made unlawful for any sewage, unless the same has been passed over land so as to become purified, or for any injurious refuse from manufactures or agriculture to be cast into the River Lea or into any of its tributaries, and that persons offending in this respect be made liable to penalties to be recovered summarily.

“That it be incumbent upon the Conservators to see to the enforcement of the prohibitions that may be established against pollution of the river, and that for this purpose, power be given to them to visit and inspect works, and after due notice to close the outlets of sewers, drains, and discharge pipes into the river or its tributaries.

“That in the event of the funds derived from the navigation, together with the annual payments now made by the New River and East London Waterworks Companies proving insufficient to meet the expenses of measures taken by the Conservators for the protection of the river from pollution, the Companies (New River and East London Water) be called upon to contribute in equitable proportion such further sum as may be necessary, not exceeding a maximum, to be fixed by Parliament.”

Such being the recommendations of the River Commissioners, the Directors desire me also to state for the information of their Lordships, that simultaneously there has been movement on the part of several important parishes in the valley of the Lea, and that a very comprehensive scheme for dealing with the sewage of the entire valley below Hertford has been at their instance designed by Mr. Bazalgette, the principal engineer of the Metropolitan Board of Works, so that before the Bill by which the East London Company had proposed to acquire power to extend their intercepting drains, and deal, to some extent at least, with the most prominent part of the mischief, came under the consideration of the Committee of Parliament to which it was referred, the Company found not only that the whole subject of metropolitan water supply was to come under the consideration of that Committee, but that the River Commissioners had reported and made the recommendations herein set forth, and that a scheme of sewerage for the entire valley had been designed by no less an authority than the gentleman who as engineer designed and executed the general sewerage system of the metropolis.

Under these circumstances the Directors determined upon withdrawing their own necessarily imperfect measure, feeling that it was not only imperfect, but that it might, if permitted by Parliament and carried into effect, be the means of preventing or delaying larger and more satisfactory arrangements.

In thus dealing with the subject, and in their strongly entertained opinion that the duty of ceasing to pollute, and of preventing the pollution of the river, lies (especially as regards the attendant expense) far more with riparian owners and population than with the water companies, the Directors infer that they have the concurrence not only of the River Commissioners, but of the Committee of Parliament to which I have already alluded.

The Commissioners speak thus of the intercepting works which the Company had proposed :—

“The East London Waterworks Company are, as appears by their Bill now before Parliament, proposing to protect their in-take by constructing additional intercepting sewers' works, the expense of which properly belongs to the towns that require them ;”

whilst the Committee in their Report (ordered by the House of Commons to be printed 27th June 1867), state with reference generally to the contamination of the Lea—

“To improve the purity of the water of the Lea, plans have been submitted to your Committee for what are called comprehensive schemes for disposing

disposing of the sewage of the valley of the river, which though imperfect would require a large outlay. But as they would only collect the sewage into a considerable volume, rendering it more difficult to dispose of it with advantage at the place of outfall, your Committee are not prepared to recommend the adoption of these schemes.

“Your Committee are of opinion that if each town or place were compelled to intercept its sewage, and apply it to some adjacent land, the whole of the sewage of the towns on the River Lea and its tributaries might be diverted from the river at a comparatively small cost and with great agricultural profit. By these means each town would bear the cost and enjoy the advantages resulting from its own sewage, and as the quantity of sewage would be in proportion to the population, each place would be treated with an equal measure of justice.”

“Considering the amount already contributed by the two water companies to the funds of the Commissioners, and the large expenditure of the metropolis to effect its own drainage and to dispose of its own sewage so that it may not be an injury or even inconvenience to others, and that the water companies are assessed to the rates for this purpose, your Committee see no reason why they or the inhabitants of the metropolis should be called upon to pay the expense of similar works carried on by other towns for the purpose of preventing the sewage of those towns becoming injurious or a nuisance.”

And the Committee in the same Report, after expressing their general concurrence with the views of the River Commissioners, and suggesting some modifications of them, add—

“To give effect to the views above expressed respecting the River Lea, your Committee recommend that a Bill should be introduced in the next Session by the Board of Trade.”

And further state their opinion that—

“When the remedial measures thus recommended are carried out, the River Lea will be as free from the risk of contamination as the River Thames,\* and will afford a supply of wholesome water of unquestionable character to the East London Waterworks Company at the lower source of supply, as it now does to the New River Company from its in-take near Hertford.”

In this state of circumstances the Directors, relying that their Lordships will not lose sight of the above-cited recommendation of the Committee, consider that as regards the protection of the Lea from contamination above the Company's in-take, they have no step to take beyond earnest co-operation with their Lordships and the other river interests in procuring satisfactory enactments from Parliament, and afterwards in carrying them into effect.

The Thames and the Lea thus being fully protected, the water consumers of East London will hereafter in the judgment of the Directors be in possession of the very best supply which can be furnished to them.

VI. Having thus stated what are “the steps which the Company propose to take,” it may be considered that the subject is exhausted, but in conclusion the Directors cannot forbear calling attention to a few recently recorded facts as to the quality of the East London Company's water.

Considerable controversy arose before Captain Tyler respecting the comparative value and the efficacy of the respective tests used by the eminent chemists who have had the duty of analysing the Company's water.

The Directors forbear to express any opinion on this subject, not merely because their judgment could have no intrinsic value, but because here again their duty as managers and dispensers of the East London water is rather to facilitate

---

\* Of the Thames water the same Committee had in a previous part of their report stated—

“Your Committee are satisfied that both the quantity and quality of the water supplied from the Thames is so far satisfactory that there is no ground for disturbing the arrangements made under the Act of 1852, and that any attempt to do so would only end in entailing a waste of capital, and an unnecessary charge upon the owners and occupiers of property in the metropolis.”

facilitate observation and inquiry, and to give attention to every result presented to them on even plausible authority, than to lose perhaps valuable opportunity whilst seeking to determine which course of inquiry, amongst several, may have the greatest merit.

The directors have for many years past co-operated with the other metropolitan water companies in procuring their respective supplies to be periodically analysed by a high independent authority (Dr. Letheby, who is the medical officer of the City of London; has been for some time past selected for this duty). The directors have from time to time supplied Dr. Letheby with additional samples taken from other points on their works, so as to afford a check and additional means of detecting any shortcoming, and its origin.

The Registrar General has also been supplied by the Company with every information, and the means of making such analyses as have appeared to him desirable, and there is no doubt that Professor Frankland and his predecessors in the duty have from time to time subjected the water supplied by each of the companies to the most delicate tests and the severest criticism.

The result of all these observations and analyses was, up to the time of the deplorable epidemic of last year, to show a considerable and a gradually increasing improvement since the water inquiry of 1852, and the passing of the Water Act of that year, in the quality of the water supplied by all the Metropolitan Companies, nor was the quality of the East London water appreciably different from that of the other companies.

The epidemic and its peculiar development in the eastern districts of London caused additional scrutiny in respect of the East London Company's water, but if the exceptional case of the water supposed to soak into the Old Ford reservoirs be laid aside, not merely as one of doubt, but as one against the recurrence of which provision has been made, nothing resulted in the way of proof or suggestion that the quality of the East London Company's water was inferior in any respect to that of any of the other water companies.

But whilst it is most satisfactory in the present calm to review matters about which there was a few months ago so much alarm, and to recall the results of the criticism and inquiry which that alarm engendered, it is even more pertinent and useful to bring under notice what has been the condition of things more recently.

Dr. Letheby has continued his labours of analysis with results showing in grains per gallon of water taken from :—

It would render this paper burdensome were I to supply the materials for comparing these results with those obtained in the case of the other Metropolitan Companies, but the facts with or without such comparison are most satisfactory.

Professor Frankland has also continued his labours, but, as is well known, reports his results in other shape and language.

They stand recorded in the returns of the Registrar General, and, whether considered absolutely or comparatively, are such as to show the condition of the East London water to be satisfactory.

From the commencement of the present year Dr. Frankland has adopted a new tabulated form of report on the quality of the metropolitan water supplies as chemically tested by him, and one which it must be supposed exhibits more prominently and usefully the points to which, according to his judgment and experience, the public attention should be directed.

In this new form of report Professor Frankland eliminates and sets forth the amount of "previous sewage contamination (estimated)" in 100,000 parts of water, and the following are the proportions as published by him from February to July 1867 inclusive:—

|                | Chelsea. | West<br>Middlesex. | Southwark<br>and<br>Vauxhall. | Grand<br>Junction. | Lambeth. | New<br>River. | East<br>London. | Kent. |
|----------------|----------|--------------------|-------------------------------|--------------------|----------|---------------|-----------------|-------|

| May - - -      | 1325     | 1755               | 1795                          | 1295               | 1285     | 1865          | 915             | 2855  |
| June - - -     | 1158     | 2195               | 735                           | 1085               | 1305     | 1005          | 535             | 2225  |

Such being the most recent results of chemical analysis, the directors instruct me to conclude my letter with the following extract from the monthly report of Dr. Frankland to the Registrar General, dated 1st June 1867:—

"The water supplied by the East London Company from their reservoirs at Old Ford has been specially examined for present sewage contamination, (*i. e.*) sewage existing as such at the time the analysis was made, but no such contamination was detected."

And the following extract from the comments upon the quality of the waters respectively supplied by the eight metropolitan water companies during May 1867, contained in the weekly return of the Registrar General, dated 3rd June 1867:—

"The traces of previous sewage contamination were least in the East London."

The directors trust that this communication will satisfy their Lordships that the steps taken, and proposed to be taken, by the East London Waterworks Company with reference to their supply are, as affects quantity and in quality, all that can be expected, or are considered by their Lordships desirable.

To the Secretary of the  
Board of Trade  
(Railway Department.)

I have, &c.  
(signed) *E. Bates*, Secretary.

— No. 3. —

MEMORANDUM by Captain *Tyler*, on No. 1587 R.

I CANNOT, I think, do better, in commenting upon this letter, than consider *seriatim* the different allegations of the householders who memorialised the Board of Trade on the 13th November 1866, against the East London Waterworks Company, with the conclusions at which I arrived in my report of

of the 27th May, and the replies of the Company upon each. The first allegation was as stated in my report of the 27th May.

1. That the Company's works at Lea Bridge, "from whence the whole water supply of this portion of London is derived, were situated at a point where the water had been contaminated by the sewage of Broxbourne, Hoddesdon, Bishop's Stortford, Enfield, Ware, and many other places, comprising a population of many thousand inhabitants."

I reported that there was no doubt of the truth of this allegation, that the Company suffered from such contamination as well as the public; and they ought to receive, in the interest of a quarter of the population of the metropolis, all the assistance that Parliament can afford towards its alleviation.

The Company, in reply, refer to the recommendations of the Pollution of Rivers' Commission, and to those of Mr. Ayrton's Committee; and they state that, relying upon the introduction of a Bill in the next Session of Parliament, as recommended by the Board of Trade, they have now no step to take beyond earnest co-operation with their Lordships and the other river interests, in procuring satisfactory enactments from Parliament, and afterwards in carrying them into effect.

This course is probably the best they can take, and is preferable to the adoption of a partial remedy, as originally intended by them.

The second allegation was :—

2. That at the works of the Water Company (at Old Ford) there was an underground reservoir several feet below the River Lea, which was immediately contiguous to it, and that the water from the river, "which was no better than an open sewer," found its way into this reservoir.

I stated my opinion that this allegation had been proved, and that the water of the Lea (of the impure quality of which at this point there was no doubt) found its way into these covered reservoirs.

The Company now say : "The covered reservoirs at Old Ford cannot be to any considerable extent interfered with, or their depth or capacity lessened, until a further filtering area has been perfected on the Company's supply above them." And this is, no doubt, unfortunately the case; but they did, as they also state, after my examination of those reservoirs, proceed to introduce into their Bill, then before Parliament, certain clauses of a preventive and remedial character. This Bill, which has since become law, binds and empowers them to provide the further filtering area which they require to fill up one of those covered reservoirs, which it would be difficult to render water-tight, and to lessen the depth of the other covered reservoir, and render it water-tight to the satisfaction of the Board of Trade.

They have thus done voluntarily all that could be expected with a view to the remedy of this evil.

The third allegation was :—

3. That at the same works there were two open ponds, "where no sufficient care was taken to protect the water against impurity," and that water had been admitted from those ponds into the underground (covered) reservoir.

I reported in regard to this allegation. The truth of it is admitted by the officers and servants of the Company. The use of such unfiltered water, so stored in an uncovered reservoir, is indefensible, and was a distinct infringement of the provisions of "The Metropolis Water Supply Act of 1852," and I added, that a clay bank, 40 feet thick, had been placed in front of the sluice from the offending reservoir, in September 1866. The Company were thus precluded from that date from resorting to the open reservoirs in aid of their supply.

The Company now draw attention to the fact, that by clauses introduced by them into their Act of this year, provision is made for absolutely filling up these uncovered reservoirs within a limited period.

This further allegation having been proved, has therefore been properly met by the Company; and their action in respect to a matter in which they had gravely offended, is now quite satisfactory.

The fourth allegation was :—

4. That water "so used" had been "the principal, if not the sole, cause of the fearful mortality from cholera at the East end of London."

This was a subject which necessarily occupied a good deal of time in my inquiry, and space in my report. There were strong facts in support of the allegation. There was an extraordinary excess of cholera in the field of supply of the East London Company, and particularly in those districts supplied chiefly from the Old Ford works. There were, on the other hand, instances, such as the Limehouse Schools and the London Hospital, in which the use of water from the Old Ford works was notably not followed by cholera symptoms, and there were certain localities, chiefly on higher ground, or of the better class, supplied with water from Old Ford, but exempt, or nearly so, from cholera. As might be expected, the courts and houses principally affected were, as a general rule, in low-lying, ill-drained, unhealthy situations, in which the inhabitants would be most liable to suffer, whether water were or were not the producing agent. Upon a review of the whole of the evidence, I found that a case of grave suspicion had been established against the Company, and that while absolute proof in such a matter would be exceedingly difficult, a proximity to absolute proof, which I pointed out, had been nearly reached. Cholera matter would have found its way into the Lea at an early stage of the epidemic, and might have soaked from the Lea into the covered reservoirs, and I expressed an opinion that if, as was possible, choleraic poison did find its way into the Company's mains, it must have passed directly from the River Lea into the closed reservoirs, rather than from the Lea into the open reservoirs, and so to the district through the water that was so improperly supplied from the open reservoirs.

On this point the Company do not say much. The directors are conscientiously satisfied that the water neither caused nor continued the mischief. They do not believe this to be the real issue. They freely admit that, even if it were conceded on all hands that the water had no connection with the epidemic, the duty of protecting it from impurity, and of supplying it in the best practicable condition, would still be imperative upon them. This is undoubtedly true as regards the future; and when the Lea has been protected from contamination, and the other improvements contemplated have been carried out, there will certainly no longer be any cause for suspicion on account of cholera or other epidemic disease, against the water of the East London Water Works Company.

The above four allegations have reference to the quality only of the water. Chemical analysis, though valuable as an auxiliary, is unfortunately a very imperfect guide as regards the absolute condition of water. Chemical evidence avails but little in proof of purity when it is known that the Company's filtered water is more or less contaminated by soakage in the Old Ford covered reservoirs; that unfiltered stagnant water has frequently been served out to the district from the open reservoirs at Old Ford; and that the Lea is itself subject to so much pollution. Admitting that the Company are now doing, or are ready to, or have done, what they can towards removing these means of contamination, there still can be no question as regards the past, that the complaints of the memorialists on the subject of quality may fairly be said to have been well founded.

The fifth allegation was:—

5. That the water supply was deficient in *quantity*.

Insufficiency of supply was proved (1) at the Whitechapel Workhouse; (2) by the distribution of a supply proper for one house amongst a great number of houses, while the Company received payment for each, as at Butler's Buildings and Gibraltar Gardens; (3) at Miss Coutts' establishment in Columbia-square; (4) generally in 1864, when the Company were compelled, in consequence of prolonged drought, to reduce their supplies for several weeks at a time; (5) in the want of a Sunday supply to those who could not even obtain a sufficient supply on week days.

The Company now state that especial attention having been directed to the different cases of complaint, no complaint has since been received from the same parties. They promise, "if possible, increased vigilance on the part of their officers." Having "already explained" that "the giving of an intermittent supply on Sundays would be extremely inconvenient," they add that  
"the

“the suggested supplement on a Saturday evening would be still more difficult.”

They point out the steps they are now taking to increase their storage, their filtering area, and their pumping power, and to obtain a supplement from the Thames.

These measures are satisfactory, and it is only to be regretted that they were not adopted at an earlier period.

15 August 1867.

(signed) *H. W. Tyler.*

— No. 4. —

(R. 1587.)

Board of Trade to the Secretary of the East London Waterworks Company.

Sir,

Board of Trade (Railway Department),  
Whitehall, 18 September 1867.

I AM directed by the Lords of the Committee of Privy Council for Trade to acknowledge the receipt of your letter of the 29th July, explaining what the directors of the East London Waterworks Company have done, and propose to do, for the purpose of improving their water supply. This letter has been referred to Captain Tyler for his observations, a copy of which I am now to transmit for the information of your Directors, and from which it will be seen that the action taken and contemplated by the Company is, in the opinion of that officer, satisfactory.

With reference to the third paragraph of your letter, in which you state that your Directors feel constrained to reserve the right of objecting, whenever they consider it necessary, that the inquiry conducted by Captain Tyler travelled in several respects into matter beyond the legal jurisdiction of an inspector appointed by the Board of Trade; that his report is liable to the same objection; and that the very general and unqualified finding by their Lordships, “that the complaint of the memorialists is well-founded,” goes far beyond the conclusions of Captain Tyler’s report; I am to observe that My Lords are unable to perceive, either in Captain Tyler’s report, in your reply, or elsewhere, any sufficient grounds for the objections which, on the part of the Directors, you reserve the right of making at a future time, and cannot admit that Captain Tyler’s inquiry or report travelled beyond his legal jurisdiction, which would appear to have been intentionally made extensive by the terms of “The Metropolis Water Act, 1852,” directing “inquiry, examination, and report, with reference to the grounds of complaint as to the quantity or quality of the water supplied.”

With regard to your observations on what you term the “very general and unqualified finding” of their Lordships, I am to state that it was formally notified to the Company that “it appeared to the Board of Trade that the complaint of the memorialists was well founded” (in the precise terms of the 12th section of the Act), because all the allegations of the memorialists admitting of absolute proof had been found by Captain Tyler to be substantiated, while there were at least strong facts in support of the remaining (the fourth) allegation.

I am to add that, while preferring, with the Company, the extension of a system of constant supply, their Lordships are at the same time of opinion that a Sunday supply should in the meantime be afforded in all those cases in which, as has been clearly pointed out, it is so urgently required, and that no time should be lost in carrying out the various improvements which the Company have now obtained power, or bound themselves, to effect.

The questions of the conservancy of the Lea, of the Company’s obligations as regards fittings, and other questions connected with the subject-matter of this inquiry, will receive due consideration from their Lordships in the preparation of any further Bills which it may seem desirable to introduce into Parliament.

I am, &c.

(signed) *Robert G. W. Herbert.*

Board of Trade, acknowledging ditto; dated 27th February - - - - -                                                                                                                                                  | 59   |

## CORRESPONDENCE

RESPECTING

### THE SUPPLY OF GAS TO THE METROPOLIS.

(1.) *Suggestions for Amendment in the Metropolis Gas Act, 1860, left by a Deputation to the Board of Trade.*

Agreed to at a Meeting of Delegates from Vestries and District Boards in the Metropolis,  
20th December 1866.

Clause 2. Amend by substituting *three* for *six* in the third line from the end of the clause.

Clause 5. Amend so as to include all the Companies contained in the Schedule to the Act.

Clause 23. Insert the necessary clauses to enable local authorities to consume Gas by meter in the public lamps, and to pay for the same by average meter indication, limiting the number of meters to be attached to the lamps to 1 in 12 as a maximum, and 1 in 50 as a minimum.

Clause 24. Provide here that at all times the Gas shall be supplied at such a pressure as to balance a column of water one inch in height in any part of any consumer's premises.

Clause 25. Alter quality of Cannel Gas to 25 candles, and common Gas to 18 and 15 candles. Reduce grains of sulphur from 20 to 10, and absolutely prohibit sulphuretted hydrogen.

After Clause 26. Empower the President of the Board of Trade to appoint a Chemical Board at the expense of the Gas Companies, to regulate and alter, if necessary, the analysis and mode of testing the purity and illuminating power of all Gas supplied to consumers by the different Gas Companies, with power to fix the mode and places for testing the Gas; such Board to report to the President of the Board of Trade.

That the testing places to be provided by the Company, outside the City of London, shall be under the control and management of the Metropolitan Board of Works, and those within the City of London shall be under the control and management of the Commissioners of Sewers.

That the Gas Company shall be at liberty to send an officer to be present at the testing by the public officer; but the officer sent by the Gas Company shall not interfere in such testing.

That the Metropolitan Board of Works shall appoint officers to test the illuminating power and purity of the Gas supplied outside the City of London, and the Commissioners of Sewers shall appoint officers to test the illuminating power and purity of the Gas supplied within the City of London.

That such officers shall be authorized to test continuously, and report the result daily to the authority having appointed them; that every testing shall be registered and not the average only.

That the Metropolitan Board of Works and the Commissioners of Sewers shall each appoint a chief Gas analyst to direct the operations of the testing officers; that the chief Gas analysts shall receive daily reports, and submit and report on them weekly to the authority respectively appointing them.

If any complaint be made by the Gas Company as to the testing, there shall be an appeal to the chief analyst of the district, whose decision shall be final.

The weekly report, if unchallenged, shall be conclusive as to the experiments made.

That the expenses incident to the appointment of the testing officers and chief Gas analysts shall be paid respectively by the Metropolitan Board of Works and the Commissioners of Sewers.

That in the event of the Metropolitan Board of Works, or the Commissioners of Sewers, making default in appointing such officers for the period of twelve months, the President of the Board of Trade shall have power to appoint officers, charging the cost of the same to the Metropolitan Board, or the Commissioners of Sewers respectively.

Amend, alter, vary, or strike out such parts of clauses 27 to 34 in "Metropolis Gas Act, 1860," inclusive, as are inconsistent with the new testing clauses.

Amend Clause 37, by adding the words "to any other local authority or," before the words "to any private consumer," and by striking out the words, from the word "otherwise," to the end of the clause.

Amend Clause 38, by substituting the word "land" for "Companies," in the last line but two.

Clause 40. Amend this by substituting a maximum price of 3s. per 1000 for 15 candle Gas, 3s. 6d. for 18 candle Gas, and 4s. 6d. for 25 candle Gas.

Clause 41. Add an improved form of accounts as a schedule to the Act, giving power to the President of Board of Trade, to alter the form of account. The improved form should contain the following additional particulars:—1st. The cubic feet of Gas sold at each distinct price. 2nd. The average price paid per ton for each kind of coal, with the tonnage of each.

Clause 42. Amend this so as to compel the Companies to mark on their map the diameter in inches of all their mains laid under the public streets and roads.

Provide that a Public Auditor be appointed by the Metropolitan Board of Works, to examine the accounts of all the Companies, independently of their own auditors.

Provide for a thorough examination by the Board of Trade of the capital accounts of all the Gas Companies, so as to furnish materials for a schedule to the Bill, setting forth the real and proper amounts of capital, and the rates of dividend to which each Company is entitled at the present time.

Sections 9, 12, 17, 26, 32, 33, 34, 41, 46, 49, 51, 53, of the Metropolis Gas Act, relate to penalties which may be imposed upon Gas Companies, and the Committee of last Session recommended that a more summary process should be enacted.

Provide that no new works shall be erected within seven miles from St. Paul's.

Provide that existing works shall be removed, within five years, outside the same area.

Provide that if not purchased by the Metropolitan Board that existing Gas Companies shall effect an amalgamation, so as to limit the Companies to four, two north, and two south of the Thames, with stations for gas holders.

Capitalization of profits to be prohibited, and where any portion of existing capital has been so created, limitation of dividends thereon to be fixed at three per cent.

Provide clause for deducting compensation for accidents and penalties incurred, from 10 per cent. dividend, absolutely.

Provide clause that where any dispute arise between consumer and company, the disputant consumer should deposit a sufficient sum as a guarantee of his bonâ fide objection to the amount charged, and that pending the dispute the Gas shall be supplied as before by the Company.

Give powers to the Metropolitan Board of Works and the Commissioners of Sewers to purchase the works respectively of Companies supplying Gas outside and inside the City of London, and prescribe terms and conditions of supply, and how price is to be settled.

That should the Metropolitan Board of Works be empowered to purchase, it is desirable that the chief analyst should be appointed by the Board of Trade, and that the regulations here proposed should apply where applicable to the Metropolitan Board of Works.

Provide clauses adapting the 35th Section of the Gas Clauses Act to the Metropolis.

Provide that the appeal from the decision of a Vestry or District Board as to the laying down of new mains should be transferred from the Secretary of State for the Home Department to the President of the Board of Trade.

(2.) *Metropolitan Board of Works to Board of Trade.*

SIR,

Metropolitan Board of Works, Spring Gardens, S.W.,  
22nd December 1866.

In accordance with the wish you expressed to me at an interview on the subject of the supply of gas to the metropolis, I submitted two questions to my colleagues:— First, in the event of Her Majesty Government deciding to introduce a bill during the ensuing session for the more efficient control of the gas companies, and vesting that control in the hands of the Metropolitan Board, what conditions would it in their opinion be desirable to insist upon? Secondly, if on the other hand Her Majesty's Government should prefer to bring in a Bill to empower the Board to purchase the stock, plant, property, and interests of the gas companies, on what principle would the Board be prepared to negotiate for such purchase?

The members felt the importance attaching to the replies to be given these two questions, and referred them to a committee of their whole body, the better to obtain a free expression of opinion and a full discussion of the details. Their report was yesterday submitted to the Board, and I have the honour to inform you that the following resolutions were almost unanimously agreed to:—

“ That, in the event of the Government deciding to introduce a bill into Parliament for the purpose of establishing a more efficient control of the existing gas companies of the metropolis, and of vesting such control in the board, the conditions of such control should be as follows, viz.:—

“ That the maximum price of gas be fixed at 3s. 6d. per 1,000 cubic feet.

“ That the illuminating power be equal to 18 sperm candles.

“ That the gas supplied be of such purity as not to discolour turmeric paper, or paper imbued with acetate of lead, when such paper is exposed to a current of gas issuing for one minute from an orifice one quarter of an inch in diameter at a pressure of not less than half an inch of water.

“ That the gas supplied do not contain more than 16 grains of sulphur, in any form, in 100 cubic feet of gas.

“ That a chemical board of three members be appointed from time to time for the metropolis, at the expense of the gas companies, by the Metropolitan Board of Works, to regulate the analysis of the purity and illuminating power of all gas supplied to consumers by the different gas companies, with power to fix the mode and places for testing the gas; such chemical board to report to the Metropolitan Board of Works.

“ That every gas company do, within its own district and at its own cost, provide and maintain in a convenient situation, at a distance of not less than 1,000 yards from the works, a testing place, and all proper materials, apparatus, machinery, and instruments, for testing the illuminating power and purity of the gas by the public officer, and that such testing place be under the control and management of the Board.

“ That the gas company be at liberty to send an officer to be present at the testing by the public officer but not to interfere in such testing.

“ That each gas company have a separate testing place in the same building, under its own control, so as to be enabled to test the same gas at the same time.

“ That public officers, for the purpose of testing the illuminating power and purity of gas, be appointed by the Board, one for each district.

“ That such officers be authorized to test continuously, and report the result daily to the Board; that every testing be registered, and not the average only.

“ That a chief gas analyst be appointed by the Board to direct the operations of the testing officers; to receive daily reports, and submit and report on them weekly to the board.

“ That if any complaint be made by the company as to the testing, there be an appeal to the chief analyst, whose decision should be final.

“ That the weekly, if unchallenged, be conclusive as to the experiments made.

“ That the expenses incident to the appointment of such public officers be paid by the Board.

“ That a public auditor be appointed by the Board to examine the accounts of all the companies, independently of their own auditors.

“ That, in the event of the Government deciding to introduce a Bill into Parliament for giving the Board authority to purchase the properties of the several gas companies of the metropolis, the amount to be paid for such purpose should not, in any case, exceed a fixed charge of 6 per cent. on the present paid-up ordinary capital of the companies, the holders of which are now entitled to and in receipt of a dividend of

" 10 per cent., and that the Board should also have such powers as may be necessary for redemption.

" Your committee beg further to express their unanimous opinion that, in the event of purchase being decided on by the Government, the Board should make it a condition that the terms of purchase should be fixed by Parliament, and embodied in the Act to be passed for that purpose."

I believe all the points upon which you sought the Board's opinion are included in the foregoing propositions, but should there be any matter of detail upon which you seek further information, I shall be happy to wait on you to explain it.

I have, &c.

J. THWAITES,

Chairman.

The Right Hon. Sir Stafford H. Northcote, Bart. M.P.

(3.) *Board of Trade to Messrs. Baxter, Rose, Norton, and Co.*

Board of Trade, Whitehall, S.W.,  
28th December 1866.

GENTLEMEN,

I AM directed by the Lords of the Committee of Privy Council for Trade to transmit to you, for any observation on the part of the gas companies which you represent, the enclosed copy of a communication which has been received from the Metropolitan Board of Works on the subject of the supply of gas to the metropolis.

I have, &c.

Messrs. Baxter, Rose, Norton, and Co.

J. EMERSON TENNENT.

(Copy of No. 2 enclosed.)

(4.) *Messrs. Baxter, Rose, Norton, and Co. to Board of Trade.*

6, Victoria Street, Westminster Abbey, S.W.,  
31st December 1866.

SIR,

YOUR letter of the 28th inst., conveying the resolutions of the Metropolitan Board of Works respecting the London gas companies, for the companies to make their observations in reply, we duly received on the same day, and immediately had copies of it sent to each of the companies interested.

As there are 25 companies to communicate with, it will unavoidably occupy some time to collect the views of them all, so as to form some general reply, but we pledge ourselves that there shall be no unnecessary delay, and that their answer shall be sent at the earliest possible moment.

We are, &c.

Sir J. Emerson Tennent.

BAXTER, ROSE, NORTON, & Co.

(5.) *Board of Trade to Metropolitan Board of Works.*

Board of Trade, Whitehall, S.W.  
12th January 1867.

SIR,

WITH reference to the proposals concerning the supply of gas to the metropolis which the Metropolitan Board of Works have been good enough to furnish to the Government, I am directed by the Lords of the Committee of Privy Council for Trade to request that the Board of Works will have the goodness to furnish, in addition, the grounds on which those proposals have been based.

A similar request has been made to the gas companies, in order that the Government may have the facts fully before them; and, as time presses, I am to express a hope that the information now asked for may be furnished at once.

I have, &c.

Sir J. Thwaites.

T. H. FARRER.

(6.) *Board of Trade to Mr. R. Baxter.*

Board of Trade, Whitehall, S.W.,  
12th January 1867.

SIR,

WITH reference to the deputation on the subject of the metropolitan gas which waited on Mr. Secretary Walpole and Sir Stafford Northcote, I am directed by the Lords of the Committee of Privy Council for Trade to request that you will, on behalf of the gas companies, furnish the Board of Trade with the following information:—

1. A statement of the amendments in the present system to which the companies would accede.

2. A statement of the grounds on which the companies propose such amendments, and if those amendments should differ from the proposals which the Metropolitan Board of Works have made to the Government (copy of which is enclosed in my letter of the 28th December), of the grounds of such difference.

It will be obvious that without this information the Government are not in a position to do justice between the gas companies and the consumers, and as you must be perfectly familiar with the subject, I am to express a hope that the information requested may be furnished in the course of a very few days.

I have, &c.

R. Baxter, Esq.

T. H. FARRER.

(7.) *Metropolitan Board of Works to Board of Trade.*

Metropolitan Board of Works,  
17th January 1867.

SIR,

IN furnishing you with the grounds upon which this Board based their proposals for the future control of the gas companies of the metropolis, I presume that regard is to be had chiefly to our reasons for arriving at the conclusions we have specified in reference to maximum price, illuminating power, and purity.

We assume that the Legislature having adopted the principle of districting some six years since, the principle of competition, either for the field of supply or within the field, has been formally abandoned, and that consequently, subject to the maximum of 10 per cent. profits, the companies possess all the advantages of an unrestricted monopoly. In 1860, when the Districting Act was passed, the financial condition of the companies afforded small grounds for thinking that the maximum of profits would speedily be reached, but the economy effected in the machinery of distribution by districting the increased population and the more general adoption of gas for private use have made the parliamentary maximum the rule, without the consumer obtaining any corresponding advantage; in fact, some of the companies, in addition to 10 per cent. on their ordinary capital have, during the last six years, paid back dividends of 20 and 24 per cent. Obviously this state of things has the accompanying disadvantage of affording no place for skill and impeding improvement in the manufacture of gas. So long as the shareholders receive their maximum dividend there is no reason for the application of increased intelligence or greater economy, and we may anticipate carelessness and extravagance rather than cheaper gas. In illustration of our argument we would refer to the evidence of Mr. Baxter, the solicitor of the 13 gas companies of the metropolis before the Select Committee of the House of Commons last year by which it will be seen that the present operation of the Act of 1860 is first to take care that the dividend is kept to 10 per cent., then to form a reserve fund equal to one tenth of the nominal capital of the undertakers, and when the reserve fund is complete, and not till then, the excess of profit is applied to the reduction of the price of gas. Moreover, the companies can and do take out of the reserve fund any sum which may be necessary to make up 10 per cent. dividend, so that practically 10 per cent. dividend is guaranteed before any reduction in price can take place. The result of having arrived at a maximum of 10 per cent. is that from that moment it matters not to the company what the price of gas may be 4, 5, or 6 shillings, their profits being secured there does not remain any sufficient inducement to improve the manufacture or adopt more economical processes while the public is deprived of control over them; but for the fixing of a maximum price by the Legislature there is no reason, in the nature of things, why the price should not be 10s. per 1,000. The natural price of consumable articles we know to depend, first, on the demand, next on the supply. On grounds of public policy the supply of gas cannot be left to that natural

action, and the Legislature has created a monopoly in its favour. Deprived of their natural protection, the consumers are at the mercy of the suppliers, and legislation must again intervene to redress the balance, but the intervention in this case is the least advantageous to the consumer, its effect being only to guarantee a maximum to the producer, and that based upon the state of facts adduced at a particular time, and to deprive the consumer of all the advantages he would otherwise derive from the application of greater skill and ingenuity or the discoveries of science.

The Board feel that the interests of the companies having been so amply provided for, the time has now arrived for making some provision for those of the public, and they addressed themselves in the first instance to the question of price.

In fixing this at 3s. 6d. per 1,000 for 18-candle gas, they did not suppose that the Legislature, in assigning a maximum of 10 per cent., intended to guarantee a 10 per cent. dividend; yet that would be the practical effect of adopting the companies' suggestion of 4s. per 1,000 for 14-candle gas, inasmuch as gas of that quality is already supplied at that price, allowing also of the accumulation of a reserve fund. Doubtless that price of 3s. 6d. per 1,000 would require increased exertions on the part of the companies, improved apparatus, and higher skill to approach their present dividends; but we contend that the possession of a monopoly entitles the public to demand that those exertions shall be made; that they need not be made in vain is demonstrated by the experience of Mr. Clemenshaw, formerly manager of the works at Manchester, who

(Q. 1888-9.) gave evidence before the Select Committee of the House of Commons that 22 candle gas made from cannel coal could be supplied in London at 3s. per 1,000 feet. Dr. Letheby gave evidence before the same Committee that from 1852 to 1860 the (Q. 2073-6.) Great Central supplied the city with gas equal to 14·79 candles at 4s. At the present time 14-candle gas, from a difference in the burners employed, is only equivalent to the standard of 12-candle gas, as defined by the Act of 1860, so that in point of fact the illuminating power of 18 candles required by the Board at a price of 3s. 6d. per 1,000 is only equivalent to the 16-candle standard of 1860. Seeing, therefore, that Manchester had actually been supplied with 22-candle gas at 3s. per 1,000, and that in the opinion of a competent authority London could be supplied at the same rate, the Board felt that there was no impropriety in asking the Legislature to fix a price of 3s. 6d. per 1,000 feet for 18-candle gas.

Manchester is not, however, the sole case upon which we rest our proof. During the last session a very rigid inquiry took place before the referees, and afterwards before a Committee of the House of Commons, into the cost of gas at Brighton, where coals are dearer, the residual products less valuable, and the machinery of distribution, from the consumers being scattered, is more costly; yet the maximum price of gas settled by the Committee and inserted in the bill, was 3s. 6d. per 1,000 for 14-candle gas.

And as further proof, if any were needed, the South Metropolitan and Independent gas companies are at the present moment supplying their customers at the rate of 3s. 4d. per 1,000 cubic feet.

The degree of purity of the gas supplied is of hardly less importance than price and illuminating power; the presence of ammonia and sulphur, especially the latter, is injurious to books, furniture, and clothing, and above all, the human frame. So long ago as 1859 the Great Central had reduced the amount of sulphur to 16·4 grains per 100 cubic feet. Ten years of scientific progress ought at least to enable us to diminish that quantity, and although the use of lime as a purifier is undoubtedly an offensive process still, after undergoing a first treatment with peroxide of iron, the subsequent use of lime is comparatively inoffensive; it becomes really a question of cost. The evidence before the Committee of the House of Commons tends to show that (Q. 1064.) in this respect London compares disadvantageously with many country towns. In Paris the quantity of sulphur does not exceed 6 grains per 100 cubic feet. Mr. Hawksley, after numerous careful experiments, reports that for 1d. per 1,000 cubic feet the amount may be reduced to a minimum of 12 grains and a maximum of 16 grains per 100 cubic feet, which is the maximum approved by this Board. (Q. 1258.)

The other points set forth in the Board's previous communication are matters of administration for the convenience and dispatch of public business and affording the necessary guarantees for fairness, independence, and impartiality in carrying out the checks which may hereafter be imposed. They were fully considered by the Select Committee of the House of Commons on the London Chartered Companies Gas Bill, and are taken verbatim from their report.

Referring to the second alternative submitted, viz., that of purchasing the properties of the several gas companies, I am to state that the grounds upon which the Board based their proposition, that the purchase value should be estimated at the rate of 6 per cent.

on the paid-up capital, were, that considering the fluctuating nature of the property, its liability to depreciation by discoveries in chemical, physical, or mechanical science, and the chances of accidents, that 6 per cent. was a fair average rate on which to calculate its selling value, and when guaranteed on such solid security as the Board would give, would financially be equivalent in market price to the 10 per cent. paid with the present relatively hazardous security.

The Right Hon. Sir Stafford H. Northcote, Bart., M.P.

I have, &c.

J. THWAITES.

(8.) *Board of Trade to Mr. R. Baxter.*

Board of Trade, Whitehall, S.W.,  
31st January 1867.

SIR,

WITH reference to the correspondence on the subject of the metropolitan gas supply, I am directed by the Lords of the Committee of Privy Council for Trade to transmit to you a copy of a letter from the Metropolitan Board of Works, stating the grounds upon which they based their proposals for the future control of the metropolitan gas companies.

R. Baxter, Esq.

I have, &c.

T. H. FARRER.

(*Copy of No. 7 enclosed.*)

(9.) *Mr. R. Baxter to Board of Trade.*

6, Victoria Street, Westminster, S.W.,  
22nd January 1867.

SIR,

I HAVE the honour, pursuant to your letter of the 28th ultimo, in which you enclose a communication from the chairman of the Metropolitan Board of Works on the subject of the supply of gas to the metropolis, requesting any observations the gas companies might desire to make thereon, now to forward herewith a memorandum from the companies, which fully explains their views on the proposals for raising the illuminating power of gas from 12 to 18 candles, and at the same time to reduce the price to 3s. 6d., as well as with reference to the terms suggested by the Board for the purchase of the undertakings of the gas companies.

On the several minor details proposed by the Metropolitan Board, as well as in reply to the communication to me of the 12th instant, I hope to be able to forward a reply in the course of to-day or to-morrow.

The Right Hon. Sir Stafford H. Northcote, Bart., M.P.

I have, &c.

ROBERT BAXTER.

(*The memorandum (No. 1) referred to in the above letter will be found with Mr. Baxter's letter to the Board of Trade of the 30th January 1867 (No. 16 below), forwarding copies of correspondence between the Board of Trade and the Metropolitan Gas Companies.*)

(10.) *Mr. R. Baxter to Board of Trade.*

6, Victoria Street, Westminster, S.W.,  
23rd January 1867.

SIR,

I HAVE the honour to acknowledge the receipt of your communication of the 12th instant, with reference to the deputation on the subject of the metropolitan gas which waited on Mr. Secretary Walpole and Sir Stafford Northcote, and requesting to be furnished with the following information, viz. :—

1. A statement of the amendments in the present system to which the companies would accede.

2. A statement of the grounds on which the companies propose such amendments, and if those amendments should differ from the proposals which the Metropolitan Board of Works have made to the Government, of the grounds of such difference.

In reply, I am instructed to state that the gas companies, being sincerely desirous of affording to the Government all possible facilities for the consideration of the question of the supply of gas to the metropolis, are prepared to acquiesce in the amendments of the Metropolis Gas Act of 1860 specified in the memorandum (No. 2) accompanying this letter, and that the grounds of their difference on the heads touched upon from the Metropolitan Board will also be found in the same memorandum.

I am desired to add that, as the price charged for gas at Manchester and other provincial towns has been so frequently referred to, the matter is now under investigation on behalf of the companies, and they hope to be able to send you a memorandum on that subject in the course of a day or two, and if you should wish for further details or explanation upon any points the companies will be happy to furnish them.

I have, &c.

The Right Hon. Sir Stafford H. Northcote, Bart.

ROBERT BAXTER.

(The Memorandum (No. 2) referred to in the above letter will be found as one of the enclosures in No. 16 below.)

(11.) Board of Trade to Mr. J. F. Bontemps.

Board of Trade, Whitehall, S.W.,  
25th January 1867.

SIR,

WITH reference to the deputation which recently waited on the President of the Board of Trade on the subject of the supply of gas to London, I am directed by the Lords of the Committee of Privy Council for Trade to request that the corporation of the city of London will have the goodness to state in writing for the information of the Government what are their views and wishes with respect to the notice of a Bill given on behalf of the Government, and with respect to the proposals of the Metropolitan Board of Works (copy of which is enclosed).

Should the city desire any modification of the latter proposals, the Board of Trade will be obliged if they (the city) will be good enough to give their reasons.

The Board of Trade will be obliged by as early an answer as may suit your convenience.

I am further directed to transmit to you a copy of a memorandum which has been forwarded to the Board of Trade on behalf of the metropolitan gas companies, containing a statement of the concessions which they are prepared to make.

I have, &c.

J. F. Bontemps, Esq.

LOUIS MALLET.

(13.) *Messrs. Baxter, Rose, Norton, & Co. to Board of Trade.*

6, Victoria Street, Westminster, S.W.,  
26th January 1867.

SIR,

I HAVE the honour now to transmit to you the further communication of the gas companies respecting the supply of gas to the provincial towns, as mentioned in my letter to you of the 23rd inst.

I have, &amp;c.

ROBERT BAXTER.

To the Right Hon. Sir Stafford H. Northcote, Bart., M.P.

(Memorandum (No. 3) in No. 16 below, enclosed.)

(14.) *Metropolitan Board of Works to Board of Trade.*

Metropolitan Board of Works, Spring Gardens, S.W.,  
29th January 1867.

SIR,

I AM directed by the Metropolitan Board of Works to acknowledge the receipt of your letter of the 25th inst., transmitting a copy of a memorandum (No. 2) forwarded to the Board of Trade on behalf of the metropolitan gas companies, containing a statement of the concessions which they are prepared to make, and to tender you the thanks of this Board for the same.

I am also to request that this Board may be furnished with a copy or copies of the memorandum (No. 1) referred to in the second paragraph on page 4 of memorandum (No. 2), and stated to have been dated and forwarded to the Board of Trade on the 22nd instant.

I have, &amp;c.

JOHN POLLARD.

Sir J. Emerson Tennent.

(15.) *Board of Trade to Metropolitan Board of Works.*

Board of Trade, Whitehall, S.W.,  
31st January 1867.

SIR,

I AM directed by the Lords of the Committee of Privy Council for Trade to transmit to you for the information of the Metropolitan Board of Works a printed copy of the correspondence between this Board and the metropolitan gas companies, and I am to state, with reference to your letter of the 29th inst., that memorandum (No. 1) will be found embodied therein.

The Secretary,

T. H. FARRER.

Metropolitan Board of Works.

For the correspondence referred to in the above letter see below.

(16.) *Mr. R. Baxter to Board of Trade.*

6, Victoria Street, Westminster,  
30th January 1867.

Mr. Baxter's compliments to Mr. Farrer, and begs to forward him six complete copies of the correspondence between the gas companies and the Board of Trade. As they were all ready bound up, and Mr. Baxter had no loose copies of memorandum Nos. 1 and 2, he thought it better to send them bound as they are.

T. H. Farrer, Esq.

## LIST OF ENCLOSURES IN No. 16.

Letter from the Board of Trade (No. 3), enclosing Copy of a Communication from the Metropolitan Board of Works (No. 2). (These will be found on pages 6 and 5.)

Memorandum (No. 1).—Observations of the Gas Companies thereon, with Engineer's Estimates enclosed.

Letter from the Board of Trade, as to the concessions the Companies are willing to make (No. 6 above).

Memorandum (No. 2).—Concessions of the Companies, with Clauses as to appointment of Chemists.

Memorandum (No. 3).—Statement of the Gas Companies as to the supply of Gas in Provincial Towns.

## MEMORANDUM (No. 1) (Enclosed in No. 16).

*Observations of the Metropolitan Gas Companies upon the Letter of the Metropolitan Board of Works to the Board of Trade of the 22nd December 1866.*

The companies have had under their consideration the letter from the Board of Trade of the 28th ultimo, forwarding copy of a communication from the Chairman of the Metropolitan Board of Works, to the Right Honourable Sir Stafford H. Northcote for any observations the companies might have to make thereon. In reply, they respectfully submit the following remarks:—

1. The companies observe, that the chairman of the Metropolitan Board in his communication, states that the opinion of the Board has been sought:

1stly. Upon the conditions which it would be desirable to insist upon in the event of the control of the companies being placed in the hands of the Board.

2ndly. On what principle the Board would negotiate for the purchase of the gas companies' undertakings.

2. The companies venture to state that they possess their several undertakings founded on the principle of private enterprise, under the sanction of Acts of the Legislature, and upon conditions settled after three years parliamentary investigation, by "The Metropolis Gas Act, 1860." On the faith of those Acts they have expended a capital of between 6,000,000*l.* and 7,000,000*l.* sterling, and they cannot believe that the Government of this country will, as the Metropolitan Board evidently anticipate, so far interfere with what Parliament has deliberately settled as to seek to impose on the companies conditions dictated by the municipal body of the district which the companies are authorized to supply; or that Government will propose a Bill to compel the gas companies to surrender their undertakings to the Metropolitan Board of Works.

3. It should be borne in mind that although every ingenuity was exercised by their opponents to throw discredit upon the companies when before the Select Committee last session, yet the report of that Committee, adverse as it is in its tone, does not accuse the companies of having committed a single breach of their parliamentary obligations.

4. As London was the first city lighted by gas, the metropolitan gas companies have had to encounter all the risks incident to an entirely new system of lighting, and have had to contend with the difficulties by which it was for a long period encompassed. Although success has ultimately attended their operations, they have thus had to incur an outlay of capital in excess of that which might suffice for companies formed with the benefit of their experience.

5. The basis of remuneration for gas companies has been settled by Parliament, not for London only, but by a general law for the whole country, and it is only within the last few years that the companies have been reaping the fruits of a fifty years' enterprise.

6. The question of allowing the municipalities of the various corporate towns of the kingdom to supply gas, either in competition or otherwise, was brought before Parliament when the Public Health Act was revised in 1856, and although for a time entertained by Lord Llanover, who then, as First Commissioner of Public Works, had charge of the Bill, it was abandoned as well on the ground of its general inexpediency, as of its not being just or fair towards existing companies.

7. The proposition made, in the first instance, that the Corporation of London, and now that the Metropolitan Board, should undertake the supply of gas, obviously arises out of the success which has at last attended the operations of the metropolitan companies; and it is only when a profit appears to be no longer doubtful that the municipal bodies of London move in this direction.

8. The gas companies, however, proceed to consider the effect of the proposals contained in the letter of the chairman of the Metropolitan Board, with a view to giving the fullest information to the Board of Trade upon the subject.

The most important of these proposals are—

1stly. That if the gas companies are left in possession of their undertakings, they should be required to furnish gas at the maximum price of 3*s.* 6*d.* per 1,000 cubic feet, and of a minimum illuminating power of 18 candles, instead of 4*s.* 6*d.* and 12 candles, as fixed by the Metropolis Gas Act of 1860.

2ndly. That in the event of the Metropolitan Board being authorized to purchase the gas undertakings, the amount to be paid for such purchase shall not in any case exceed the fixed charge of six per cent. on the present ordinary paid-up capital of the companies now in receipt of 10 per cent., with a power of redemption which is not specified.

With respect to the first proposal—

9. The companies have submitted to a committee of their engineers the question of the increased cost which would arise from the adoption of a minimum illuminating power of 18 candles, and they append to this memorandum the report of such engineers. From this document it will be seen that the difference between the cost per 1,000 cubic feet of 18-candle gas, and 1,000 cubic feet of 12-candle gas is 1s. 2½d., without taking into consideration the serious question of the increase of cost of Wigan cannel hereafter more fully alluded to.

10. The quantity of gas now *made* by the several metropolitan companies may be taken at 10,440 millions of cubic feet per annum.

If the additional cost be reckoned only at 1s. 2d. per 1,000 feet upon this quantity, it will be found to amount to the annual sum of - - - £609,000

The gas *sold* by the various metropolitan gas companies may be taken in round numbers at 9,000 millions of cubic feet per annum. [The difference between the quantity made and the quantity sold is the loss unavoidably incident to the distribution of gas.]

The proposed reduction of price from 4s. 6d. to 3s. 6d. would amount to no less than 450,000l.

The companies have already reduced the price since the passing of "The Metropolis Gas Act," on an average 6d. per 1,000 cubic feet, and the public have thus been benefited to the extent of 225,000l.

The reduction of another 6d. per 1,000 cubic feet would deprive the companies of a further annual sum of - - - 225,000

The combined result of the additional expense of increasing the illuminating power and the reduction of the price from that now charged would therefore be an annual loss of no less than - - - 834,000

The total net profit of the metropolitan gas companies, as shown by the last Parliamentary return, was - - - 678,986

This sum deducted from the amount above stated, shows a deficit of - £155,014

11. The adoption of the course suggested by the Metropolitan Board would, therefore, not only take away every shilling of profit derived from the manufacture of gas throughout the metropolis, but would leave an annual deficit of 155,014l.

12. It should be stated here that the effect of the late reduction of 6d. per 1,000 cubic feet in the price of gas, made by nearly all the companies within the last 18 months, has been to leave scarcely sufficient profit to maintain the maximum dividend. The dividend of one of the largest companies has been reduced from 10 to 8½ per cent., and other companies have been compelled to trench upon their reserve funds to make up the required amount.

13. The above calculation is made upon the assumption that the increased quantity of cannel that will be required will be procurable, and at the price now being paid by the companies, viz., 27s. per ton. This, however, cannot be expected. The metropolitan companies now consume nearly a million and a quarter tons of coal a year, of which about 150,000 tons only are cannel. If the standard of illuminating power is to be raised as proposed, 900,000 tons of cannel will be required, being 750,000 tons more than at present, and in ten years' time this quantity will probably be more than doubled; for in order to produce 12-candle gas, the material required is the ordinary Newcastle coal, which is readily obtainable in London in large quantities, at the comparatively low average price of 16s. per ton, but to make 18-candle gas as much as three-fourths of the coal must be cannel.

14. In the spring of last year the gas companies thought it right to obtain the best information they could as to the yield of the cannel coal-fields, and among others they applied to Mr. R. Hunt, F.R.S., the keeper of the mining records of the Geological Museum in Jermyn Street. From his report, a copy of which is transmitted herewith, it will be seen that the fields yielding cannel are of very limited extent, and that the total quantity now raised in Lancashire of what is called the Wigan cannel, and which is undoubtedly the best adapted for gas making in London, is only 650,000 tons a year. The price of Scotch cannels in London is very considerably higher than Wigan, and they are for the most part not so suitable, especially on account of the excess of sulphur which they contain.

15. The Lancashire cannel-field is resorted to for the manufacture of gas by Manchester, Liverpool, and other great manufacturing towns in the north of England, and the yearly increasing demand for gas in those districts necessarily leaves a smaller quantity of cannel available for more distant places; consequently the price of cannel increases every year.

16. It is obvious that an increase in the demand of 750,000 tons of Wigan cannel, exceeding as it does the total quantity now raised, would lead to an enormous increase of price, and any increase of price must add proportionately to the estimated cost given by the engineers, and thus augment the loss to the companies beyond that above stated.

17. In the evidence given against the companies before the Select Committee of last session, it will be observed that in reply to question No. 3,655, Mr. Heron, the Town Clerk of Manchester, stated that in that city the standard of illuminating power had been *reduced* of late by the Corporation from *positive necessity*, because they could not procure an adequate supply of cannel, although within 20 miles of the Wigan district.

18. Dr. Letheby, the analyst for the Corporation of London, likewise stated frequently, and very confidently, that cannel coal could not be procured in London in sufficient quantities to supply London with cannel gas. (See answers to questions 1243, 1272, 1273, 1274, 1275, 1341, 1470, 1471, &c.)

19. The gas companies would observe that on examining the Gas Acts passed between 1856 and 1866 inclusive, amounting in number to 190, there are only 17 which require any higher standard of illuminating power than 14 candles, and of all these Acts there are only three which fix the maximum price under 4s. per 1,000 cubic feet; and with respect to those provincial towns so frequently alluded to as being supplied with gas upon lower terms, and of better quality than London, there are very special circumstances in each case, either with respect to the capital upon which the dividend is payable, or the local cost of materials or labour, which satisfactorily explain the reason, and show that the cases are not parallel with that of London.

With respect to the second proposal—

20. The suggestion is, that in the event of the Metropolitan Board being authorized to purchase the gas undertakings, the amount to be paid for such purchase shall not in any case exceed a fixed charge of 6 per cent. on the present ordinary paid-up capital of the companies now in receipt of 10 per cent., with an unspecified power of redemption (possibly to reduce the rate of 6 per cent.), and also in order to avoid the possibility of the Metropolitan Board having to pay for the purchase, a price to be fixed by arbitration, as is usual in cases where the sale is compulsory, that the terms of purchase should be embodied in the Act.

21. If Government should propose to establish a new precedent, and transfer the property of the metropolitan gas companies, without their consent, to the local authorities, the same rule will be applicable to all other gas companies throughout the kingdom, and the public faith of Parliament thus broken, as respects one class of private enterprise, will no longer be relied upon by any other classes. There are now about 1,100 gas companies, probably half that number of water companies, and about 600 railway companies, besides numerous other companies, all founded on the principle of private enterprise, and equally interested in the faith of Parliament being maintained. The property of all those undertakings must be seriously prejudiced should such a course of interference be once entered upon.

22. The report of the Select Committee of last session, although drawn up adversely to the companies, after their counsel had been informed that they need not offer evidence to rebut the attacks made upon them, does not go further upon this point than to suggest that facilities should be afforded for the disposal of the undertakings "to some body" or bodies representing the ratepayers of the metropolis, on such terms and conditions "as may be agreed upon, and as Parliament may seem fit to impose," thus clearly implying that no transfer was contemplated except by agreement. Moreover, in all those instances where corporations have become the purchasers of gasworks, the terms of sale have invariably been the result of mutual arrangement.

23. With reference to the proposal to pay the companies in 6 per cent. bonds for the compulsory transfer of their property now yielding 10 per cent., the companies can see no reason why their shareholders should have a less income secured to them than

that which they are legitimately entitled to, and have been for several years receiving. The proposal is the more unreasonable from the fact that the shares of the companies have been purchased for the most part by the present holders at premiums varying from 50 to 100 per cent.

24. Mr. Baxter, in his evidence of last session, stated that 6 per cent. might not be an unfair guarantee for the shares of a company on its first establishment, thus relieving it of all risks. But the metropolitan companies have all not only incurred the risks, but suffered the losses incident to such enterprises, and are fully entitled to maintain the statutory maximum dividend of 10 per cent., more especially as Parliament has made provision in "The Gasworks Clauses Act" for a reserve fund, the more certainly to secure the shareholders against any diminution of the maximum when once reached.

25. The companies call attention to the remarkable fact that whilst the Metropolitan Board suggest that a standard of 18 candles, with a reduced price of 3s. 6d. per 1,000 cubic feet should be imposed upon the companies if the supply of gas be continued by them, yet (as it clearly appears from the published debate on their resolutions) the Board, if they undertake the supply, do not contemplate taking upon themselves any such inconvenient obligations, but expect to be at liberty to fix their own standard of illuminating power and price.

26. This will be seen by reference to page 10 of the printed report of the debate herewith transmitted. Mr. Richardson, whilst declaring himself in favour of purchasing the interests of the companies, expressed his fear that if the Board were bound to a lower price, with an increased illuminating power, on the one hand, and on the other purchased the interests of the companies, they would be, as it were, burning both ends of the candle. To this the chairman replied, "No, we do not. If we control, we control" (alluding to the control of the companies), and if we purchase, we purchase, and all "these matters (meaning the illuminating power and price) will be in our own hands." The same line of argument is taken in other parts of the discussion, so that it would appear that the intention of the Board is to dictate to the companies conditions entirely ruinous, such as the Board of Works would not comply with themselves, in order to force the companies to surrender their property to avoid such ruinous obligations.

27. There are at present 13 independent companies, each one interested in producing gas at the cheapest possible price, and it is very unlikely that the Metropolitan Board would be able to exercise any greater economy than is now practised, or be able to supply gas upon better terms without loss to themselves.

28. It may be well however to consider the pecuniary result to the Metropolitan Board of their becoming the purchasers of the gas undertakings upon the terms proposed, and furnishing 18-candle gas at 3s. 6d. per 1,000 cubic feet.

|                                                                                                                                                          |         |
|----------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| It has been shown that to supply gas at that standard of illuminating power and price would entail the sacrifice of all profit, and an annual deficit of | £       |
| - - - - -                                                                                                                                                | 153,014 |
| To this must be added, for the interest of 6 per cent. on a share capital of 6 millions sterling                                                         | 360,000 |

|                                         |                                                                                                                                                                                                                         |         |
|-----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| Making a total annual loss of 513,014/. | to be raised by taxation on the ratepayers of the metropolis generally, in order that the Metropolitan Board may undertake the manufacture of gas and deprive the companies of four-tenths of their statutory profits - | 513,014 |
|-----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|

29. The companies do not here refer to the other proposals contained in the communication of the Metropolitan Board, because they may be more conveniently dealt with in a separate communication.

London, 21st January 1867.

## (ENCLOSURE in MEMORANDUM (No. 1.) Enclosed in No. 16.)

*Engineers' Estimate sent to the Board of Trade, with the Observations of the Metropolitan Gas Companies, 21st January 1867.*

## 18-CANDLE GAS.

ESTIMATE based on the Experience of the Year 1866 of the Cost of making 1,000 cubic feet of Gas, having a Minimum Illuminating Power of 18 Sperm Candles, the items including merely the cost of Coal and Fuel for carbonizing, the amount realized by the sale of coke, tar, breeze, and liquor being deducted.

All other expenses of wear and tear, management, rates, taxes, &c., being altogether omitted from this estimate, as the difference in cost between gas at 12 candles and gas of 18 candles is all that is required to be ascertained.

To produce gas having an illuminating power of 18 candles, it will be necessary to use three parts of Wigan cannel coal and one part of ordinary Newcastle coal.

| Dr.                                                                                                                   |   |        | Cr.                                                |    |      |
|-----------------------------------------------------------------------------------------------------------------------|---|--------|----------------------------------------------------|----|------|
| <i>Cost of Coal, and Fuel to carbonize the same.</i>                                                                  |   |        | <i>Amount received for Products.</i>               |    |      |

## 12-CANDLE GAS.

ESTIMATE based on the Experience of the Year 1866 of the Cost of making 1,000 cubic feet of Ordinary Coal Gas, having a Minimum Illuminating Power of 12 Sperm Candles, the items including merely the cost of Coal and Fuel for carbonizing, the amount realized by the sale of coke, tar, breeze, and liquor being deducted.

All other expenses of wear and tear, management, rates, taxes, &c., being altogether omitted in this estimate, as the difference in cost between gas of 12 candles and gas of 18 candles is all that is required.

| Dr.                                                                                                                                                  |   |       | Cr.                                              |    |      |
|------------------------------------------------------------------------------------------------------------------------------------------------------|---|-------|--------------------------------------------------|----|------|
| <i>Cost of Coal, and Fuel to carbonize the same.</i>                                                                                                 |   |       | <i>Amount received for Products.</i>             |    |      |
|                                                                                                                                                      | £ | s. d. |                                                  | s. | d.   |
| Coal, 1 ton, at 16s.                                                                                                                                 | - | 16 0  | By sale of 36 bushels of coke, at 3d. per bushel | 9  | 0    |
| Fuel to carbonize the same, 12 bushels at 3d.                                                                                                        | 3 | 0     | „ 9 gallons of tar, at 1d. per gallon            | 0  | 9    |
| Cost of coal and fuel -                                                                                                                              | - | 19 0  | „ 4 bushels of breeze, at 2s. per 42 bushels     | -  | 0 2½ |
| Value of products -                                                                                                                                  | - | 10 1  | „ 10 gallons liquor, at 1s. 6d. per 108 gallons  | -  | 0 1¾ |
|                                                                                                                                                      |   | 8 11  | Value of products -                              | -  | 10 1 |
| The cost, therefore, of one ton of coal is 8s. 11d., and as one ton will produce 9,500 feet of gas, it follows that the cost per 1,000 feet is 11¼d. |   |       |                                                  |    |      |

## MEMORANDUM (No. 2) (Enclosed in No. 16).

*Concessions of the Metropolitan Gas Companies in reply to the Letter of the Board of Trade,  
23rd January 1867.*

By the 13 Metropolitan gas companies included within the Metropolis Gas Act, 1860.

The companies accede to the following amendments of the Metropolis Gas Act, 1860:—

1. That the maximum price for gas be reduced by 6*d.* per 1,000 cubic feet on the price fixed by the Act of 1860, except as regards suburban districts, and subject to the power of increase under the circumstances defined in clause 40 of the Act.
2. That the illuminating power of common gas be increased from the standard of 12 to 14 sperm candles; the burner to be defined as proposed by Dr. Letheby, the analyst of the City of London Corporation, as follows:—"Unless prevented by frost or unavoidable cause or accident, or during any necessary repairs, all the common gas supplied by the company shall be of such illuminating power as to produce at a distance of not less than 1,000 yards from the works, from a metal argand burner, having an external diameter of 1·10 of an inch, and an internal diameter of 0·50 of an inch, and having 15 holes, each hole of the diameter of 0·05 of an inch, and with a 7-inch chimney, supported upon an ordinary gallery, without a perforated disc, and consuming five cubic feet of gas an hour, a light equal in intensity to the light produced by 14 uncased sperm candles of six to the pound, each burning 120 grains an hour, such burner being similar in every respect to the model deposited with the clerk of the Metropolitan Board of Works and the secretary of the company: Provided that the company and the Metropolitan Board of Works may from time to time agree upon any other mode of test by which to ascertain the illuminating power of the gas; and the company shall be liable during the continuance of every such agreement to have their gas tested in the manner prescribed by the agreement instead of the manner herein-before specially prescribed."

*Purity.*

3. That with respect to the general purity of the gas, this shall be determined by the chemical board herein-after mentioned.
4. That the quantity of sulphur to be allowed in 100 cubic feet of gas be also determined by the chemical board.
5. That for the purposes above mentioned, the Home Secretary or the President of the Board of Trade shall appoint three eminent chemists, who shall undertake the duties mentioned in the clauses accompanying this memorandum.

*Testing.*

6. That every gas company do, within its own district, and at its own cost, provide and maintain in a convenient situation, at a distance of not less than 1,000 yards from the works, a testing place with all proper materials, apparatus, machinery, and instruments for testing the illuminating power and purity of the gas by the public officer, and that such testing place be under the control and management of the Metropolitan Board.
7. That the gas company be at liberty to send an officer to be present at the testing by the public officer, but not to interfere in such testing.
8. That the gas company may have a separate testing place in the same building, under its own control, so as to be enabled to test the same gas at the same time.
9. That public officers shall be appointed by the Metropolitan Board for the purpose of testing the illuminating power and purity of gas in each district.
10. That such officers be authorized to test the gas continuously, and record the result; registering every complete examination, and reporting to the Metropolitan Board daily, and that a copy of such report be supplied to the company of the district, the books in which the records of the examinations are entered to be open to the inspection of the company.

11. That a chief gas analyst be appointed at the expense of the companies by the Home Secretary or President of the Board of Trade.
12. That if any complaint be made by the company as to the mode of testing, or the report of the testing officers, there shall be an appeal to the chief analyst, whose decision should be final.
13. That the report of the testing officers to the Metropolitan Board, if unchallenged within one week after a copy shall have been received by the company, shall be conclusive as to the experiments made.
14. That the expenses incident to the appointment of the testing officers be paid by the Metropolitan Board.

*Auditor.*

15. That a public auditor be appointed by the Home Secretary or President of the Board of Trade to examine the periodical accounts of the companies. If correct, he is to certify the same, and if incorrect to require their correction by the company, subject in case of dispute to an appeal to the Home Secretary or President of the Board of Trade.

The following is a statement of the grounds on which the companies propose the amendments above specified, and the grounds upon which some of them differ from those proposed by the Metropolitan Board :—

*Price and Illuminating Power.*

1 and 2. The companies propose these amendments of the Act of 1860 by way of concession to the public, these terms having been suggested by Dr. Letheby, the gas analyst and chief witness of the corporation of the city of London last session, and approved by the Select Committee as those which they considered were required from the companies, and with which the chairman stated the Committee were satisfied (see Speeches and Discussions before the Committee, 8th May 1866, page 28). The companies having once made the concessions are prepared to abide by them, although cannel coal, which is required to make 14-candle gas, has since risen in price, and the cost of common coal and labour, and of gas making generally, has also increased.

That the gas companies are not in a position to make any larger concessions is evidenced by the fact that three of the companies, at the present reduced price of gas, have been unable for the past half year to maintain their dividends out of their current profits.

With respect to the difference between the above concessions and the proposals of the Metropolitan Board on these points, the gas companies refer to their memorandum No. 1, dated and forwarded to the Board of Trade on the 22nd January 1867, in which it was shown that the proposals of the Metropolitan Board, requiring 18-candle gas at the price of 3s. 6d. per 1,000 cubic feet, would not only deprive the companies of every shilling of profit, but involve a deficit of upwards of 150,000*l.* per annum.

*Purity.*

3, 4, and 5. The companies propose that instead of amending the Act of 1860 by defining more precisely what amount of impurity the gas may lawfully contain, as proposed by the Metropolitan Board, the whole question contained in the 3rd, 4th, and 5th conditions proposed by the Metropolitan Board shall be settled by reference to competent scientific men, to be selected, not by the Metropolitan Board, but by the Home Secretary, as recommended by the Select Committee, or by the President of the Board of Trade. The companies, therefore, submit the accompanying clauses, which were suggested to the Select Committee of last session, and whereupon the committee recommended by clause 5 of their report that a chemical board should be appointed.

The companies are desirous of supplying the purest gas which can be made, and they also desire that the public should be thoroughly satisfied on this head.

With these views they believe that it will be far better for all parties to have this

really scientific question properly investigated and settled by competent authority, as proposed by the Select Committee, than by fixing an arbitrary standard as proposed by the Metropolitan Board of Works.

### *Testing.*

6, 7, and 8. There is no difference between these clauses and those proposed by the Metropolitan Board, as the companies have no objections to accede to them if the Board of Trade should desire it.

9. The clause proposed by the Metropolitan Board provides for the gas in each district being tested by a separate officer. It appears to the companies that this may be found an unnecessary expense, and may be inconvenient. The clause proposed by the companies provides for the testing of the gas supplied in every district, but admits of the same officer testing it in more than one district if found desirable.

10. The clause proposed by the companies differs somewhat from that of the Metropolitan Board, the object being to keep the chief analyst more in the capacity of an umpire between the companies and the Board, and to afford the companies fair access to the records of the testing officers.

11. That as the companies propose that the chief analyst should be constituted an umpire between them and the testing officer, they consider that such chief officer should be appointed not by the Board of Works but by the Home Secretary or President of the Board of Trade.

12. The companies submit that complaint should be open not only upon the mode of testing but upon the report of the testing officer, and in this respect the clause of the companies differs from that of the Metropolitan Board.

13. The companies consider that in order to enable them to detect any inaccuracy of the testing officers, a copy of his report should be sent to them as well as to the Board; this clause differs from that of the Metropolitan Board to the extent of providing for this deficiency.

14. The companies clause limits the expenses to be paid by the Metropolitan Board to those incident to the appointment of the testing officers only, while the clause of the Metropolitan Board includes also the expenses of the chief analyst.

### *Auditor.*

15. Although the appointment of a public auditor was not recommended by the Select Committee of last session, yet the companies will not object to such an appointment if the Government desire it. It is, however, submitted that as the public auditor would be in the position of an umpire between the companies and the Metropolitan Board, he should be appointed by an independent authority, the Home Secretary or the President of the Board of Trade, and not by the Metropolitan Board as proposed by them, and also that his duties should be defined.

With respect to the remaining proposals, viz.: relating to the purchase of the properties of the gas companies and the terms upon which such purchase should be made, the companies have no remarks to offer beyond those contained in their memorandum No. 1, of the 22nd January 1867, to which they beg leave to refer.

London, 23rd January 1867.

---

### ENCLOSURE IN MEMORANDUM (No. 2.)

*Clauses proposed by the Companies for the appointment of three Chemists to define the purity of the Gas supplied in the Metropolis.*

1. Within six months after the passing of this Act, and from time to time thereafter, it shall be lawful for Her Majesty's Secretary of State for the Home Department for the time being to appoint three practical chemists of eminence, with instructions to inspect the works of the several gas companies who are subject to the provisions of "The Metropolis Gas Act, 1860," and to investigate the process of manufacture carried on therein, with a view of ascertaining the means adopted by the said several companies of

purifying the gas supplied by them to the public, and the avoidance of nuisance arising therefrom to the neighbourhood in which such works are situate, and the said companies shall afford all proper facilities for the purpose of such investigation whenever required so to do by the said chemists.

2. That the said chemists shall have power to adopt all such tests as to them may be expedient, whether at the said works or elsewhere, for ascertaining the amount of sulphur and ammonia, and of sulphuretted hydrogen, or other impurity with which the gas supplied by the said companies respectively is charged, and of determining the minimum amount of such impurities with which, in their judgment, it is practicable to make and supply gas continuously with reasonable care from the existing works of the said companies at the prices limited by "The Metropolis Gas Act, 1860," and this Act, and without occasioning nuisance to the neighbourhood in which such works are situate.

3. That on the report of the said chemists it shall be lawful for the said Secretary of State to issue an order defining the minimum amount of sulphur and of ammonia, and of sulphuretted hydrogen, to be contained in the gas supplied by the said companies; and after communication of the said order to the said companies, and publication thereof in three successive weeks in the "London Gazette," the same shall, at the conclusion of the period by the said order to be fixed, and with reference to any alteration of works which may be necessary to carry such order into execution, be binding on the said companies as though the same formed part of this Act, and shall be capable of being enforced by all or any of the means provided by "The Metropolis Gas Act, 1860," or this Act, for securing the purity of gas to be supplied under the provisions thereof, and from and after the publication of the said order section 25 of "The Metropolis Gas Act, 1860," shall be and the same is hereby repealed.

4. That all the expenses of the said investigation by the said chemists, and of their report thereon, shall be paid by the said gas companies in proportion to the amount of gas supplied by them respectively in the year preceding such report; and in case of difference between them as to such proportions, the same shall be settled by some competent person to be appointed by the said Secretary of State, whose decision shall be final.

#### MEMORANDUM (No. 3) (Enclosed in No. 16).

*Statement of the Metropolitan Gas Companies as to the supply of Gas in Provincial Towns; sent to the Board of Trade 26th January 1867.*

The persons who have agitated for cheap gas in London, have laid great stress upon the low price charged in Manchester, Plymouth, and other provincial towns, and have perseveringly misrepresented that the price in London is quite exorbitant as compared with that in the provinces.

The metropolitan gas companies, having investigated this subject, beg to submit the following statement:—

#### With respect to Manchester.

1. Those who have conducted the gas supply in that town have never had any competition. The consumers in the metropolis and their representatives, the vestries, have ever clamoured loudly for competition as the proper means of obtaining cheap gas, and have encouraged as many as three companies in the city, and four in the best parts of the west end to lay pipes and supply gas in the same streets. The consumers of Manchester, on the contrary, have always sanctioned the principle of monopoly. One capital, therefore, instead of three or four, has done the work, and all the expenditure inseparable from competition has been avoided.

2. Unlike the case of London, where the public are indebted to joint stock companies for introducing the improved system of lighting and taking upon themselves all the risks, the supply of gas at Manchester was initiated by the local authorities, who obtained the necessary capital by borrowing on the security of the rates and at a low interest.

3. The capital so raised has been paid off out of profits from time to time during a long period of years, and this has been done to such an extent that, instead of the loans amounting to 810,183*l.*, the actual cost of the works,—plus the working capital,—the amount of the bond debt at the present time is only 347,472*l.*

|                                                                                                                                              |   |         |
|----------------------------------------------------------------------------------------------------------------------------------------------|---|---------|
| According to the printed accounts of the corporation, the amount represented to be standing as investment on the works at Midsummer 1866 was | £ | 502,699 |
| To this, however, must be added a sum written off in 1857 of                                                                                 | - | 127,860 |
| Also a further sum written off at different times for depreciation of works and plant, amounting to                                          | - | 129,624 |
| Making the cost of the works                                                                                                                 | - | 760,183 |
| Add the working capital, which is at least                                                                                                   | - | 50,000  |
| Total investment                                                                                                                             | - | 810,183 |
| The amount of the bond debt is                                                                                                               | - | 347,472 |
| The difference being                                                                                                                         | - | 462,711 |

4. A sum, therefore, of no less than 462,711*l.* of the capital of 810,183*l.*, really invested in the concern, has been provided out of the profits and is receiving no return.

It must not, however, be supposed that the profits which have admitted of this result being attained have been derived from the present low prices of gas. These were only arrived at in 1865. The following table will show the prices that were obtained before that date :—

| Date.    | Price per<br>1,000 cubic feet. | Date.    | Price per<br>1,000 cubic feet. | Date.    | Price per<br>1,000 cubic feet. |
|----------|--------------------------------|----------|--------------------------------|----------|--------------------------------|
|          | <i>s. d.</i>                   |          | <i>s. d.</i>                   |          | <i>s. d.</i>                   |
| 1829 - - | 12 0                           | 1842 - - | 7 0                            | 1855 - - | 5 0                            |
| 1830 - - | 12 0                           | 1843 - - | 6 6                            | 1856 - - | 5 0                            |
| 1831 - - | 10 6                           | 1844 - - | 6 6                            | 1857 - - | 5 0                            |
| 1832 - - | 10 6                           | 1845 - - | 6 0                            | 1858 - - | 5 0                            |
| 1833 - - | 10 6                           | 1846 - - | 6 0                            | 1859 - - | 5 0                            |
| 1834 - - | 10 3                           | 1847 - - | 6 0                            | 1860 - - | 4 6                            |
| 1835 - - | 10 0                           | 1848 - - | 5 0                            | 1861 - - | 4 0                            |
| 1836 - - | 9 0                            | 1849 - - | 5 0                            | 1862 - - | 4 0                            |
| 1837 - - | 8 6                            | 1850 - - | 5 0                            | 1863 - - | 3 9                            |
| 1838 - - | 8 0                            | 1851 - - | 5 0                            | 1864 - - | 3 6                            |
| 1839 - - | 7 6                            | 1852 - - | 5 0                            | 1865 - - | 3 2                            |
| 1840 - - | 7 0                            | 1853 - - | 5 0                            | 1866 - - | 3 2                            |
| 1841 - - | 7 0                            | 1854 - - | 5 0                            |          |                                |

It should be observed that these prices apply only to the township of Manchester, which is supplied at a lower rate than the other parts of the district. The prices previous to 1829 were at much higher rates, but of these the companies have no list.

6. It must be borne in mind, while looking at the above prices, that the situation of Manchester in relation to the coalfields has been most advantageous as compared with London, common coal having been procurable at Manchester at a very low figure, and cannel at a less price than the London companies have paid for ordinary Newcastle coal. This and the cheapness of labour, as compared with London, have allowed of the gas being manufactured at Manchester at a comparatively small expense.

7. It must be obvious that if the proprietors of gasworks can obtain for many years such prices as will yield a sufficient profit, not only to pay the authorized dividends or interest, but also to redeem a considerable portion of the capital, a much smaller price per 1,000 feet in subsequent years will suffice to pay dividend or interest on the limited amount to which the capital may be so reduced.

8. Thus, in the case of Manchester, taking the volume of gas produced, as shown by the report of the corporation, at 1,160 millions of feet, the profit required to pay the interest of 4 per cent. upon the reduced amount of 347,472*l.*, would be 2 $\frac{3}{4}$ *d.* per 1,000 feet. To pay a dividend of 10 per cent. (to which gas companies are entitled by the Gasworks Clauses Act) on 810,183*l.*, a profit of 1*s.* 4 $\frac{3}{4}$ *d.* per 1,000 feet would be required, which is nearly the same as the rate required by the London companies. If

the difference between the two rates of  $2\frac{3}{4}d.$  and  $1s. 4\frac{3}{4}d.$ , viz.,  $1s. 2d.$  were added to the present Manchester prices of  $3s. 2d.$  and  $3s. 8d.$ , it would make them respectively  $4s. 4d.$  and  $4s. 10d.$ , which is higher than the price charged in London.

9. The comparison of prices, therefore, assuming the Manchester capital not to have been paid off, stands in favour of the London companies. And if we compare the Manchester outlay of 810,000*l.* with the capital outlay of the London companies, we shall see that for every million feet made the Manchester capital is 690*l.*, whereas the London capital upon each million feet made is less than 620*l.*

10. From this it will be observed how little reason there is in the contention that the prices and capitals of the London companies are excessive.

#### With respect to Plymouth.

11. The case of this town is frequently quoted against the metropolitan companies, because it is said that the cost of coal is nearly the same at Plymouth as in London, and yet the gas at Plymouth is only  $2s. 9d.$  per 1,000 cubic feet, whilst in London it is  $4s.$

12. The circumstances of this case are simply these: the present Plymouth Gas Company purchased in 1848 the plant and works of the United General Gas Company, who had commenced operations at Plymouth but were not successful. The purchase was a very favourable one for the existing Plymouth Company, inasmuch as they gave 25,410*l.* for works which had cost the United General Company upwards of 40,000*l.* Moreover, the purchase money was payable by instalments over a series of years, and the Plymouth Company were enabled to pay it off out of the profits they then made, the price charged for the gas during that time being much higher than it is now, as will be seen from the following list, the present price not having been arrived at until 1864.

| Date.    | Price per<br>1,000 cubic feet. | Date.    | Price per<br>1,000 cubic feet. | Date.    | Price per<br>1,000 cubic feet. |
|----------|--------------------------------|----------|--------------------------------|----------|--------------------------------|
|          | <i>s. d.</i>                   |          | <i>s. d.</i>                   |          | <i>s. d.</i>                   |
| 1846 - - | 6 0                            | 1853 - - | 5 0                            | 1860 - - | 3 9                            |
| 1847 - - | 6 0                            | 1854 - - | 6 0                            | 1861 - - | 3 4                            |
| 1848 - - | 6 0                            | 1855 - - | 5 0                            | 1862 - - | 3 0                            |
| 1849 - - | 6 0                            | 1856 - - | 5 0                            | 1863 - - | 3 0                            |
| 1850 - - | 6 0                            | 1857 - - | 4 6                            | 1864 - - | 2 9                            |
| 1851 - - | 5 6                            | 1858 - - | 4 0                            | 1865 - - | 2 9                            |
| 1852 - - | 5 0                            | 1859 - - | 4 0                            | 1866 - - | 2 9                            |

13. Subsequently, also, from time to time the Plymouth Company have enlarged their works and added to their mains out of their annual profits, instead of raising share capital for the purpose; the result of these operations is, that at the present time the value of the plant and works of the Plymouth Company may be set down at 120,000*l.*, whilst their entire share capital amounts to little more than half that sum, viz., 62,500*l.* only.

14. Under these special circumstances with respect to capital, the profit required to pay the dividend is only  $7\frac{1}{2}d.$  per 1,000 cubic feet of gas sold; whereas to pay a 10 per cent. dividend on 120,000*l.* (with their make of gas, 190 millions,) more than  $1s. 3d.$  per 1,000 feet would be required.

15. With respect to the cost of manufacturing gas at Plymouth as compared with London, one very important particular in favour of the Plymouth Company has always been most unfairly withheld by those who make these unjust comparisons, viz., that the minimum illuminating power which the Plymouth Company is bound by their Act to supply is only *ten* candles, while the minimum standard imposed upon the metropolitan companies by the Act of 1860 is *twelve* candles.

16. A ton of the same common coal may cost as much at Plymouth as at London, but if the legal standard of the illuminating power of the gas to be supplied at the two places does not correspond the cases are by no means parallel, for a ton of the same common coal will produce a much larger volume of gas of a low illuminating power than of a higher one.

17. Wages and other expenses of manufacture are upon a low scale as compared with London—another advantage possessed by the Plymouth Company.

18. The various other cases of towns which have been relied on as being supplied at low prices are similarly capable of explanation, as being differently circumstanced from London, either in regard to their capital or the cost of coal, labour, and materials, or in some other special particular. The metropolitan companies would have proved this before the Select Committee last session, had not the Chairman told their counsel, when cross-examining one of the witnesses, that the committee did not consider the evidence that was being given was relevant to the inquiry, as the circumstances were not similar to those of London.

### *Gridley's Return.*

19. Since the Select Committee of last session made their report, a return relative to the supply of gas in the United Kingdom, moved for by Captain Gridley, has been published by the House of Commons.

20. From this return certain cases, being chiefly those of towns close to the coal-fields, have been picked out by the opponents of the metropolitan gas companies to show that the price charged in London is unreasonably high. The companies could as easily point out isolated cases to show that the London price is too low; for instance, the corporation of Middleton, according to their return, pay 5s. 10d. only per ton for coal, and charge 5s. per 1,000 feet for their gas, and there are many similar cases.

21. This return, so far from being unfavourable to the metropolitan companies, shows that a large majority of the provincial towns are charging higher rates than that of London.

22. Deducting the cases where no particulars are given, and the metropolitan and suburban companies, and nine cases where water is supplied as well as gas, there are 141 returns, viz. :—

|                                                                             |   |   |   |   |     |
|-----------------------------------------------------------------------------|---|---|---|---|-----|
| From companies                                                              | - | - | - | - | 131 |
| „ corporations                                                              | - | - | - | - | 10  |
| Of the 131 companies in 1865—98, or $\frac{3}{4}$ ths, charged 4s. or more. |   |   |   |   |     |
| „ „ 33, or $\frac{1}{4}$ th, „ under 4s.                                    |   |   |   |   |     |
| Of the 10 corporations - 6 „ 4s. or more.                                   | - | 6 |   | „ |     |
| „ „ - 4 „ under 4s.                                                         | - | 4 |   | „ |     |

23. Of the 33 companies charging under 4s., there are 29 who get their coal cheaper than the very lowest price paid by any of the metropolitan companies. The other four of the 33 companies are Plymouth (herein-before explained), Devonport, Ipswich, and Belfast.

24. With regard to the three last-mentioned towns, the price in Devonport was reduced from 4s. to 3s. 9d. in 1865 only, and the dividend of that company is less than 10 per cent.; at Ipswich the price was reduced from 4s. to 3s. 9d. as recently as July 1865; and in Belfast the charge ranged as high as 4s. 2d. as recently as 1864.

25. The charge of less than 4s. by the four corporations is at once explained by the situation of the towns, viz., Burnley, Bury in Lancashire, Carlisle, and Stockport.

26. Attention is respectfully called to the fact that in Edinburgh, one of the towns relied upon by the Select Committee in their report, and which lies within a very short distance of the rich cannel coalfields, the companies have been compelled to raise the price of gas from 4s. 4d. to 4s. 10d. per 1,000 cubic feet *since that report was made*. Many other companies in Scotland, notwithstanding their advantages in regard to obtaining cannel, have been obliged to adopt the same course, including the following instances :—

|             |        | s. | d. |    | s. | d. |
|-------------|--------|----|----|----|----|----|
| Aberdeen    | - from | 5  | 5  | to | 5  | 10 |
| Arbroath    | - „    | 5  | 0  | to | 5  | 10 |
| Forfar -    | - „    | 5  | 5  | to | 5  | 10 |
| Hamilton    | - „    | 5  | 0  | to | 5  | 10 |
| Perth -     | - „    | 4  | 2  | to | 6  | 8  |
| Musselburgh | - „    | 5  | 0  | to | 5  | 5  |
| Portobello  | - „    | 5  | 0  | to | 5  | 5  |
| Kirkcaldy   | - „    | 4  | 5  | to | 4  | 10 |

*Gas Acts from 1856 to 1866.*

27. With a view to ascertain what has been the practice of Parliament in legislating on this subject, the companies have examined all the Acts relating to gas which have been passed from 1856 to 1866 inclusive, and they find that the number of Acts is 190, and that of those Acts 17 only require a higher standard of illuminating power than 14 candles, and the cannel coalfields either lie close at hand or are within easy access of the towns to which those Acts relate.

28. Again, with regard to maximum prices, the companies would further point out that *three only of those 190 Acts prescribe a less price than 4s.*, and 24 only prices so low as 4s., or less than 5s.

29. From the foregoing facts it is clear that if the price and quality of the gas supplied in London were to be regulated by the price and quality of the gas supplied in the provincial towns instead of by the circumstances specially affecting the metropolis, the opponents of the companies would have no claim to be supplied on more favourable terms than at present, but on the contrary, the companies would have a right to raise their prices.

London, 26th January 1867.

---

(17.) *City Remembrancer to Board of Trade.*

SIR,

Remembrancer's Office,  
29th January 1867.

I HAVE to acknowledge the receipt of your letter of the 25th inst. (c. 164) addressed to Mr. Bontemps, the chairman of the Special Gas Committee of the Corporation of London, together with the enclosures.

I hope shortly to be able to forward to you the views and wishes of the corporation with respect to the notice of the bill in Parliament given on behalf of the Government.

I am, &c.

Sir J. Emerson Tennent, Bart.

WILLIAM CORRIE.

---

(18.) *Metropolitan Board of Works to Board of Trade.*

SIR,

Metropolitan Board of Works, Spring Gardens, S.W.,  
31st January 1867.

THE committee of this Board, to whom the subject of the gas supply of the metropolis stands referred, have had before them your letter of the 25th inst., enclosing a copy of a memorandum which has been forwarded to the Board of Trade on behalf of the metropolitan gas companies, containing a statement of the concessions which they are prepared to make. I am directed to inform you that the committee, having carefully considered the statements and observations of the companies, see no reason to alter their views as embodied in the communication from the chairman of this Board to the Board of Trade on the 22nd December last. The committee are of opinion that the so-called concessions of the companies with regard to the price and illuminating power of the gas supplied to the metropolis cannot in any way be considered as a concession, inasmuch as the companies are, at the present moment, charging 4s. per 1,000 cubic feet for gas of the professed illuminating power of 14 candles.

I have, &c.

JOHN POLLARD,  
Clerk of the Board.

Sir J. Emerson Tennent, Bart.

---

(19.) *City Remembrancer to Board of Trade.*

## METROPOLIS GAS ACT.

SIR,

Remembrancer's Office,  
11th February 1867.

THE engagements of the gentleman to whom the corporation referred your letter of the 25th ultimo (c. 164) have been so pressing and numerous that he has not yet been able to prepare the answer.

I hope to be able to forward it to you in a few days.

I have, &amp;c.

Sir J. Emerson Tennent, Bart.

WILLIAM CORRIE.

(20.) *Town Clerk of City of London to Board of Trade.*

SIR,

Guildhall, London,  
16th February 1867.

I HAVE the honour to acknowledge the receipt of your letter of the 25th ultimo, addressed to the chairman of the Special Gas Committee of the Corporation of the City of London, requesting that they will have the goodness to state in writing for the information of the Government what are their views and wishes with respect to the notice of a Bill given on behalf of the Government and with respect to the proposals of the Metropolitan Board of Works, and that should they desire any modification of the latter proposals they will give their reasons.

2. Before they deal with the two questions upon which the Lords of the Committee of Privy Council for Trade have been good enough to ask their opinion, the circumstances render it necessary that they should make a few observations on the general subject.

3. The metropolitan gas companies, both in the press and in certain memoranda numbered 1, 2, and 3, sent to you by their solicitors (which have since been printed and circulated), have represented that the object of those who in the last session of Parliament drew and are now drawing attention to the question of the supply of gas to the metropolis has been to ask the Legislature to break faith with persons who have invested their capital in gasworks, to confiscate their property, and to ruin their shareholders.

4. The corporation of London have too large an interest in the preservation of the rights of property and the maintenance of ancient privileges to allow themselves to remain under this imputation.

5. The facts as to gas supply being by this time well known, it will be sufficient to remind you that Parliament having granted to the gas companies for the first time in 1860 a monopoly of supply, and that monopoly not only having led to a large increase in the cost of gas both for public and private lighting, but having had for its immediate consequence that one man living in a street paid 3s. 4d. per 1,000 feet for his gas whilst his opposite neighbour paid 4s. 6d. and was positively debarred by Act of Parliament from getting precisely the same article at 1s. 2d. per 1,000 less, the corporation thought it right to ask Parliament in the last session to restore the condition of things existing before 1860, and allow them to compete in the supply of gas for the city. When the Committee of the House of Commons intimated that the result of this competition might be to drive the companies out of the field, and that some provision should be made for them, I was directed to and did at once apply to the companies to know upon what terms they would transfer their works to the city, which request remained without practical reply.

6. The corporation gave the necessary notices for a Bill in the present session, including therein a provision for the purchase of the existing interests supplying the city, but immediately they learnt from the parliamentary notices given by the Board of Trade that the Government proposed to take up the question in the general interest of the metropolis they directed the city's Bill to be withdrawn.

7. These facts sufficiently refute the charge of attempted confiscation, indeed it is to be regretted that in dealing with so large and important a question, the gas companies, or those who speak for them, do not use more fairness and candour in their statements, as it is obvious that the Government have additional difficulty in coming to a just and impartial decision when they have to find their way through conflicting statements.

8. One instance only may be taken in support of this assertion. In paragraph 17 of Memorandum (No. 1) it is alleged that Mr. Heron, the town clerk of Manchester, stated that in that city the standard of illuminating power had been reduced of late by the corporation from positive necessity, because they could not procure an adequate supply

of cannel, although within 20 miles of the Wigan district, and the question No. 3655 of the evidence before the Select Committee is quoted to prove the statement. Few would think it necessary under such circumstances to turn to the evidence itself to see what the actual facts are; great will be your surprise to learn that Mr. Heron's actual words are, "the standard has been reduced from the positive necessity of using a considerable quantity of coal; the standard was always for years above 22 candles, and now it is about 21 candles; it has been reduced slightly from the fact that we have been obliged to use a portion of coal, not being able to get all the cannel we required;" and when we turn to the very next page we find from the evidence of Mr. Lancaster the explanation to be (3690, 3691, 3692), that it was accidental and temporary, only through alterations at the gasworks, which prevented the usual winter stores being laid in, and the demand being great at that particular season; there was not a want of cannel coal, but simply of the rolling stock to carry it.

9. As it cannot fail to have had great weight, it may as well at once be said here that the most important statement made by the gas companies, namely that in paragraph 10, as to the cost of 18-candle gas, is utterly fallacious.

10. Five engineers have put their names to an estimate showing the net cost of one ton of coal for 18-candle gas to be 1*l.* 1*s.* 4*d.* The large cost is arrived at by underrating the value of the residual products. Among those who sign that estimate is Mr. Pritchard, the engineer of the Western Gas Company. Now it so happens this is the only one of the five companies which exclusively manufacture cannel gas, and for that purpose use the kind of coal spoken of (Wigan), and in the very last return made to Parliament by this Western Company, that for the year 1865 (see page 342, Appendix to Report of Select Committee), it appears that the residual products realized more than 25 per cent. of the cost of the coals (the actual figures being, cost of coals 38,077*l.* 10*s.* 6*d.*, sale of residual products 9,572*l.* 18*s.* 2*d.*); taking then the cost of the coals as given by the five engineers at

|                                                 |             |
|-------------------------------------------------|-------------|
| - - - - -                                       | £1 4 3      |
| and deducting the sale of the residual products | - - - 0 6 1 |

|         |           |         |
|---------|-----------|---------|
| we have | - - - - - | £0 18 2 |
|---------|-----------|---------|

instead of 1*l.* 1*s.* 4*d.* given by the gas companies as the net cost of one ton of coal; so that as each ton of coal makes 9,875 feet of gas, according to the engineers (though it is believed 10,500 is nearer the mark), we have  $18\frac{1}{2} = 218$  pence, and  $\frac{218}{9875}$  is equal to 22 pence, instead of 26 pence as brought out by them.

11. Taking then the quantity of gas made by the metropolitan companies to be, as given by them, 10,440 millions of cubic feet per annum, and admitting for present purposes that the cost of ordinary 12-candle gas is 11 $\frac{1}{4}$ *d.* per 1,000 as they allege, we have the difference of cost to be,

|                             |   |    |                  |
|-----------------------------|---|----|------------------|
|                             |   | s. | d.               |
| 1,000 feet of 18-candle gas | - | 1  | 10               |
| Do. 12-candle gas           | - | 0  | 11 $\frac{1}{4}$ |
|                             |   | 0  | 10 $\frac{3}{4}$ |

And not 1*s.* 2 $\frac{3}{4}$ *d.* as alleged by the companies.

12. In their statement the gas companies have calculated the extra cost at 1*s.* 2*d.* only, which gives an excess of 3 $\frac{1}{4}$ *d.*, i.e. 1*s.* 2*d.* less 10 $\frac{3}{4}$ *d.*, and taking 3 $\frac{1}{4}$ *d.* upon the before-mentioned quantity shows an error or misstatement of 141,375*l.* per annum.

13. Nor is this all, there is according to the companies a difference between the quantity they make and the quantity they sell of gas of no less than 1,440 millions of cubic feet per annum. The price they charge for gas varies between 6*s.* and 3*s.* 4*d.*, the mean is therefore 4*s.* 8*d.*, and the result is that this loss represents no less than 336,000*l.*, which amounts to a dividend of nearly 6 per cent. upon their entire capital, or 9*d.* per 1,000 feet in the cost of their gas, and being added to their former error of

|                                |            |
|--------------------------------|------------|
|                                | £141,375   |
|                                | 336,000    |
|                                | -----      |
|                                | 447,375    |
| turns their alleged deficit of | - 155,014  |
|                                | -----      |
| into a profit of               | - £322,361 |

or within a fraction of 5 $\frac{1}{2}$  per cent. upon their capital. They will ask why this loss is not allowed to them; the answer is, that with reasonable care as exercised elsewhere no such loss need be incurred, and one fact being worth many speculations, your attention is drawn to the evidence given by Mr. James Bell (4501-4593), from which it appears

that the West London Junction Gas Company having a meter at their works and another three miles off at the Great Western station there is no difference between the two meters in the quantity they register, conclusively establishing that gas mains can be laid so as not to leak.

14. I proceed now to address myself to the specific questions the Government have put to the city ; and, first, with respect to the notice for the Bill given by the Government, I am to state the corporation consider that if the Bill be drawn so as fully and distinctly to carry out the intentions expressed in the notice it will speedily lead to a greatly improved and more beneficial supply of gas for the city of London, and the rest of the metropolis ; at the same time it may well be that when its details are seen they may give occasion for the suggestion of amendments.

15. Q. With respect to the proposals of the Metropolitan Board of Works.

The corporation propose, in the first instance, to go through the suggestions made by that Board in the same order as followed by them, putting those suggestions in each case into the form which seems most desirable to the corporation, and then adding at the end such further considerations as seem to them essential.

| Proposals of Metropolitan Board of Works.                                                                                                                                                                                                                                                                                                                                                                                          | Amendments suggested by the Corporation of London.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. That the maximum price of gas be fixed at 3s. 6d. per 1,000 cubic feet.                                                                                                                                                                                                                                                                                                                                                         | Approved.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 2. That the illuminating power be equal to 18 sperm candles.                                                                                                                                                                                                                                                                                                                                                                       | Approved.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 3. That the gas supplied be of such purity as not to discolour turmeric paper, or paper imbued with acetate of lead, when such paper is exposed to a current of gas issuing for one minute from an orifice one quarter of an inch in diameter at a pressure of not less than half an inch of water.                                                                                                                                | That the gas supplied shall be <i>at all times</i> of such purity as not to discolour moistened turmeric paper, nor moistened paper imbued with acetate of lead, when such paper is exposed for one minute to a current of gas issuing from an orifice one quarter of an inch in diameter, <i>such orifice being in free communication with the pipes of the gas company, and having no contrivance interposed to increase or diminish the pressure naturally accompanying the ordinary supply of the gas.</i>                                                                                              |
| 4. That the gas supplied do not contain more than 16 grains of sulphur in any form in 100 cubic feet of gas.                                                                                                                                                                                                                                                                                                                       | That the gas supplied shall not contain more than the quantity of sulphur in each 100 cubic feet of gas which shall be declared proper and reasonable by the chemical board herein-after proposed.                                                                                                                                                                                                                                                                                                                                                                                                          |
| 5. That a chemical board of three members be appointed from time to time for the metropolis, at the expense of the gas companies, by the Metropolitan Board of Works, to regulate the analysis of the purity and illuminating power of all gas supplied to consumers by the different gas companies, with power to fix the mode and places for testing the gas ; such chemical board to report to the Metropolitan Board of Works. | That a chemical board of three members be appointed from time to time for the metropolis, at the expense of the gas companies, by the President of the Board of Trade, to regulate, and alter if necessary, the analysis and examination of the purity and illuminating power of all gas supplied to consumers by the different gas companies, with power to fix the mode and places for testing the gas ; such board to report to the President of the Board of Trade.                                                                                                                                     |
| 6. That every gas company do within its own district and at its own cost provide and maintain in a convenient situation, at a distance of not less than 1,000 yards from the works, a testing place and all proper materials, apparatus, machinery, and instruments for testing the illuminating power and purity of the gas by the public officer ; and that such testing place be under the control and management of the Board. | That every gas company shall within its own district and at its own costs provide and maintain in a convenient situation, at a distance of not less than 1,000 yards from each of its works for the manufacture of gas, a testing place and all proper materials, apparatus, machinery, and instruments for testing the illuminating power and purity of gas to the satisfaction of the chemical board ; and such testing places shall within the city of London, be under the control and management of the Commissioners of Sewers, and in the rest of the metropolis of the Metropolitan Board of Works. |
| 7. That the gas company be at liberty to send an officer to be present at the testing by the public officer, but not to interfere with the testing.                                                                                                                                                                                                                                                                                | Approved.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 8. That each gas company have a separate testing place in the same building under its own control, so as to be enabled to test the same gas at the same time.                                                                                                                                                                                                                                                                      | Approved.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 9. That public officers for the purpose of testing the illuminating power and purity of gas be appointed by the Board, one for each district.                                                                                                                                                                                                                                                                                      | That public officers for the purpose of testing the illuminating power and purity of the gas be appointed by the Commissioners of Sewers for the City of London, and by the Metropolitan Board for the rest of the metropolis.                                                                                                                                                                                                                                                                                                                                                                              |
| 10. That such officers be authorized to test continuously and report the result daily to the Board ; that every testing be registered, and not the average only.                                                                                                                                                                                                                                                                   | That such officers be authorized to test continuously and report the result daily to the chief gas analyst ; that every testing shall be registered, and not the average only.                                                                                                                                                                                                                                                                                                                                                                                                                              |

## Proposals of Metropolitan Board of Works.

11. That a chief gas analyst be appointed by the Board to direct the operations of the testing officers, to receive daily reports, and submit and report on them weekly to the Board.

12. That if any complaint be made by the company as to the testing, there be an appeal to the chief analyst, whose decision should be final.

13. That the weekly report, if unchallenged, be conclusive as to the experiments made.

14. That the expenses incident to the appointment of such public officers be paid by the Board.

15. That a public auditor be appointed by the Board to examine the accounts of all the companies, independently of their own auditors.

16. That in the event of the Government deciding to introduce a Bill into Parliament for giving the Board authority to purchase the properties of the several gas companies of the metropolis, the amount to be paid for such purpose, should not in any case exceed a fixed charge of 6 per cent. on the present paid-up ordinary capital of the companies, the holders of which are now entitled to and in receipt of a dividend of 10 per cent., and that the Board should also have such powers as may be necessary for redemption.

## Amendments suggested by the Corporation of London.

That a chief gas analyst be appointed by the joint agreement of the corporation of London and the Metropolitan Board of Works, or failing that agreement, by the President of the Board of Trade; such chief analyst to direct the operations of the testing officers, to receive daily reports, and submit and report on them weekly to the Metropolitan Board of Works, to the Commissioners of Sewers, and the vestries and district boards in the metropolis.

Approved.

Approved.

That a public auditor be appointed by the President of the Board of Trade to examine the accounts of all the gas companies, independently of their own auditors.

That the cost of the chief analyst and of the auditor be defrayed by the corporation of London and the Metropolitan Board of Works in such proportions as the Board of Trade may determine, and that the cost of the testing officers be defrayed by the Commissioners of Sewers in the city, and in the rest of the metropolis by the Metropolitan Board.

The corporation approve of this, subject to the power of purchase being so altered as to give it to the corporation of London, as to the gasworks supplying the city and to the Metropolitan Board of Works for the rest of the metropolis. The corporation being of opinion it is very desirable in the interest of economy and public convenience that the control over the breaking up of the streets should be vested in those who have the management and repairs of the streets, and who are responsible for their proper maintenance.

16. I have now to add certain additional suggestions beyond those made by the Metropolitan Board of Works, which seem to the corporation necessary by way of amendment of the Metropolis Gas Act of 1860.

17. The capital accounts of the gas companies should undergo a searching revision by an impartial accountant or surveyor, so as to ascertain and by the Act to declare upon what amount they are entitled to their 10 per cent. dividend.

18. That the chemical board shall fix the burner and standard for testing the illuminating power of gas.

19. At clause 23 insert the necessary provisions to enable the Commissioners of Sewers and all other local authorities to purchase their gas by meter for the public lamps, and authorize the system of average meter indication for the public lamps, limiting the number of meters which must necessarily be attached to the lamps to one meter for every tenth lamp.

20. At clause 24 provide that at all times the gas shall be supplied at such a pressure as to balance a column of water one inch in height in any part of any consumer's premises.

21. In clause 37 strike out from the word "otherwise" to the end of the clause.

22. In clause 38 substitute the word "lands" for the word "companies" in the last line but two.

23. Make clause 40 consistent with former proposals as to price and illuminating power.

24. At clause 41 add an improved form of account as a schedule to the Act, giving power to the President of the Board of Trade to alter the form of account from time to time. The improved form should contain the following additional particulars: 1st, the cubic feet of gas sold at each distinct price; 2nd, the average price paid per ton for each kind of coal, with the tonnage of each.

25. In clause 42 require the companies to mark on their official map the diameter in inches of all their mains and pipes (except service pipes) laid under the public streets and roads.

26. Alter the clauses relating to penalties, so as to make them more summary, and recoverable at the instance of any private person or public body consuming the gas of the company from which the penalty is sought to be recovered.

27. Provide that existing works supplying the city for the manufacture of gas shall be removed within five years to sites not nearer than two miles from any part of the city boundary.

28. Provide clause for deducting compensation for accidents and penalties incurred by the company from the declared dividend; but, nevertheless, the dividend shall rank as if paid in full, notwithstanding the deduction of such compensations or penalties.

17. I proceed now briefly to notice the difference between the proposals of the Metropolitan Board of Works and those of the corporation, with the reasons for the difference.

No. 3. The object is to ascertain the purity and not the pressure.

No. 4. Instead of laying down a strict limit to the quantity of sulphur, the corporation would prefer to leave this to the chemical board, because they are informed that considerable doubt exists amongst chemists as to the proper determination of sulphur in coal gas. As the chemical board will have full power to institute experiments, and otherwise inquire into this disputed point, it would seem more fair to the companies to allow the quantity to rest upon experimental determination.

No. 6. As to the establishment of the testing houses, the corporation propose that one of them shall be placed in each district supplied by a separate gasworks, because it is evident that the same gas company may make very different gas at different manufacturing stations. The Metropolitan Board of Works, on the other hand, seems to contemplate only one testing house for each separate gas company, no matter how many stations that company may have.

No. 10. To make the reports of the testing officers useful, they should be made to the chief gas analyst, and not to the local authority as proposed by the Metropolitan Board.

No. 14. As to the appointment of a public auditor, the corporation consider that, as this officer will exercise very important functions, he should be independent of all parties, and in order to secure this they consider he should be appointed by the Government.

18. Where the other proposals differ from those of the Metropolitan Board they are for continuing to the corporation their ancient control over public affairs within their jurisdiction.

19. The further provisions, Nos. 17 to 26, are such as experience has shown to be necessary for the protection of the consumers, and the first of these, No. 17, that for ascertaining and settling the capital accounts of the companies, the corporation hold to be indispensable in any new gas legislation, whatever form it may take; in proof of which your attention is drawn to the great discrepancies in the capitals of the various companies. The business of a gas company is to turn coal into gas and sell it, therefore the ton of coal is a very fair standard to take as a unit from which to estimate what the capital of a company should be, and taking this unit we find the capital of the company that has the smallest amount of capital to be equal to about 4.35 and the highest to be 10.89 for every ton of coal they distil, so that the capitals of the metropolitan companies vary more than 100 per cent.

20. Before concluding there are two broad features of the proposals of the Metropolitan Board approved of by the city and strenuously opposed by the companies to which it is right your attention should be specially directed; they are, the one the reduction of the maximum price of gas from 5s. to 3s. 6d. and the increase of its illuminating power to 18 candles, the other the proposed purchase of their works at a fixed charge of 6 per cent. upon their present capital.

21. As to the former, it is partly disposed of in an earlier part of this letter, but I am to add, it has come to the knowledge of the corporation that there is one patent, if not more, for using the waste heaps of coal in combination with shale oil for the manufacture of gas, which process has been tried with the most marked success at one of the largest London works, and from which 18-candle gas is produced at a cost scarcely exceeding ordinary 12-candle gas, and without wearying you by going through the evidence laid before last year's Committee as to price and illuminating power, or adducing the experience of other towns, it may be confidently asserted that two companies in London, the South Metropolitan and the Independent, sell their gas at 3s. 4d., and yet pay 10 per cent. dividend; and that one other company, the West London Junction, actually sells gas, and has done so since 1859, at 2s. 10½d., yielding a profit of 12 per cent. on their capital, and is prepared to supply any quantity at that price; this conclusively shows that when the companies, for their own sake, have to study economy and improved processes in the manufacture and distribution of gas in so concentrated a field as the metropolis, they will have no more difficulty in obtaining a fair profit from 18-candle gas at 3s. 6d. than the Brighton Company has in obtaining a profit from 14-candle gas at 3s. 6d., where coals

are dearer, the residual products less valuable by one-third, and the town dues nearly double the London coal tax or than in Edinburgh, which obtains 30-candle gas at 4s. 4d., equal to 18-candle gas at 2s. 7½d., for surely the extra charge of 10½d. per 1,000 cubic feet, equal to 8s. 9d. per ton of coal will suffice to pay the cost of carriage to London of the inexhaustible supply of Scotch cannel, to say nothing of the nearer fields of Wigan coal.

22. As to the other question, the terms of the proposed compulsory purchase of the works of the gas companies, I am to state the corporation approves of the suggestion that the amount and conditions of the purchase should, if possible, be settled in the Bill; and their opinion that 6 per cent. upon the present capital of the companies is a fair sum, is based upon the assumption that 40 per centum of the whole capital of the companies has been wasted or unprofitably employed, which the figures before quoted in paragraph 17 give strong reason for believing to be the case, as also that by their Bill of last year the corporation proposed to erect works capable of supplying annually 1,000 million feet of gas for an outlay of half a million sterling, and which, if erected at that cost, would make each ton of coal annually carbonized to be represented by a little more than 4l. sterling, while the aggregate capital invested in the gasworks of London at this time represents more than 6l. sterling on every ton of coal carbonized.

23. If, therefore, the capital of the gas companies is more than 40 per cent. in excess, and ought to be reduced by that amount, it is evident that 10 per cent. on 60l. would amount to the same thing as 6l. per cent. on 100l., and so on of any amounts in these proportions, however large; and if the corporation are right in their contention that the capital has been wasted or unprofitably employed, or is, in fact, not capital at all, but accumulated dividends, there is nothing in the terms of the Acts of Parliament under which the various companies erected their works which authorizes them to charge this loss or improvidence in perpetuity upon the public.

24. The corporation is aware, it is alleged, that the Act of 1860 is a parliamentary settlement which ought not to be disturbed, but without again repeating the reasons in paragraph 4 for seeking a revision at the hands of Parliament, it is well known that the public were not to be represented in this settlement. Many gentlemen, to whom all praise is due for their exertions, for three years endeavoured to get a proper Bill passed, but being subjected to the unwearied defence and opposition which the heavy purse of the companies enabled them to maintain, they at last retired from the conflict, and the companies moulded the Bill to their own views.

25. The companies in memorandum No. 3 (paragraphs 20 to 23) would have it believed that the price charged for gas when supplied by corporations is generally higher than when the supply is in the hands of companies; now in the only instance in England where the point is tested, that of Walsall, the Birmingham and Staffordshire Company (the wealthiest and most powerful in the Midland Counties) in order to do any business at all are obliged to charge less money by 8d. a 1,000 in Walsall, where they are in competition with the corporation, then they charge in all the rest of their district, including the town of Birmingham itself, and yet the corporation of Walsall have a large margin of profit from their gasworks. Unless, therefore, the Government should be of opinion that the Board of Works and the corporation of London are less able to manage gasworks than the corporation of Walsall, nothing but a large benefit to the public can arise by the proposed transfer of the works of the gas companies, the saving alone in the abolition of the present wasteful system of management by 13 different boards of directors with their 13 sets of officials being an item of serious consideration.

I have, &c.

Sir J. Emerson Tennent, Bart.

F. WOODTHORPE,  
Town Clerk.

(21.) Chartered Gas Company, Horseferry Road, Westminster, S.W.,  
26th February 1867.

SIR,

THE metropolitan gas companies have had under consideration the letter of Sir John Thwaites of the 17th ult., communicating to the Government, by desire of the Board of Trade, the grounds upon which the Metropolitan Board of Works have based their proposals relative to the supply of gas to the metropolis, and the letter of the Town Clerk of the City of London of the 16th inst., stating the views and wishes of the Corporation thereon.

Those letters not having been officially communicated by the Board of Trade to the gas companies, they conclude that the Government do not wish the correspondence on so

large a subject prolonged. The companies, however, cannot permit the assertions contained in those letters to pass unchallenged; and I am instructed to say that they are prepared to give them a distinct and absolute refutation; and therefore respectfully beg to express their hope that the Government will not found legislation on the *ex parte* statements which those letters contain.

I have, &c.

The Right Hon. Sir Stafford H. Northcote, Bart., M.P.

ROBERT BAXTER.

(22.) *Board of Trade to Messrs. Baxter, Rose, Norton, and Co.*

Board of Trade, Whitehall, S.W.,  
27th February 1867.

GENTLEMEN,

I AM directed by the Lords of the Committee of Privy Council for Trade to acknowledge the receipt of your letter of the 26th inst., in which you state that the letter of Sir John Thwaites of the 17th ult., and that of the Town Clerk of the City of London of the 16th inst., addressed to this Board on the subject of the supply of gas to the metropolis, not having been officially communicated by the Board of Trade to the gas companies, they conclude that the Government do not wish the correspondence on so large a subject prolonged.

In reply I am to inform you that the letters above mentioned were sent to you as agents for the gas companies, and that the Board of Trade desire that no inferences whatever as to the opinions concerning the contents of those letters may be drawn from the mode in which they were sent, or from the absence of any remarks upon them.

I have, &c.

Messrs. Baxter, Rose, Norton, & Co.

T. H. FARRER.

(23.) *Mr. R. Baxter to Board of Trade.*

6, Victoria Street, Westminster,  
2nd March 1867.

SIR,

I HAVE the honour to acknowledge the receipt of your letter, dated the 27th ult., in reply to mine of the 26th, and I am requested by the metropolitan gas companies to say that, having regard to the explanation which you have been good enough to afford them, they deem it to be more respectful to the Board of Trade that they should furnish statements in answer to the letter of the Metropolitan Board dated the 17th January, and that of the Corporation of London of the 16th ult., if there is still time to do so before the Metropolis Gas Bill is issued; and I am further requested to say that those statements will be completed and forwarded to you accordingly.

I have, &c.

T. H. Farrer, Esq.

ROBERT BAXTER.

(24.) *Mr. R. Baxter to Board of Trade.*

6, Victoria Street, Westminster, S.W.,  
8th March 1867.

SIR,

I HAVE the honour to transmit to you from the Metropolitan Gas Companies Memoranda No. 4 and No. 5 in reply to the observations of the Metropolitan Board of Works, and of the Corporation of the City of London, in pursuance of my Letter of the 2nd instant.

I have, &c.

T. H. Farrer, Esq.

ROBERT BAXTER.

(For Enclosures see over.)

## MEMORANDUM (No. 4) (Enclosed in No. 24.)

*Observations of the Metropolitan Gas Companies upon the Letter of the Metropolitan Board of Works to the Board of Trade of 17th January 1867.*

To the Right Honourable Sir Stafford Northcote, &c., Board of Trade, Whitehall.

Metropolitan Board of Works, Spring Gardens, S.W.,  
17th January 1867.

SIR,

IN furnishing you with the grounds upon which this Board based their proposals for the future control of the Gas Companies of the Metropolis, I presume that regard is to be had chiefly to our reasons for arriving at the conclusions we have specified in reference to maximum price, illuminating power, and purity.

The Metropolitan Gas Companies observe that this letter emanates from the Metropolitan Board, in consequence of an application from the Board of Trade, for the grounds on which the Metropolitan Board based the proposals contained in their letter of the 22nd December, 1866.

The chief proposals in that letter were, that the Companies should be compelled to supply gas of 18-candle power at 3s. 6d. per 1,000 feet, which would have the effect of sweeping off the whole of their profits, and leaving them to work at a dead loss of 150,000*l.* a year, as shown in the Companies' Memorandum, No. 1; and that, in default of the Companies submitting to terms which would entail the annihilation of their property, they should surrender their undertakings to the Board of Works, on payment of 60 per cent. of their present income.

The application of the Board of Trade was very fully considered and deliberated upon by a Committee of the whole of the Metropolitan Board, who at length resolved to send in this letter of the 17th January, as a complete statement of the grounds on which they consider themselves warranted in putting forward propositions, which, if adopted, would be disastrous to the Companies, and their shareholders, who, on the faith of Parliament, have subscribed the funds for the purpose of supplying gas to the inhabitants of the metropolis.

1. We assume that the Legislature, having adopted the principle of districting some six years since, that the principle of competition either for the field of supply or within the field has been formally abandoned, and that, consequently, *subject to the maximum of 10 per cent. profits*, the Companies possess all the advantages of an *unrestricted monopoly*.

Before commenting on this paragraph it may be found useful, as the position of the Metropolitan Gas Companies is so much misrepresented, that the following short history should be furnished.

The first Act ever passed relating to the supply of gas was granted to one of the London companies in 1812. From that date to 1842, nine other Acts were passed for the Metropolis, but Government, foreseeing the evils that would result from competition, insisted in every case upon each Company being confined to a separate district. In 1842 Parliament for the first time departed from this regulation, and passed an Act authorizing two Companies for the same district. Several other Acts were subsequently passed on the same principle, and the companies over the greater part of the Metropolis were then thrown into active competition with each other. There were commonly two or three companies competing in the same street, and as many as four in Regent Street, and some of the principal thoroughfares in which there are no less than twelve parallel mains. The streets were constantly being opened merely to change the supply from one company to another on the whim of the consumer, and the complaints by the public of the interruption caused to the traffic were general from all parts of the Metropolis. This state of things continued about twelve or fourteen years; the dividends of some of the old companies, which had previously paid 8 and 10 per cent., fell to 3 and 5 per cent., while some of the new companies got no dividends at all.

Although the later Acts, as before stated, *authorized* several Companies to supply gas in the same district, none of the Acts made it *compulsory* upon the Companies to afford a supply anywhere; the Companies had full power to abandon any portion of their districts, or to divide them among themselves in any way they pleased. The Companies at last finding, that if they were to have a fair return upon their capital one of two things must be done to obtain it, viz., either the price of gas must be raised by a general

agreement amongst themselves, or else the expenses must be reduced by an arrangement of districts, selected the latter course as being the most beneficial one for the public.

During the time of competition contracts for the street lighting were taken at ruinously low prices, owing to the power which the vestries possessed of admitting any new company who would underbid the companies already supplying the district, for the purpose of gaining admission to compete for the private lighting. After the districting arrangements had been carried out and competition had ceased, the unremunerative prices for the public lighting were of course raised to a rate more nearly approaching the rate charged to private consumers. The parish authorities felt themselves aggrieved at this, appointed delegates to represent them, and got up an agitation which resulted in a *three years* parliamentary inquiry, commencing in the year 1858.

The companies, when they made these arrangements, did not raise the price to the private consumers, but maintained it at the low price to which severe competition had reduced it; nevertheless, many of the consumers, finding that they could no longer change at pleasure the supply from one company to another as they had been accustomed to do, extorting more favourable terms on every change, considered themselves also aggrieved, and joined in the agitation.

The then Home Secretary, Sir George Cornewall Lewis, when appealed to, frankly stated that the companies in districting had adopted the right system, and the Select Committee appointed by the House of Commons to inquire into the whole matter were of opinion that the companies had not been guilty of any misfeasance, but considered that the companies should be placed under uniform regulations.

Reverting, however, to the letter of the Metropolitan Board—from paragraph No. 1, it would naturally be inferred that the exclusive supply of their several districts was first granted to the companies by the “Metropolis Gas Act, 1860,” and further, that such grant was obtained by the *companies*, and without any restrictions, except a limitation of profit to 10 per cent., but the facts are precisely the reverse.

The districting arrangements were made by the companies themselves some years before the passing of the Act, to put an end to the evils which resulted alike to the public and the companies from competition.

All that the Act did for the companies was to sanction the continuance of a state of things which had manifestly conduced to the benefit of all parties, as was proved by the companies’ opponents in 1860.

The Act did not confer upon the companies a single privilege of any description; it was simply a *controlling Act*.

Moreover the Act was promoted, not by the companies, as might be supposed from the statement of the Metropolitan Board, but by the delegates from the metropolitan vestries, for the sole object of benefiting the consumers, by imposing upon the companies every possible obligation that they could persuade Parliament to adopt.

At the time the Act was applied for there were, as there are now, 13 companies supplying the districts defined in the Act; each company had its own set of regulations, and no two companies had the same.

The bearing of the Act upon the several companies will be seen from the following statement.

Before the Act five companies only out of the 13 were subject to a maximum price, which had been fixed as follows:—

|                                                  |   |         |   |   |
|--------------------------------------------------|---|---------|---|---|
| 2 companies limited to 6s. per 1,000 cubic feet. |   |         |   |   |
| 1 company                                        | “ | 5s. 6d. | “ | “ |
| 1                                                | “ | 5s.     | “ | “ |
| 1                                                | “ | 4s.     | “ | “ |

Maximum price.

(The illuminating power in this last instance being equal to 10 sperm candles only.) The other companies were under no restriction and might charge any price they saw fit, and competition having ceased there was nothing to prevent their doing so.

*The Act restricted all the companies to one uniform maximum price of 4s. 6d. per 1000 cubic feet, for 12-candle gas, and 6s. for 20-candle gas, except under special circumstances.*

Before the Act six companies only out of the 13 were limited to the 10 per cent. dividend. Dividends. and even these six were at liberty to make up their back dividends to 10 per cent. for any period they had previously been below that rate. The other companies were under no such regulations, and might have paid any dividends they could make.

*The Act limited the dividends of all the companies to 10 per cent., and the making up of back dividends to six years.*

- illuminating power. Before the Act four companies only out of the 13 were under any regulation as to illuminating power. Of these four,  
 1 had a standard of 12 sperm candles.  
 3 " " 12 wax " (equivalent to 10 sperm only).  
 The other companies might supply gas of any quality they pleased.  
*The Act made all the companies subject to one uniform standard of 12 sperm candles for common gas, and 20 sperm candles for cannel gas, and to a heavy penalty in case of default. This, it should be observed, is a minimum standard. The gas must, therefore, never be below it. The consequence is, that the companies have to supply gas of the average quality nearly two candles richer.*
- Purity. Before the Act none of the companies were subject to any regulations as to purity.  
*The Act placed them all under very stringent regulations in this respect, such as had never before been applied to any other company, and made them subject to the same penalty in case of default as for deficient illuminating power.*  
*The Act made it compulsory upon the companies to establish testing-rooms, for testing the quality of the gas. It also made it compulsory upon the local authorities of every district to do the same, and to appoint Examiners to make the tests.*  
 More than one-half of the local authorities in the Metropolis have not complied with this enactment to the present time.  
*The Act authorizes any consumer to call in the Examiner to test the quality of gas supplied upon the consumer's own premises, and upon its being found below the standard, he may complain to a magistrate, who is empowered to fine the company for the default.*
- Supply. The power of lighting, in their Parliamentary limits, being permissive only, every company had the right to refuse to extend their mains or to supply gas in any street they pleased, and to refuse to light any premises they chose in the streets actually occupied by their mains.  
*The Act made it for the first time compulsory on the companies to furnish a supply wherever required within their district, for lighting either street burners or private ones, and placed them under a penalty for failing or neglecting to do so.*
- Constant supply. Before the Act two only of the 13 companies were under any obligation to keep up a constant supply of gas, day and night, in their mains.  
*The Act made it compulsory upon all the companies to do so, and this entailed upon the companies considerably increased expense.*
- Meters. Before the Act none of the companies were compelled to supply meters; some did, and some did not.  
*The Act for the first time made it compulsory upon the companies to supply them, and at certain fixed rates, and a penalty was imposed in the case of refusal. Several of the companies had to incur another considerable outlay to comply with this regulation.*
- Service pipes. Before the Act none of the companies were under any regulations as to service pipes; some charged the consumer for the whole length of pipe laid down between the main and his premises, some for a portion only.  
*The Act made it compulsory upon all the companies to supply and lay down service pipes whenever required to the extent of 150 feet, at their own expense, with a penalty in case of neglect or refusal. This imposed a heavy annual expenditure upon the companies.*
- Publication of accounts. *The Act requires the companies to furnish the Home Secretary with an annual account, to lay before Parliament, showing the actual state and condition of each company as to capital, revenue, and dividends, in any form he may dictate, and to furnish such other information as he may require, AND IN THE GAS WORKS CLAUSES ACT, 1847, to which the majority of the companies were then for the first time made subject, there is a power for the magistrates, on the application of two consumers, to appoint an accountant for the purpose of examining the books and to enforce a reduction in the price, if the profits should be ascertained to exceed the prescribed rate.*
- Home Secre- to enforce *The Act empowers the Home Secretary, on complaint of deficient quantity, quality, or purity of the gas by the local authorities, or any 20 consumers within*

*the district of any one company, to have the company's works inspected and the grounds of complaint removed; and should there appear to him to have been any undue neglect, he may direct that the company be prosecuted by the Attorney-General; and, moreover, the Home Secretary, in the event of any company neglecting or not being in a condition to fulfil the obligations imposed by the Act, has full power to take away any part of its district, and transfer it to some other company.*

provisions of  
the Act.

Thus the very tenure of their districts by the several companies is dependent on their accurate fulfilment of the conditions imposed upon them by the Act.

This is what the Metropolitan Board are pleased to call "*Unrestricted Monopoly.*"

2. In 1860, when the Districting Act was passed, the financial condition of the companies afforded *small grounds* for thinking *that the maximum of profits would speedily* be reached, but the *economy* effected in the machinery of distribution by *districting*, the increased population, and the more general adoption of gas for private use, have made the Parliamentary maximum the rule, *without the consumer obtaining any corresponding advantage*, in fact some of the companies in addition to 10 per cent. on their ordinary capital, have, during the last six years, paid back dividends of 20 and 24 per cent.

If there were "*small grounds*" for thinking that the maximum profit would soon be reached, as here asserted, there were of course, "*small grounds*" for expecting a reduction in the price of gas, for the price was only to be reduced on the maximum profit being reached, and the back dividends and reserve funds being made up.

But in fact there is nothing to warrant this assertion of the Metropolitan Board; on the contrary, it was shown in evidence, in 1860, by the companies' opponents, that as a consequence (to adopt the words of the Board) "*of the economy effected in the machinery of distribution by the districting*" (which the vestries complained of,) the dividends of all the companies were improving every year, and 10 per cent. was actually being then paid by some of the companies; and on a very large amount of the share capital, that rate had been paid for many previous years.

Although this improved state of things existed, the companies have been far from obtaining all the benefits to which the Act entitled them before reducing their prices. Two companies only, out of the 13, have been able to complete their reserve funds up to the present time, and the majority have neither created any reserve fund at all, nor been able to make up their back dividends; nevertheless, the price of gas has been reduced in all parts of the metropolis, and to a rate which, in consequence of the expenses of manufacture having recently increased, *proves to be insufficient to maintain the dividends on a very large portion of their share capital.*

The sum authorized to be set apart as reserve fund, viz., *one-tenth* of the nominal capital of the company, is about equal to one year's maximum dividend, and this on the present share capital amounts to 570,000*l.*, whereas the amount actually set apart as shown by the latest published returns is less than 160,000*l.*

The amount outstanding on back dividends for the six year's immediately preceding the passing of the Act, was 667,000*l.*, whereas the amount paid off up to the present time is less than 250,000*l.*

The reductions that have been made in the price of gas from time to time since the passing of the Act, have resulted in a saving to the public of more *than half a million sterling.*

And yet the Metropolitan Board can assert that "*the consumers have had no corresponding advantage,*" and that the companies have paid back dividends of 20 and 24 per cent.

3. Obviously this state of things has the accompanying disadvantage of affording no place for skill, and impeding improvements in the manufacture of gas. So long as the shareholders receive their maximum dividend, there is no reason for the application of increased intelligence *or greater economy*, and we may anticipate carelessness and extravagance rather than cheaper gas.

This assertion on the part of the Metropolitan Board is wholly unjustifiable as applied to the companies, but it is precisely the argument which the consumers might reasonably apply to the Metropolitan Board if that body were allowed to purchase the undertakings of the companies. The Board having no individual interest in developing their resources, would, it might with some reason be said, never make any improvement at all, and, to use their own terms, "*carelessness and extravagance would be the result, rather than cheaper gas.*"

If, however, it is considered that all stimulus to exertion and economy is lost after the

maximum profit is reached, it is suggested that this objection might be readily obviated by granting to the companies an increase of dividend rateably with a reduction of price a principle which has already been adopted in some late Provincial Acts.

4. In illustration of our argument we would refer to the evidence of Mr. Baxter, the solicitor of the 13 gas companies of the Metropolis, before the Select Committee of the House of Commons last year, by which it will be seen that the present operations of the Act of 1860 is, first to take care that the dividend is kept to 10 per cent.; then to form a reserve fund equal to one-tenth of the nominal capital of the undertakers, and when the reserve fund is complete, and not till then, the excess of profit is applied to the reduction of the price of gas. Moreover, the companies can and do take out of the reserve fund any sum which may be necessary to make up 10 per cent. dividend; so that *practically 10 per cent. dividend is guaranteed before any reduction in price can take place.*

The operation, as described in this paragraph, is undoubtedly correct, except that instead of its being the operation of the Metropolis Gas Act, which applies exclusively to the metropolitan companies, it is the operation of the Gas Works Clauses Act, 1847, which applies to the gas companies generally throughout the kingdom.

It is here admitted by the Metropolitan Board that they consider that 10 per cent. is *guaranteed* when once reached, and yet they propose (paragraph 20) that the companies should accept 6 per cent. from them in lieu of that income, on the ground of *the uncertainty* of the 10 per cent.

5. The result of having arrived at a maximum of 10 per cent. is that, from that moment, it matters not to the company what the price of gas may be, 4s., 5s. or 6s. their profits being secured, there does not remain any sufficient inducement to improve the manufacture or adopt more economical processes, *while the public is deprived of control over them*, but for the fixing of a maximum price by the Legislature there is no reason in the nature of things why the price should not be 10s. per 1,000.

The utter groundlessness of the assertion that the public are "deprived of control" has been already shown (see summary of the provisions in the Controlling Act, obtained by the vestries, in remarks on paragraph 1).

As to the statement that, "but for the fixing of maximum price, there is no reason why the price should not be 10s. per 1,000." This is not so, because the machinery of the Gas Works Clauses Act, which, as before stated, can at any time be put in motion by two consumers, would be amply sufficient to secure to the public all fair reductions from time to time in the present prices if there were no maximum at all mentioned in the Metropolis Gas Act.

6. The natural price of a consumable article we know to depend, first on the demand, next on the supply; on grounds of public policy the supply of gas cannot be left to that natural action, and the Legislature has created a monopoly in its favour. *Deprived of their natural protection* the consumers are at *the mercy of the suppliers*, and legislation must again intervene to redress the balance; but the intervention in this case is the least advantageous to the consumers, its effect being only to guarantee a maximum to the producer, and that based upon the state of facts adduced at a particular time, and to deprive the consumer of all the advantages he would otherwise derive from the application of greater skill and ingenuity or the discoveries of science.

So far as it is possible to extract any meaning from these statements, they have been already answered.

7. The Board feel that the interests of the companies having been so amply provided for, the time has now arrived for making some provision for those of the public, and they addressed themselves in the first instance to the question of price.

In reply to this observation the companies cannot help remarking how persistently the Board ignore the existence of the Controlling Act obtained by the vestries, and everything that the companies have done—misrepresent the facts—and strive to create an impression that the companies have done nothing for the benefit of the public, although they are well aware of the large savings which the consumers have derived from the liberal conduct of the companies in reducing prices before they were bound to do so.

8. In fixing this at 3s. 6d. per 1,000 for 18-candle gas, they did not suppose that the Legislature in assigning *a maximum of 10 per cent. intended to guarantee a*

10 per cent. dividend, yet that would be the practical effect of adopting the companies' suggestion of 4s. per 1,000 for 14-candle gas, inasmuch as gas of that quality is already supplied at that price, allowing also of the accumulation of a reserve fund.

As to Parliament not having "*intended* to guarantee" what it is stated in a previous paragraph (No. 4) in this letter they have guaranteed, the metropolitan companies would observe that, with the exception of the limitation of the time for making up back dividends, the dividends are entirely regulated by the Gasworks Clauses Act, which was incorporated by their opponents with the Metropolis Gas Act. If the proceedings before the Select Committee of 1860 be referred to, it will be seen that nothing could have been better understood than was the effect of thus applying the General Act to the metropolitan companies. Since the Gasworks Clauses Act was passed in 1847, it has been incorporated in about 250 Gas Acts, and if, as suggested, Parliament made a mistake in the case of the metropolitan gas companies, the mistake has been made in all those cases, a large proportion of those Acts having been passed since the Metropolis Gas Act.

As to 14-candle gas being now supplied for 4s., the Metropolitan Board here, as in other instances, find it convenient to speak of the average power supplied as if it were the minimum. To keep above the present Parliamentary minimum of 12-candles, an average of 14-candles has to be supplied. So far from the reserve funds having been accumulated from the profits derived from the supply of gas at the reduced price of 4s., it may be stated that one of the largest companies, which has no reserve fund, has already had its dividend brought down by such reduction from 10 to 8½ per cent., and another large company to 8 per cent. Other companies, which have been more fortunate in times past, will have to draw from their reserve funds to complete a rate of dividend which the large recent increase in the price of coal, and the constant rise in the value of labour, will render it difficult, if not impossible, to maintain out of current profits.

9. Doubtless that price of 3s. 6d. per 1,000 would require *increased exertions* on the part of the companies, *improved apparatus*, and *higher skill* to approach their present dividends, but we contend that the possession of a monopoly entitles the public to demand that those exertions shall be made; that they need not be made in vain is demonstrated by the experience of Mr. Cleminshaw, formerly manager of the works at Manchester, who gave evidence before the Select Committee of the House of Commons, questions 1888-9, that *22-candle gas made from cannel coal could be supplied in London at 3s. per 1,000.*

This argument assumes that those who conduct the undertakings of the metropolitan companies are men wanting alike in skill and exertion, and that the apparatus used by them is inefficient, without a particle of evidence being adduced to show anything of the kind. It is well known that the directors of the metropolitan gas companies employ the most skilled engineers that can be chosen, and never neglect an opportunity to adopt every improvement in machinery or in working which science can suggest.

But it is here plainly admitted by the Metropolitan Board that, even with increased exertions, improved apparatus, and higher skill, the price of 3s. 6d. per 1,000 for 18-candle gas would only enable the companies *to approach* their *present* diminished dividends. The Board therefore no doubt assumes that a continuance of the 10 per cent. dividend allowed by the Act is hopeless, but it is nevertheless contended that the possession of a monopoly by the companies entitles the public to demand that those exertions, however costly, shall be made and maintained, although the quality and price proposed may conduce to a dead loss.

The Board here state the principal ground on which they base their proposal to compel the companies to charge 3s. 6d. for 18-candle gas, to be the evidence of a single person, brought forward by the active adversaries of the companies, which, if it were positive and unqualified, which it is not, is capable of contradiction. When, however, the evidence of Mr. Cleminshaw is sifted, it will be found to be fallacious, the prices of coal and coke, which he instances and states to be the basis of his calculation, being wholly incorrect.

Mr. Cleminshaw's connexion with Manchester had, it appears, ceased for seven years previous to his giving evidence last session; and, as a matter of fact, his statement that Manchester is now supplied with 22-candle gas at 3s. is contradicted by Mr. Heron, the present town clerk of Manchester, who states that the quality is about 21-candles, and the price 3s. 2d. within and 3s. 8d. outside the borough. 1910.  
1888.  
1889.  
3533.  
3655.

Mr. Cleminshaw, however, most cautiously qualifies his evidence, and carefully repeats that "he did not mean to say that London could be supplied with 22-candle gas at the price named under existing circumstances." 1883.  
1991.

10. Dr. Letheby gave evidence before the same Committee, that from 1852 to 1860 the Great Central supplied the City with gas equal to 14·79 candles at 4s. At the present time 14-candle gas, from a difference in the burners employed, is only equivalent to the standard of 12-candle gas as defined by the Act of 1860, *so that in point of fact the illuminating power of 18 candles required by the Board at a price of 3s. 6d. per 1,000 is only equivalent to the 16-candle standard of 1860.*

With respect to the alleged quality of the gas supplied by the Great Central Company at 4s. from 1852 to 1860, it should be borne in mind that the dividends paid by that company during the period in question were considerably less than the prescribed maximum of 10 per cent.; in fact, in the years 1857 and 1858 the dividends were at the rate of 5½ per cent., and in 1859 it was as low as 5 per cent.

As regards the alleged improvement in the burner, whatever may be Dr. Letheby's views as to the effect of the burner now used in raising the illuminating power of 12-candle gas, he will readily admit that it cannot possibly have the same effect on gas of a higher illuminating quality.

In order to test the power of gas of 15 candles and upwards, the test burner for 12-candle gas is wholly inapplicable, inasmuch as it could not consume the richer gas at the rate of five feet per hour, and an entirely different description of burner must be used.

It is therefore an entire mistake on the part of the Metropolitan Board to say that in asking for 18-candle gas they are only requiring for 16. In fact the illuminating power of 18 candles required by the Metropolitan Board being a minimum, the companies would practically have to supply an average 20-candle gas.

The reference to Dr. Letheby's evidence is not fortunate for the Metropolitan Board, for he, the gas analyst and chief witness of the Corporation of the City of London, admitted that the illuminating power to be required of the companies should not exceed 14 candles, and that the companies could not supply it for less than 4s. (See Answers 1470, 1471, and 1497.)

11. Seeing, therefore, that Manchester had actually been *supplied with 22-candle gas* at 3s. per thousand, and that in the opinion of a competent authority, London could be supplied at the same rate, the Board felt that there was no impropriety in asking the Legislature to fix a price of 3s. 6d. per 1,000 for 18-candle gas.

The statement here made is incorrect. Manchester was formerly supplied with common coal gas; since it has been supplied with cannel gas there has been no official check of the quality in the interests of the consumers. The person, however, *employed and paid by the Corporation* to report at the end of the year, stated the *average* to have been 21¼ candles, so that the minimum, instead of being 22, as is here implied, could not have been equal even to 20 candles.

Mr. Cleminshaw, who, as before stated, had ceased to be manager of the Manchester works for seven years, did not, on cross-examination, seem to be very well acquainted with what was going on there. The town clerk (Mr. Heron), also called by the Corporation of the City of London, admitted that the quality had been reduced from positive necessity, owing to the difficulty in procuring cannel.

But the case of Manchester has really no bearing whatever on the position of the metropolitan companies, as has been explained in the companies memorandum No. 3. It merely shows that if the London vestries, instead of promoting competition on all occasions, had, like Manchester, adopted the principle of monopoly, and allowed the first proprietors of gas works in London, established upwards of fifty years since, the exclusive supply of the whole metropolis to the present time, at sufficiently high prices to pay their prescribed rate of dividend, and to redeem the greater part of their capital, then a lower price than that now charged would suffice to pay the dividend upon the amount to which the capital would have been by this time reduced.

12. Manchester is not, however, the sole case upon which we rest our proof. During the last session a very rigid inquiry took place before the referees, and afterwards before a Committee of the House of Commons, into the cost of gas at Brighton, where coals are dearer, the residual products less valuable, and the machinery of distribution, from the consumers being scattered, is more costly, yet the maximum price of gas settled by the Committee and inserted in the Bill was 3s. 6d. per 1,000 for 14-candle gas.

The extraordinary argument here is that, because the Brighton and Hove Act of last session prescribes the price of 3s. 6d. for *fourteen-candle* gas, therefore London ought to

3547.  
3548.  
3549.

3586.  
3555.

be supplied for the same price with *eighteen*-candle gas. Whereas if the price of 3*s.* 6*d.* (or 3*d.* per candle) be a fair one for 14-candle gas, then the price for 18-candle gas ought to be 4*s.* 6*d.* The metropolitan companies, however, contend that 3*s.* 6*d.* is not a fair price for 14-candle gas, and this is completely borne out by the working of the very company referred to since the passing of its Act. The company has lately held its general meeting, and, although the cost of material and labor is in fact less than in London, the result of supplying gas for the last half year under the terms of the Act—which by the way does not limit the price to 3*s.* 6*d.* for the whole of the company's district, but allows of 4*s.* and 5*s.* being charged in certain parts—has been to reduce the dividend from 10 to 5 per cent., and the shares, which were before the passing of the Act selling at 32*l.* each, have become unsaleable at 18*l.* The Metropolitan Board could not, therefore, have selected a more unfortunate case upon which “to rest their proof” than that of the Brighton and Hove Company.

13. And as further proof, if any were needed, the South Metropolitan and Independent Gas companies are at the present moment supplying their customers at the rate of 3*s.* 4*d.* per 1,000 cubic feet.

It should be borne in mind that the standard illuminating powers of these two companies is not 18 candles as proposed, but 12 candles only. Their case is a proof that the Act itself is sufficient to secure a reduction in the price, and proper skill and management in the working of their undertakings; but it so happens that neither of the companies has been able at the price above quoted to pay 10 per cent. out of current profits, both being obliged to resort to their reserve funds for that purpose.

As against the two selected cases of Manchester and Brighton, put forward by the Metropolitan Board as justifying the demand for 18-candle gas at 3*s.* 6*d.*, the companies beg to refer to their Memorandum No. 3, wherein it is shown how cheaply London is supplied, considering the dearness of every article employed either in the erection of works or the manufacture of gas, as compared with other towns, and to point out that, although the subject of gas has been considered by Parliament one hundred and ninety times in the last eleven years, the Metropolitan Board cannot quote a single instance, even where the gasworks are almost at the pit's mouth, in which Parliament has set a precedent for their demand. The only three cases in which a maximum price of less than 4*s.* (the present price in London) has been imposed, out of one hundred and ninety Acts, are Brighton (before explained) and Nottingham and Staffordshire Potteries. The works in both the latter instances are most advantageously situated for the economical manufacture of gas, and the minimum of illuminating power prescribed for the three towns is that of 14, 12, and 14 candles respectively.

14. The degree of purity of the gas supplied is of hardly less importance than price and illuminating power, the presence of ammonia, and sulphur, especially the latter is *injurious* to books, furniture, clothing, and above all, *the human frame*.

So long ago as 1859, the Great Central had reduced the amount of sulphur to 16·4 grains per 100 cubic feet. Ten years of scientific progress ought at least to enable us to diminish that quantity, and although the use of lime as a purifier is undoubtedly an offensive process, still, after undergoing a first treatment with peroxide of iron, the subsequent use of lime is comparatively inoffensive, it becomes really a question of cost. The evidence before the Committee of the House of Commons tends to show that in this respect London compares disadvantageously with many country towns. In Paris, the quantity of sulphur does not exceed 6 grains per 100 cubic feet.

Mr. Hawksley, after numerous careful experiments, reports that for 1*d.* per 1,000 cubic feet the amount may be reduced to a minimum of 12 grains and a maximum of 16 grains per 100 cubic feet, which is the maximum approved by this Board.

There is an extraordinary amount of exaggeration as to the mischief arising from the very trifling amount (as compared with the surrounding bulk of atmospheric air) of impurity thrown off in the combustion of gas, and if ventilation were properly attended to no complaints would be made. On this point the companies beg leave to refer the Board of Trade to the Report, printed by the House of Commons in 1859, of Drs. Faraday, Hoffman, Tyndall, and others, enclosed herewith, and showing that the pictures in the galleries at the South Kensington Museum and other places (where there was a proper system of lighting, and due provision for ventilation and the escape of the products of combustion) had not been injured by the gas, and recommending the continuance and extension of its use, although, as the report stated, London gas produced 22½ grains of sulphuric acid for every 100 feet. Since that report was made upwards of 4,000 gas

lights have been and are now nightly used in the picture galleries in the South Kensington Museum alone.

As to Paris, the material there used for gas-making is well known to be singularly free from sulphur (unlike English coal). But if this were not so, the price of 8 francs, or 6s. 8d. per 1,000 allowed the Paris gas companies, is so liberal, and admits of so large a profit, (their dividends exceeding 20 per cent.), and the illuminating power required of them so moderate (about 10 candles), that they could afford to go to very large expenses to purify the gas, even to the injury of the illuminating power. The Paris company is, however, under no obligations as to the removal of sulphur.

The companies, however, are quite as anxious as the consumers that the gas should be as pure as possible. Their reason for objecting to the limit for sulphur being fixed by Parliamentary enactment at 16, or any other given number of grains, is, that there is no satisfactory means at the present time of extracting the sulphur, and they have been advised by some of the most eminent chemists of the day, that the process at present in use, although the best known, so far from being a satisfactory one, cannot by any means be depended upon for uniform results with coals of different descriptions, or even the same description of coal in different conditions. They think, therefore, that it would be better for all parties, that this matter should be referred for investigation, as proposed by them, and approved by the Select Committee, to a Board of scientific men.

15. The other points set forth in the Board's previous communication are matters of administration for the convenience and dispatch of public business and affording the necessary guarantees for fairness, independence, and impartiality in carrying out the checks which may hereafter be imposed. They were fully considered by the Select Committee of the House of Commons on the London (City) Corporation Gas Bill, and are taken *verbatim* from their report.

The clauses referred to are not all taken (as here stated) *verbatim* from the Select Committee's Report. The proposal of a Public Auditor, indeed, is entirely new. These subjects are, however, severally treated in the Mem. (No. 2) of the companies, and need not, therefore, be further alluded to in this place.

16. Referring to the second alternative submitted, viz., that of purchasing the properties of the several gas companies, I am to state that the grounds upon which the Board based their proposition that the purchase value should be estimated at a rate of 6 per cent. *on the paid up capital* were, that considering the *fluctuating* nature of the property, its liability to depreciation by discoveries in chemical, physical, or mechanical science, and the chances of accidents, that 6 per cent. was a fair average rate on which to calculate its selling value, and when guaranteed on such solid security as the Board would give, would financially be equivalent, in market price, to the 10 *per cent.* paid with the present relatively *hazardous* security.

I have, &c.,

J. THWAITES.

The proposal that 6 per cent. should be substituted for 10 per cent. is here sought to be justified on the ground of the alleged "fluctuating nature of the property," and the "hazardous security" of the shares. But in the previous part of the letter (paragraph 4), it suits the Metropolitan Board, in arguing for a further control of the companies, to admit the truth, viz., that the companies have "practically 10 per cent. already guaranteed to them." There is no doubt that the effect of the Gasworks Clauses Act (as expressly intended by Parliament) is, that when once a company has overcome its difficulties, and arrived at a 10 per cent. dividend, it is almost invariably able to maintain it, with the help, if necessary, of the reserve fund, accumulated under the requirements of that Act and for that specific purpose.

This position is so well ascertained and generally understood that the fully paid up shares of the London companies as well as of the many provincial companies have been purchased by present holders, at prices as high as cent. per cent. premium, that is, to pay the investors a certain 5 per cent. upon the money invested, and shares only partly paid up have been purchased at a higher premium, in the expectation of the full amount being called up and 10 per cent. secured thereon. To give these persons 6 per cent. bonds for their shares would be simply reducing their incomes to 3 per cent. and less upon their capital invested on the faith of Parliament.

For this proposal of substituting, on a transfer of the undertakings, 6 per cent. for 10 per cent., the Metropolitan Board are as unable to produce precedents as they are for their demand of 18-candle gas for 3s. 6d.

The metropolitan gas companies have made inquiries as to the prices paid by corporations where they have purchased the gas works of companies, and they have been furnished with the following list :—

| Towns.                | Date. | Price per 100l. Share Capital. |
|-----------------------|-------|--------------------------------|
| Birkenhead - - -      | 1858  | £220                           |
| Burnley - - -         | 1854  | 300                            |
| Bury (Lancashire) - - | 1857  | 250                            |
| Darlington - - -      | 1854  | 200                            |
| Halifax - - -         | 1856  | 240                            |
| Macclesfield - - -    | 1861  | 250                            |
| Oldham - - -          | 1837  | 10 annuities.                  |

From the prices paid in these instances, it is clear that no other basis could have been taken than that of a secured income of 10 per cent. The metropolitan companies, having arrived at that rate of dividend, are not prepared to surrender their undertakings on less favourable terms.

The appended extract from a recent share list shows the value, even at this time of depression, of the shares of several provincial companies paying 10 per cent. dividends, whose properties are not liable to such depreciating circumstances as attend the present agitation against the London companies, and it is not very probable that the 6 per cent. bonds of the Metropolitan Board of Works would ever fetch such premiums as would admit of the holders of them recouping their capital.

In conclusion, it may be pointed out, that although all the risks alluded to in the last paragraph of Sir John Thwaites' letter are entirely ignored when the Board is seeking to impose restrictions upon the gas companies as to price, &c., they are vividly brought forward and made strong points of argument for the depreciation of the gas companies' property when the Board proceeds to consider the question of purchase. But if by using the term "hazardous security," it is intended to convey that the shareholders' Parliamentary rights can be interfered with by new legislation, the same thing might be said of their rights if they accepted the bonds of the Metropolitan Board instead of their shares. The Metropolitan Board has been established in precisely the same manner as the companies, namely, by Act of Parliament, and the bonds of the Board would have an origin no higher than that of the corresponding shares. Were Parliament to decide to reduce the rate of 10 per cent. upon the shares, it could no less reduce the 6 per cent. on the bonds.

If, too, the assertion that the property is so "liable to depreciation by discoveries in "chemical, physical, and mechanical science," is good for anything, it is manifest that a body constituted like the Metropolitan Board is not justified in entering upon so speculative an undertaking, even if they could purchase it for less than the annuity (from 300,000l. to 400,000l. a year), which they propose to charge on the metropolitan ratepayers, for the undertaking would not be less liable to the contingencies referred to if conducted by the Metropolitan Board.

London, 8th March 1867.

## MEMORANDUM (No. 5) Enclosed in No. 24.

*Observations of the Metropolitan Gas Companies upon the Letter of the Corporation of the City of London to the Board of Trade of the 16th February 1867.*

1. The letter of the Corporation expresses great indignation that it should be supposed that they are asking the Legislature to break faith with the gas companies, or in any manner to confiscate their property, or ruin their shareholders, and emphatically avows that they (the Corporation) "have too great an interest in the preservation of the rights of property, and the maintenance of ancient privileges," to enter upon any such course. The companies, however, without adverting to what was done in the last session of Parliament, would respectfully point out that in this same letter the Corporation modestly propose to cut down the capital of the gas companies to 60 per cent. of the amount actually recognized by Parliament, upon the mere assertion that the remaining 40 per cent. has been wasted or unprofitably employed: and they further seek to impose terms as to price and illuminating power, which would take away the entire annual profit

resulting from the supply of gas. The companies confess themselves unable to reconcile these proposals with the principles professed by the Corporation.

2. The Corporation seek to invalidate the estimates of the engineers, and the calculation of the companies comprised in Memorandum No. 1, by two statements, viz. :—

|                                                                                                             |          |
|-------------------------------------------------------------------------------------------------------------|----------|
|                                                                                                             | £        |
| 1. That the annual value of the residual products is understated by -                                       | 141,375  |
| 2. That the gas lost in distribution would, if it were all saved and sold, produce an annual sum of - - - - | 336,000  |
| Making a total of - - - -                                                                                   | 477,375  |
| And after deducting the amount of the deficit shown in the companies' memorandum, viz. - - - -              | 155,014  |
| A profit would remain of - - - -                                                                            | £322,361 |

3. The companies have submitted the statements in question to the engineers, and beg to refer to their Report annexed hereto, confirming the original estimate, and explaining the mistakes of the Corporation. It will thus be seen that there is no ground whatever for saying that the sum of 141,375*l.* should be added to the valuation of the products, or that 336,000*l.* could be obtained by the saving of leakage.

4. The companies, however, cannot refrain from exposing the means by which those who seek to impress the Government with their superior ability to conduct the metropolitan gas supply and with their own infallibility, and who illiberally charge the companies, in paragraph 7, with a want of fairness and candour, have brought out the amount of 336,000*l.* The loss in money by the "unaccounted-for gas" is, of course, merely the cost of making it at the factory. Instead, however, of valuing the loss at the cost price of the gas the Town Clerk has taken the *selling* price, and not content with that, in order to make the figures as large as possible, he has taken the selling price, not at 3*s.* 6*d.*, which was the selling price proposed for the gas in question, but at 4*s.* 8*d.*, which he says is the mean price charged by the companies. But this, again, is another misstatement, as the alleged price of 6*s.* is not charged by any of the metropolitan companies, and in consequence of by far the larger proportion, about nine-tenths, of the gas supplied to London being of the cheaper quality, the average price works out at 4*s.* per 1,000, and not 4*s.* 8*d.*

5. The companies proceed to point out some of the other numerous misstatements which they regret to find in the letter of the corporation.

6. The statement in paragraph 7, that the Metropolis Gas Act had for its immediate consequence, that two men in the same street had to pay different prices, is incorrect. The same state of things existed before the Act. At some point there must be a difference in price, and this is the case in Manchester and other towns, and is expressly sanctioned in many Gas Acts; and the Corporation of London have themselves hitherto contended, that the price should be lower within the city than it should be immediately beyond the city boundary.

7. As to paragraph 8.—The companies would observe, that Manchester has no minimum standard, and there is no one to check the quality on behalf of the consumer. When the illuminating power of Manchester has always been spoken of, the *average*, and not the minimum has been quoted.

8. As to paragraph 21.—The South Metropolitan and Independent Companies have *not* been able to pay their dividends out of their current profits for the last year.

The West London Junction Gas Company is spoken of as if it were a flourishing London company, yielding a profit of 12 per cent. The simple facts are, that it supplies one consumer only, and pays no dividend whatever on its ordinary shares.

As to the Brighton and Hove Company obtaining a profit by selling 14-candle gas at 3*s.* 6*d.*, this case is explained in page 15 of the Companies Memorandum No. 4; the *company having, by selling 14-candle gas at 3*s.* 6*d.*, had its dividends brought down from 10 to 5 per cent., and the value of its shares from 32*l.* to 18*l.**

The price quoted for Edinburgh is incorrect, the company having in consequence of the increased cost of cannel and labour *raised its price from 4*s.* 4*d.* to 4*s.* 10*d.** since the Select Committee's report of last session, as stated in the Companies' Memorandum No. 3, which was before the Corporation when their letter was written.

The statements as to the supplies and cost of Scotch cannels are incorrect, as is also that relating to the manufacture of gas from waste coal mixed with shale oil.

9. As to paragraph 24.—It is asserted that the public were not represented during the legislation of 1860, and that "owing to the unwearied defence and opposition which the

heavy purse of the companies enabled them to maintain, their opponents at last retired from the conflict, and the companies moulded the Bill to their own views." The facts are that the Metropolis Gas Bill was promoted, not by the companies, but by the delegates of the Vestries—who had the charge of the Bill to the last, *and the costs of it were paid by the Metropolitan Board of Works.*

10. As to paragraph 25.—For want of better arguments to justify the proposal to take the companies' property away from them, it is stated that by the transfer of the gas-works to the superior management of the Metropolitan Board and the Corporation of London, a large benefit would arise, as "the abolition of the present wasteful system of "management by 13 different boards of directors with their 13 sets of officials is an item "of serious consideration." This is mere reckless assertion, without a particle of proof—the fact being, that if all the boards of directors with their secretaries were removed, and without compensation—an injustice which Parliament is not likely to sanction,—the saving of expense would amount to less than one penny per 1,000 feet, owing to the very large volume of gas over which the expenses are spread. It is patent, however, that the gas supply to some hundreds of thousands of customers could not be carried on by any management, however skilful, without some superior officials, or with fewer clerks, inspectors, and collectors than the companies employ now that each has a district of its own.

11. The companies conclude by pointing out their objections to the amendments proposed by the letter of the Corporation to be made in the Metropolis Gas Act.

Nos. 1 to 16 have been already dealt with in the Companies' Memoranda, Nos. 1 and 2.

No. 17. The companies object to any proposal, if it be for the purpose of cutting down their capital, all of which has been legally raised and expended. Such a course cannot be adopted without actual confiscation of the shareholders' property.

No. 18. The burner should not be fixed by the chemical board, but specified in the Act.

No. 19.—The system of average meter indication, as applied to the public lamps, is an unfair one, and productive of constant disagreement.

No. 20.—To maintain a pressure, as suggested, of one inch in every part of every consumer's premises, is simply impracticable, as far as the companies are concerned, they having no control over the pipes and fittings of the consumers.—See Dr. Letheby's evidence condemning this proposal, in Blue Book, Answer 1524.

No. 21.—As to the price chargeable for the public lamps, the words proposed to be omitted from the Act of 1860 were added after much consideration, and there is no alteration in circumstances to call for their removal.

No. 24.—The proposed alteration as to a new form of accounts is unnecessary, because the Secretary of State has already ample powers under the Act.

No. 25.—The proposal for marking the size of the mains upon the deposited maps was negatived by the Select Committee of 1860, and there is no ground for reversing the decision.

No. 26.—The companies do not admit that any machinery, more simple and more easily set in motion for the recovery of penalties than that now provided, is called for.

No. 27.—It was proved before a Parliamentary Committee in 1859, that the City Gas Company's works occasioned no nuisance; and Parliament authorized their continuance on the present site, although the term of their Parliamentary tenure would have expired in three years. If the gasworks are to be removed, how is the expense to be met?

No. 28.—The injustice of the proposal as to the manner in which compensations for accidents are to be defrayed is so manifest that it requires no observation from the companies.

London, 8th March 1867.

---

*Engineers' Report enclosed with Memorandum (No. 5).*

Our attention has been drawn to the letter of the Corporation of the City of London, dated 16th February 1867, addressed to the Board of Trade, in which the Corporation attempts (paragraphs 10 and 11) to invalidate the estimate given by us in our former report, that the cost of 18-candle gas would be 1s. 2 $\frac{3}{4}$ d. per 1,000 cubic feet beyond the cost of 12-candle gas.

We, however observe, that the only objection raised for this purpose is, that the residual products of one of the companies realized in a particular year (1865) a higher per-centage of the cost of the coals than we had allowed in our estimate.

Without entering upon an explanation of any individual company's accounts, which we are prepared to do if necessary, but which seems to us at present superfluous, we beg to say that our estimate was based, as was expressly stated, on the experience of 1866, and that as the proposition of the Metropolitan Board was that 18-candle gas should be supplied by all the metropolitan companies, and not by one company only, the products are of course valued by us in the estimate at the *average* price which would be obtained for the identical products at the works of all the companies.

On a careful reconsideration of the subject, therefore, we unhesitatingly adhere to our estimate.

Our attention has also been drawn to the assertion in the 13th paragraph of the letter of the Corporation, that the loss of 1,440 millions cubic feet of gas in distribution need not be incurred, and that a dividend of nearly 6 per cent. on the companies' capital might arise from this source.

The reason given for this assertion is, that a Mr. Bell, Solicitor for a small gaswork, having only one customer and one main to supply that customer, said that there was no leakage from that pipe.

The Corporation have fallen into the error of supposing that all the unaccounted-for gas is caused by leakage; whereas it is a fact notorious to all persons acquainted with the supply of gas, that the greater part of the loss does not arise from leakage, although that is the technical word commonly but erroneously used when "unaccounted-for gas" is spoken of, but that a much larger volume is lost by condensation, fraudulent burning, excess in consumption by the street lamps beyond the contract quantity, and deficient registration of meters.

We should not have been surprised if Mr. Bell's statement as to the condition of the pipe in question had been correct, as the companies have a considerable extent of mains practically free from leakage. We have, however, ascertained on inquiry, that the unaccounted-for gas of this very company has amounted to  $7\frac{1}{2}$  per cent.

Having had considerable experience in these matters, we beg leave to certify that 14 or 15 per cent. of the gas made is a very moderate loss, and even the ex-manager of the Manchester Works, one of the chief witnesses called by the Corporation against the companies last session, admitted that, with great advantages, the gas lost in Manchester is not less than 10 per cent.—(Blue Book, Answer 2,026).

Board of Trade, Whitehall, S.W.,  
9th March 1867.

SIR,

I AM directed by the Lords of the Committee of Privy Council for Trade to acknowledge the receipt of your letter of the 8th inst., transmitting from the metropolitan gas companies, in pursuance of your letter of the 2nd inst., Memoranda No. 4 and No. 5, in reply to the letters of the Metropolitan Board of Works and of the Corporation of the City of London to the Board of Trade, dated 17th January and 16th February last respectively.

I am, &c.

R. Baxter, Esq.

ROBERT G. W. HERBERT.

(26.) *Vestry of St. John to Board of Trade.*

Vestry Offices, Workhouse, Hampstead, N.W.,  
4th March 1867.

SIR,

I AM desired by the Vestry of this parish to transmit a copy of a resolution in relation to the reported proposal to give powers to the Metropolitan Board of Works to purchase the works of the metropolitan gas companies.

I am, &c.

THOS. TOLLER,

Vestry Clerk.

The Right Hon. the President of the Board of Trade.

(Enclosure in No. 26.)

Vestry of St. John, Hampstead, 1st March 1867.

RESOLVED,

"That this Vestry protest against any powers being given to the Metropolitan Board of Works to purchase gas companies' works in the metropolis, the Vestry considering that it would be objectionable to carry on the manufacture and sale of gas at the expense of the public rates."

Extracted from the Minutes.

THOS. TOLLER,

Vestry Clerk.

Board of Trade, Whitehall, S.W.,  
6th March 1867.

SIR,

I AM directed by the Lords of the Committee of Privy Council for Trade to acknowledge the receipt of your letter of the 4th inst., addressed to the President of this Board, transmitting a copy of a resolution of the Vestry of St. John's, Hampstead, against any powers being given to the Metropolitan Board of Works to purchase gas companies' works in the metropolis.

I am, &c.

ROBERT G. W. HERBERT.

Thos. Toller, Esq.,  
Vestry Clerk.

MEMORIALS FROM GAS COMPANIES ON THE OUTSKIRTS OF THE  
METROPOLIS PRAYING TO BE EXEMPTED FROM THE OPERA-  
TION OF THE PROPOSED BILL.

(28.) *Memorial of Woolwich, Plumstead, and Charlton Consumers' Gas Company to the Board of Trade.*

METROPOLIS GAS ACT AMENDMENT.

To the Right Honourable the Lords of the Committee of Privy Council  
for Trade.

The Memorial of the "Woolwich, Plumstead, and Charlton Consumers' Gas Company."

SHREWETH,

THAT a copy of your Lordships' letter dated the 28th December last, addressed to MESSRS. Baxter, Rose, Norton, & Co., together with the communication from the Metropolitan Board of Works on the subject of the supply of gas to the metropolis, has been sent to this company for observations thereon.

Your memorialists, having considered the same, beg leave respectively to inform your Lordships that when the Gas Act of 1860 was passed this company, though named in the schedule to that Act, was specially exempted from its operations for the following reasons :—

1st. That the town of Woolwich is supplied with gas by two companies independently of each other, whereby a fair competition is insured and monopoly prevented; the consumers having the privilege of taking their supply from either company at their option.

2nd. That the company was incorporated in the year 1855, and that the Act includes provisions limiting the amount of dividends, fixing a maximum price of gas, and standard of illuminating power, and incorporates the Gas Clauses Act, 1847.

3rd. That in the suburban parishes of Plumstead and Charlton the supply is scattered over a very wide area, many miles of main supplying the public lamps only, whilst the consumption in the houses, mostly private, is very small and the leakage necessarily very great.

Your memorialists, therefore, beg leave respectfully to submit that it would be quite impossible for them, under the peculiar disadvantages of their case, to supply gas at the same price and illuminating power which companies more favourably circumstanced in the densely populated districts of the metropolis can; and that to impose the same provisions on your memorialists as on such companies would be a grievous hardship, if not their absolute ruin.

Your memorialists therefore humbly pray that when the Bill comes under your consideration you will be pleased to cause them to be exempted from its operations.

The seal of the company attached by order (L.S.)  
of the board in the presence of

JOSEPH WATES,  
Clerk to the Woolwich, Plumstead, and  
Charlton Consumers' Gas Company.

(29.) *Board of Trade to Woolwich, Plumstead, and Charlton Consumers' Gas Company.*

Board of Trade, Whitehall, S.W.,  
25th January 1867.

SIR,

I AM directed by the Lords of the Committee of Privy Council for Trade to acknowledge the receipt of a memorial from the Woolwich, Plumstead, and Charlton Consumers' Gas Company, praying for exemption from a proposed Bill for the amendment of the Metropolitan Gas Act, 1860.

I have, &c.

The Clerk to the Woolwich, Plumstead,  
and Charlton Consumers' Gas Company.

LOUIS MALLET.

(30.) *Woolwich Equitable Gas Company to Board of Trade.*

Woolwich Equitable Gas Company,  
Woolwich, 12th January 1867.

MY LORDS,

A COPY of your Lordships' letter dated the 28th December last, addressed to Messrs. Baxter, Rose, Norton, and Spofforth, together with the communication from the Metropolitan Board of Works on the subject of the supply of gas to the metropolis, has been sent to the Woolwich Equitable Gas Company for observation thereon.

As the chairman of that Company I beg to inform your Lordships that when the Gas Act of 1860 was passed the company I represent was exempted from its operation for the following reasons :—

1st. That two companies supply with gas the town of Woolwich and the suburban parishes of Plumstead and Charlton independently of each other, the mains of each lying side by side (with the exception of the extreme boundaries of the district), thus giving the consumers the privilege of taking their supply from either company at their option.

2ndly. That no monopoly exists within the parishes supplied by the said companies.

3rdly. That this company was incorporated in the year 1855, and the Act contains provisions limiting the amount of dividends, fixing a maximum price for gas, standard of illuminating power, and incorporates the Gas Clauses Act of 1847.

4thly. That owing to the extensive areas over which the mains of this company are laid, and the consequent loss by condensation and leakage, it is impossible to supply gas at the same price and to the same advantage as in the densely populated London districts, where the supply is concentrated.

I therefore respectfully beg to suggest to your Lordships, that inasmuch as the allegations put forth by the public in support of their demand for legislative interference in the supply of gas to the metropolis do not apply to the company I represent, that your Lordships will be pleased to cause it to be exempt from any measure your Lordships may intend to submit to Parliament in the ensuing session.

I have, &c.

To the Lords of the Privy Council for Trade.

SAML. FARNFIELD,  
Chairman of the Woolwich Equitable  
Gas Company.

(31.) *Board of Trade to Woolwich Equitable Gas Company.*

Board of Trade, Whitehall, S.W.,  
25th January 1867.

SIR,

I AM directed by the Lords of the Committee of Privy Council for Trade to acknowledge the receipt of a memorial from the Woolwich Equitable Gas Company, praying to be exempted from any measure for the amendment of the Metropolitan Gas Acts which it is intended to introduce into Parliament in the approaching session.

I have, &c.

The Chairman of the  
Woolwich Equitable Gas Company.

LOUIS MALLET.

(32.) *Messrs. Baxter and Co. to Board of Trade.*

6, Victoria Street, Westminster, S.W.,  
28th January 1867.

Messrs. Baxter, Rose, Norton, & Co. present their compliments to Mr. Farrer and beg to enclose copies of memorials respecting the proposed alterations of the "Metropolis Gas Act," which they have recently presented to the Home Secretary on behalf of the following gas companies:—

The Brentford.

The West Ham.

The Woolwich Equitable, and the Woolwich, Plumstead, and Charlton Consumers'.

The Eltham.

T. H. Farrer, Esq.

*Enclosure (No. 1) in No. 32.*

METROPOLIS GAS ACT AMENDMENT.

To the Right Honourable Spencer H. Walpole, Her Majesty's Principal Secretary of State for the Home Department.

The Memorial of the Brentford Gas Company, whose seal is hereunto affixed,

SHEWETH,

THAT your memorialists were present at the interview which you were pleased to grant to the metropolitan gas companies on the 28th of November last, and your memorialists are led to expect, from what took place at that interview, that it is the intention of Her Majesty's Government to bring in a Bill in the ensuing session to amend the provisions of the "Metropolis Gas Act, 1860," and that the several companies named in the schedule to that Act, who were specially excluded from its operations when the Act was passed, will in all probability be brought within its operations by the said Bill.

That your memorialists are further led to believe that one of the amendments sought to be introduced into the said Bill is to transfer the powers to see that the provisions of the Act are properly enforced now vested in the local authorities from those authorities to the Metropolitan Board of Works, and another is to reduce the present maximum price of 4s. 6d. per 1,000 cubic feet to 3s. 6d., and to raise the standard of illuminating power for the said gas from 12 candles to 18 candles.

Your memorialists, therefore, respectfully call your attention to the fact that when the "Metropolis Gas Act, 1860," was first introduced, the outlying companies were named in the preamble with the metropolitan companies, it being intended to make them subject to the provisions of the Act, and they had to retain counsel and appear before the Committee, and that after being in attendance for several days at a great expense they procured a hearing, whereupon the Committee struck them out of the preamble and added the schedule to the Act, whereby they are excluded from its operations.

That there are nine companies in the said schedule, and all those companies but two, viz., the Eltham Gas Light and Coke Company (Limited) and the Mitcham, Merton, and Tooting Gas Company, are regulated by recent and special Acts of their own and subject to the provisions of the Gasworks Clauses Act, and that the last-named company is about to apply to Parliament for an Act in the ensuing session.

That the districts of all those companies but one, the West Ham Gas Company, are partly within (some only to a very limited extent) and partly without the jurisdiction of the Metropolitan Board of Works, and the district of that one company is wholly without their jurisdiction.

That the district of your memorialists is wholly suburban, and on the outskirts of the metropolis, where the supply is scattered over a very wide area, the houses supplied with gas far apart, and the consumption small; the length of main required to furnish the supply, and the whole cost of distribution, much in excess of what is required for similar purposes in any place subject to the provisions of the Metropolis Gas Act; the cost of coals is also greater from the greater length of carriage, and the outlay of capital more disproportionate to the rental than that of other companies situated like those in the metropolitan districts.

That the charge per 1,000 cubic feet varies in the district of your memorialists from 4s. 6d. to 5s. 6d., but in no instance is it so low as that now charged in the districts of the metropolitan companies, viz., 4s. per 1,000.

That in the event of the price being arbitrarily reduced to 3s. 6d., it would be a reduction upon the price charged by the metropolitan companies of  $12\frac{1}{2}$  per cent., upon the lowest charge made by your memorialists of 22 per cent., and upon the highest of  $36\frac{1}{3}$  per cent.

That although your memorialists were excluded from the operations of the Metropolis Gas Act, 1860, they have since voluntarily reduced the price of gas in their district.

Your memorialists beg leave respectfully to state that if they were arbitrarily compelled to supply gas in a district like theirs at the illuminating power of 18 candles, and the price of 3s. 6d. per 1,000 cubic feet, they would not only be unable to pay any dividend to their proprietors, but they would be subject to a very heavy annual loss in carrying on their operations.

That having been excluded from the operations of the Act by the deliberate decision of the Committee, in the first instance they took no part in the discussions on the clauses of the Bill, and hence there are in the Act as it now stands many provisions which, although applicable to the metropolitan companies, it would be extremely unjust to impose upon companies supplying districts like those of your memorialists, and they submit that it would be a great hardship upon them to be included in another Bill, and put to the expense of appearing by counsel a second time before another Committee, when all the facts which led to their exclusion in the first instance remain in full force at the present day.

That one of the main objects of the Metropolis Gas Act was to place all the companies under uniform regulations; but if the outlying companies are now brought within the Act, this will be no longer possible, as there must of necessity be at least three or four different prices, and many other provisions of the Acts must be modified in different degrees to meet the varying circumstances of each of the outlying companies.

That in any event the regulations could only be partial, as the jurisdiction of the Metropolitan Board of Works covers only a portion of the districts of your memorialists, and could not be extended over the whole under such a Bill as the one now under discussion, but that some public measure would have to be made specially for that purpose.

Your memorialists therefore humbly pray that when the Bill comes under your consideration, you will be pleased to give instructions that they be excluded from its operations.

*Enclosure (No. 2) in No. 32.*

## METROPOLIS GAS ACT AMENDMENT ACT.

To the Right Hon. Spencer H. Walpole, Her Majesty's Principal Secretary of State for the Home Department.

The Memorial of the West Ham Gas Company, situate in the parish of West Ham in the county of Essex, whose seal is hereunto affixed.

SHEWETH,

THAT your memorialists were present at the interview which you were pleased to grant to the metropolitan gas companies on the 28th of November last, and your memorialists are led to expect from what took place at that interview, that it is the intention of Her Majesty's Government to bring in a Bill in the ensuing session to amend the provisions of the Metropolis Gas Act, 1860, and that the several companies named in the schedule to that Act, who were specially excluded from its operations when the Act was passed, will in all probability be brought within its operations by the said Bill.

That your memorialists are further led to believe that one of the amendments sought to be introduced in the said Bill is to transfer the powers to see that the provisions of the Act are properly enforced, now vested in the local authorities, from those authorities to the Metropolitan Board of Works, and that another of the proposed amendments is to raise the standard of the illuminating power from 12 candles to 18, and to reduce the maximum price from 4s. 6d. to 3s. 6d.

Your memorialists therefore respectfully call your attention to the fact, that when the "Metropolis Gas Act, 1860," was first introduced, your memorialists, the West Ham Gas Company, with all the other outlying companies now in the schedule, were named in the preamble along with the metropolitan companies, it being intended to make them subject to the provisions of the Act; and your memorialists, with others, had to retain counsel and appear before the Committee; that after being in attendance for several days at a great expense they procured a hearing, and thereupon the Committee struck them out of the preamble, and added the schedule to the Act whereby they were excluded from its operations.

That the districts of all the companies named in the schedule to that Act but that of your memorialists are partly within and partly without the jurisdiction of the Metropolitan Board of Works, but that the district of your memorialists is, on the contrary, *wholly* without the jurisdiction of the Board.

That the jurisdiction of the said Board is bounded on the eastern side thereof by the River Lea, which separates the counties of Middlesex and Essex—the authority of the Board being confined to the Middlesex side.

That the works, stations, and offices, and the entire district supplied by your memorialists are all on the Essex side of the said River Lea, and consequently wholly beyond the jurisdiction of the Board.

That the district of your memorialists is wholly suburban, and on the outskirts of the metropolis, where the supply is scattered over a very wide area; the houses supplied with gas far apart, and the consumption small; the length of main required to furnish the supply, the cost of distribution, and the proportion of capital to rental are all much in excess for what is required in any place subject to the provisions of the "Metropolis Gas Act."

That if the price were arbitrarily reduced as proposed to 3s. 6d. per 1,000 cubic feet in the district of your memorialists, it would be a reduction upon the rate now actually charged of 22 per cent., while at the same time the illuminating power being increased, they would be subject to a considerable additional expenditure in producing the gas.

That the price now charged by your memorialists is 4s. 6d. per 1,000 cubic feet, and they beg leave respectfully to state that it would be quite impossible for them to supply gas in a district like theirs on the proposed terms, viz., gas of 18-candle illuminating power at 3s. 6d. per 1,000 cubic feet. That they would not only not be able to realise any dividend for their proprietors out of such terms, but that they would suffer a very heavy loss every year.

Your memorialists respectfully submit, that having been excluded from the operations of the Act by the deliberate decision of the Committee in the first instance, they took no part in the discussions on the clauses, and hence there are many provisions in the Act as it now stands, which, although applicable to the metropolitan companies, it would be extremely unjust to impose upon companies supplying districts like those of your memorialists, and that it would be a great hardship upon them to be included in another Bill, and put to the expense of appearing by counsel a second time before another Com-

mittee, when all the facts which led to their exclusion in the first instance remain in full force at the present day.

That Parliament cannot, without violating all their established regulations, extend the jurisdiction of the Metropolitan Board so as to include within it the district of your memorialists, under a Bill "for regulating the supply of gas to the metropolis." That if such an extension of their authority is deemed expedient, it can only be granted by a separate Bill, brought in specially for that purpose.

That if when the Bill is introduced it is proposed to transfer the powers for putting it in operation to the Metropolitan Board, and to make the West Ham Gas Company subject to its provision, the Committee to whom the Bill will be referred will be unable to deal with that part of the question, and have no alternative but to strike the West Ham Gas Company out of it.

Your memorialists therefore humbly pray, that when the Bill comes under your consideration, you will be pleased to give instructions that the West Ham Gas Company be excluded from its operations.

*Enclosure (No. 3) in No. 32.*

METROPOLIS GAS ACT AMENDMENT.

To the Right Hon. Spencer H. Walpole, Her Majesty's Principal Secretary of State for the Home Department.

The Memorial of the Woolwich Equitable, and the Woolwich, Plumstead, and Charlton Consumers' Gas Companies, whose seals are hereunto affixed.

SHEWETH,

THAT your memorialists were present at the interview which you were pleased to grant to the metropolitan gas companies on the 28th of November last, and your memorialists are led to expect from what took place at that interview, that it is the intention of Her Majesty's Government to bring in a Bill in the ensuing session, to amend the provisions of the "Metropolis Gas Act, 1860," and that the several companies named in the schedule to that Act, who were specially excluded from its operations when the Act was passed, will in all probability be brought within its operations by the said Bill.

That your memorialists are further led to believe that one of the amendments sought to be introduced in the said Bill is to transfer the powers, to see that the provisions of the Act are properly enforced, now vested in the local authorities, from those authorities to the Metropolitan Board of Works, and that another of the proposed amendments is to raise the standard of the illuminating power from 12 candles to 18, and to reduce the maximum price from 4s. 6d. to 3s. 6d.

Your memorialists, therefore, respectfully call your attention to the fact that when the "Metropolis Gas Act, 1860," was first introduced all the outlying companies now in the schedule were named in the preamble along with the metropolitan companies, it being intended to make them subject to the provisions of the Act; and your memorialists, with others, had to retain counsel and appear before the Committee; that after being in attendance for several days, at a great expense, they procured a hearing, and thereupon the Committee struck them out of the preamble and added the schedule to the Act, whereby they were excluded from its operations.

That there are nine companies in the said schedule, and all those companies but two, viz., the Eltham Gaslight and Coke Company (Limited), and the Mitcham, Merton, and Tooting Gas Company, are regulated by recent and special Acts of their own, and subject to the provisions of the Gasworks Clauses Acts, and that the last-named company is about to apply to Parliament for an Act in the ensuing session.

That their several districts are to a great extent suburban, and on the outskirts of the metropolis, where the supply is scattered over a very wide area, the houses supplied with gas far apart, and the consumption small; the length of main required to furnish the supply, the cost of distribution, and the proportion of capital to rental are all much in excess of what is required for any place subject to the provisions of the Metropolis Gas Act, 1860.

That if the price were arbitrarily reduced as proposed to 3s. 6d. per 1,000 cubic feet, in the district of your memorialists, it would be a reduction upon the rate now actually charged of 22 per cent. in some cases and 36½ per cent. in others, while at the same time, the illuminating power being increased, they would all be subject to a considerable additional expenditure in producing the gas.

Your memorialists beg leave respectfully to state that the charge per 1,000 cubic feet varies in the districts supplied by them from 4s. 6d. to 5s. 6d., and that it would be quite impossible for them to supply gas in districts like theirs on the proposed terms, viz., gas of 18-candle illuminating power at 3s. 6d. per 1,000 cubic feet. That they would not only not be able to realize any dividend for their proprietors out of such terms, but that they would suffer a very heavy loss every year.

Your memorialists respectfully submit that having being excluded from the operations of the Act by the deliberate decision of the Committee in the first instance, they took no part in the discussions on the clauses, and hence there are many provisions in the Act as it now stands which, although applicable to the metropolitan companies, it would be extremely unjust to impose upon companies supplying districts like those of your memorialists, and that it would be a great hardship upon them to be included in another Bill and put to the expense of appearing by counsel a second time before another Committee, when all the facts which led to their exclusion in the first instance remain in full force at the present day.

That one of the main objects of the Metropolis Gas Act was to place all the companies under uniform regulations; but if the outlying companies are now brought within the Act, this will no longer be possible, as there must of necessity be at least three or four different prices, and many other provisions of the Act must be modified in different degrees to meet the varying circumstances of each of the outlying companies.

Your memorialists therefore humbly pray that when the Bill comes under your consideration, you will be pleased to give instructions that they be excluded from its operations.

---

*Enclosure (No. 4) in No. 30.*

METROPOLITAN GAS ACT AMENDMENT.

To the Right Hon. Spencer H. Walpole, Her Majesty's Principal Secretary of State for the Home Department.

The Memorial of the Eltham Gas Company, whose seal is hereunto affixed.

The Eltham Gas Company.

SHEWETH,

THAT your memorialists were present at the interview which you were pleased to grant to the metropolitan gas companies on the 28th of November last, and your memorialists are led to expect from what took place at that interview, that it is the intention of Her Majesty's Government to bring in a Bill in the ensuing session to amend the provisions of the "Metropolis Gas Act, 1860," and that the several companies named in the schedule to that Act, who were specially excluded from its operations when the Act was passed, will in all probability be brought within its operations by the said Bill.

That your memorialists are further led to believe that one of the amendments sought to be introduced in the said Bill is to transfer the powers, to see that the provisions of the Act are properly enforced, now vested in the local authorities, from those authorities to the Metropolitan Board of Works, and that another of the proposed amendments is to raise the standard of the illuminating power from 12 candles to 18, and to reduce the maximum price from 4s. 6d. to 3s. 6d.

Your memorialists, therefore, respectfully call your attention to the fact that when the "Metropolis Gas Act, 1860," was first introduced all the outlying companies now in the schedule were named in the preamble along with the metropolitan companies, it being intended to make them subject to the provisions of the Act; and your memorialists, with others, had to retain counsel and appear before the Committee; that after being in attendance for several days, at a great expense, they procured a hearing, and thereupon the Committee struck them out of the preamble and added the schedule to the Act, whereby they were excluded from its operations.

That there are nine companies in the said schedule, and all those companies but two, viz., the Eltham Gaslight and Coke Company (Limited), and the Mitcham, Merton, and Tooting Gas Company, are regulated by recent and special Acts of their own, and subject to the provisions of the Gasworks Clauses Acts, and that the last-named company is about to apply to Parliament for an Act in the ensuing session.

That the districts of all those companies but one, the West Ham Gas Company, are partly within (some only to a very limited extent) and partly without the jurisdiction

of the Metropolitan Board of Works, and the district of that one company is wholly without their jurisdiction.

That their several districts are wholly suburban, and on the outskirts of the metropolis, where the supply is scattered over a very wide area; the houses supplied with gas far apart, and the consumption small; the length of main required to furnish the supply, the cost of distribution, and the proportion of capital to rental are all much in excess of what is required for any place subject to the provisions of the Metropolis Gas Act; the cost of coals is also greater, from the greater length of carriage, and there being no sufficient demand for the coke and other products in their immediate neighbourhoods, the amounts realized therefrom are much below that of other companies situated like those in the metropolitan districts.

That if the price were arbitrarily reduced as proposed to 3s. 6d. per 1,000 cubic feet in the district of your memorialists, it would be a reduction upon the rate now actually charged of 22 per cent. in some cases and  $36\frac{1}{3}$  per cent. in others, while at the same time, the illuminating power being increased, they would all be subject to a considerable additional expenditure in producing the gas.

Your memorialists beg leave respectfully to state that the charge per 1,000 cubic feet varies in the districts supplied by them from 4s. 6d. to 5s. 6d., and that it would be quite impossible for them to supply gas in districts like theirs on the proposed terms, viz., gas of 18-candle illuminating power at 3s. 6d. per 1,000 cubic feet. That they would not only not be able to realize any dividend for their proprietors out of such terms, but that they would suffer a very heavy loss every year.

Your memorialists respectfully submit that having been excluded from the operations of the Act by the deliberate decision of the Committee in the first instance, they took no part in the discussions on the clauses, and hence there are many provisions in the Act as it now stands which, although applicable to the metropolitan companies, it would be extremely unjust to impose upon companies supplying districts like those of your memorialists, and that it would be a great hardship upon them to be included in another Bill and put to the expense of appearing by counsel a second time before another Committee, when all the facts which led to their exclusion in the first instance remain in full force at the present day.

That one of the main objects of the Metropolis Gas Act was to place all the companies under uniform regulations; but if the outlying companies are now brought within the Act, this will be no longer possible, as there must of necessity be at least three or four different prices, and many other provisions of the Acts must be modified in different degrees to meet the varying circumstances of each of the outlying companies.

That in any event the regulation could only be partial, as the jurisdiction of the Metropolitan Board of Works covers only a portion of the districts of your memorialists, and could not be extended over the whole under such a Bill as the one now under discussion, but that some public measure would have to be made specially for that purpose.

Your memorialists therefore humbly pray that when the Bill comes under your consideration, you will be pleased to give instructions that they be excluded from its operations.

---

(33.) *Board of Trade to Messrs. Baxter, Rose, Norton, & Co.*

Board of Trade, Whitehall, S.W.  
2nd February 1867.

GENTLEMEN,

I AM directed by the Lords of the Committee of Privy Council for Trade to acknowledge the receipt of your letter of the 28th ult., containing copies of memorials of the following gas companies, viz.:—

Brentford,  
West Ham,  
Woolwich Equitable, and the Woolwich, Plumstead, and  
Charlton Consumers,  
Eltham,

which have been addressed to the Home Department respecting the proposed alterations of the Metropolitan Gas Act.

LOUIS MALLET.

Messrs. Baxter, Rose, Norton, & Co.

(34.) *Memorial of Crystal Palace District Gas Company to Home Office and Board of Trade.*

METROPOLIS GAS ACT AMENDMENT.

To the Right Hon. Spencer Horatio Walpole, Her Majesty's Principal Secretary of State for the Home Department, and the Right Hon. Sir Stafford Northcote, President of the Board of Trade.

The Memorial of the Crystal Palace District Gas Company.

SHEWETH,

THAT your memorialists are informed that it is the intention of Her Majesty's Government to bring in a Bill in the ensuing session (of which notices have been given in the Gazette) to amend the provisions of the Metropolis Gas Act, 1860, and amongst other things to include within its operation the several companies (of whom your memorialists are one) who were specially excluded from its operation when the Act was passed.

That your memorialists are also led to understand that the Metropolitan Board of Works proposes to urge before the Committee on such Bill the reduction of the price of gas throughout the districts of the companies proposed to be included in its operations to a uniform charge of 3s. 6d. per thousand feet, and to raise the standard of illuminating power from 12 candles to 18 candles.

Your memorialists were incorporated by an Act passed in the year 1858, and received further powers by an Act passed in the year 1862, in which nearly all the claims now required by Parliament have been inserted.

That your memorialists district is partly without and partly within the boundaries of the Metropolis Management Act, and was specially excluded after a prolonged investigation of the entire subject of gas legislation from the provisions of the Metropolis Gas Act, 1860, for many reasons, some of which are as follows:—

- a. That it is entirely a suburban district, and a considerable portion of it is entirely rural.
- b. That the rental, calculated either by the square mile of district, or by the mile lineal of main land, is only a fraction of that in metropolitan companies, consequently extra leakage takes place, and the rental being small, there is a greater increase in cost of management.
- c. That the works are situate inland, and consequently there is an extra cost for railway carriage and cartage on coal and other materials beyond that paid by the metropolitan companies, and that for the same reasons the amount realized for coke and residual products is less.
- d. That for these and other causes it was clear that the special reasons rendering a uniform regulation of the metropolitan companies as to every part regulated by Parliamentary enactment did not apply to your memorialists as the circumstances of your memorialists were totally different from the metropolitan companies.

That the whole of these reasons are unaltered and still applicable.

The relative position of your memorialists and the metropolitan gas companies is unaltered, and that there is very little doubt that the decision of a Committee of the Houses of Parliament will be the same with that of the Committee of 1860, which was presided over by the Right Hon. Thomas Henry Sotherton Estcourt, a member as able and impartial as any member of the House.

That your memorialists were compelled to go to very heavy expenses in appearing before the Committee on the Bill of 1860, during an inquiry which lasted from the 8th May to the 25th June 1860, and such expenses were a most serious and injurious charge upon the revenue of a company such as your memorialists, whose capital is very small compared to that of any one of the great metropolitan companies.

That under these circumstances, if your memorialists should be compelled to appear by counsel again, it will be a very great hardship, and those inhabitants of the district who have invested their money for the purpose of its being well lighted, on the faith of the legislative provisions made by the existing Acts, will be most cruelly treated if they are compelled a second time to expend large sums of money in resisting an attempt to reverse the decision so recently arrived at by the Committee presided over by the Right Hon. Thomas Henry Sotherton Estcourt.

That your memorialists and the inhabitants who have invested their money on the faith of the Acts of Parliament regulating the district, have always looked on those Acts of Parliament as a compact between your memorialists and the Legislature on behalf of

the consumers, that so long as your memorialists did their duty fairly and properly to the consumers they should not be deprived of the fair and reasonable privileges granted to them by the Act.

Your memorialists contend that although the inquiry of last session, which was conducted as between the consumers and the metropolitan gas companies, may have been held by the Government sufficient to justify further legislation as regards such metropolitan gas company, yet that your memorialists were not in any way cited before the Committee which conducted that inquiry, and no attempt was ever made to show that any modification of the legislative enactments as to price and other subjects applicable to your memorialists was required.

Your memorialists, on the contrary, are prepared to prove that they have done their duty fairly and properly in every way, and amongst other heads, they beg to represent the following facts as very important proofs of their allegations:—

- a. They have divided on the average not more than  $8\frac{1}{2}$  per cent. on dividend.
- b. Although authorized by their special Acts to divide 10 per cent. on 100,000*l.* they have voluntarily issued half that amount, or 50,000*l.*, at 6 per cent. preference shares, in order to enable them to reduce the price of gas more rapidly.
- c. They have made continual reductions in the price of gas, so that from 6*s.* maximum price per thousand feet charged in 1858, the price has been so reduced, that in 1866 their maximum price is 4*s.* 6*d.* per thousand feet, and their minimum charge 3*s.* 8*d.* per thousand feet, and the charge for public lights 3*s.* 8*d.* per thousand cubic feet, which charges, under the circumstances of the district, compare most favourably with the charges of the metropolitan companies.
- d. Their illuminating power has been at least 15 per cent. above that required by their special Act, and has been tested at all times by the parish inspectors without notice or complaint.
- e. Services have been laid on up to 100 feet lengths, and meter and fittings found without charge to consumers, and meters are let out on hire by the company at a rental or nominal quarterly charge of 9*d.* per quarter, for all sizes.
- f. The gas has been always pure from sulphuretted hydrogen, with only traces of ammonia, and as tested by Dr. Letheby has only contained from 12 to 16 grains of sulphur in the form of bi-sulphide of carbon.

That to include your memorialists in the operation of the Metropolis Gas Act, 1860, with such a fixed price as is proposed, would be absolute ruin to your memorialists property, and to be compelled to sell it on the terms threatened by the promoters of the Bill would be a confiscation such as it is impossible the legislature would sanction.

That having regard to the very high authority on which the exclusion of your memorialists rests, the exact similarity of the circumstances at the present time, the fact that no complaints have ever been made against your memorialists, and the very serious loss and injury which will be done to them if they are put to the expense of appearing before a Committee of Parliament for probably two or three months to resist this attempt to reverse the very recent decision of Parliament; your memorialists humbly submit, that in introducing the Bill the suburban company ought not to be included, and the schedule of excluded districts to the Act of 1860 ought not to be sought to be brought within the operation of the Act.

Your memorialists therefore humbly pray that when the Bill comes under your consideration, you will be pleased to omit them from its operation.

ERASMUS WILSON, F.R.S., (L. S.)  
Chairman.

J. D. H. STEPHENSON,  
Deputy Chairman.

(35.) *Board of Trade to Crystal Palace District Gas Company.*

SIR,

Board of Trade, Whitehall, S.W.,  
30th January 1867.

I AM directed by the Lords of the Committee of Privy Council for Trade to acknowledge the receipt of a memorial from the Crystal Palace District Gas Company praying for exemption from a proposed Bill for the amendment of the Metropolitan Gas Act, 1860.

The Chairman,  
Crystal Palace District Gas Company.

T. H. FARRER.

(36.) *Memorial of Wandsworth and Putney Gas Light and Coke Company to the Home Office and the Board of Trade.*

METROPOLIS GAS ACT AMENDMENT.

To the Right Hon. Spencer Horatio Walpole, Her Majesty's Principal Secretary of State for the Home Department, and the Right Hon. Sir Stafford Northcote, President of the Board of Trade.

The Memorial of the Wandsworth and Putney Gas Light and Coke Company.

SHEWETH,

THAT your memorialists are informed that it is the intention of Her Majesty's Government to bring in a Bill in the ensuing session (of which notices have been given in "The Gazette") to amend the provisions of "The Metropolis Gas Act 1860," and amongst other things to include within its operation the several companies (of whom your memorialists are one) who were specially excluded from its operation when the Act was passed.

That your memorialists are also led to understand, that the Metropolitan Board of Works proposes to urge before the committee on such Bill the reduction of the price of gas throughout the districts of the companies proposed to be included in its operation to an uniform charge of 3s. 6d. per thousand feet, and to raise the standard of illuminating power from 12 to 18 candle gas.

Your memorialists consist almost entirely of resident inhabitants of Wandsworth, a few of whom associated themselves together originally in the year 1834 as a private partnership for making gas, which they then supplied at cost price for the benefit of the neighbourhood. Afterwards they found it necessary to form themselves into a joint stock company under the Joint Stock Companies Act of 1844, with a total capital of 15,000*l.*, for the purpose of better lighting the district in which they resided, and the chairman was the principal medical man residing in Wandsworth, who has, since his death, been succeeded by his son, who is also a medical man, and has succeeded to his father's business and position in Wandsworth.

Your memorialists have since found it necessary to obtain further powers, and they therefore applied to Parliament in the year 1856, and by an Act passed in that year were reincorporated, and their capital increased to 30,000*l.* They have since then received further authority to increase their capital by virtue of an Act passed in the last session of Parliament (1866), under which some further increase of capital has been made, and in each Act all the clauses now required by Parliament, and also a number of clauses which your memorialists voluntarily acceded to at the request of the Metropolitan Board of Works for the Wandsworth district, have been inserted.

That your memorialists' district was specially excluded, after a prolonged investigation of the entire subject of gas legislation, from the provisions of the Metropolis Gas Act, 1860, for many reasons, some of which are as follows:—

- a. That it is entirely a suburban district, and comprises the chief portions of Wandsworth Common, Wimbledon Common, and Putney Heath, besides which a considerable further portion of the district is entirely rural.
- b. That the rental, calculated either by the square mile of district or by the mile lineal of main laid, is only a fraction of that in the metropolitan companies, consequently extra leakage takes place, and extra capital per unit of quantity sold is necessary.
- c. That for these and other causes it was clear that the special reasons rendering an uniform regulation of the metropolitan companies as to price and other subjects desirable did not apply to your memorialists, as the circumstances of your memorialists were totally different from those of the metropolitan companies.

That the whole of these reasons are unaltered and still applicable; the relative position of your memorialists and the metropolitan gas companies is unaltered; and that there is very little doubt that the decision of a Committee of the Houses of Parliament will be the same as that of the Committee of 1860, presided over by the Right Hon. Thomas Henry Sotheron Estcourt.

That your memorialists were compelled to go to very heavy expenses in appearing before the Committee of the Bill of 1860 during an inquiry which lasted from the 8th May to 25th June 1860, and such expenses were a most serious and injurious charge upon the revenue of a company such as your memorialists, whose capital is very small compared with that of any of the great metropolitan companies.

That under these circumstances, if your memorialists should be compelled to appear by counsel again before the House of Commons, it will be a very great hardship, and those inhabitants of the district who have invested their money for the purpose of its being

well lighted on the faith of the legislative provisions made by the existing Act will be most cruelly treated if they are compelled a second time to expend large sums of money in resisting an attempt to reverse the decision so recently arrived at by the Committee presided over by the Right Hon. Thomas Henry Sotherton Estcourt.

That your memorialists and the inhabitants who have invested their money on the faith of the Acts of Parliament regulating the district have always looked on those Acts of Parliament as a compact between your memorialists and the Legislature on behalf of the consumers, that so long as your memorialists did their duty fairly and properly to the consumers they should not be deprived of the fair and reasonable privileges granted to them by the Act.

Your memorialists contend that although the inquiry of last session, which was conducted as between the consumers and the metropolitan gas companies, may have been held by the Government sufficient to justify further legislation as regards such metropolitan gas companies, yet that no evidence whatever was adduced against your memorialists and the other suburban gas companies, and your memorialists were not in any way cited before the Committee which conducted that inquiry, nor were any attempts made to show that any modification of the legislative enactments as to price and other subjects applicable to your memorialists was required.

Your memorialists, on the contrary, are prepared to prove that they have done their duty fairly and properly in every way, and amongst other heads they beg to represent the following facts as very important proofs of their allegation :

- a. They have never declared a dividend exceeding  $7\frac{1}{2}$  per cent., and have only declared that dividend during the last year or two, although by their special Act they are authorized to declare a dividend of 10 per cent. on their original capital of 15,000*l*.
- b. They have made continual reductions in the price of gas from 6*s*. per thousand feet, which they were authorized to charge by their Act of 1856, and further in the Act obtained by them in 1866 they voluntarily proposed to reduce their maximum price to 4*s*. 6*d*. per thousand feet, which price was accordingly fixed by the Act, and which they are now charging. Considering the additional leakage and the small rental per mile of main laid, these compare most favourably with the charges of the metropolitan companies.
- c. Their illuminating power has been at least two candles higher than that required by their special Act, and no complaints have ever been made by the local authorities, although every facility has been offered to them for the purpose of testing it.
- d. Services have been laid on up to 100 feet lengths without charge to consumers, and meters are let out on hire by the company at a rental or nominal quarterly charge varying according to the size from 10*d*. to 4*s*. 3*d*.
- e. The gas has been always pure from sulphuretted hydrogen, with only traces of ammonia, and as the company exclusively purify by lime the bisulphide of carbon is reduced to 10 grains per 100 cubic feet and carbonic acid is entirely eliminated.

That to include your memorialists in the operation of the Metropolis Gas Act, 1860, with such a fixed price as is proposed would be absolutely ruin to your memorialists' property, and to be compelled to sell it on the terms threatened by the promoters of the Bill would be a confiscation such as it is impossible the Legislature would sanction.

That having regard to the very high authority on which the exclusion of your memorialists rests, the exact similarity of the circumstances at the present time, the fact that no complaints have ever been made against your memorialists, and the very serious loss and injury which will be done to them if they are put to the expense of appearing before a Committee of Parliament for possibly two or three months to resist this attempt to reverse the very recent decision of Parliament, your memorialists humbly submit that in introducing the Bill the suburban companies ought not to be included, and the schedule of excluded districts to the Act of 1860 ought not to be sought to be brought within the operation of the Act.

Your memorialists, therefore, humbly pray that when the Bill comes under your consideration you will be pleased to omit them from its operation.

THOMAS HOWELL,  
Chairman.

(37.) *Board of Trade to Wandsworth and Putney Gas Light and Coke Company.*Board of Trade, Whitehall, S.W.,  
6th February 1867.

SIR,

I AM directed by the Lords of the Committee of Privy Council for Trade to acknowledge the receipt of a memorial of the Wandsworth and Putney Gas Light and Coke Company, praying that they may not be brought within the operation of the proposed "Metropolis Gas Amendment Act" of the present session.

I am, &amp;c.

ROBERT G. W. HERBERT.

Chairman of the Wandsworth and Putney Gas Light  
and Coke Company.

(38.) *Memorial of Victoria Docks Gas Company to the Home Office.*

## METROPOLIS GAS ACT AMENDMENT.

To the Right Hon. Spencer H. Walpole, Her Majesty's Principal Secretary of State  
for the Home Department.

## The Memorial of the Victoria Docks Gas Company.

SHEWETH,

THAT your memorialists under the powers conferred upon them by an Act passed in the year 1857, supply with gas a district situate without the jurisdiction of the Metropolitan Board of Works, and the inhabitants of that district are almost wholly persons in a humble condition of life and many of them in needy circumstances.

Your memorialists were present at the interview which you were pleased to grant to the metropolitan gas companies on the 28th day of November last, and from what took place on that occasion your memorialists are led to expect that it is the intention of Her Majesty's Government to bring in a Bill in the present session to amend the provisions of "The Metropolis Gas Act, 1860," and that the several companies named in the schedule to that Act, who were specially excluded from its operations when the Act was passed, will probably be brought by the said Bill within its operations.

Your memorialists are further led to believe that one of the amendments ought to be introduced in the said Bill is to transfer the powers of supervision now vested in the local authorities, from those authorities to the Metropolitan Board of Works, and that another of the proposed amendments is to raise the standard of the illuminating power from 12 candles to 18, and to reduce the existing maximum price to 3s. 6d.

Your memorialists, therefore, respectfully call your attention to the fact that when "The Metropolis Gas Act, 1860," was first introduced, all the outlying companies now in the schedule of exclusion were named in the preamble, together with the metropolitan companies, it being intended to make them subject to the provisions of the Act, and your memorialists had to retain counsel and appear before the Committee, that after being in attendance for several days at a great expense they procured a hearing, and thereupon the Committee struck their names out of the preamble, and included it in the schedule to the Act, whereby they were excluded from its operation.

That the duties and powers of your memorialists are regulated by two recent Acts, that is to say, their Act of 1857 and an Act of 1861.

That the district supplied by your memorialists is wholly suburban, and on the eastern side of the metropolis, where the supply is spread over a very wide area, the houses supplied with gas being far apart, and the consumption small; the length of main required to furnish the supply, the cost of distribution, and the proportion of capital to rental, are all much in excess of what is required for any place subject to the provisions of the Metropolis Gas Act.

That in establishing their works and in expending a large amount of capital upon them, your memorialists did so in the belief that the occupation of the district would be encouraged thereby and a common benefit conferred. Your memorialists have divided no greater profit than 6 per cent. per annum on their present capital, and if the proposed increase in the illuminating power of their gas, together with a reduction of prices, were enforced by legislation, the cessation of their business would be inevitable.

That if the price were arbitrarily reduced as proposed to 3s. 6d. per 1,000 cubic feet, in the district of your memorialists, it would be a reduction after the average rate of

above 19 per cent., while at the same time the illuminating power being increased your memorialists would be subjected to a considerable additional expenditure in producing the gas.

That the average price now charged by your memorialists is 4s. 3d. per 1,000 cubic feet, and the proposed reduction to one uniform price of 3s. 6d. would inevitably deprive your memorialists of all profit whatsoever in the manufacture of their gas.

That your memorialists have hitherto produced and supplied gas of the illuminating power of 13½ candles, whereas an illuminating power of 12 candles only would satisfy the existing obligation upon your memorialists.

That your memorialists are exposed in a greater degree than the companies in the metropolitan districts to losses from the poverty of many of the renters of gas, and from the fact that many leave the neighbourhood or otherwise evade payment.

That your memorialists having been excluded from the operations of the Act by the deliberate decision of the Committee in the first instance, they took no part in the discussion on the clauses, and hence there are many provisions in the Act as it now stands which, although applicable to the metropolitan companies, it would be extremely unjust to impose upon a company supplying a district like that of your memorialists, and it would be a great hardship upon them to be included in another Bill, and put to the expense of appearing by counsel a second time before another Committee.

That your memorialists have expended considerable sums of money upon their works in the faith of their exemption from the operation of the Act of 1860, and in the belief that the legislation on the subject by that Act would not only be interfered with for a period of years much longer than that which has elapsed.

That one of the main objects of the Metropolis Gas Act was to place all the companies under uniform regulation, but if the outlying companies are now brought within the Act this will be no longer possible, as there must of necessity be at least three or four different prices, and many other provisions of the Acts must be modified in different degrees to meet the varying circumstances of each of the outlying companies.

That in any event the regulation could only be partial, as the jurisdiction of the Metropolitan Board of Works covers only a portion of the district of your memorialists, and could not be extended over the whole under such a Bill as the one now under discussion, but that some public measure would have to be made specially for that purpose.

Your memorialists therefore humbly pray that when the Bill comes under your consideration you will be pleased to give instructions that they be excluded from its operations.

WM. HAWKINS, (L.S.)  
Secretary.

(39.) *Board of Trade to Victoria Docks Gas Company.*

Board of Trade, Whitehall, S.W.,  
22nd February 1867.

SIR,

I AM directed by the Lords of the Committee of Privy Council for Trade to acknowledge the receipt of the memorial under the seal of the Victoria Docks Gas Company, addressed to the Secretary of State for the Home Department, and which has been transferred to this department, praying that the memorialists may be excluded from the operation of any Bill which may be brought in by Her Majesty's Government during the present session to amend the provisions of the Metropolis Gas Act, 1860; and I am to inform you that the memorial shall receive the careful consideration of their Lordships.

I am, &c.

ROBERT G. W. HERBERT.

The Secretary to the  
Victoria Docks Gas Company.

METROPOLIS GAS.—1867.

---

### MEMORANDUM No. 6. by the METROPOLITAN GAS COMPANIES.

THE Metropolitan Gas Companies have considered the suggestion of the Board of Trade, that they should state in writing their views with respect to legislation on Gas, with special reference to the provisions of the Bill now before the House.

The Companies, as in 1860, do not seek anything at the hands of Parliament, and therefore are not promoters of legislation, and at the interview with which they were honoured by the Secretary of State for the Home Department and Sir Stafford Northcote, in November last, they suggested that it was better to leave the Corporation of the City of London and other parties who complained of a grievance to bring forward their own measures for remedying it. This was the course taken by Sir George Cornwall Lewis when applied to in 1860, and the local authorities then lodged their own Bill. As the Companies' case was not heard last Session, they saw no reason why this course should be departed from on this occasion.

If, however, the Government should consider themselves pledged to legislation, the Companies do not wish to place any obstruction in the way, and would support any reasonable measure, but they would respectfully urge that the present Bill should be withdrawn.

With regard to its chief provisions, the Companies, as invited, proceed to express their views.

*The Provisions of this Bill, to which the Companies cannot assent in any form, are—*

1. The repeal of the following Sections of "The Metropolitan Gas Act," namely—Section 2, incorporating the provisions of the Gas Works Clauses Act, 1847, with respect to the amount of profits to be received by the shareholders; and Sec. 40, which authorises the Companies to raise the price of Gas upon an advance in the cost of labour, coal, and other materials, subject to arbitration in case of dispute.

2. The provision (Clause 34) which would deprive shareholders of the actual income they are now receiving, of 10 per cent., under the Gas Works Clauses Act, 1847.

Act, confirmed by the Metropolis Gas Act, and substitute a maximum of seven per cent.

3. The provision authorising bodies empowered to raise money by public rating to purchase Gas undertakings, and virtually enter into competition with private capital, thus encouraging local authorities to attack Gas Companies throughout the country, with a view to depreciate and then purchase the property.

*The Provisions which need modification are—*

1. The Gas Board ought not to be a permanent body, but be appointed from time to time to report, and, as soon as the report is made, to be *ipso facto* superseded.

In order that there may be on the Board a person of actual experience in the manufacture and distribution of Gas in London, it would be but reasonable that the Companies should appoint one member, the other two being appointed by the Board of Trade.

2. The details as to illuminating power and test of purity, and as to testing places and apparatus, and the period of testing, require modification in order to be fairly workable.

3. The Companies do not object to the appointment of Examiners by the Metropolitan Board and Commissioners of Sewers, nor to the appointment of a Chief Gas Examiner by the Board of Trade, but the mode of appeal from the Examiners to the Chief Examiner is not sufficiently defined.

4. Unless under very exceptional circumstances, Gas cannot at present be furnished throughout the Metropolis under 4s. per thousand cubic feet with a minimum illuminating power of 14 candles, admitting of the authorised profit. Although the subject of Gas has been before Parliament one hundred and ninety times in the last eleven years, the Companies' opponents have, in their communications with the Board of Trade, quoted only one case in which so low a rate as 3s. 6d. has been prescribed for 14-candle Gas, viz., the Act of the Brighton and Hove Company. This Act was passed last Session, under very peculiar circumstances, and the Companies now append a statement of the Brighton and Hove Company's accounts for the past half-year's working, from which it will be seen that they have only obtained a profit of 4½ per cent., instead of their accustomed 10 per cent. There cannot be a stronger proof of the unreasonableness of inserting so low a price in the Metropolis Gas Bill as 3s. 6d. for 14-candle Gas.

5. The penalties by reduction of price would be exceedingly oppressive, and the mode of enforcing them most unjust, there being (besides other objections) an entire absence of any provision for such accidents as may be beyond the control of the Companies.

6. The Reports of the Chief Gas Examiner ought to have no reference to price.

7. The periods of payment for Gas should not be prescribed by the Act, but left entirely in the discretion of the Companies.

8. The Companies do not object to an Auditor to be appointed by the Board of Trade, but his duties are not properly defined.

9. The pressure prescribed by Clause 41 is unreasonable and unnecessarily wasteful of the Gas, and therefore against the interests of all parties.

10. Exceptions ought to be admitted in Clause 43, as in the Gas Act, 1860, Section 37. The supply to the public lamps subjects the Company to greater waste and loss of Gas than any other service. Cases occur in which large establishments pay for all their Gas, as measured at one inlet by one or more meters, the consumer bearing the waste in distribution. In these cases a lower price ought not to be prohibited.

11. The provision in Clause 51 is objectionable. It would only encourage repeated agitation, and unsettle and depreciate the undertakings.

12. The burner defined in the second Schedule of the Act is only suited to common Gas. The Cannel Gas Burner has been omitted.

STATEMENT of Brighton and Hove Company's Account for the last Half-Year, ending  
31st December 1866.

## — No. 2. —

Resolution of Chairmen of Gas Companies left by Mr. Beck at the Board of Trade on the 12th April 1867.

Resolved,

THAT under a fair system of penalties the Companies will not object to the deduction from their dividends of such penalties, if incurred.

## — No. 3. —

LETTER from Mr. Beck to Mr. Farrer.

Chartered Gas Company, Horseferry-road, Westminster, S.W.  
23 April 1867.

Dear Sir,

I HAVE again brought before the Committee of Chairmen of the Metropolitan Gas Companies the Bill introduced for regulating the supply of Gas to the Metropolis; and I now return you a print of the Bill, striking out those clauses which have led to the opposition upon the Second Reading, and to which the Companies cannot in any way assent.

If the present Bill be withdrawn, and another introduced omitting these Clauses, the Companies will not oppose the Second Reading and the reference to a Committee. The Companies adhere to the terms of the Resolution of the Chairmen's Committee, communicated to you on the 12th instant. To most of the remaining Clauses, however, of the Bill the Companies entertain the strongest objections; but it will doubtless be more satisfactory to the public that these should be debated and settled upon evidence given in Committee, the Companies holding themselves at perfect liberty to oppose such Clauses in Committee, although they abstain from any opposition on the Second Reading.

I am, &c.

(signed) *S. Adams Beck*, Chairman.

T. H. Farrer, Esq.,  
Board of Trade.

May I request the favour of an early answer to the above address?

## — No. 4. —

LETTER from Mr. Farrer to Mr. Beck, enclosing proposed Alterations in Bill.

Dear Sir,

Board of Trade, 23 April 1867.

I HAVE laid before Sir Stafford Northcote your letter of this date, with its enclosure, on the subject of the Metropolis Gas Bill. I have also informed him of the result of our previous communications. He has carefully considered these, as well as the printed observations of the Companies upon the Bill, with the view of effecting, if possible, the object which the Companies, as well as the consumers, have in view, viz., that this long disputed question should be disposed of in the present Session.

With this object he is willing to alter the Bill to the effect shown in the accompanying paper, provided that the Bill so altered is likely to afford a basis for a satisfactory settlement.

If this appears to be the case, Sir Stafford Northcote will take steps to have the Bill altered accordingly, leaving disputed points, as suggested by you, "to be debated and settled upon evidence given in Committee."

It seems to him that the withdrawal of the Bill is open to serious objections;  
one

one of these is, that it might prevent a settlement of the question during the present Session.

As the answer of the Companies will materially affect the course the Government may take on Monday, I am to request that Sir Stafford Northcote may have an answer at your earliest convenience.

S. A. Beck, Esq.

Believe me, &c.  
(signed) T. H. Farrer.

---

Enclosure in No. 4.

ALTERATIONS in the METROPOLIS GAS ACT proposed to the COMPANIES before  
SECOND READING.

OMIT the permissive powers to purchase.

Omit the clauses which reduce the price on account of defective power or purity.

Impose efficient penalties for defective power or purity, bearing same proportion either to the capital or to the quantity of Gas supplied by the several Companies, so that the penalty may bear a fair proportion to the breach of statutory obligation.

Let the liability to them be determined, not by evidence in Court, but by the Report of the Examiner.

Make the penalties fall efficiently and exclusively on the dividends.

Omit the clauses fixing the standard price of Gas.

Let the present standard maximum price of Gas be determined by the Select Committee, with some power such as there is in the present Act to raise it, if circumstances so require; and also with power to lower it, if circumstances so require.

Let the standard dividend for each Company be fixed at the average of actual dividend paid by that Company during a given number of years; the number of years to be determined by the Select Committee.

Let the dividend rise in proportion to the reduction of price from the point of standard price, that point being determined as above mentioned; and let it be again reduced if the price is afterwards raised.

---

— No. 5. —

LETTER from Mr. Beck to Mr. Farrer.

Chartered Gas Company, Horseferry Road,  
Westminster, 26 April 1867.

Dear Sir,

YOUR letter of the 23rd instant, forwarding a statement of the alterations proposed by the Board of Trade to be made in the Metropolis Gas Bill, with a view to avoid opposition to the Bill on the second reading, has been laid before the Committee of Chairmen of the Metropolitan Gas Companies to-day. The Committee regret to find that the proposals made do not in any degree yield the principle for which the Companies have always contended, and which they cannot now forego, viz., the maintenance of the General Act of 1847, which regulates Gas Companies in the United Kingdom generally, and upon the faith of which their capitals have been subscribed.

I am instructed to return you herewith the statement altered in red ink,\* in such particulars only as the Companies consider indispensable.

I also enclose a print of the Bill, with Clauses 4, 28, 29, 34, 49, and 50 struck out, and am desired to suggest that if the views of the Companies be agreed to by the Government, the proceeding to be adopted on the motion for second reading should be as follows, viz.:—

That the Bill should be permitted to pass second reading unchallenged, on the understanding that Sir Stafford Northcote shall at the same time state to the House

---

\* The words proposed to be left out are printed in erased type, and those to be inserted are printed in *italics*.

House the modifications agreed to, which he intends to make in the Bill, and that the Bill should thereupon be committed to a Committee of the whole House, for the purpose of striking out the clauses before enumerated, and that it should be in the altered shape reprinted before reference to a Select Committee.

I am to repeat that the submission of the Companies to the course proposed must in no case be held to preclude their opposition to any of the clauses of the Bill in Committee, or in its subsequent stages in the House.

Hoping to receive at as early an hour to-morrow as possible such a reply as may render unnecessary any opposition on the part of the Companies to the second reading of the Bill,

I am, &c.  
(signed) S. Adams Beck.

T. H. Farrer, Esq.,  
Secretary, Board of Trade.

Enclosure in No. 5.

ALTERATIONS in the METROPOLIS GAS ACT proposed to the COMPANIES before SECOND READING, as altered by the Gas Companies.

[*Note*.—The words proposed to be left out are printed in erased type, and those to be inserted are printed in *italics*.]

1. Omit the permissive power to purchase.
2. Omit the clauses which reduce the price on account of defective power or purity.
3. Impose efficient penalties for defective power or purity, leaving ~~same~~ *some* proportion ~~either to the capital or~~ to the quantity of *bad* Gas supplied by the several Companies, so that the penalty may bear a fair proportion to the breach of statutory obligation.
4. Let the liability to them be determined not by evidence in court, but by the Report of the *Chief Gas Examiner, after hearing the Company in case of dispute.*
5. Make the penalties fall efficiently and exclusively on the dividend.
6. Omit the clauses fixing the standard price of Gas.
7. Let the present standard and maximum price of Gas be determined by ~~the Select Committee, Parliament,~~ *having regard to the present prescribed rates of dividend,* with some power such as there is in the present Act to raise it, if circumstances so require; and also with power to lower it *to the standard maximum,* if circumstances so require.
8. ~~Let the standard dividend for each Company be fixed at the average of actual dividend paid by that Company during a given number of years:—the number of years to be determined by the Select Committee.~~
9. Let the *present prescribed rate of dividend* rise in proportion to the reduction of price from the point of standard price, that point being determined as above-mentioned in *Clause 7,* and let it be again reduced *to the prescribed rate* if the price is afterwards raised.
10. Omit *Clause 4 in the Bill (Repeal as in Schedule) and of course the Schedule itself.*

— No. 6. —

LETTER from Mr Farrer to Mr. Beck.

Dear Sir,

Board of Trade, 27 April 1867.

I HAVE to acknowledge your letter of yesterday's date, which I have this morning laid before Sir Stafford Northcote.

He desires me to say that, having carefully considered the proposals contained in your letter and its enclosure, he is unable, consistently with the position the Government have assumed as Arbitrators between the Gas Companies and the Consumers, to accept those proposals.

It appears to him that the principal point for which the Gas Companies contend

tend is, as stated in your letter, "the maintenance of the General Act of 1847, which regulates Gas Companies in the United Kingdom generally, and upon the faith of which their capitals have been subscribed."

If this were the only question at issue, Sir Stafford Northcote would not be prepared to dispute it, but it is to be remembered that the operation of this principle is entirely altered by the Act of 1860. Before that Act there was competition in the Metropolis. Under that Act there has been and is complete monopoly. If the Companies desire to be placed on the footing on which they stood when their capital was subscribed, the proper course to effect that object would be to repeal the Act of 1860.

I am further to remind you, with reference to the figures concerning price, penalties, and dividends contained in the Bill, that Sir Stafford Northcote, both before and after the Bill was introduced, expressed his willingness to omit these figures altogether, so as not to prejudice either party before the Select Committee to whom the Bill was to be referred. This proposal was not considered satisfactory by the Companies, and, after hearing their objections to the Bill, Sir Stafford Northcote expressed his readiness to make the alterations in the Bill contained in my letter of the 23rd instant.

His object in making these concessions was to meet the views of the Companies as far as was consistent with justice to the public, and thus to prevent delay and save costs to all parties.

The principles, however, to which he felt bound to adhere, are as follows:—

First, to provide that effectual penalties for supplying improper Gas shall really fall on the Companies, and not on the consumer.

Secondly, to provide that, if circumstances change, there shall be a means of varying the standard price of Gas, either upwards in favour of the Companies, or downwards in favour of the consumer, as the case may require.

Thirdly, to provide that for the present rule which limits the maximum profits of the Companies to 10 per cent., and which thus destroys all motive for exertion, there shall be substituted a sliding scale, of which the lowest point shall be the actual present profits of the Companies, calculated on an average of a certain number of years, and which shall be capable of rising indefinitely in proportion as the price of Gas is lowered.

It now appears from your letter that the Companies are willing to assent to the first of these propositions, to the extent at any rate of having the question inquired into by a Committee. But that as regards the two others, the Companies not only do not assent to them, but refuse to assent to any inquiry before a Select Committee, unless these points are wholly withdrawn from its consideration.

Considering the strict and complete monopoly of Gas which now exists in London; considering that the history of Gas from its first introduction to the present time shows a constant reduction in cost; considering, lastly, that the present circumstances of the Gas supply in London are such as specially lead to the conclusion that there is much room for improvement in manufacture, and for future reduction in cost, Sir Stafford Northcote is of opinion that a full discussion of the two provisions in question is essential, and that it is impossible for him to undertake to withdraw those provisions from the consideration of the Select Committee to which the Bill will be referred.

In conclusion, I am to state, that however much Sir Stafford Northcote may regret that his efforts to save the time of Parliament and the expense to parties should prove ineffectual, he feels that if the Gas Companies adhere to the propositions contained in your letter of the 26th instant, and still reject the concessions which he has expressed his readiness to make, there is no course for him but to leave the whole question to be determined by Parliament in the usual way.

Believe me, &c.

FURTHER RETURN to an Order of the Honourable The House of Commons,  
dated 22 February 1867;—for,

COPY “of CORRESPONDENCE between the Board of Trade and the Corporation of the City of *London*, the Metropolitan Board of Works, the London Vestries, and the Gas Companies of *London*, with respect to the SUPPLY of GAS to the METROPOLIS.”

---

— No. 1. —

LETTER from Mr. *Beck* to Mr. *Farrer*.

Dear Sir,

Chartered Gas Company, Horseferry-road,  
Westminster, 29 April 1867.

I BEG to acknowledge the receipt of your letter of the 27th instant, which, having been delivered at this Company's office on Saturday evening at a late hour and after everyone had left, did not reach me until this morning.

Without pursuing the earlier detail to which you allude, I am instructed on behalf of the Companies to observe that, in stating the principles to which you say Sir Stafford Northcote is bound to adhere, viz. :—

1. The provision that the penalties shall fall upon the Company ;
2. That if circumstances change, there shall be a means of varying the price, either upwards or downwards, as the case may require ; and,
3. To substitute for the present maximum profit, a sliding scale ;

And, to your statement that the Companies assent to the consideration of the first by a committee, but object to all inquiry into the second and third—  
With respect to the second and third you entirely misconceive the views of the Companies.

Upon the second point, they do not, as you imagine, refuse to accept a varying standard, but consider that, subject to the limit fixed by the Act of 1847, it would be beneficial to adopt a varying scale ; and this you will find distinctly stated in No. 7 of my letter to you of the 23rd instant.

With regard to the third point, you will see, by reference to paragraph No. 9, in my letter of the same date, that the Companies are ready to adopt the sliding scale, beyond the limits fixed by the Act of 1847 ; and they consider the motive for exertion which Sir Stafford Northcote desires to establish would be thus safely attained, whilst the adoption, as a minimum of the average profits of a term of years, might, in the case of some of the Companies concerned, work an extreme injustice.

The Companies do not shrink from the most searching inquiry, nor do they object to any fair restriction which may be suggested for the satisfaction of the public ; but the provisions of the present Bill have been (no doubt, unintentionally) framed in such a manner as would break faith with all the shareholders, representing more than 500 millions of capital, invested in joint-stock undertakings ; and the Gas Companies cannot conceive that the Government will persevere in the course so contrary to public policy as to press the Bill, as it now stands, upon the attention of The House.

I am, &c.

(signed) *S. Adams Beck*, Chairman.

T. H. Farrer, Esq., Board of Trade.

— No. 2. —

LETTER from Mr. Farrer to Mr. Beck.

Dear Sir,

Board of Trade, 30 April 1867.

SIR STAFFORD NORTHCOTE is anxious to meet the views of the Gas Companies as far as he can do so consistently, with what appear to him the just rights of the public.

As regards the basis to be taken for the sliding scale of dividends, to the principle of which the Companies assent, Sir Stafford Northcote considers that it would not be fair to remove the present limit of 10 per cent., and to give the Companies the right of making larger, and perhaps much larger, profits unless a concession is made to the public in the price of Gas. Assuming, however, that the Select Committee would see the propriety of making some provision to this effect, Sir Stafford Northcote would have no objection to take a dividend of 10 per cent. as the basis of the sliding scale, if the circumstances of all the Companies were alike. The difficulty in the way of adopting that basis is, that if an uniform price is fixed, while some Companies are able to sell at a much lower rate than others, a price which will give 10 per cent. to the least favourably circumstanced, will give much more to the most favourably circumstanced, and *vice versâ*, a price which will only insure 10 per cent. to the latter, will leave the former with a much smaller rate of profit; consequently it will be difficult for the Select Committee to determine to which end of the scale they should adapt the fixed price. This difficulty would be avoided by taking the average profits of each Company as the basis, instead of the fixed rate of 10 per cent. for all.

As, however, the Companies object to this proposal, and as the main object of the sliding scale may be attained upon the basis of a 10 per cent. dividend, Sir Stafford Northcote is willing to accept that as the basis, leaving it to the Select Committee to fix the price with reference to the considerations to which I have adverted.

With regard to the proposal that there shall be a power of varying the price upwards or downwards, according to a change in the cost of production, Sir Stafford Northcote is happy to find that he misunderstood the views of the Gas Companies. It would be manifestly inequitable that a power should be given to raise the price when the cost of production increased, unless there were a corresponding provision for lowering it when the cost decreased. Sir Stafford Northcote is willing to leave it to the Select Committee to consider under what conditions such variations should take place.

With reference to the concluding paragraph of your letter, Sir Stafford Northcote cannot admit that the Bill, as at present drawn, involves any breach of faith whatever with the Metropolitan Gas Companies, and still less that it in any way affects any other class of Companies.

The Bill is prepared for the purpose of rendering possible to maintain the privilege of monopoly, given to the Gas Companies in 1860, without injury to the public. If the Companies refuse to accede to the conditions, which upon full inquiry may be thought necessary in order to mitigate the inconveniences of that monopoly, it may become a question for Parliament whether it is right that they should be left in the possession of it; but this is a question for the future.

Believe me, &c.  
(signed) T. H. Farrer.

S. A. Beck, Esq.,  
Chartered Gas Company's Office,  
Horseferry Road.

# R E P O R T.

Spring Gardens, 31 July 1866.

THE Board, in pursuance of the provisions contained in the 200th section of the Act of the 18th & 19th Vict. c. 120, designated "The Metropolis Local Management Act, 1855," have now to submit a Statement and Report of their several proceedings, and of the steps taken by them during the past year, under that Act, and the several other Acts, nearly the whole of which have been passed since that date.

The Acts referred to are as follows :

|                                                  |          |                                                                    |
|--------------------------------------------------|----------|--------------------------------------------------------------------|
| Metropolitan Sewers Act:                         |          |                                                                    |
| 11 & 12 Vict. c. 112                             | (1848)   | - Improvement Rates, &c.                                           |
| Metropolis Management Acts:                      |          |                                                                    |
| 18 & 19 Vict. c. 120                             | (1855).  |                                                                    |
| 19 & 20 Vict. c. 112                             | (1856).  |                                                                    |
| 25 & 26 Vict. c. 102                             | (1862).  |                                                                    |
| Main Drainage Acts (Purification of the Thames). |          |                                                                    |
| 21 & 22 Vict. c. 104                             | (1858).  |                                                                    |
| 26 & 27 Vict. c. 68                              | (1863).  |                                                                    |
| 28 Vict. c. 19                                   | (1865)   | - Extension of Time for Loan.                                      |
| Thames Embankment Acts:                          |          |                                                                    |

### MAIN DRAINAGE WORKS.

In their last Report the Board described somewhat fully the main features of the works for the drainage of the Metropolis, which were then far advanced towards completion. Reference was also made to the condition of the Metropolitan Area with regard to its drainage previously to the formation of the Board, the course taken for improving that condition, and the principles upon which the Main Intercepting Drainage Works had been designed. It may, therefore, in the present Report, be sufficient to describe briefly their general arrangement, and the routes of the several lines of sewer.

### NORTHERN DRAINAGE.

For the north side of the Thames three lines of sewers, called respectively, the High Level, Middle Level, and Low Level, were designed to converge to and unite at Abbey Mills, east of London, where the contents of the Low Level Sewer are to be pumped into the Upper Level, and from that point their aggregate stream is intended to flow through the Northern Sewer to the outfall at Barking Creek, about 12 miles below London Bridge.

#### *High Level Sewer and Penstock Chamber.*

This sewer commences at the foot of Hampstead-hill, by a junction with the Fleet Sewer. It passes through Kentish-town, Holloway, Stoke Newington, and Hackney, to a junction with the Middle Level Sewer at Old Ford, Bow. In length it is about seven miles, it drains an area of about 10 square miles, and intercepts the sewage of Hampstead, part of Kentish-town, Highgate, Holloway, Hackney, Clapton, and Stoke Newington. Its cost, including compensations, was 196,804 *l.* This sewer was completed in 1861, and it has been in full operation since that date.

Connected with the High Level Sewer, a penstock chamber was constructed, at its junction with the Middle Level Sewer at Old Ford, Bow. It contains five large iron penstocks, worked by machinery, for the purpose of diverting the sewage into either of the three channels which form the commencement of the Northern Outfall Sewer, and which will, under all ordinary circumstances, be used for the discharge of the sewage at Barking Creek. The work is so contrived, that in times of sudden and severe storms, or in case of accident to the Outfall Sewers, relief in a few minutes could be obtained by the discharge into

into the River Lea of the whole of the sewage. This provision places three-fourths of the northern sewage completely under control, and it has proved highly satisfactory in its operation.

*Middle Level Sewer and Branch.*

The Middle Level Sewer has been carried as near to the Thames as possible, with a view of intercepting as much sewage as practicable by gravitation, and thereby reducing the low level area which is dependent upon pumping. This sewer is about  $9\frac{1}{2}$  miles in length, and intercepts the drainage of a densely inhabited area of about  $17\frac{1}{2}$  square miles. It commences at Kensal-green, and passes thence under the Paddington-canal into the Uxbridge-road, along Oxford-street, Hart-street, Liquorpond-street, and across Clerkenwell-green, thence by Old-street-road to Shoreditch, along Church-street and Green-street, Bethnal Green, to its junction with the High Level Sewer at the penstock chamber at Bow, already described. A branch sewer in connection with this work, about two miles in length, has also been carried along Piccadilly, through Leicester-square and Lincoln's-inn-fields, to the main line at King's-road, Gray's-inn-road. This sewer is also in full operation. It is provided with weirs or storm overflows at its various junctions with the main valley lines. One of these, the Ranelagh storm overflow, runs through Hyde-park and Kensington-gardens; its length is about 5,700 feet.

The total cost of the Middle Level Sewer, including its branches, is 349,869 *l.* 2*s.* 11*d.*

*Low Level Sewer and Branches.*

This length of sewer is designed to intercept the sewage from an area of about 11 square miles, and to form the main outlet for the western district, which comprises about 14 square miles. This latter area lies so low, that its sewage will have to be lifted a height of  $17\frac{1}{2}$  feet into the Low Level Sewer. The sewer will commence at the Grosvenor-canal, Pimlico, and pass along Lupus-street and Bessborough-street, to and along the river side from Vauxhall-bridge, eastward. Between Westminster and Blackfriars Bridges it is being constructed in connection with the Thames Embankment. From thence it will pass under a portion of the new street now being formed between Blackfriars and the Mansion House.

It was stated in the Report of the past year that the contract for the eastern portion of this sewer, a length of about four miles, commencing at Tower-hill, and extending to the pumping station at Abbey Mills, and for the Wick-lane or Homerton Branch from Bromley to Old Ford, about one mile in length, had been let to Mr. William Webster, for the sum of 229,000 *l.* the engineers' estimate being 245,000 *l.* Those works, with the exception of about 300 feet near the East London Railway, and 70 feet passing under the River Lea, have all been completed, and in a satisfactory manner.

During the past year a contract has also been let for the Isle of Dogs Branch of this sewer to Mr. Webster, for the sum of 79,700 *l.*, the engineer's estimate being 75,000 *l.* This sewer will be about  $1\frac{1}{2}$  miles in length, and will extend from the Low Level Sewer at Three Mills-lane, Bromley, to Bromley Hall, thence across the East India Dock-road and High-street, Poplar, to Bedford-street, crossing Russell-street to and under the entrance to the West India Docks, thence along Cold Harbour into and along the East Ferry-road, terminating at the Great Barnfield Sewer at the entrance to Manchester-road, in the Isle of Dogs. Of this work 3,600 feet has already been constructed, at a probable cost of 25,000 *l.*, and the remaining portion is being pushed on with all speed.

*Abbey Mills Pumping Station.*

This pumping station will be, when completed, the most extensive in connection with the Main Drainage Works. It is found that the maximum quantity of sewage and rainfall to be lifted the necessary height, viz., 36 feet, and at the required rate of 15,000 cubic feet per minute, will require engine power to the extent of about 1,140 horses, which it is proposed to obtain by means of eight engines of 142 horse-power, each furnished with two boilers. The engine house to be cruciform in plan, and the engines will be arranged in

pairs, two in each arm of the cross. In height it will be divided into three compartments, the lower one being the pump-well, into which the sewage will be received from the Low Level Sewer, the intermediate one will form a reservoir for condensing water, and the upper one will form the actual engine house in which the eight engines will be placed.

The sewage from the Low Level Sewer wells will run through iron cages before entering the pump wells, whereby anything likely to affect the proper action of the pump valves will be intercepted, and the cages will, from time to time, be taken up and cleared of any intercepted matters. The sewage having passed into the wells, will be lifted by the pumps through hanging valves into a cast-iron culvert, and thence be forced into the Northern Outfall Sewer.

The foundations of the station, which were in course of construction by Mr. William Webster at the date of the last Report, have since been progressing rapidly towards completion. The value of the works executed up to the date of this Report is about 41,000 *l*.

Subsequently the Board, upon the recommendation of the Main Drainage Committee, entrusted Mr. Webster with the erection of the station. The foundations of the building, and the walls, up to an average height of eight feet, or to a level with the engine room floor, are completed. The foundations of the filth hoist have also been laid, and the penstocks are fixed. The excavations for the boiler house and chimney shafts have been completed, and the concrete laid down. The total value of the work done is 40,365 *l*.

The Board have also accepted a tender of Messrs. Rothwell and Co., for the construction and erection of the engines and machinery, for the sum of 54,570 *l*.

The iron standards with the cross girders are already in their respective positions; the eight flywheel and crank races are also built, and the iron cradles to carry the boilers are nearly all bedded in their permanent places.

The value of the machinery fitted and upon the works is estimated at 20,000 *l*.

#### *Western Division Drainage.*

The western division drainage area comprehends Fulham, Chelsea, Brompton, Kensington, Shepherd's Bush, Hammersmith, and part of Acton, an area of about 14 square miles. The Board originally proposed to deal with the sewage of this division in its own neighbourhood, but they abandoned that plan in deference to the wishes of the inhabitants and others, and it is now included in the Low Level system of metropolitan drainage.

The main, or Chiswick line, is about  $3\frac{1}{4}$  miles long; it commences at Chiswick-mall, and runs near to the river and along the Fulham-road and Walham-green to Cremorne-gardens. Eventually it will be extended to the permanent pumping station near the Grosvenor Canal, the land for which has already been purchased by the Board. The sewage at present is lifted at a temporary pumping station near Cremorne-gardens.

The Fulham branch is 1 mile 720 feet in length; it commences at Fulham-bridge, and joins the Chiswick line at King's-road.

In addition to these lines there are minor branches which, for the present, discharge into a large well or sump at the temporary pumping station near Cremorne-gardens.

These works have been completed at a cost of 83,387 *l*.

The Acton branch is another main line of sewer for this Division. It runs along the Uxbridge-road from Stamford Brook at Wormwood Scrubs to the Counters Creek Sewer at Royal-crescent, Notting-hill. Its length is  $1\frac{1}{2}$  miles and its total cost has been 9,820 *l*. 11 *s*. 10 *d*.

#### *Outfall Sewer.*

The Northern Outfall Sewer, the most costly line of sewer included in the scheme for the drainage of the districts north of the Thames, is formed in an embankment, above the surrounding levels, and is, by means of aqueducts and culverts, carried over and under rivers, railways, streets, and roads. It commences at the Penstock chamber already mentioned, at Old Ford, Bow, and passes the North London Railway, the River Lea, and four other streams, the Eastern Counties Railway, the Stratford-road, and Abbey Mill-lane, to the pumping station at Abbey Mills, where the contents of the Low Level Sewer will

will be raised 36 feet. Throughout this length the Outfall consists of a double line of sewer. From this point three parallel lines of sewer are continued to the outlet at Barking Creek. At a little distance beyond the Abbey Mills, three lines of sewer are carried, by means of iron culverts, over the Channelsea River and Abbey Creek, Marsh-lane, and the North Woolwich and Bow and Barking Railways. The remaining portion of the triple sewer is constructed in brickwork to Barking Creek, where the outlet is formed.

The sewage falls a depth of 16 feet before entering the river, and is discharged by nine culverts laid at the level of low water spring tide. Provision is made, in case of need, for diverting the sewage into the reservoir by means of pen-stocks, and it may be simultaneously discharged from the Outfall Sewers direct into the river without passing through the reservoir.

The whole of this line is completed, and has been in operation since March 1864. The cost was 649,760 *l*.

#### *Outfall Reservoir.*

This reservoir occupies an area of about  $9\frac{1}{2}$  acres; its average depth is  $16\frac{1}{2}$  feet. It is almost entirely above the general level of the ground, and is covered by an embankment of earth rising about two feet above the crown of the arches. It was completed at a cost of about 172,800 *l*., and has been successfully in operation since August 1864.

### SOUTHERN DRAINAGE.

To provide for the drainage of the Metropolitan area on the south side of the Thames, three intercepting lines, namely, the High Level Sewer and its Southern Branch, the Low Level, and the Bermondsey Branch of the Low Level, have been constructed; these unite at Deptford Creek, where the contents of the Low Level are raised to the level of the Outfall Sewer, and the sewage brought down by the three sewers is then conveyed by one channel (the Outfall Sewer) through Woolwich to Crossness Point, in the Erith Marshes, and delivered into the river during the ebb of the tide.

#### *High Level Sewer and Branch.*

The line of the High Level Main Sewer, which is about  $9\frac{1}{2}$  miles in length, commences at Clapham, and its branch at Dulwich, and they drain an area of about 20 square miles, including, Tooting, Streatham, Clapham, Brixton, Dulwich, Camberwell, Peckham, Norwood, Sydenham, and part of Greenwich. The two lines unite in the New Cross-road, near the New Cross Station on the Brighton Railway. The length of the branch line is  $4\frac{1}{2}$  miles.

Two subsidiary branches have also been extended from this sewer at Dulwich; one to Crown-hill, Norwood, and the other to the Crystal Palace.

The main line and branches were completed at a cost of 234,673 *l*.

#### *Low Level Sewer.*

The Low Level Sewer drains Putney, Battersea, Nine Elms, Lambeth, Newington, Southwark, Bermondsey, Rotherhithe, and Deptford, comprising an area of about 20 square miles. Its length is about 10 miles, and the cost of the works, as far as at present ascertained, is 234,000 *l*.

#### *Bermondsey Branch of Low Level Sewer.*

An important branch sewer, about  $2\frac{3}{4}$  miles in length, has also been constructed from the Low Level Sewer at High-street, Deptford, towards the River to St. James's Church, Bermondsey, at a cost of 97,515 *l*. 3 *s*. 2  $\frac{1}{2}$  *d*.

#### *Deptford Pumping Station.*

This station is situate by the side of Deptford Creek, and close to the Greenwich Railway Station. The sewage is here lifted from the Low Level Sewer into the Outfall Sewer. Four engines, each of 125 horse-power, are at work at this station. The building was erected at a cost of 109,455 *l*. 17 *s*. 5 *d*., and the engines were completed and fixed at a cost of about 28,000 *l*.

*Outfall Sewer.*

This sewer conveys the sewage through Greenwich and Woolwich to Crossness Point in the Erith Marshes.

Its length is  $7\frac{3}{4}$  miles. Through the town of Woolwich it has been constructed at a depth ranging from 45 to 75 feet. It receives from the High and Low Level Sewers 12,000,000 gallons of sewage daily, which, until its formation, flowed into the Thames between Wandsworth and Woolwich.

The works, exclusive of the land purchased by the Board, were completed at a total cost of 310,648 *l*.

*Crossness Pumping Station and Reservoir.*

The area upon which this pumping station and reservoir stands, is  $6\frac{1}{2}$  acres in extent.

The sewage is here lifted by means of four beam engines, each of 125 horsepower, and discharged into the river immediately after high water. The maximum quantity of sewage lifted is ordinarily about 10,000 cubic feet per minute. The outlet into the River from the Outfall Sewer consists of 12 iron pipes, carried under the "Saltings" into a paved channel formed in the bed of the River. The cost of erecting the station and reservoir, so far as at present ascertained, is 325,000 *l*.

The contract for the engines and machinery at this station was let at a sum of 44,900 *l*., and the work has been executed at a cost, up to the present time, of 50,000 *l*.

*Greenwich Sewers.*

In connection with the Southern Main Drainage, a branch line of intercepting sewer, from the eastern end of Greenwich to the pumping station at Deptford, has been completed during the past year at a cost, pending the adjustment of the account, of about 23,800 *l*. The length of sewer is nearly two miles, and its size varies from 4 feet 6 inches by 3 feet, to 4 feet by 2 feet 8 inches, and about 1 mile of pipe sewer and drain connections have been laid in connection therewith.

*Statistics of the Works.*

The whole of the Main Drainage Sewers, with the exception of the Northern Low Level, have been completed, and are now in active operation. The works were commenced in January, 1859, and the ceremony of their formal opening took place on 4th April, 1865. The total length of sewers forming the system is 82 miles; and, in conjunction with the pumping stations and other works, when completed, will have cost about 4,200,000 *l*.

The extent of area, the drainage of which is intercepted and carried off by these sewers, is about 117 square miles, having a population of 2,809,000.

On the north side of the river the sewage intercepted daily at present amounts to 10,000,000, and on the south side, to 4,000,000 cubic feet.

In designing the sewers, provision has also been made for taking the drainage arising from the present and prospective water supply of the same area, and the increased quantity of sewage. In the construction of the other sewers and works, 318,000,000 bricks, and 880,000 cubic yards of concrete have been used, and about  $3\frac{1}{2}$  million cubic yards of earth excavated. These extensive works, embracing almost every branch of engineering science, have been constructed under buildings, and over and under rivers, canals, railways and roadways, from 25 feet above to 75 feet below the surface, without any important casualty or interference with the public convenience or traffic.

*Improved Condition of the River.*

In the Report of their proceedings for the last year, the Board alluded to the improvement which had taken place in the condition of the Thames since the Main Drainage works had been in operation, and the experience of the past year fully justifies the anticipations then expressed of benefits to be derived from the increased purification of the river, benefits which are evidenced by the fact of the return of fish in large quantities to those parts of the river,

which,

which, previous to the execution of the works, were in the most polluted condition, namely, between Vauxhall-bridge and the Pool, and the absence, even in the hottest weather and at low tide, of all offensive odours from the stream.

A still greater improvement in the condition of the river may fairly be anticipated, as arrangements for purifying its upper waters become matured, and a more efficient system of water supply for domestic purposes is organised.

The Board would here allude to the advantages which would result to the entire sewage system of the metropolis if larger quantities of water were discharged into the sewers than is now the case. An increased and continuous, in the place of the present intermittent, water supply would remove many grounds of complaint which now exist, not only with regard to domestic requirements, but also with reference to the cleansing of the sewers, and would, to a great extent, solve the much-vexed question of their ventilation, with which the Board have yet to deal. The Board entertain the hope that the important question of water supply will, at no distant period, receive that consideration from the Legislature, which, with a due regard to the public health, it so pre-eminently demands.

In connection with the subject of the Main Drainage, and its bearing upon the purification of the river, it may be well to mention here that, in the latter part of last year, statements were made that cholera, typhus, scarlet fever, croup, and other diseases, had appeared at certain places at Woolwich, and were attributable to the pollution of the river by the discharge of the sewage at the Crossness Outfall Station. These statements gave rise to some alarm, on the part of the authorities at the War Department, lest the health of the troops stationed at Woolwich should suffer, and the Engineer of the Board was thereupon instructed to make a careful examination into the grounds upon which the allegations were made. This was done, and in the result it appeared that there were local causes, such as overcrowding of houses, defective water supply, and other imperfect arrangements, which were quite sufficient to account for the cases of disease which had occurred.

Early last year the Board directed the Engineer, in conjunction with Dr. Letheby, to inspect and report on the chemical and other works in the neighbourhood of the Northern and Southern Outfalls, from which it was believed foul odours emanated, and which were erroneously attributed to the Sewage Outfall Works, and it was found that, in close proximity to the Northern Outfall, most offensive operations were carried on, such as the manufacture of the mauure known as the superphosphate of lime, which it appears is effected by the mixture of oil of vitriol with coprolites and crushed bones; the manufacture of oil of vitriol, and the distillation of gas liquor and gas tar, the former being converted into sulphate of ammonia, and the latter into naphtha, creosote, and pitch.

On the southern side of the river, about half a mile from the Southern Outfall, it was found that there were two manufactories where the refuse from the London tanneries, known as "scutch," which is the scraping of hides, &c., is operated upon. In one of these factories the scrapings of hides, &c., are converted by boiling it for several hours in a weak solution of oil of vitriol into manure, which is afterwards consolidated in open pits, the refuse from which runs into the Thames. In the other factory, the trimmings of hides, &c., are manufactured into glue, by boiling them in diluted sulphuric acid. The vapours from both of these factories were particularly offensive, and no contrivance whatever was used for condensing them.

Nearly opposite these works, on the northern side of the river, works were in course of erection for the distillation of bone oil, which it appears is effected by the carbonisation of bones in making animal charcoal.

The conclusions which were arrived at by the reporters, after the inspection of these manufactories, are here given in the words of the Report, which will be found in the Appendix: "The results of these inspections are, that large and "very offensive operations are carried on in the neighbourhood of both the "Northern and Southern Outfalls; and that the putrid and other vapours "emitted from the works are diffused into the atmosphere, and wafted to a considerable distance. The two points which presented themselves to our "consideration were: 1st. That these vapours, coming from the neighbourhood "of the outfalls, might very naturally be erroneously attributed to the sewage. "And, 2nd. That the effluvia from the neighbouring factories may be a serious

"nuisance to the work people who will have to reside at the Drainage Outfalls. "It is therefore of great importance that the character of these vapours should be identified, and that no false opinion should be entertained of them, as regards their connection with the sewage from the Outfalls."

An independent inquiry, with relation to these factories and the river, was also made by direction of the War Department, conducted by Dr. Briscoe, Surgeon Major of the Royal Artillery; Captain Inglis, R. E., Inspector of Works, and Mr. Abel, the Chemist of the War Department. These gentlemen carefully inspected the chemical and manure works adjacent to the outfalls, and especially directed their attention to the state of the river near the outfalls. The conclusions at which they arrived, with regard to the odours from the manufactories, were in perfect accordance with those of the Board's engineer and Dr. Letheby, whilst their testimony to the absence of anything of an offensive nature resulting from the discharge of the sewage into the river at the points of outfall was highly satisfactory.

In concluding their Report these gentlemen stated that they considered it right to ascertain for themselves whether the offensive odours which had been complained of could be traced at all to the Sewage Outfalls, especially as, at two of the chemical works inspected, it was asserted that the charge made against them by the officers of the Metropolitan Board of Works of creating a nuisance could be brought with much greater justice against that body. They stated that, in rowing past the Northern Outfall, at Barking, while the sewage was being discharged, they could perceive no odour whatever, although they passed in tolerably close proximity to the shore, and through the water which was most highly charged with sewage; they further stated that they visited the works of the Southern Outfall at Crossness, without giving any previous notice, and were surprised to find them so generally free from odour, especially as the weather had been dry for some time past. That the admirable arrangements made for passing the gases from the sewers and tanks through the boiler fires appeared most effectually to prevent their escape into the air, excepting in the engine-room, where there were openings leading into shafts in immediate connection with the large tanks. That the odour which pervaded this room was, however, not to be compared in its offensive character with that emanating from the neighbouring manure works, and was not perceptible outside the building. That they witnessed the discharge of sewage from this outfall, taking up their position upon a projecting landing stage immediately over the point of outfall, and that no offensive exhalation whatever was perceptible upon that occasion. They also stated that, although their attention had been directed for some time previously to the discovery in the Arsenal of a pollution in the air alleged to emanate from the Main Drainage Outfalls, they had been unable to obtain any evidence of it, while the odours which from time to time pervaded the air in that neighbourhood were recognised by them upon their inspecting the chemical works to which reference has been made.

## UTILIZATION OF THE SEWAGE.

### *North Side of the Thames.*

The Board, in their last Report, set forth the steps they had taken in reference to this important subject. They also gave the particulars of the arrangements they had entered into with Messrs. Napier and Hope, the promoters of the scheme for the reclamation of a large portion of the Maplin Sands, near the mouth of the River Crouch, on the Essex coast, and the utilization of the Northern Sewage in connection with that scheme.

The terms on which the concession of the Northern Sewage was made, were as follows:—

The Board were to grant to the concessionaries and their legal representatives the absolute and exclusive right and property in the sewage of the northern area of the metropolis, for a period of 50 years, to be computed from the expiration of four years after the passing of an Act for ratifying the concession.

The concessionaries were, within six calendar months after the passing of the Act, to deposit with the Board the sum of 25,000 l., as a guarantee for the due execution

execution of their works, and were to construct brick culverts of not less than 9 feet 6 inches in diameter, for conveying the sewage to the Sands to be operated upon; and on the completion of those culverts the Board were to return them the 25,000 *l*. In the event, however, of the concessionaries failing to complete the culverts within four years from the passing of an Act authorising their construction, the money was to be forfeited to the Board.

The concessionaries were to be bound to take at all times, during the existence of the concession, so much of the sewage collected in the Outfall Sewer as a culvert of the above-mentioned dimensions was capable of passing; the quantity, however, was in no case to exceed 12,000,000 cubic feet in 24 hours.

The concessionaries were to have the right to use, and the property in so much of the sewage collected in the outfall sewer as could be received and utilized by them during the four years immediately after the passing of the Act.

The Board, on giving not less than five years' notice, in writing, were to have the right to take over, at the end of the concession, the whole of the works and land at a fair valuation by arbitration.

After deduction of the annual charge for money borrowed, and rent charges, and of the working and establishment expenses, the net profits of the concessionaries were to be applied and divided as follows:—

The net profits sufficient to pay interest, not exceeding the rate of 5 per centum per annum on the share capital for the time being, to belong to the concessionaries.

The net profits, after payment of such interest at the rate of 5 per centum per annum until they would be sufficient to pay in addition to such interest, on the average of the year, a sum at the rate of 10 per centum on the share capital aforesaid, to be equally divided between the concessionaries and the Board.

The net profits, after payment of such interest at the rate of 5 per centum per annum until they would be sufficient to pay in addition to such interest, on the average of the year, a sum at the rate of 20 per centum on the share capital aforesaid, should, as to so much as exceeds 10 per centum, but does not exceed 20 per centum, be divided between the concessionaries and the Board, in the proportion of one-fourth to the concessionaries and the residue to the Board.

Any further net profits to be divided equally between the concessionaries and the Board.

The proportion of net profits are to be payable to the Board half-yearly, without any deduction, except in respect of income tax.

On giving to the concessionaries not less than two years' notice, in writing, before the determination of the first 30 years of the full term of the concession, the Board are to have the right, on the termination of those 30 years, to require a revision, by arbitration, of the stipulations of the agreement, with respect to the apportionment of profits.

The money from time to time paid to the Board, in respect of net profits is to belong to them for the benefit of the rate-payers of the metropolis; but they are not to be liable as partners with the concessionaries by reason of any payment to or for their benefit out of the profits of the undertaking, or by reason of any other matter stipulated for in the agreement.

The agreement also provides that, if at any time during the existence of the concession, Her Majesty's Principal Secretary of State for the Home Department, on the application of the Board, or of the concessionaries, is of opinion, and certifies that the operations of the concessionaries have failed to accomplish the end contemplated, the Board or the concessionaries are to be at liberty to make application to Parliament for the revision of the concession and of the provisions of the Act.

The Board having ratified the agreement, Messrs. Napier and Hope subsequently introduced their Bill into Parliament for confirming the agreement, and the formation of a company to carry out the scheme.

The Bill, after being very fully discussed in a Select Committee of the House of Commons, was passed, and received the Royal Assent on the 19th June 1865.

The Board have now the satisfaction to report that the Company has been

formed in conformity with the provisions of the Act, and that the sum of 25,000 *l.* has been deposited, in accordance with the terms of the agreement, as a guarantee for the due execution of their works, and that the Company have lately entered into a contract with the contractor, Mr. Webster, for the construction of the culverts and other works, which are now in active progress.

Doubts having been expressed by Baron Liebig, and other persons of scientific eminence, as to the feasibility of Messrs. Napier and Hope's scheme, the Company have, during the past year, instituted a series of experiments to demonstrate the effect of the sewage on the sands to be reclaimed and acted upon; and, to afford facilities to persons who might wish to see some practical test of its merits, have entered into an arrangement with the Board to rent from them about 10 acres of land, adjacent to the Northern Outfall Sewer at Barking, for the purpose of making a series of experiments. This land, which was in a very rough and uncultivated state, has been covered with sand taken from the area proposed to be reclaimed from the sea, to the depth of about a foot, and on this rye grass has been sown. This has been irrigated with sewage taken from the Northern Outfall Sewer, and samples of the crops grown have been sent to the office of the Board; and, judging from what has already been done, the theories of Baron Liebig and others are in no way borne out, and there appears to be no reason whatever to doubt the ultimate success of the larger undertaking to be carried out by the Company on the Maplin Sands.

*South Side of the Thames.*

The disposal of the southern sewage had also been under the consideration of the Board prior to the date of their last Report. They felt that experience had been gained in connection with the question of the northern sewage, and they trusted that, by inviting tenders for the southern sewage, they might be enabled speedily to arrange for a concession of that area also, and thus utilize the whole of the sewage under their control for the regeneration of the soil, and rescue it for ever from the river.

The Board, as was briefly stated in their last Report, advertised for tenders for the southern sewage, and, on the 7th July 1865, they received five tenders from the under-mentioned persons, viz. :

Mr. Rigby Wason.  
Mr. George Shepherd.  
Mr. C. F. Kirkman.

Mr. B. Smith.  
Mr. T. Ellis.

These tenders were, on the same day, referred to the Main Drainage Committee, for their consideration and report at the earliest possible period, and the engineer was instructed to report to the committee on the engineering features of each scheme.

The committee made their report to the Board on the 17th November 1865. They stated that none of the tenders received complied strictly with the terms of the advertisement, but that they were mostly suggestions unaccompanied by plans, sections, or other particulars necessary to show what works were intended, or the cost of them, and that they had found much difficulty therefore in judging of the relative merits and advantages of the several schemes.

The principal features of each proposal were, shortly, as follows :

Mr. Rigby Wason proposed to draw off the sewage from the Board's sewer at various points along its line by means of syphons, and to raise it to a height most convenient for distribution into the country through brick culverts two feet in diameter. He considered it impossible, however, to give any details of the scheme, such as the points at which the sewage should be taken, the daily quantities to be utilized, the number of gallons to be supplied per acre, &c. He estimated the cost of the works at 163,000 *l.*, and proposed to raise a capital of 500,000 *l.*; and did not propose to receive any profit from the concession, should it be granted to him, until the ratepayers and the company had received between them 15 per cent. upon the capital of the company.

Mr. George Shepherd proposed to pump the sewage, solid and liquid, undeodorised, at Deptford and Crossness, to various elevations, the highest being about 400 feet, so as to irrigate the high lands, for which he considers sewage is more in demand than for low lands. He proposed a system of district reser-  
voirs,

voirs, about 20 in number, into which the sewage, after being pumped, would flow by gravitation through main pipes laid along the public roads, and in which it would be allowed to ferment and be stored for use, thus being always ready and in reserve, each reservoir to irrigate from four to five square miles. He also proposed to purchase from the Board the pumping stations at Crossness and Deptford, by which he states he could furnish a large quantity of sewage to farmers within six months. He further proposed to collect on the route the sewage of every town near London. He estimates the south side sewage at 55,000 tons daily, and is of opinion that it may be diluted with 60 or 70 million tons of water. He proposed to make this available for from 40,000 to 50,000 acres, and thinks 300 tons per acre will be ample for each dressing. His capital would not exceed 600,000 *l.*; and he was of opinion that it would not be safe to estimate a profit of more than 10 per cent., but he did not state how he proposed to apportion this.

Mr. Charles F. Kirkman proposed to adopt the solid, or dry system; to take the sewage from the Southern Outfall at Crossness, to deodorise it and separate the solid from the liquid, discharging the latter in an inoffensive form into the river. He described the process of separation, and proposed a contract of 21 years' duration from the completion of the works, which were to be ready for use within one year, and to be completed within two years from the date of the contract. He also proposed that the Board should receive a nominal rent for the first seven years of the term, and that a rent or royalty for the remainder of the term should be settled by the Secretary of State, or Chief Commissioner of Works. He gave no estimate of the cost, and stated that he could not tender in compliance with the terms of the advertisement, as they appear only to apply to persons interested in a liquid distribution of sewage.

Mr. Richard Smith proposed to force the sewage, by steam power, to pumping stations at Deptford and Erith, thence through pipes to reservoirs situated, respectively, at West-wood, Hayes Common, Bagshot Heath, and Leatherhead Common. He intended to erect six reservoirs, in all, each to contain about 220,000 gallons; to use the sewage partly by irrigation and partly by hose and jet, and to form about 300 acres of osier beds for the purpose of filtering the sewage after it had been used upon the higher levels, to absorb the remainder of its valuable properties, and allow it, thus rendered clear and inoffensive, to run into the various streams. Mr. Smith estimated the cost of his scheme at about 400,000 *l.*; proposed a 60-years' lease of the sewage, the Board to receive  $2\frac{1}{2}$  per cent. after the shareholders have received  $7\frac{1}{2}$  per cent.; any further profits beyonds this 10 per cent. to be equally divided between the Company and the Board.

Mr. Thomas Ellis proposed to conduct the sewage by a brick culvert, 11 feet 6 inches in diameter, from the Crossness Reservoir to an outlet into the river at Higham Creek, about two miles below Gravesend, and 30 miles below London-bridge. This culvert to have a discharge into the river at the outfall, at low water, by gravitation, and to take the drainage from Erith, Dartford, and Gravesend, on its way. Near the proposed outfall a pumping station was to be erected, and the sewage forced through a culvert, two miles in length, to an elevation of about 280 feet, whence it was to flow by gravitation, through pipes, to the area proposed to be irrigated, which was stated to comprise about 196,000 acres, but the locality is not defined. At convenient points along the line of pipes the sewage to be distributed by hose and jet, or by open channels. Mr. Ellis also proposed that his company should take on lease about 4,000 acres of land, for the purpose of cultivation, on which to use any excess of the sewage. He assumed the quantity of sewage to be about  $9\frac{1}{2}$  million cubic feet per diem, equal to about 98 million tons per annum, which would give 500 tons per acre on the area over which he proposed to utilize it. Mr. Ellis expressed his desire to accept the same terms of concession as those granted to Messrs. Napier and Hope; and estimated the cost of the scheme at about 1,600,000 *l.*, and his working expenses at 115,442 *l.*

The whole of these tenders, and the communications referred to in them, together with the engineer's report on the several schemes, were printed and circulated amongst the members of the Board, and the committee reported, as the conclusion at which they had arrived, after mature deliberation and full discussion on the merits of the various tenders, that the plan of Mr. Ellis, imperfect as it was, contained the most favourable features, and was most capable

of being so improved and developed as to meet the ends in view. They pointed out, however, one important modification, which it appeared to them should be especially required with regard to the outfall at Higham, where, in the judgment of the committee, it appeared to be absolutely necessary, in the event of the concession being granted to Mr. Ellis, that he should construct a reservoir, with pumping power, so that the discharge into the river might take place, as at Crossness, soon after high water.

The committee concluded by stating that, "in their opinion, the tender of Mr. Thomas Ellis, so far as his general scheme is concerned, offered the greatest advantages, but that they were of opinion that he should be required to construct a reservoir at the point of discharge into the river on the same principle as that at Crossness, viz., to discharge at high water," and recommended that the subject should be referred back to them, to negotiate the precise terms on which a concession should be granted to him.

The Board, after discussion, agreed to the conclusion arrived at by the committee, and the subject was accordingly referred back to the committee to negotiate the precise terms on which a concession should be granted to Mr. Ellis, and the decision of the Board was communicated to Mr. Ellis the same day before the rising of the Board, in order that he might be in a position, should he desire to do so, to give the requisite Parliamentary notices; a course which was in strict accordance with that taken with reference to the proposal of Messrs. Napier and Hope.

The Board felt strongly that the object in view in granting a concession of the sewage was not simply to prevent its flowing into the Thames, but that they had an important duty connected with it in relation to the ratepayers of the metropolis, namely, that they should agree to such a plan as would ensure a probable substantial return in relief of the burden of taxation. With this view they considered it essential to ascertain that the estimates which Mr. Ellis had submitted were not only sufficient, but, at the same time, not in excess of the amount which should be expended in connection with his plan. This was the more important, as there was a considerable discrepancy between the estimate furnished by Mr. Ellis and that arrived at by the engineer of the Board. It was therefore arranged that Mr. Ellis's engineer and the engineer of the Board should confer on the differences between their respective estimates, in order that antagonistic evidence before a Parliamentary Committee might, if possible, be prevented.

The committee, in order that no time might be lost, and to enable Mr. Ellis to proceed to Parliament this Session, at once proceeded with the consideration of the subject, and had several interviews with Mr. Ellis, and received from him further information with respect to his plans and estimates. At the meeting of the committee, on the 15th May 1866, Mr. Ellis stated that it had become evident to his friends that, after the financial crisis which had taken place, and according to the state of the money market, it would be impossible to raise funds for the object in view, and he suggested that either the concession should be granted to him on the condition that if he did not proceed to Parliament next session it should be forfeited, or that the committee should adjourn the matter. After careful consideration, the committee, while deeply regretting the delay of another Session, felt that they had no alternative but to comply with the request for an adjournment, and they accordingly adjourned the consideration of the subject for two months.\*

#### COVERING, &c., OF MAIN SEWERS.

At the date of their last Report the Board had decided on undertaking works to several of the sewers mentioned in Schedule (D) of "The Metropolis Local Management Act, 1855," for the purpose of rendering them effective, and in order

\* On the 23rd July 1866, Mr. Ellis, accompanied by one of his friends (Colonel Kennedy), attended the committee, and stated that a leading capitalist had been consulted on the subject of raising funds for carrying out his scheme, but that they had been advised to postpone any steps in the matter till the money market was in a more favourable condition, and Mr. Ellis stated that, considering the present financial crisis, it would not be possible for him to proceed to Parliament in the present Session, and he therefore requested a further adjournment of the subject.

The committee, on consideration, consented to adjourn the subject for a further period, and the chairman informed Mr. Ellis that the committee had agreed to adjourn the matter till the first week in October next, when they would hear any statement he might be prepared to make, but that they would hold themselves free to issue fresh advertisements for tenders, when Mr. Ellis would be required to send in his proposition, with others who might be prepared with plans.

order to adapt them to the system of main drainage, of which they will now, in many instances form a part. The cost of the first portion of the works was estimated at 390,000 *l.* and the Board have, during the past year, concluded arrangements for a loan of 300,000 *l.* for meeting such cost. Up to the present date the Board have entered into contracts for the following works :

#### NORTH SIDE OF THE RIVER.

##### *Ranelagh Sewer and Branch*

Comprise the construction of about 1 mile 2,830 feet of brick sewers, varying in size from 8 feet circular to 4 feet by 2 feet 8 inches, and 1,100 feet of 12-inch pipe. The brick sewers are to be constructed in Albion-street, Southwick-street, Southwick-crescent and place, Radnor-place, and Grand Junction-road, and the pipes are to be laid in the bed of the open sewer at the back of the Kilburn Park-road. The contract for these works was let for a sum of 30,440 *l.* and the works which have been executed up to the present time consist of about 4,490 feet of sewers, the total approximate value of which, including numerous incidental works, is 17,000 *l.*

##### *Stamford Brook.*

In this contract is comprised the construction of about 7,510 feet of 5-feet brick sewer, and 1,520 feet of 12-inch pipe, with other works incidental thereto, in King-street, New-road, to Acton Back-common, and between the common and Webb's land, and in fields and places by Longfield-walk to Old Oak-common-lane. To the present time the work executed is 4,737 feet of sewer, for the diversion of the open brook between Acton Back-common and Hammersmith-creek, 23 feet of 3 feet 9 inches by 2 feet 6 inches sewer, and 906 feet of 12 inch pipe, the total approximate value of which is, including the minor works incidental thereto, 14,000 *l.*

##### *The Grove, Hammersmith, and High-street, Fulham, Sewers.*

This contract was let for the sum of 7,000 *l.* It comprised the construction of about 4,300 feet of sewer, with the requisite side entrances, air shafts, gullies, &c. Up to this date about 1,600 feet of the Grove section, and 722 feet of the Fulham sewer have been constructed, at a total estimated cost of about 3,500 *l.*

##### *City-road, Finsbury-place, &c., Sewer.*

This work was let for the sum of 8,300 *l.* The contract provides for the construction of about 3,218 feet of brick sewer, for the diversion into the middle level line of a portion of the Main London Bridge Sewer, extending from Fore-street to Old-street. The works executed up to the 25th March last consist of about 2,746 feet of sewer, and about 2,150 feet of 9-inch pipe-drains, the estimated value of which is 10,170 *l.*

Previous to this contract being let, the Board, in order to provide an outlet for the local drainage of Pickard-street and its neighbourhood, directed that a length of about 3,000 feet of the City-road branch of the Main London Bridge Sewer, extending from Providence-row to Pickard-street, should be forthwith re-constructed under their general contract, and this work has been finished at a cost of 4,827 *l.* 10 *s.* 5 *d.*

##### *Counters Creek Sewer.*

A contract has been entered into for the re-constructing and otherwise improving this sewer from Royal-crescent, Uxbridge-road, to Bramley-road, a length of about 4,368 feet. The tender accepted was for the sum of 18,700 *l.*, and the works are now in hand.

##### *Globe-road and Swan-street, &c., Sewers.*

This contract comprises the construction of about 1 mile 230 feet of brick sewer, and the under-pinning of about 1,280 feet of existing sewer, with a view to the improvement of the main sewers under the jurisdiction of the Board within the parish of Bethnal Green. The contract has just been let for the sum of 11,800 *l.*, and the works will be forthwith commenced.

*Hackney Brook.*

The work required for filling up the portion of this open sewer in the neighbourhood of Hackney-wick was about 1,097 feet of brick sewer, and has cost, including the filling in of the old channel, and forming side entrances, gullies, &c., to the new sewers, 1,949 *l.* 5 *s.* This work, in consequence of its urgent character, was carried out under the general contract.

## SOUTH SIDE OF THE RIVER.

*Falcon Brook.*

This work comprises the construction of about 1 mile 3,720 feet of brick sewer, for the purpose of superseding the open brook from the York-road, Battersea, to near Nightingale-lane, and the construction of about 2 miles 910 feet of sewer for diverting the line of the brook between the "Plough," Clapham-common, and Wheatsheaf-lane, Tooting. Some delay occurred in the progress of these works at their earlier stage, in consequence of the death of the contractor; and fresh arrangements were made for carrying out the contract for a sum of 35,900 *l.* A total length of 2,718 feet of sewers and other incidental works has now been completed, the approximate value of which is 6,368 *l.*

*Earl Sewer—White Post-lane Branch.*

A sum of 700 *l.* having been contributed by the London, Brighton, and South Coast Railway Company towards the expense of covering the open portion of this sewer near Canterbury-row, Old Kent-road, the Board decided to re-construct the whole length of 2,036 feet, from the Grand Surrey Canal to the Low Level Sewer in the Old Kent-road. The work has been completed, and its cost is estimated, pending the final settlement of the account, at about 3,236 *l.*

*Woolwich Sewers.*

The contract for the diversion of the Rope-yard, Market-place, Trinity-street, Sun-alley, &c., Sewers into the Southern Outfall Sewer, included the construction of about 4,430 feet of sewers. The whole of the works have been completed, at a cost, as far as can be at present ascertained, of about 8,581 *l.* 10 *s.* The contract price was 8,910 *l.*

*Heathwall, Lord Spencer, &c., Sewers.*

The works for the amendment of these main sewers comprise the construction of about 2 miles 920 feet of brick sewers, extending from the Old Mill-pond, Battersea, to Hamilton-street, Wandsworth-road; the construction of about 3,120 feet of brick sewer along Battersea Bridge-road to Folly-lane; and the formation of about 1,320 feet, extending from Wandsworth-lane to Upper Richmond-road. The work for the diversion of the sewage from a part of the Wandle River, through Garratt lane, consists of 1 mile 3,570 feet of brick sewer, extending from the junction of High-street and Ram-lane, Wandsworth, to St. Mary's Church, Duns-hill. About 1 mile 3,220 feet of sewers, the approximate value of which is 15,000 *l.*, have been constructed. The amount of the contract for the works is 45,600 *l.*

*Earl, Battle Bridge, Duffield, &c., Sewers.*

The works for improving these lines of main sewers consist of the execution of about 6 miles 240 feet of brick sewers, with the requisite air-shafts, gullies, side entrances, &c. These sewers pass through some of the most important thoroughfares on the south side of the river, such as the Kent road, Deptford and Bermondsey Lower roads, Camberwell-road, Waterloo-road, and other places. About 1 mile 1,723 feet of sewers, with numerous minor incidental works, have, up to the present time, been constructed at a cost of 27,100 *l.* The contract for the works was let for a sum of 88,500 *l.*

The working drawings and specifications for the amendment of other important main sewers are also in a state of forwardness, and tenders for the execution of the necessary works will be invited without loss of time.

## ORDINARY WORKS.

The Board have, during the past year, also directed the execution of other works connected with the numerous sewers vested in them; these works comprise the cleansing, maintaining, and, in cases where necessary, repairing of main sewers and their flaps, penstocks, outlets, and other appurtenances; and also the formation of sewers, side entrances, ventilating shafts, the underpinning of sewers, and other incidental works. The sum expended on these several works up to the 25th March last, was 33,996 *l.* 2 *s.* 10½ *d.*

Details of the engineering works executed under the supervision of the Board during the past year, together with information relative to the present condition of existing contracts, and those completed, are given in the Tables, and in the engineer's report, which will be found in the Appendix to this Report.

## LOCAL DRAINAGE.

The construction of the Main Drainage Works has afforded the means for local boards to perfect their systems of drainage, and which they are now rapidly proceeding with. It may be mentioned that, during the 10 years the Board have been in existence, about 2,000 applications have been made to them by vestries and district boards for their sanction to proposed sewerage works; these applications, together with the plans and sections accompanying them, have been carefully examined by the engineer of the Board, and, as occasion required, amended. The total length of sewers which the Board have sanctioned during the period referred to, exceeds 400 miles. Above 113 miles of sewers, of sizes varying from a brick sewer 5' 3" × 3' 6" to a pipe 9 inches in diameter, have been approved by the Board during the past year, and in the same period 458 branch sewers and drains have, under the superintendence of their officers, been connected with the Board's main sewer lines.

Table No. 3, in Appendix (B) to this Report, shows in detail the lengths and sizes of the various sewers so sanctioned during the past year.

The Board, being impressed with the importance of a record being kept showing the exact position of these local sewers, as well as of underground railways, pipes, and other works, have recently determined to inscribe them on their set of Ordnance Sheets, and, with that view, have requested the several vestries and district boards to furnish the information necessary for the purpose, and this work is now proceeding.

## VENTILATION OF SEWERS IN THE METROPOLIS.

This important question has, during the past year, again occupied the attention of the Board. At the date of the last Annual Report it was under the consideration of one of their committees, who instructed the engineer to make such experiments as, in his judgment, might be necessary for testing the value of charcoal, or other deodorising ventilators. The engineer subsequently submitted to the committee his report, in which, after reviewing numerous modes of ventilation which had been suggested to Parliament, the Commissioners of Sewers, and the Board, during the last 16 years, he stated his conclusions on the subject, as follows:—

1st. The sewers cannot be ventilated like mines, which have but one inlet for the air at one end, and one outlet at the other, so that the current can be readily kept under control.

2nd. That whilst the connection of sewers with furnaces considerably improves the ventilation of the sewers in the immediate vicinity, it is questionable whether a large portion of the noxious gases evolved is actually consumed thereby; and that such a mode of ventilation is not applicable to the general ventilation of the metropolitan or any other extensive system of sewers.

3rd. That steam jets, fans, and other mechanical contrivances, worked by steam power, do not effect the ventilation as satisfactorily as furnaces with the same expenditure.

4th. That the connection of sewers with rain-water, or other pipes, carried to the tops of houses, have, in some instances, been attended with advantage, more particularly at the upper ends of sewers in the high districts, where the flow of water is not great; but that this should be done only where there is no fear of the gases descending again into the chimneys and windows of such houses, and cannot, therefore, be generally adopted.

5th. That ordinary gas pipes are not of sufficient bulk, and could not be constructed with a sufficient internal area to admit of free ventilation of the sewers through them, even were the lamps kept burning night and day.

6th. That charcoal ventilators have not yet been tried upon a sufficiently comprehensive scale to admit of a very decided opinion being pronounced with respect to them, but that present experience seems to indicate that they tend to retard the ingress of air for the effective ventilation of the sewers, and should, therefore, be cautiously applied.

7th. That ventilation by air shafts, from the top of the sewer to the centres of the streets, though not perfect, is a great improvement upon the old system of ventilation through the gully gratings at the sides of the streets, as the gullies allowed the accumulation of the foul gases in the upper portions of the sewer, which are driven in large masses, under certain changes of atmosphere, into the streets, whilst the air shafts prevent such accumulations.

8th. That it is probable most of the above modes of ventilation may, under favourable circumstances, be applied with advantage in particular cases; but that the most efficacious and most universally applicable mode of preventing the escape of noxious gases, is so to construct the sewers that a continuous flow shall be kept up in them, and to provide them with a sufficiently copious supply of water, that the decomposing matter within them shall be diluted, and instantaneously removed, and not allowed to settle and ferment. Much improvement has already been effected in the ventilation of the London sewers, by the abolition of the tide-locked and stagnant sewers, and much more may yet be accomplished by the introduction of a more copious supply of water; a desideratum also, otherwise, greatly needed for the necessities and comfort of the inhabitants of the Metropolis.

The committee, looking to the great difficulties with which this question is beset, and being of opinion that it was desirable no means should be left untried for obtaining the best suggestions on the subject, reported to the Board their opinion that if a premium were offered for a plan, the attention of persons engaged in the study of chemistry and scientific subjects might be drawn to the question, and the result might lead to the adoption of some plan suitable to the object required. The Board fully discussed this Report, but were at the time unable to arrive at any satisfactory decision on the suggestion made by their committee. The engineer has recently, by the direction of the Board, reported the nature of the experiments made during the last 12 months by his department, and the result thereof. Four classes of experiments have been made:

- 1st. By the use of charcoal ventilating grates.
- 2nd. By ventilation through chimney shafts and furnaces.
- 3rd. By ventilation through pipes carried to the tops of buildings, &c.
- 4th. By dilution of the sewage with water.

The observations made relative to the experiments instituted under the first head tend to show that, whilst there is no complaint of foul smell emanating through the gratings of the sewer, the charcoal appears to have the effect of diminishing the current of air through the ventilators, and of confining it to the sewers, so that if the system of ventilation by means of deodorizers was generally adopted, a great increase, both in the number and size of the ventilating shafts, would become necessary for the protection of men working in the  
sewers.

sewers. The engineer, in conjunction with Dr. Miller, is at the present time conducting other experiments, in order more satisfactorily to test the efficiency of this mode of ventilation.

The ventilation by means of chimney-shafts and furnaces, so far as it has been practicable to test the system, has been satisfactory, but the experiments which have hitherto been made demonstrate that the establishment of a sufficient number of furnaces would involve an expenditure of 201,480 £. per annum for fuel, in addition to a cost of 460,000 £ for the construction of chimneys and furnaces, which would be far too expensive to enable the plan to be applied. There is reason to suppose, however, that it might be adopted with great advantage in localities where existing furnaces could be made available, the ventilation by means of the furnaces in Woolwich Dockyard, to which reference was made in last year's Report, having been so far attended with success. A further experiment is now in operation, with a view of ascertaining more definitively the cost and effect of sewer ventilation by means of the street gas burners.

In carrying out experiments under the third head, namely, by ventilation through pipes conveyed to the tops of buildings, difficulty has been experienced in obtaining the permission of occupiers of houses, to fix the pipes, in consequence of apprehension that foul gases, under certain atmospheric conditions, would descend the chimneys or enter the upper windows, and this fear might probably render a universal adoption of the plan impracticable.

Calculations have been made with a view of ascertaining the practicability of adopting the plan of diluting the sewage, from which it appears that, in addition to the present supply, about 42,000,000 of gallons of water daily would be necessary to carry out the plan, and, from communications with the several water companies, it does not appear that, with their present resources, such a large addition to the existing daily water supply could be obtained.

The foregoing remarks will probably induce a consideration that the question of the ventilation of the sewers in the Metropolis is surrounded with greater and more numerous difficulties than are at first sight apparent; but the Board have reason to hope that the further consideration which they propose to give to this important subject will result in their devising a plan for meeting the object in view, and which a due regard for the public health and convenience doubtless imperatively demands.

The reports of the engineer above referred to are given in length at Appendix(C) to this Report.

### POLLUTION OF THE THAMES.

The preamble of the Main Drainage Act of 1858 sets forth that "it is necessary, with a view to the health of the Metropolis, that works should be speedily undertaken for the purification of the Thames," and it was with that object the Legislature conferred on the Board the necessary powers to execute such works as, in their judgment, would effect that object.

It, therefore, naturally becomes a matter of concern to the Board, now that so large a portion of the works, specially designed for the diversion from the Thames of the drainage of the Metropolis within the jurisdiction of the Board, has been completed, to ascertain that one of the primary objects of the Legislature in passing the Act in question is being effected.

It is satisfactory for the Board to be able to report that very much has been done in this respect. A marked improvement in the condition of the River is apparent. It has been observed that, from the time when the principal part of the northern sewage was diverted, by means of the main intercepting sewers, and carried down to Barking Creek, and, subsequently, as further portions of the drainage area have been relieved by the completion of the main sewers, the River has become proportionately free from pollution. No well grounded complaints of bad odour from the River have, during the past year, reached the Board, neither have they been under the necessity, as on former occasions, of deodorizing the sewage. Indeed, the improvement which has taken place is obvious, and the increased purity of the River is proved by the appearance of fish, as already stated, large numbers being seen between the bridges. It was stated in the last Report of the Board that the Crown had issued a commission to certain scientific gentlemen, to inquire into the best means of remedying the pollution of the rivers, with special reference to the River Thames, as affected

by the discharge of sewage from towns and villages, and the refuse from paper mills, and other manufactories, and the possibility of intercepting and rendering useful or innocuous those means of pollution. This, no doubt, resulted in a great measure from the representations made by the Board to the late Lord Palmerston on the subject.

The Commissioners have, during the past year, issued their first Report, and a large mass of evidence taken by them, principally relating to the Upper Thames and its navigation.

The Commissioners mention particularly Oxford, Reading, Windsor, Kingston, and Richmond, as each tending to pollute the river to a very serious extent. With regard to Oxford, the evidence shows that the water below that place is unfit for drinking, and that the increasing impurity of the stream renders it useless for the manufacture of white paper. The state of the Kennet, at Reading, near its junction with the Thames, is described as being deplorably filthy.

The condition of the river near Windsor is represented to be highly objectionable, as it is also at Kingston and Richmond.

The Report, in speaking of these causes of pollution, states that, admitting that the volume of the sewage is small as compared with that of the river, and that the water pumped into London is found, on analysis, to contain but a limited quantity of organic matter, these facts give but unsatisfactory ground of assurance that the metropolitan water supply is wholesome. That, allowing for oxydation, which the water more or less undergoes in its course, there is no sufficient guarantee for the water of Oxford, on its arrival at Hampton, being purged of injurious sewage taint; and that, consequently, the London drinker of Thames water may be drinking with it some remnant of the filth of Oxford.

They also state that the general opinion of medical men is, that what causes organic matter in water to be poisonous is not its quantity, but its quality, and that this cannot as yet be detected by either microscopic or chemical analysis; and is, at present, only known by its occasional pernicious effects.

In summing up this part of their Report, the Commissioners say, considering the enormous magnitude of the interests at stake in the question of the metropolitan water supply (the health of many hundreds of thousands of persons), it seems impossible to come to any other conclusion than that the only safe course is to keep all sewage out of the river.

This conclusion is in perfect keeping with that which the Board arrived at when considering the matter in 1864, and the chairman at that time, writing to Lord Palmerston, on behalf of the Board, after stating the circumstances which had induced the Board to address his Lordship, said, "I would, therefore, submit to your Lordship, that the time has now arrived for the legislative prohibition of the discharge of sewage into the Thames by any town or village above London."

To the same effect, the Commissioners now say that, "in order to secure the river from sewage pollution, new legislative measures are necessary," as the Thames Conservancy have no power to prevent any pollution, unless it is injurious to the navigation.

In order to give effect to the recommendations of the Commissioners, a Bill has been introduced into Parliament during the present Session, for the purpose of vesting in the Conservators of the Thames the charge of the Thames and Isis from Staines, in the county of Middlesex, to Cricklade in the county of Wilts, for the object, amongst other things, of preventing the pollution of the Thames between those places, and it provides that the Conservators shall make application to Parliament for another Act for similar purposes, as to that portion of the river between Staines and the western boundary of the district under the authority of the Metropolitan Board of Works.

Although the scope of the measures just adverted to lies beyond the limits of the Board's jurisdiction, they nevertheless feel that the interests confided to them have such an intimate relation to those measures, and any others of a like nature which may be promoted, that it is impossible to separate them, and therefore they cannot but again express the hope that the objects sought by the Report of the Commissioners, and the Bill subsequently introduced, will be fully accomplished, and that the whole of the sewage now flowing into the river above the Board's area may be intercepted and profitably applied, and thus afford the ratepayers of the Metropolis the full benefit of the large outlay which they have incurred in dispolluting the stream within their own limits.

## METROPOLITAN IMPROVEMENTS.

## THAMES EMBANKMENT, NORTH.

The Board have to report, with reference to this important undertaking, that, notwithstanding the difficulties which their contractors have had to contend with, in consequence of the financial crisis, and in obtaining the necessary supply of materials, more especially of granite, to keep pace with the work and the condition of the labour market, that they have, nevertheless, made considerable progress with the works.

This work is proposed to be executed in three lengths. The first extending from Westminster Bridge to Waterloo Bridge; the second, from Waterloo Bridge to the eastern boundary of the Inner Temple, the contracts for which have been let; and the third, from the Inner Temple to Blackfriars Bridge.

Included in the first of these portions are the formation of a granite-faced river-wall about 3,740 feet in length, the construction of a portion of the Low Level Sewer, and the subway for the reception of gas and water mains connected with it; the extension of the outlets of the main sewers hitherto discharging into the river, but now to be diverted into the Low Level Sewer, and the formation of about 3,200 feet of brick sewer, 4 feet by 2 feet 8 inches, designed to intercept the smaller sewers and drains discharging on the foreshore of the river; and the construction of commodious steamboat piers and landing places, in substitution of those which will be removed to make way for the works of the Embankment.

The contract for this length was let to Mr. George Furness, for the sum of 520,000 *l.* Up to the date of this Report, the works executed consist of about 3,500 feet in length of timber, coffer, and iron caisson-dams, either completed or in progress; 2,075 feet of the Low Level Sewer, varying in size from 7 feet 9 inches to 8 feet 3 inches in diameter; 1,767 feet of the subway; 2,625 feet of the 4 feet by 2 feet 8 inches brick sewer for the interception of the smaller drains, &c., and 284 feet of the Flushing Sewer. The Westminster Steamboat Pier, for a length of 320 feet, has been brought up to a level of  $3\frac{1}{2}$  feet above Trinity high-water mark, and the screen wall, parapet, and steps leading on to Westminster Bridge, are in course of formation; 720 feet of the river-wall adjoining have been brought up to heights varying from 1 foot below to  $3\frac{1}{2}$  feet above high-water mark. The foundations of the new York Gate have been partly formed, together with 677 feet of the adjoining wall. The Charing Cross New Steamboat Pier, for a length of 45 feet, has been partly constructed, and 359 feet of the wall eastward of the Charing Cross Bridge are also in progress. The concrete foundations are progressing, and concrete is being filled in for a further length of 467 feet of the river-wall. Material has been filled to the extent of about 447,800 cubic yards. The approximate value of the whole of the work completed, and of the materials and plant upon the ground, was, up to the 25th March last, 281,588 *l.* and 318,549 *l.* to the present date. Of the latter amount, the proportionate sum of 229,940 *l.* is for works, 48,044 *l.* for materials, and 40,565 *l.* for plant.

The second portion of this work, namely, from Waterloo Bridge to the Inner Temple, required the formation of 1,970 feet of granite-faced river-wall, with a further portion of the Low Level Sewer in continuation of the length included in the first contract. It necessitated the extension of the outlets of the sewers discharging into the River which were to be intercepted by the Low Level Sewer, and the construction of 2,440 feet of 4 feet by 2 feet 8 inches brick sewer to divert the various sewers and drains running over the foreshore of the river. It is intended, also, to form a new steamboat pier and landing stairs at the Temple, to replace those removed in the progress of the works.

The contract for these works was taken by Mr. Ritson, for the sum of 229,000 *l.* The coffer dam for the entire length is completed and rendered water-tight, thus securing the works from the action of the tides. The Low Level Sewer and Subway, for a length of 1,420 feet, have been completed and a similar length of river-wall has been brought up to an average level of 3 feet above Trinity high water-mark. Of this length, about 400 feet of the wall having been completed, the dam has been removed and the wall exposed to view. The small intercepting sewers on the foreshore are complete and in operation, and the filling-in over them effected and ready for the roadways.

The approximate value of the whole of the work executed, and of the materials and plant upon the ground, was, up to the 25th of March last, 178,240 *l.* and 187,239 *l.* to the present time. Of the total amount, the proportionate sum of 159,336 *l.* is for works, 10,886 *l.* for materials, and 17,017 *l.* for plant.

The contract for the the third and remaining portion of Northern Embankment, namely, from the Temple Gardens to Blackfriars Bridge, a length of about 900 feet, has not yet been let, in consequence of the delay which has occurred in the settlement of the plans for the construction of a portion of the Metropolitan District Railway (Inner Circle) between the railway company and the City Gas Company, whose works abut on the line, and whose interests will be materially affected by the railway works.

The contract drawings for this work are, however, in active preparation, and will be completed as soon as practicable, when the works will be submitted to public competition.

#### EMBANKMENT APPROACHES, NORTH.

In connection with the works for the Embankment itself, the Board were authorized to form certain new streets, as approaches to the Embankment, viz., one to communicate with Surrey, Norfolk, and Arundel-streets, another with Wellington-street, Waterloo Bridge; also other short streets to communicate with Villiers-street, Buckingham-street, and Cecil-street, a new street from near George-street, Adelphi, to terminate at the east end of Whitehall, and another from the Embankment at Whitehall-stairs to Whitehall, opposite the Horse Guards.

These streets are, in fact, the same as those proposed in the Report of the Royal Commission of 1861, and for the carrying out of which, in conjunction with the Thames Embankment, the late Government obtained the passing of the Act for the execution of the works above adverted to, but the consideration given by the Board to the subject during the progress of the works of the Embankment, and to the various railway plans affecting the original design, led to the opinion that some important modifications of the general scheme for the approaches became absolutely necessary.

It appeared to the Board that the plans authorized by the Act of Parliament were defective in not providing a communication direct between Charing-cross and the Embankment.

They were also of opinion that an improvement could be effected from the junction of Wellington-street and the Strand, and that other alterations and improvements on the original plan should be made. They therefore caused a Bill to be prepared, with a view to obtaining the necessary powers to enable them to deviate from and extend the plan for the approaches as originally desired. The works proposed to be authorized by the new Act, and sought for, were as follows :

A new street (No. 1) commencing at or near the Charing-cross Railway Bridge, and terminating at Charing-cross, near Northumberland House.

A new street (No. 2), commencing at the eastern end of Whitehall-place, and terminating in the intended new street (No. 1), near Charing-cross Railway Bridge.

A new street (No. 3), commencing at the south-east end of Craven-street, and terminating in the intended new street (No. 1) at or near the Charing-cross Railway Bridge.

A new street (No. 4), commencing at or near the Charing-cross Railway Bridge, proceeding in a southerly direction to the said Embankment roadway, authorized by the Act of 1862.

A new street (No. 5), commencing from and out of the intended new street (No. 2), at or near the Crown wharf, proceeding to Great Scotland-yard, and thence to the intended new street (No. 1). at the southern end Northumberland-street.

The widening of Northumberland-street (No. 6), on the western side thereof from its junction with West-strand, to the point of its intersection by the intended street (No. 1).

A new roadway (No. 7), commencing from and out of the intended new street (No. 1), near the Charing-cross Railway Bridge, passing through the central opening between the Middlesex abutment and the first brick pier

pier of the Charing-cross Railway Bridge, and terminating near and on the Eastern side of the said bridge.

A new street (No. 8), commencing from and out of Villiers street, at the southern end thereof, and terminating in the new roadway (No. 7), near the eastern side of the Charing-cross Railway Bridge,

A new street (No. 9), commencing at the Embankment roadway, before referred to, at or near Charing cross Railway Bridge, on the eastern side thereof, and terminating in the Strand at or near its intersection with Wellington-street.

A branch street (No. 10), commencing in the new street or roadway (No. 9), at or near Beaufort Wharf, and terminating in the main authorized Embankment roadway, near Waterloo Bridge.

This Bill was introduced into the House of Commons, and referred to a Select Committee, when it was strongly opposed by His Grace the Duke of Northumberland in consequence of the proposed interference with his property by the formation of the new street from Charing-cross to the Embankment. The result of that opposition was that the Board considered it prudent to withdraw the clauses in the Bill relating to that particular street.

The Board, however, have not been able to proceed with the measure in consequence of the change in the Government, and the advanced period of the Session preventing the introduction of the Financial Bills for providing the means required for these and other contemplated works.

#### THAMES EMBANKMENT, SOUTH.

The works at present contemplated for the Embankment on the south side of the River consist of a solid embankment from Westminster Bridge to Gun House-alley, near Vauxhall Bridge; the formation of a roadway of an average width of 60 feet along the Embankment between Gun House-alley and Lambeth Suspension Bridge, and a footway 20 feet wide from that point to Westminster Bridge; the removal of a number of dilapidated buildings of the lowest class, and the formation of new streets as approaches to these works. It is also proposed to improve Palace New-road, to widen and otherwise improve a portion of Stangate, and to stop up and appropriate to the general improvement portions of Crozier-street. A contract has been let for the Embankment and works between Westminster Bridge and Gun House-alley, near Vauxhall Bridge, to Mr. W. Webster. The principal works to be done under the contract are the formation of about 4,300 feet in length of river-wall, landing-stairs near Westminster Bridge, paved road and footways, sunk roadways to the dock and other properties severed by the works, and the construction of a short length of sewer for the drainage of a part of the roadway. The contract sum for these works is 309,000 *l*.

The work at present executed under this contract consists principally of the driving of about 2,245 feet of the dam, and 2,280 feet of staging to an average depth of 15½ feet, clay puddling, dredging, excavating, filling-in with earth and concrete. Some of the brickwork for the head walls to the land arches of Westminster Bridge has also been completed.

The approximate total value of the preliminary works, executed to the 25th March last, was 27,000 *l*.; and up to the date of this Report, 39,000 *l*.\*

#### COAL AND WINE DUTIES AND IMPROVEMENT RATE.

It may be convenient here to mention that the raising of adequate funds for the improvements so urgently required in the Metropolis has been, as in former years, the subject of much anxious consideration on the part of the Board.

They reported last year the result of their application to the Government for the transfer to the Board of so much of the Hackney Carriage Duties as were levied in the Metropolis in excess of those raised from the other parts of England,

\* On the 28th July 1866, the foundation stone of this work was, at the request of the chairman of the Board, laid by Mr. W. Tite, M.P. The ceremony was performed in the presence of the Right Hon. Lord John Manners, M.P., the First Commissioner of Her Majesty's Works; the Right Hon. the Lord Mayor, the members of the Board, and others. It may be also interesting to mention that the ground agreed to be sold to the Governors of St. Thomas's Hospital is being rapidly cleared, and that the Governors have entered into a contract with Mr. William Webster, the contractor for the Embankment works, to lay the foundation of the new hospital, which is now rapidly progressing.

England, estimated to amount to the sum of 44,834 £., and which they hoped, upon the representations made, would have been granted in aid of the expenses which the Board were called upon to meet. The Lords of the Treasury stated, amongst other reasons for not complying with the request of the Board, that the portion of the duty leviable upon hackney carriages, which is computed to be in excess of the duty payable elsewhere, might be regarded as a special contribution by the metropolis to the public revenue; that the erection of the palaces and Government offices might be looked upon as a large contribution towards the embellishment of the metropolis; that the Government had obtained Parliamentary votes of large sums in aid of the metropolitan police and for parks; that the Metropolitan Board had had the advantage, never granted to provincial towns, of the use of the public credit, by way of guarantee, to enable them to raise money on terms advantageous to the metropolis; that the Royal parks, instead of being made to yield revenue, were applied exclusively to the pleasure and advantage of the people of the metropolis; and that, independently of the use of the grounds, the amount voted in the year 1864-5 for the maintenance of the parks, &c., within the metropolitan area was 67,144 £., and for other parks in the neighbourhood of London, 34,817 £., which, together, amounted to more than twice as much as the sum levied on the hackney carriages of London. The Government having thus declined to concede these duties, it became a matter of urgent necessity for the Board to take some step for securing other means for carrying out public improvements without prejudicing the claims which they have to meet in connection with the other important duties confided to them. This subject has been, during the past year, very specially considered in reference to the proposed new approaches to the Thames Embankment, the construction of an Embankment of the Thames at Chelsea, and the widening of Park-lane.

The Board, feeling the importance of immediate steps being taken for carrying out these improvements, addressed themselves to the question of raising the funds necessary for that purpose, and they found, from the Report submitted to them by the Thames Embankment Committee, that upon a fair calculation of the value of the coal duties at present placed at their disposal to meet the cost of the Thames Embankment works and the new street to the Mansion House, as against the estimates for those improvements, that there would be a deficiency in respect of those works to the extent of 103,040 £. The Board, on a consideration of these facts, and with a view to the carrying out of the improvements already mentioned, passed a resolution to the effect, "That in order to form approaches to the Thames Embankment, as recommended by the committee, and to construct an embankment of the Thames at Chelsea, and to widen Park-lane at the Piccadilly end; all of which, in the opinion of this Board, are desirable improvements, it is necessary to apply to Parliament for a further extension of the coal and wine duties." They also instructed their officers to prepare the necessary Parliamentary Notices, Books of Reference, &c., to be submitted to the Streets Committee, and authorised that committee, in the mean time, to communicate with the Government on the suggested mode of supplying the funds for the intended improvements.

On the 16th February, the committee reported to the Board that they had been in communication with the Government in order, if possible, to obtain their assistance in passing a measure through Parliament for the further extension of the coal and wine duties for a period of 10 years. The committee stated however, that it appeared to them that, in addition to the extension of the coal and wine duties, it was highly desirable there should be some other source to which the Board might look for the means to carry out the many improvements which the exigencies of the rapidly increasing population required. They further stated that as the term for which the coal and wine duties had been devoted to the cost of improvements in the metropolis would expire in about 16 years, and as the produce of these duties would be exhausted by the Thames Embankment and the new street, that if Parliament should sanction the further extension of these duties, as proposed by the Board, the funds so created would be entirely absorbed by the cost of the improvements for which the Board proposed immediately to ask the sanction of Parliament, leaving no provision for any future works, however important or urgently required they might be.

The committee felt that, from the discussions which had from time to time taken

taken place in Parliament, and the communications between the various Governments and the Board, they could not expect any assistance from the national purse. They were also of opinion that any tax on consumable articles, as is imposed in Paris and other continental cities, would not be satisfactory to the London ratepayers, but be considered a retrograde movement as regards taxation.

It should be borne in mind that, under the existing law, the taxing powers of the Board for their general expenses are in no way limited, but the Board are enabled to raise any amounts which in their judgment may be necessary. The Board have hitherto confined their levy for these expenses to a sum equivalent to a 3*d.* rate on the county rate rental, and, while they have no desire to increase taxation, it is considered that the existing anomaly, imposed by the Local Management Acts, of raising the funds required by the Board for general improvements, upon the principle of the sewers rate, should be got rid of, and a readjustment of taxation take place. The committee suggested that, in pursuing such a course, due regard should be had to the benefit which permanent improvements in the metropolis would confer upon the owners of property as well as upon the occupiers; that both those interests should bear a fair proportion of the expense of such improvements, and they submitted the following resolution, as embodying their views, for the consideration of the Board:

“That, in addition to the continuance of the coal and wine duties, it is expedient and just that property should bear a fair proportion of the expense of carrying out permanent improvements in the metropolis, and that power should be conferred on the Board to make improvement rates for such purposes, which should be borne, one moiety by the occupiers and the other by the owners of property.”

This subject was maturely considered by the Board in connection with communications from several of the vestries and district boards on the subject.

It may be well here to mention that the chairman of the Board has on several occasions given evidence before Committees of the House of Commons upon the subject of the taxation of the metropolis, viz.: Thames Embankment Committee, 1860, presided over by the late Sir J. Paxton; the Local Taxation of the Metropolis in 1861, presided over by Mr. Ayrton; the Sewage of the Metropolis, presided over by Lord R. Montagu, in 1864; Commons and Open Spaces in the Metropolis, 1865, presided over by Mr. Doulton; and more especially before that which sat in the early part of the present year on Metropolitan Local Government, presided over by Mr. Ayrton. He then pointed out that a considerable portion of the expenditure and obligations of the Board had been incurred for the purposes of supplying wants arising from the defects of former administration of the affairs of the metropolis, and of effecting permanent improvements, which had materially tended to increase the value of property in the metropolis, and he earnestly pressed upon the attention of the committee, the urgent necessity which existed for an alteration in the law, so as to supersede the present anomaly, in consequence of which the funds for general metropolitan improvements carried out by the Board are raised by means of a sewers rate, which falls upon the occupiers, and allows the owners of metropolitan property, in most instances, to escape from taxation. The evidence so given had no doubt great weight with the committee, inasmuch as in their report they recommended, “That in any arrangement of the financial resources of the Metropolitan Board, a portion of the charge for permanent improvements and works should be borne by the owners of property within the metropolis, the rate being in the first instance paid by the occupier, and subsequently deducted from his rent, as is now provided in regard to the general property tax.”

On the 11th of May last, the chairman laid before the Board a letter from the Right Honourable G. J. Goschen, to the effect that the Government would consent to the continuance of the coal and wine duties for five years, if combined with the proposal of an improvement rate, and the Board ultimately passed a resolution assenting to the principle of an improvement rate, in the following terms:

“That the Board agree to the proposal that the coal and wine duties should

"should be continued for five additional years, and to the principle of an improvement rate, half thereof to be charged on the owners, and to be raised in the like manner as the property tax, and on these conditions is prepared to proceed with the three important Bills now before Parliament."

The Board also instructed their solicitor to prepare the necessary draft bills for carrying into effect the objects embraced in the foregoing resolution.

Three Bills were accordingly prepared:

1. To further continue the London Coal and Wine Duties for a period of five years.
2. To extend the provisions of "The Thames Embankment and Metropolis Improvement (Loans) Act, 1864."
3. To make better provision for the raising of money to be applied in the execution of permanent improvements in the metropolis.

These several Bills were submitted to the Government, but up to the present time no steps have been taken for introducing them into Parliament, and the consequence of this has been, that the Board have been unable to press the Thames Embankment Approaches Bill on the attention of the Committee of the House of Commons, and, indeed, unless the financial Bills are introduced into Parliament, the Board will be precluded from prosecuting that and the other Bills during the present Session.

#### NEW STREET FROM BLACKFRIARS BRIDGE TO THE MANSION HOUSE.

THIS proposed line of street is intended to run from the termination of the Northern Embankment at Blackfriars Bridge to the Mansion House. It will pass through Earl-street and Doctors' Commons, to Cannon-street, and from thence to its terminus at the Mansion House. Its length will be about 3,450 feet, and with the exception of the portion between Cannon-street and Old Fish-street, viz., New Earl-street, its width will be about 70 feet.

A subway for gas and water mains, &c., will be constructed beneath the roadway along its entire length.

The Board have been principally engaged, since the date of the last report, in dealing with the very numerous claims for the various properties required for the improvement, and up to the 31st March last, they have settled claims in respect of 140 freeholds, 52 leaseholds, and five yearly tenancies\*, amounting in the aggregate to 1,184,723 *l.* 7 *s.* 5 *d.*, for the sum of 1,059,234 *l.* 6 *s.*

The following statement shows the particulars of the claims and the receipt and expenditure, in respect of this new street to the Mansion House, and the Northern and Southern Embankments:

|                     |   |   |   |    | Claims.   |    |    | Settlements. |    |    |
|---------------------|---|---|---|----|-----------|----|----|--------------|----|----|
|                     |   |   |   |    | £.        | s. | d. | £.           | s. | d. |
| For the Embankment: |   |   |   |    |           |    |    |              |    |    |
| 11 Freeholds, &c.   | - | - | - | -  | 153,370   | -  | -  | 124,258      | -  | -  |
| 29 Leaseholds, &c.  | - | - | - | -  | 157,887   | 11 | 1  | 87,116       | 10 | -  |
|                     |   |   |   | £. | 311,257   | 11 | 1  | 211,374      | 10 | -  |
| For the New Street: |   |   |   |    |           |    |    |              |    |    |
| 140 Freeholds, &c.  | - | - | - | -  | 1,055,690 | 1  | 4  | 953,211      | 6  | -  |
| 52 Leaseholds, &c.  | - | - | - | -  | 128,485   | 6  | 1  | 105,113      | -  | -  |
| 5 Yearly Tenancies* | - | - | - | -  | 648       | -  | -  | 910          | -  | -  |
|                     |   |   |   | £. | 1,184,723 | 7  | 5  | 1,059,234    | 6  | -  |

Receipts

\* This includes three claims sent in in which no amounts were stated, but for which the magistrates awarded various sums.

## Receipts and expenditure to 25th March :

|                                                                |   |   |        |           |    |    | 1,387,376 | 10        | 1    |
| Balance, 25th March, 1866                                      | - | - | -      |           |    |    | 155,134   | 13        | 8    |
| For the Northern Embankment, the payments amount to            | - | - | -      |           |    |    | 1,105,885 | 14        | -    |
| For the Mansion House-street, about                            | - | - | -      |           |    |    | 273,490   | 16        | 1    |
| For the Southern Embankment                                    | - | - | -      |           |    |    | 8,000     | -         | -    |
|                                                                |   |   |        |           |    |    | £.        | 1,387,376 | 10 1 |

Besides other sums, to be settled by arbitration with the Metropolitan District Railway Company for land required for stations on the Embankment, the company were bound to pay to the Board, under their Act of 1864, a minimum sum of 200,000 *l.*, in respect of the right given by that Act to carry the railway under the Thames Embankment and new street.

## THAMES EMBANKMENT, SOUTH.

The particulars and general features of this improvement have been already described at page 25 of this Report.

The Statutes for this improvement were obtained in 1863 and 1864, and the properties and interests purchased since July 1865 to 31st March last, were as follows :

|                            | Claims.      | Settlements. |
|----------------------------|--------------|--------------|
|                            | £. s. d.     | £. s. d.     |
| 11 Freeholds and Copyholds | 26,666 4 -   | 24,090 - -   |
| 14 Leaseholds, &c.         | 116,076 10 5 | 85,885 - -   |
| £.                         | 142,742 14 5 | 109,975 - -  |

The receipts and expenditure to 25th March were as follows :

| RECEIPTS.                                                                 |   |   |   |    | £.          | s. | d. |

#### GARRICK STREET (LATE KING STREET), COVENT GARDEN.

This street extends from the junction of St. Martin's lane with Long-acre. It was opened to the public in March 1861. The whole of the building plots have now been let on leases for 80 years, with one exception, where the term is 50 years. The aggregate rental received for these plots is 2,484 *l.* per annum.

The Board would have proceeded with the sale of the ground rents of this property, but the state of the money market has been such that they have not deemed it expedient to do so at present.

The cost of this improvement was made chargeable on the balance of the London Bridge Approaches Fund, by the Act of 1857, under which it was carried out. The amounts received and expended in connection with this improvement, up to the 25th March last, were as follows :

## SOUTHWARK STREET.

This important thoroughfare has been opened for nearly three years, and its value as a ready means of communication between the West End, Southwark, and the London Bridge Railway Stations, is becoming daily more evident. Out of the 206 plots into which the surplus land in the line of the street was divided, the Board have let on lease 177, and there remain to be let 29 plots. The income derived from the ground rents, including the rent of some warehouses purchased by the Board, but not pulled down, amounts to 6,904 *l.* per annum.

The following statement shows the amounts received and expended by the Board, in connection with this improvement, up to the 25th March last:

## BURDETT ROAD.

This new line of road has been formed by the Board under the provisions of the Victoria Park Approaches Act. It extends from the Mile End-road to the East India Dock-road, a distance of about 3,486 feet; the width of the road is 70 feet. It was opened to the public on the 25th May 1862. The land not required for the roadway was set out for building purposes. There are in all 89 plots; of these 41 have been let on leases, realising an aggregate rental of 176 *l.* 15 *s.* per annum.

¶ The sums received and expended in respect of this improvement up to the 25th March last, were as follows :

## REMOVAL OF MIDDLE ROW, HOLBORN.

The Act authorising the carrying out of this much required improvement provides for the removal of the block of buildings situated on the north side of the Row, and to that extent the widening of High Holborn at that point. The estimated cost of the work is 61,152 £.

The following statement shows the claims which have been dealt with up to the 31st March last, and the amounts at which they have been settled :

## WHITECHAPEL IMPROVEMENT.

The Board reported last year that they had obtained an Act to enable them to form a new line of street to open up an improved means of communication between Whitechapel and the Commercial-road.

The want of this improvement had been long felt, and its urgency has become, during the last few years, more and more apparent from the increase of the heavy traffic through this neighbourhood to the City and West End, and between

between the several docks and railways. The street which it is proposed to form will extend from Back Church-lane to Leman-street. It will be about 1,150 feet in length and 70 feet in width. The net cost is estimated at about 115,364 *l*.

Since the passing of the Act in 1865, the Board have been engaged in the purchase of the properties required for the improvement, and up to the 31st March the Board had agreed to settle claims for properties and interests, as follows:

|                            | Claims. |    |    | Settlements. |    |    |
|----------------------------|---------|----|----|--------------|----|----|
|                            | £.      | s. | d. | £.           | s. | d. |

#### PARKS.

##### *Finsbury Park.*

The quantity of land purchased for the park was 120 acres, the cost of which has been 56,650 *l*., or about 472 *l*. per acre; the portion proposed to be built upon is about 20 acres, leaving 100 acres for the park proper.

As stated in the last Report, unavoidable delay occurred in the completion of the purchases of the land and other interests, before steps could be taken for the formation of this park.

These difficulties being overcome, the Board at once gave directions for the laying out of the park. With this object, a plan was prepared showing the proposed method of forming the roads and laying out the ground, and also the site of the land proposed to be appropriated for building purposes, as provided by the Act.

The question of the propriety of building on a portion of the land was raised by memorials from the vestries of St. Luke and Islington, and from inhabitants of the borough of Finsbury, and carefully considered by the Board. These memorialists and deputations strongly deprecated the using of any part of the area for that object. The Board, however, felt that the claims of other portions of the metropolitan area could not be lost sight of; that there were many very important improvements in various parts of the metropolis necessarily in abeyance from the want of funds, nor could the cost to be incurred for the inclosing and formation of roads, the erection of lodges, planting of trees, shrubs, &c.; and the perpetual expense for maintenance which will have to be borne when the park is completed, be forgotten. These circumstances led the Board, after a full consideration, to approve the plan prepared, whereby a portion of the property will be let for building purposes, as is the case in Glasgow and other places, and the funds so received will be applied in recouping the Board to some extent for their large outlay in carrying out the scheme, and afterwards be applicable to other important improvements.

##### *Southwark Park.*

This park will embrace an area of about 60 acres, lying between Paradise-row, Rotherhithe, and Deptford Lower-road; the amount paid for the land was about 911 *l*. per acre.

The negotiations for the purchase of the land have been of a lengthened and difficult character, but the Board have the satisfaction of stating that they are now concluded.

They have also taken steps to settle claims for the yearly tenancies and other minor interests, and to obtain possession of the whole of the property, and have instructed their architect to prepare plans for laying out the ground for the purposes of the park, and dedicating it to the public use.

## OPEN SPACES.

The Board in the Report of last year referred to the consideration which they had given to the subject of the preservation of the commons and open spaces in and around the metropolis, and stated that they had arrived at an unanimous resolution to the effect that it was highly desirable to preserve such open spaces for public recreation and enjoyment; that the Board should compensate the lords of manors and commoners for any rights of which they might be deprived, and that, towards meeting the expenditure to be incurred, powers should be given to the Board to sell portions of such open spaces for building and other purposes. They also stated that this resolution had been submitted to the Select Committee of the House of Commons, appointed to inquire into the best means of preserving for the public use the forests, commons, and open spaces in and around the metropolis. This Committee, after a lengthened inquiry, during which a large mass of valuable evidence was taken, recommended, amongst other things, that the Statute of Merton should be repealed, and that no inclosure should take place under the provisions of the Inclosure Act within the Metropolitan area; and that a Board should be appointed to act as Trustees for the preservation of commons and open spaces within that area. Upon a consideration of the Report, the Board expressed the hope that some legislative action might result upon the presentation of the Report of the Committee.

Pending the passing of some measure based upon the recommendation of the Select Committee of the House of Commons, the Board have not relaxed their efforts to preserve intact the open spaces within their jurisdiction, which otherwise might have been seriously interfered with in connection with railway and other schemes brought into Parliament during the present Session.

It may here be well to mention that the Board have received urgent representations with respect to some of these open spaces. A deputation from the Boards of Works for the Greenwich, Lewisham, and Plumstead districts, attended the Board, and presented a memorial from a joint meeting of the committees of the several districts, represented by them, calling attention to the encroachments, by gravel digging, which have taken place, and are yearly increasing, on Blackheath, and pointing out nuisances which exist there by the erection of booths on the waste or common of the Royal manor, and also from the letting and driving of horses and donkeys, and strongly urging the Board to adopt such measures as they might deem advisable to obtain the necessary legal powers for taking charge of Blackheath, and other commons and open spaces within the metropolitan district, and making bye-laws and regulations for the maintenance and preservation thereof.

The Board also received a memorial from the Vicar, Churchwardens, and other influential inhabitants of Plumstead, complaining of recent encroachments on Plumstead Common, which they stated had been, from time immemorial, open and free, and praying the Board to take such steps as might prevent its being inclosed.

As showing the urgent necessity and importance of securing the commons and open spaces around the metropolis for the public benefit, it may be mentioned that no less than seven of such open spaces were threatened by railway schemes during the present session of Parliament. They were the following:

Hampstead Heath, by two schemes.  
 Hackney Downs, by one railway and two junctions.  
 Barnes Common, by two railways and two junctions.  
 Fulham Common, by two railways and two junctions.  
 Parson's Green, by one railway.  
 Wimbledon Common, by three railways and three junctions.  
 Tooting Common, by two railways and one junction.

The Board, in the interests of the public, have succeeded, after much negotiation and opposition, in obtaining important modifications of the schemes in mitigation of the evils threatened. Full particulars will be found under the head of Bills in Parliament.

There was one Bill, however, which it is necessary to refer to here, namely, the Commons (Metropolis) Bill, introduced into the House of Commons by the

Right

Right honourable William Cowper, because it arose out of the inquiry which was made by the Select Committee, already referred to.

By this Bill it was proposed to appoint a body of unpaid Commissioners, consisting of the Chairman of this Board, the First Commissioner of Her Majesty's Works, one of the Inclosure Commissioners, and two persons to be appointed by the Secretary of State; that the Board, so constituted, should receive and consider memorials from lords of manors or commoners for the improvement of commons, by drainage and otherwise, and for their protection from nuisances; and the Commissioners were to be empowered to prepare a scheme of improvement in reference to each common brought under their consideration, which scheme was to receive the sanction of Parliament before it came into operation. The expenses of any application, and the scheme consequent thereon, were to be borne by the applicants. Further, that this Board should, on the recommendation of the Commissioners, contribute such amount as they thought fit towards the expenses of executing any scheme under this Act, when confirmed by Act of Parliament, and all money so contributed by this Board was to be deemed to be part of the expenses of the Board under the Metropolis Management Act, 1855, and the Acts for amending the same, and to be raised and paid by the Board accordingly. The other expenses were to be defrayed out of money to be provided by Parliament for that purpose.

The provisions of this Bill were very carefully considered, and, after full discussion, an unanimous resolution was passed in the following terms, viz. :

“That, in the opinion of the Board, the Commons Metropolis Bill \* is wholly inadequate to effect the object it professes to have in view; that it entirely fails to deal with the cases already brought to the knowledge of the Board in and near the metropolis, and would be quite inoperative in promoting the very desirable end of preserving these open spaces for public use.”

This resolution was communicated to the First Commissioner, and he was also reminded of the willingness of the Board to deal with the question of open spaces, as stated in their unanimous resolution of the 5th May 1865, to which reference has already been made.

They also stated that, whilst they believed there were several commons where no land at all would be available for building purposes, there were others in which portions might be so appropriated without detriment to the commons, and with great advantage to the ratepayers. That, in addition to Hampstead Heath and Tooting Common, there were open spaces at Wandsworth, Blackheath, Peckham Rye, and Hackney, all of which cases had been brought under the notice of the Board, and for which some provision must ultimately be made.

The Board cannot but express their earnest conviction of the growing importance of this subject in reference to the health of the metropolis. The absorption of open space by building operations in every direction within the metropolitan area, and the rapid increase of suburban towns and villages immediately adjacent, arising from the increased facilities for travelling afforded by the railway companies, call for constant attention on the part of the Board, and they entertain the hope that the valuable information with regard to manorial and other rights which has been obtained by recent Committees of the House of Commons, may lead to the speedy passing of such measures as will secure to the present and future inhabitants of the metropolis, and its immediate neighbourhood, the perpetual use of open spaces and recreation grounds.

---

\* The Bill was much modified in passing through the two Houses. The Act (which received the Royal Assent on the 10th August 1866), provides that the Inclosure Commissioners shall be the body to receive and consider memorials submitted to them, and shall settle schemes for the protection and improvement of commons brought under their notice, subject to the final approval of Parliament.

The expenses of the Commissioners in relation to any memorial are to be borne by the memorialists, or by any ratepayers or inhabitants of the parish or district in or near which the common is situated, or by the local authority, and the local authority beyond the metropolis, or the Metropolitan Board of Works, may contribute such amount as they think fit towards executing any scheme when confirmed by Parliament, including the payment of the compensation (if any) to be paid in pursuance thereof.

And it is also provided that all expenditure made by any local authority shall be defrayed out of a local rate, as defined by the first Schedule to this Act.

## PARLIAMENTARY BILLS.

The Board have, during the present Session, promoted three Bills for Metropolitan Improvements, namely, for the improvement of High-street, Kensington, and its vicinity, for the widening of Park-lane, for the formation of approaches to the Northern Embankment, and for the embankment of a portion of the River between Chelsea Hospital and Battersea Bridge.

*High Street, Kensington.*

By this Bill the Board propose to widen High-street on its southern side, between Young-street and the works of the Metropolitan Railway, now in course of construction westward of King-street, and to form a new street in substitution of part of King-street, and another to run westward to King-street. Urgent representations were addressed to the Board by the Vestry of Kensington, as to the necessity for widening High-street, and, as the street was the main western line of thoroughfare into London, the Board determined on seeking the authority of Parliament to carry out such improvements in the locality as appeared to them necessary for facilitating the traffic, and, accordingly, at an early period of the Session, they introduced the measure in question. It has recently received the Royal Assent, and will come into operation on the 1st October next, when steps will be taken for carrying out the provisions of the Act. The net cost of this important improvement is estimated at 77,565 *l.*

*Park Lane.*

The Board, in their last Report, described the urgent necessity which existed for widening this thoroughfare, and expressed their regret that they had not succeeded in obtaining the sanction of Parliament to their plan for opening a line of communication from Piccadilly, through Hamilton-place to Park-lane, an arrangement which would, in their opinion, have afforded the required relief to the traffic, and have been effected with the greatest facility and at the least expense. The Board have, during the present Session, again renewed their efforts, to effect the desired improvement, and have submitted to Parliament a plan for widening the south end of the lane on its western side near Piccadilly, at a net cost, estimated approximately, of 105,000 *l.*

*Approaches to the Northern Embankment.*

This Bill provides for the formation of approach roads from Whitehall, Charing Cross, and the Strand, to the embankment roadway. With the exception of one important communication from Charing Cross, through Northumberland House, the new approaches proposed to be formed are modifications of those authorised by the Thames Embankment Act of 1862. The net cost of the works, estimated approximately, is 454,700 *l.*

The difficulties met with in the prosecution of the Bill, and the steps taken by the Board, are fully set out in the paragraph headed "Embankment Approaches, North," under the head of "Metropolitan Improvements."

*Chelsea Embankment.*

The object of this Bill is to authorise the Board to extend the embankment of the Middlesex shore of the River from the termination of the present embankment at the western end of Chelsea Hospital to Battersea Bridge, and to form a public roadway between those points behind the embankment wall, so as to complete the thoroughfare along the River side between Vauxhall and Battersea Bridges. The length of the proposed new roadway and embankment is somewhat in excess of three-fourths of a mile. The net cost of this improvement is estimated, approximately, at 206,000 *l.*

The net cost of the works proposed by the last-mentioned Bills amounted to 765,700 *l.*, and the Board recorded their opinion that, in order to provide for such outlay, it was necessary to apply to Parliament to extend the period for the levying of the coal and wine duties, and they accordingly instructed one of their committees to communicate with Her Majesty's Government on the suggested mode of supplying the necessary funds. These communications resulted

resulted in an intimation being given by the Government, that they would be prepared to assent to an extension of the duties, provided a proposition for levying an improvement rate on property in the metropolis were combined with it. To this course the Board assented, and Bills were accordingly prepared and submitted to the then Government for carrying into effect the arrangements, but circumstances, over which the Board have no control, have hitherto retarded their introduction into Parliament.

Pending the prosecution of these measures, no steps have been taken by the Board with the three Improvement Bills above referred to, beyond having them referred to Select Committees.

The proceedings of the Board with respect to the coal and wine duties, and the levying of an improvement rate on the metropolis, are more fully referred to in this Report under the head of "Coal and Wine Duties."

#### *Railway and other Bills.*

In addition to the Bills above alluded to, the attention of the Board has been occupied with the consideration of other projects for new railways, and other matters affecting the metropolis, the Plans and Bills connected with which were, pursuant to the Standing Orders of Parliament, deposited with the Board. The Board have caused them to be investigated and reported upon by their officers, and they have much satisfaction in stating that, in the majority, such modifications have been made, as with a due regard to the public interests, the Board deemed it expedient to require.

The following are the titles of the several Bills :

#### *House of Lords.*

|                                          |                             |
|------------------------------------------|-----------------------------|
| Belgravia and South Kensington Road.     | Metropolitan Tramways.      |
| City and London Bridge Railways.         | Pneumatic Despatch Company. |
| East London Railway (Additional Powers). | South Kensington New Road.  |
| Equitable Gas Company.                   | South Kensington Road.      |
| Finchley Road Estate.                    | Thames Subway.              |
| Imperial Gas Company.                    | Wandsworth Canal.           |
| Metropolis Sewage and Essex Reclamation. |                             |

#### *House of Commons.*

|                                                                                          |                                                                       |
|------------------------------------------------------------------------------------------|-----------------------------------------------------------------------|
| Artizans' and Labourers' Dwellings.                                                      | London, Chatham and Dover Railway (New Lines).                        |
| Brixton, Clapham and Balham Extension Railways.                                          | London and South Western Railway (Additional Powers).                 |
| Croydon Direct Railway.                                                                  | London (City) Corporation Gas.                                        |
| Cattle, &c., Contagious Diseases.                                                        | Metropolitan Railway (Additional Powers).                             |
| City, Kingston and Richmond Railway.                                                     | Mid-London Railway.                                                   |
| Commons, Metropolis.                                                                     | Metropolitan and St. John's Wood Railway.                             |
| Equitable Gas.                                                                           | Metropolitan and Richmond Railway.                                    |
| East London Railway (South Western Extension).                                           | Metropolitan District Railway.                                        |
| East London Eastern Extension Railway.                                                   | Metropolis Gas Act Amendment.                                         |
| Great Western Railway (Further Powers).                                                  | Midland Railway (Additional Powers).                                  |
| Great Northern Railway (Additional Powers).                                              | North Metropolitan Railway.                                           |
| Gas Light and Coke and City of London Gas Light and Coke Company.                        | North-Western and Charing Cross Railway Railways' Clauses.            |
| Gas Light and Coke Company.                                                              | South Eastern Railway.                                                |
| Hampstead, Highgate and Charing Cross Railway.                                           | Superannuation (Officers, Metropolitan Vestries and District Boards). |
| London, Chatham and Dover, and South Eastern (Kennington, Clapham and Brixton) Railways. | Thames Navigation.                                                    |
| London (City) Traffic Regulation.                                                        | Wimbledon Railways.                                                   |
| London, Chatham and Dover Railway (Various Powers).                                      | Waterworks.                                                           |
|                                                                                          | Westminster Boulevard.                                                |
|                                                                                          | Wandsworth and Putney Gas.                                            |

Several of these Bills materially affected matters under the control of the Board, and required their special attention. The Bills to which this remark applies, are the following :

#### *Artizans' and Labourers' Dwellings.*

By this Bill it is proposed to provide for taking down or improving dwellings occupied by working men and their families which are unfit for human habitation,

tation, and for building and maintaining better dwellings for such persons. The measure is a general one, and applies to the United Kingdom. It is proposed to constitute the local authority in each of the places described in the Schedule to the Bill as the executive to carry its provisions into effect, that for the metropolis being the Board. To meet the expenses attending the execution of the Act, the Board are to levy a rate within the metropolis in the same manner as they now do for meeting the general expenses; the rate is not to exceed 3 *d.* in the pound in any one year. The Board, whilst entertaining no doubt as to the desirability of the objects of the measure, were of opinion that the machinery by which it was thought to accomplish them was objectionable, so far as the Board, as the representative of the metropolitan ratepayers were concerned, and they have instructed one of their committees to deal with the Bill as they may consider desirable.

*Commons and Open Spaces.*

This Bill, which was introduced by Her Majesty's Government at an early part of the Session, was declared to be a measure for making provision for the improvement of commons in the neighbourhood of the metropolis, and the protection thereof from nuisances; it was to apply to commons within the metropolitan Police District, and to be carried out by a body of five unpaid commissioners, to be appointed by the Government, with power to appoint officers, &c. By its provisions a scheme for the improvement of a common, by drainage and otherwise, and protecting it from nuisances, might be made on a memorial by the lord of the manor, or by any commoners, but no scheme was to be confirmed unless submitted to Parliament. The course taken by the Board with regard to this Bill is fully stated in the previous part of this Report, under the head of "Open Spaces."

*The Gas Light and Coke Company's Bill.*

The Company proposed by their Bill to raise further capital, and to acquire land at Hackney Wick for the erection thereon of works for the manufacture of gas. The land proposed to be taken was adjacent to Victoria Park. The Board being strongly impressed as to the injurious effects which would result to the park and to the health of the inhabitants of the neighbourhood, if the Bill became law, presented a petition, and appeared by counsel before the Parliamentary Committee in opposition to the measure. The Bill, although it passed the House of Commons, was rejected on the motion for the second reading in the House of Lords.

*London, Chatham and Dover, and South Eastern (Kennington, Clapham and Brixton) Railways Bill.*

The works proposed by this Bill involved an extensive interference with the sewerage on the south side of the Thames, in some instances entirely destroying the existing means of drainage; and the Board, therefore, took the necessary steps for obtaining the insertion in the Bill of a clause specially defining the works which the Company were to execute, for the proper protection of the sewers through which their railway was intended to pass, and their efforts in that respect have been successful.

*London, Chatham and Dover Railway (Various Powers) Bill.*

By a clause in this Bill, the Company sought to remove the restriction imposed by a previous Act, with reference to the width of their bridge over Southwark-street, with a view of enabling them to construct a bridge over that street for a further width of about 120 feet, making, with that already constructed, an archway of about 270 feet in width. The Board deemed this so objectionable a proposition that they determined to oppose it, and ultimately an arrangement was come to with the Company, by which the proposed widening of the bridge is to be carried out, provided that the Company's works do not encroach beyond the frontage line of the adjoining street.

*London, Chatham and Dover Railway (New Lines) Bill.*

One of the lines proposed by this Bill would have materially interfered with the carrying out of the plans for the local drainage of Greenwich, and with the main drainage sewers of that district; but, in consequence of the steps taken by the Board in opposing this portion of the Bill, its promoters withdrew the clauses relating to their works in Greenwich, and ultimately relinquished their intention of constructing the line in question.

*North Metropolitan Railway Bill.*

The scheme proposed by this Bill contemplated the construction of a portion of the railway in tunnel under Hampstead Heath, and a portion through the Heath and Parliament-hill in open cutting, thereby materially curtailing the area of the heath. The surface of Hackney-downs, another place resorted to by the public for the purposes of recreation, would have also been seriously interfered with. Under these circumstances the Board presented a petition against the Bill with the object of obtaining the insertion of clauses for protecting the interests of the public, and they have the satisfaction of stating that they have succeeded in obtaining the introduction into the Bill of clauses for preventing any portion of the heath or downs being appropriated or interfered with by the company in a manner prejudicial to those interests.

*North Western and Charing-cross Railway Bill.*

The company endeavoured by this Bill to repeal the sections of their Act of 1864, prohibiting the opening of Hampstead and Tottenham-court roads for constructing their works, and power was sought to increase, at the discretion of the company, the number of ventilating shafts in those roads, which were, by the Act of 1864, limited to three. The Board considered the proposition highly objectionable, and accordingly opposed it, and the clauses were ultimately withdrawn.

*South Eastern Railway (New Lines at Greenwich, &c.) Bill.*

The interference with the sewerage of Greenwich by this scheme was similar to that proposed by the London, Chatham and Dover Company's Bill, to which allusion has already been made, and the opposition of the Board thereto resulted in a withdrawal of that portion of the scheme which affected the Greenwich district.

*Superannuation (Officers of Metropolitan Vestries and District Boards) Bill.*

By this Bill it is proposed to empower vestries and district boards of the metropolis, under certain circumstances, to grant to any officer in their service an annual retiring allowance, not exceeding in any case two-thirds of his salary. The Board, after considering the provisions of the measure, were of opinion that the powers sought for by vestries, &c., should also be extended to the officers in their employ, and they accordingly took steps for obtaining the necessary alteration in the Bill, and the Bill, as amended, has recently received the Royal Assent.

*Thames Navigation Bill.*

This most important Bill, in addition to regulating certain matters for the purification and general improvement of the River Thames, and the transaction of business by the Board of Conservators, proposed to add five members to the present Board, one of such five to be appointed by the Board of Trade. The Board, looking to the nature and importance of their duties in relation to the river, and to the circumstance that all interests, with the exception of that of the rate-payers of the metropolis, were represented on the Conservancy Board, were of opinion, that the interests of the metropolis required that they should be represented on that Board, and with that view, the chairman, at their request addressed a communication to the President of the Board of Trade, by whom

the Bill was introduced, pointing out the views entertained by the Board upon the subject. The correspondence appears in Appendix (D) to this Report. The Bill was subsequently referred to a Select Committee of the House of Commons, but the Board have hitherto been unable to obtain the introduction of a clause whereby the metropolitan ratepayers would be represented on the Board.

*Wandsworth and Putney Gas Company's Bill.*

A clause was originally inserted in this Bill directed to the object of exempting from the operation of certain sections of the Metropolis Management Amendment Act, 1862, relating to lines of building frontage and width of streets, any gas works or buildings which the company had erected, or might hereafter erect, upon the lands specified in the Schedule to the Bill. The Board considered this so objectionable on public grounds, that they presented a petition against it, and succeeded in obtaining its rejection from the Bill.

*Finchley-road Estate Bill.*

Sir T. M. Wilson, by this Bill, sought legislative authority for grant building leases of the land on both sides of the Finchley-road. The Board have, in past years, opposed the various propositions which have been made to Parliament by Sir T. M. Wilson, for permission to build in the neighbourhood of Hampstead Heath, and, with regard to the present Bill, their opposition has been maintained on the ground that the land to which it referred was an open space with public footpaths, over which the public had a right of way; that the proposition to lay out the land for building was contrary to the intention of the late Sir T. M. Wilson, and that it was desirable the existing restriction as to granting building leases should not be removed. The Bill was thrown out by the House of Lords on the motion for its second reading.

*Imperial Gas Company's Bill.*

This Bill, like the Gas Light and Coke Company's Bill, proposed the erection of gas works in the immediate vicinity of Victoria Park. The scheme was strenuously opposed by the Board, and the Bill was ultimately lost on the motion for its second reading.

*Metropolis Sewage and Essex Reclamation Company's Bill.*

This Bill proposed alterations in the culverts sanctioned by the Company's Act of last Session, in order to effect a saving in the cost of construction, and an extension of time was sought for making such culverts. The Bill also contained provisions as to the time for compulsory purchase of property, and payment of compensation. The Board considered the Bill, in its then form, objectionable, and in order to guard against any alteration in the terms of the agreement between themselves and the company, under the Act of 1865, petitioned against the Bill; the promoters subsequently altered the measure to meet the views of the Board, and the petition was thereupon withdrawn. The Bill has recently become law.

## FIRE BRIGADE.

On the 1st January 1866, under the powers contained in the Fire Brigade Act, 1865, the duty of extinguishing fires and protecting life and property in case of fire within the metropolis devolved upon the Board. The provisions of this Act were shortly described in the last Annual Report of the Board's proceedings, and it was then stated that they had referred it to one of their committees to consider and report as to the course to be pursued for putting in force the provisions of the Act on the 1st January 1866. The first step taken by the Board was the selection of a chief officer for the new brigade, in order that the committee might be assisted by his knowledge and experience in their investigations. They accordingly appointed Captain E. M. Shaw, the then superintendent of the London Fire Engine Establishment, to that office, believing that the experience he had acquired during the period he had been at

at the head of that establishment was such as to render him the most fit and proper person for the appointment.

The Board deemed it advisable, in the first instance, to divide the metropolis, for the purposes of the brigade, into four districts, each to be under the immediate charge of an officer to be called a foreman, who should reside at the principal station in his district, and take command at all fires occurring therein at which the chief officer should not be present.

With regard to the staff of the new brigade, the Board determined that it was neither necessary nor advisable to commence the new system with a larger force than had previously existed, but that it would be better that the force should gradually be enlarged as new stations were formed, and as necessity might arise for such increase. The number of men of all ranks employed by the late London Fire Establishment at the time of the transfer of the duties to the Board was 130, and consisted of four foremen, each having charge of a district, 13 engineers, 15 sub-engineers, 49 senior firemen, and 49 junior firemen. The Board, on the 1st January of the present year, took the whole of these men into their service in the positions which they respectively occupied at that date.

As above stated, the ordinary firemen under the late establishment were divided into two classes, called respectively senior firemen and junior firemen. The Board established three classes, the senior and junior firemen of the late establishment being called first and second class firemen respectively, and the third class to consist of such new men as should in future take service in the brigade. The number of men appointed by the Board in the third class, between the 1st January and the 30th June, has been 60. Nearly all have been seafaring men, the Board being of opinion that those persons were the best fitted, by previous training and habits, for the duties of firemen. A training dépôt has been established in Upper Thames-street, to which all the new men are attached in the first instance, and where they are thoroughly drilled and instructed in their various duties, prior to being distributed amongst the several stations. By this means, the time occupied in teaching the new men their duties is considerably reduced. No new man is allowed to enter the force who is over 25 years of age, or who is not in every respect thoroughly qualified for the work of a fireman. Each man, previous to appointment, undergoes an examination as to his physical fitness, by the senior medical officer of the brigade.

The Board have also appointed in the brigade such of the engine keepers and firemen formerly in the service of the parishes as appeared to them qualified for the duties; they will most of them be placed in charge of the small stations to which they were attached while in the service of the parishes. The number of persons so appointed is 13.

The Fire Brigade Act provides that, on and after the 1st day of January 1866, all stations, fire engines, fire escapes, plant, and other property belonging to, or used by, the fire engine establishment of the insurance companies in the metropolis should vest in, or be conveyed or assigned to the Board. In pursuance of this provision, the Board, on the 1st January, took over all the stations, fire engines, and other property belonging to the late establishment.

The following are the stations that were thus transferred to the Board, being 17 in number, viz. :

|                                                |                                     |
|------------------------------------------------|-------------------------------------|
| Nos. 66, 67, 68, and 69, Watling-street, City. | George-yard, Crown-street, Soho.    |
| No. 118, Cock-hill, Ratcliff.                  | Wells-street, Oxford-street.        |
| Nos. 20 and 21, Wellclose-square.              | No. 33, King-street, Baker-street.  |
| No. 23, Bishopsgate-street Without.            | No. 39, King-street, Golden-square. |
| No. 64, Whitecross-street.                     | Horseferry-road, Westminster.       |
| No. 27½, Farringdon-street.                    | No. 142, Waterloo-road.             |
| No. 254, High Holborn.                         | No. 2, Southwark Bridge-road.       |
| No. 44, Chandos-street.                        | No. 165, Tooley-street; and         |
|                                                | No. 6, Lucas-street, Rotherhithe.   |

In addition to these, two floating stations were also transferred to the Board, viz. : one at Southwark Bridge, and one at Rotherhithe.

In order to insure the immediate and, as far as possible, proper protection of the metropolis, arrangements were made with the authorities of parishes in which an efficient engine and staff had up to that time been maintained, to continue the same for a limited period, on behalf of the Board, until the latter

should be able to establish other stations, and make their permanent arrangements. The following are the stations which have thus been maintained :

|                              |                                |
|------------------------------|--------------------------------|
| Camden Town.                 | Bow.                           |
| South Kensington.            | Church-street, Bethnal Green.  |
| Hammersmith.                 | Limehouse Church.              |
| Paddington Green.            | Millwall (Mr. W. Roberts).     |
| Royal Oak, Bayswater.        | Whitechapel Church.            |
| St. John's Wood-road.        | Shoreditch.                    |
| Sloane-square.               | Globe-fields, Mile End.        |
| Fulham-road.                 | Greenwich.                     |
| Islington (Florence-street). | Deptford (Messrs. Penn & Son). |
| Holloway-road.               | Peckham.                       |
| Hackney (Town Hall).         | Wandsworth.                    |
| Stoke Newington.             | Brixton.                       |
| De Beauvoir Town.            | Lewisham.                      |
| South Hackney.               |                                |

In addition to these, the Board also established a small station at Poplar, for the protection of that neighbourhood. The duties in connection with most of the above stations are now about to be taken over by the Metropolitan Fire Brigade, the increase in the number of men, engines, and material belonging to the force being such as to admit of this being done. Several of these outlying stations will still remain in charge of the present engine-keepers, who, as before stated, have been appointed by the Board. The Board hope in a short time to be in a position to provide for the protection, by the brigade, of the whole of the localities in which the stations above mentioned are situated. They are proceeding with the acquisition of sites in various parts of the metropolis, for the purpose of erecting permanent stations, and have already obtained several suitable ones, where steps are being taken for their erection.

The brigade have a perfect system of telegraphic communication between all the principal stations of the brigade, and many of the subsidiary stations, for the purpose of ensuring, in case of necessity, the immediate concentration of a large force of engines and men at any given point.

The number of engines handed over to the Board on the 1st January was as follows: One floating steam engine lying off Southwark Bridge, four land steamers, and 27 manual engines. To these the Board have added, since the 1st January, 11 new land steamers, and 23 manual engines, which they have purchased of the parishes. They have also continued on hire the steam engines which were so held by the late establishment, viz. : the large steamer kept on board a barge off Rotherhithe, and used for the protection of water-side property, and four land steamers.

The number of men transferred to the Board on the 1st January 1866 was 130, the number appointed by the Board since that date is 73; the number of deaths, resignations, and dismissals is 19. The total strength of the force, therefore, at the present time is 184, or an increase of 54 above the number taken over.

The following Tables show the number of the engines and their power, respectively, taken to by the Board on the 1st January 1866, and the number and power of those held on the 30th June 1866 :

MANUAL FIRE ENGINES taken over by the Metropolitan Board of Works from the late London Fire Engine Establishment, on the 1st January 1866.

\* Marked thus, on hire.

It will thus be seen that the number of engines has been nearly doubled since the brigade was placed under the management of the Board, and the force in land steam engines especially has been very materially increased. The arrangements for the protection of the waterside property in the metropolis from fire

are still, in the opinion of the Board, deficient; the force available for this purpose, consisting only of the floating steam fire engine lying off Southwark-bridge, and one other large steam engine hired by the Board, which is kept, as above stated, on an iron barge moored off Rotherhithe. They have therefore determined to provide another powerful floating steam engine as soon as possible, and with that view have engaged an eminent engineer to prepare, in concert with Captain Shaw, designs for a floating engine of the least possible draught.

The subject of the organization of a system for the protection of life from fire, in connection with the fire brigade, is one that has on several occasions engaged the serious attention of the Board. This duty is cast upon them by the Fire Brigade Act, and the Board have, on previous occasions, expressed their opinion that no fire brigade for the metropolis would be complete, unless adequate provisions were made for securing that object. The Board, however, are as yet uncertain as to the cost of the system established for the protection of property in the metropolis, and having regard to the fact that the means which they have at their disposal for this purpose are limited by the Act of Parliament, they have felt themselves unable, at present, to take steps towards the establishment of a system for the protection of life from fire. The Board hope that, so soon as their present establishment shall be so far developed as to enable them to judge of its probable annual cost, they will be in a position to take steps towards the organization of a system for the protection of life, and thus relieve the Society which has for so many years past made such successful exertions for this humane object.

The resources at the disposal of the Board for meeting the expenses of the fire brigade are: (1.) A contribution by the Government of a sum not exceeding 10,000 *l.* a year; (2.) A contribution by the fire insurance companies insuring property in the metropolis of 35 *l.* per million on the gross amounts insured by them in respect of such property during the year (the amount from this source will this year be 11,050 *l.* 12 *s.* 4 *d.*); and (3.) Such sums as can be raised by a halfpenny rate on the metropolis, which is estimated this year to produce 30,822 *l.* 12 *s.* 3 *d.* In addition to this, a small sum will be received for penalties for chimney fires, a subject which is more particularly mentioned below, and for certain special services performed by the brigade, such as the placing watchmen at various public buildings, and the attendances of the brigade at fires outside the metropolitan area, which are authorised by the 30th clause of the Act. Thus the total of the resources of the Board applicable to the maintenance of the fire brigade amount to a little more than 52,000 *l.* a year.

The 21st section of the Fire Brigade Act provides that the Board may, with the consent of the Commissioners of Her Majesty's Treasury, borrow any sum not exceeding 40,000 *l.*, and apply the same for the purposes of the Act, but the Board have not yet deemed it desirable to exercise the power conferred upon them by this section.

The number of fires (exclusive of chimney fires) that have taken place between the 1st January and the 30th June, inclusive, and at which the brigade have attended with their engines, has been 726. Several of these have been of considerable magnitude; at one, in particular, the large conflagration at St. Katherine's Docks, which occurred in January, a few days after the brigade had come under the jurisdiction of the Board, their powers were severely tested.

By the 23rd section of the Fire Brigade Act it is provided that, if the chimney of any house or other building within the metropolis is on fire, the occupier of such house or building shall be liable to a penalty not exceeding 20 *s.*; and the next section directs that such penalties may be recovered summarily before two justices. The Act gives no power to the Board to receive payment of the penalty from the occupier of any building, the chimney of which shall be on fire, even if the occupier should desire so to pay it, except upon the authority of justices; and it has thus been necessary, in all cases, to proceed for the recovery of the penalties in the way prescribed by the Act. The number of chimney fires that occurred between the 1st January and the 30th June was 820, of which 578 cases had been disposed of at the last-mentioned date; 115 cases were dismissed, and in the remaining 463 cases penalties were imposed. The total amount of penalties imposed amounted to 198 *l.* 8 *s.* 6 *d.*, and the costs awarded to 65 *l.* 16 *s.* 6 *d.*, making together 264 *l.* 5 *s.*; the penalties varied in amount from 1 *s.* to 1 *l.*, the average of penalties and costs together being about 11 *s.* 6 *d.* In many cases the magistrates have only given the actual cost to the Board,

Board, viz., the 2 s. for the summons. Of the dismissed cases, some were by reason of the death or removal of the parties, some on account of the inability of the witnesses to prove the fire, and the others because the parties summoned were unable to pay anything. The penalties have hitherto, in all cases, been recovered before the police magistrates of the metropolis; but as much inconvenience and annoyance is occasioned to respectable persons, from having to attend and wait in the police courts, the Board have requested the magistrates in petty sessions to hear the summonses.

There is one subject of great importance to the metropolis in connection with the extinguishing of fires which is almost daily forcing itself upon the attention of the Board, viz., the water supply of the metropolis. The ensuring of a prompt and sufficient supply of water at fires must ever be one of the principal elements in the organization of an efficient system for the protection of life and property. The experience of the brigade during the first half-year of the Board's jurisdiction has shown that the present water supply leaves much to be desired. On many occasions during the present year the chief officer has reported that the brigade, on arriving at the scene of a fire, found no water ready, and were consequently delayed in their operations so long as to allow of considerable, and perhaps total destruction of property, which might otherwise have been saved. Under the present system, the brigade are dependent on the punctual arrival of the turncocks of the water companies at the scene of the fire, to open the plugs, the system of water mains being so complicated that the firemen are unable to ascertain the mains charged, or where they should obtain a supply. The Board have given to this subject very serious consideration, and they are of opinion that in lieu of the present intermittent, the establishment of a constant high-pressure service in the metropolis will be found the most effectual means of ensuring a prompt and sufficient supply of water at fires, and cause a large reduction in the annual cost of the brigade. In Glasgow and in several of the principal cities and towns of the United Kingdom there exists a constant high-pressure water supply, which is found to be of the greatest possible advantage; the water is thus forced to a considerable height, and engines are scarcely ever used, the fires being extinguished by the application of a stand-pipe only. The Board entertain the hope that the period is not far distant when the water supply of the metropolis will be of such a character as to be favourably contrasted with the cities and towns above referred to.

### CATTLE PLAGUE.

In addition to the other important matters confided to the Board during the past year, they have been called upon to devote much time and consideration to the means best adapted for the prevention of the further spread of the disease known as the Rinderpest, or Cattle Plague, which last year broke out with extraordinary virulence in various parts of England. The metropolis was early affected by this visitation, and although the cattle plague was not so severe in its ravages there as in some other parts of England, a very large number of the cows kept in London were attacked, and in many instances the entire stock of the cowkeepers destroyed.

The duties devolving on the Board under this Act were deemed of such paramount importance that on the day following its passing, viz., the 21st February 1866, a special meeting was held to consider its provisions, and the course to be taken: in order to secure prompt action, it was thought advisable to divide the members of the Board into committees for the various parts of the metropolis, adopting, as nearly as might be, the limits of the Parliamentary boroughs.

The committees immediately met, and having appointed their officers, laid down the necessary regulations for their guidance, and for effectually carrying out the provisions of the Act, and the orders which might from time to time be issued by the Privy Council under its provisions.

From the first reports received from the inspectors, it appeared that, although the cattle plague was rapidly on the increase, it was not then of any considerable extent.

The returns, however, for the fortnight ending the 15th March, showed so decided an increase in the number of animals affected that inquiries were instituted to ascertain whether there were any special circumstances which would

account for such increase, when it transpired that the majority of the animals affected were Dutch cows, which had been brought to this country from Holland, and landed at Blackwall on the 7th March. These cows were purchased by several cattle salesmen and dairymen by whom they were distributed over the metropolis.

The returns of the following week (22nd March) having fully justified the impression that the plague had been introduced into the metropolitan cowsheds by these cows, a communication was addressed to Her Majesty's Government, calling attention to the landing of the cows in question, and urging that more stringent regulations should be enforced for the examination of cattle brought to London by sea, in order to prevent, as far as possible, the spread of the disease.

The returns of the cattle affected with the plague, for the fortnight ending the 5th April, again exhibited so marked an increase in their number as to necessitate further inquiry, when it was ascertained that a further considerable number of cows had been imported from abroad on the 13th and 15th March, and introduced into the London cowsheds, where the disease speedily showed itself, which rendered it necessary, not only to destroy the cows so affected, but other valuable beasts with whom they had been in contact.

The importance of a more careful examination of the cattle brought from abroad having been thus demonstrated, communications were again addressed to Her Majesty's Government, and to the Commissioners of Police, on the subject. From the replies to these communications, which were submitted to the Board on the 6th April, it appeared that Her Majesty's Government were of opinion that the arrangements as to the examination, marking, and licensing of cattle imported from foreign countries should be left (as it had hitherto been) to the Board of Customs, who were responsible for the examination under Orders made by Her Majesty in Council, in pursuance of the 11th and 12th Vict., c. 105, and to the Chief Commissioner of Police, who, by Order of Council of the 6th February, 1866, was held responsible for the licensing of such cattle, and was instructed to have them properly marked.

It appeared, however, with regard to cattle brought by sea from the United Kingdom, that they were not subject to the regulations of the Board of Customs, and that it was essential some provision should be made for their examination, and officers were accordingly appointed for that duty.

From the continued prevalence of the disease, it appeared desirable again to call the attention of Her Majesty's Government to the importation of foreign cattle, to the landing of cattle brought by sea from the United Kingdom, and also the want of effective measures for marking them, so that their identification might be assured, and, on the 16th April, a communication was addressed to the Right Hon. Sir George Grey, Bart., Home Secretary, setting forth the facts which had come under the notice of the Board, in relation to the mode in which the arrangements for the examination and removal of such cattle had been carried out.

Her Majesty's Government, in consequence of these representations, obtained an Order in Council prohibiting the importation of cattle from Holland. They also gave directions that, in addition to clipping the hair off the end of the tails of all animals brought to London by sea, those not intended for immediate slaughter should have a distinctive mark placed on them. The Board of Customs were also requested to give renewed directions to their inspectors to be most vigilant in the inspection of foreign cattle, and the Commissioners of Police were instructed not to give licenses for the removal of cattle brought by sea from other parts of the United Kingdom until after the certificate of the inspectors appointed by the Board to examine such cattle had been granted. The gradual decline of the disease which followed affords strong grounds for believing that the course pursued was, at least, to some extent, the means of obtaining so satisfactory a result.

Numerous complaints were received from vestries, dust contractors, and private persons, that obstacles to the removal of manure, and street and other refuse, had been interposed by the justices of the peace, acting as the local authorities for the adjoining counties, by prohibiting such manure, &c., from being taken into their respective districts. The serious consequences likely to arise from the accumulation of large quantities of refuse matter in the metropolis rendered it necessary that energetic steps should be at once taken for the removal

removal of such prohibitive Orders. Communications were accordingly addressed to Her Majesty's Government, the clerks of the peace for the counties of Middlesex, Surrey, Kent, Essex, and Herts, and to each of the vestries and district boards of the metropolis; and strict injunctions were issued to the inspectors to personally superintend the disinfecting of all manure, &c., in the cowsheds visited with the plague, with lime and carbolic acid, and to recommend the use of disinfectants to the cowkeepers generally.

In consequence of these various complaints, Her Majesty's Government communicated with the clerks of the peace for the counties of Middlesex, Kent, and Essex, requesting them to point out to the justices that the absolute exclusion of all dung brought from the metropolis into their jurisdiction exceeded the powers given them by the Order of Council, which only referred to dung "likely to propagate infection," a condition which could not apply to dung from the metropolis, except from places where the cattle plague had existed.

It is satisfactory to state that these representations had the effect of obtaining a remission of the orders complained of, and no further hindrance has been made to the removal of the dung, &c., from the metropolis.

Under the authority of the Order in Council of the 24th March, the following premises were declared to be infected places, viz. :

House, land, &c., situate near Rushey-green, Lewisham, occupied by Mrs. Mary Grant.

Houses and premises in Smith-square, Westminster, and, in particular, those occupied by Mr. Coster.

House and premises at High-street, Forest-hill, occupied by Mr. Robert Duffin.

House and premises at South-road, Forest-hill, occupied by Mr. Charles Smith Meller.

These premises were placed under the charge of the police, and no cattle were allowed either to enter or leave. The Board, at the expiration of one month after the disappearance of disease, caused the same to be thoroughly cleansed and disinfected, and passed orders declaring the several places free from disease.

The following table will show the progress of the cattle plague in the metropolis (except the City), as reported by the inspectors from week to week :

| Week ending   | No. of<br>Animals Affected<br>with<br>the Plague. | Week ending  | No. of<br>Animals Affected<br>with<br>the Plague. |
|---------------|---------------------------------------------------|--------------|---------------------------------------------------|
| 1866 :        |                                                   | 1866 :       |                                                   |

|               |                                                   | 28 " - - -   | 4                                                 |

The amount allowed, under the compensating clauses in the Act in respect of animals slaughtered by the direction of the Board up to the present time, is 1,067 *l.* 17*s.* 6*d.*

In carrying out the very difficult and onerous task imposed upon them by the Act and Orders in Council, the Board have felt it to be their duty to take proceedings against two cowkeepers, viz., Mr. Emptage of Woolwich, who was convicted in a penalty of 5 *l.* for not giving notice, as required by the Act, of the existence

of disease among his cows, and for removing one of them without a license; and Mr. Reeder, of Blackfriars, who was convicted in the sum of 12 *l.* and costs for removing, without a license, three cows from a shed on his premises in which the cattle plague had existed.

The Board regret also to have to report a case of fraud on the part of George Scott, one of the persons appointed as inspectors. Scott was originally appointed by the Privy Council, and when the carrying out of the Cattle Diseases Prevention Act devolved upon the Board, he was continued in his appointment for the parish of St. Pancras. From information obtained, an indictment was preferred against Scott and Thomas Sketchley, a cattle salesman, for a conspiracy in obtaining two cows, the property of Mr. T. Plant, of Camden-town, under the false pretence that they were affected with the cattle plague. It was ascertained that Scott, having given the usual certificate as inspector, and obtained orders for the slaughter of the two cows, sent the animals alive to a horse slaughterer's, in Belle Isle, and that, subsequently, he and Sketchley removed them to a slaughter-house for cattle in the Metropolitan Market at Islington, the former giving a certificate that the animals were not diseased. They were then slaughtered and dressed for meat for Newgate Market by Sketchley's directions. These facts being proved on the trial, they were both found guilty, and sentenced to one year's imprisonment with hard labour.

The Board have good reason to hope that the disease is gradually decreasing in virulence, but they still feel the necessity of great watchfulness and prompt action, and they have no doubt that the arrangements made by them are sufficient to meet any emergency which may arise.

#### LOANS EFFECTED BY VESTRIES AND DISTRICT BOARDS.

With the sanction of the Board, the several vestries and district boards of the metropolis are authorised, by the provisions contained in the 183rd section of the Metropolis Management Act, 1855, to raise funds on the security of rates for defraying the cost of sewerage, paving, or other works done under the powers of that Act.

The Metropolis Management Amendment Act, 1862, extended these borrowing powers so as to enable them to raise funds for improvements by the widening or alteration of streets and the reconstruction of canal bridges, which, from increasing traffic, had become unequal to the exigencies of their localities.

The local boards have again, during the past year, largely availed themselves of the powers thus conferred upon them, and have made application to the Board for its sanction to loans amounting in the aggregate to 164,917 *l.*

These applications have received the careful consideration of a committee, who have investigated the estimates for the proposed works, and the financial condition of the several parishes, &c. Upon the Reports of the committee the Board have given their sanction to the following loans, viz.:

| Local Board.                                     | Amount.    | Works.                    | Period.<br>Years. |
|--------------------------------------------------|------------|---------------------------|-------------------|
|                                                  | £.         |                           |                   |

## CONTRIBUTIONS TO THE COST OF IMPROVEMENTS BY LOCAL BOARDS.

Applications have been made during the past year from several of the local boards for contributions towards the cost of improvements to be carried out by them.

The improvements in question consist chiefly in the widening of streets and roadways, and in the reconstruction of a canal bridge on a much extended plan, which the increased traffic over it had rendered necessary.

In most cases the Board have contributed in the proportion of one-third of the estimated cost of the improvement, but in others they considered that the nature of the improvements justified a contribution of a larger amount. The several sums contributed by the Board, during the past year, amount in the aggregate to 21,552 *l.* 1 *s.* 1 *d.*, and are in respect of the undermentioned improvements :—

| Locality.                                                    | Cost.  |    |    | Contribution. |    |    |

## FINANCIAL TRANSACTIONS OF THE BOARD.

A glance at the financial proceedings of the Board will convey an idea of the magnitude of the interests entrusted to them, and their financial powers must always be a subject of considerable interest to those who contribute the amounts raised. These sums, and the purposes to which they have been applied, will be found in the following summary.

The loans may be classed under three heads : Firstly, such as are chargeable for repayment and interest against the general account ; Secondly, loans on account of the Thames Embankment and the new street to the Mansion House ; Thirdly, main drainage loans.

The first of these consists of three loans from the Clergy Mutual Assurance Society, viz. :

| £.                                                                           | £.        | s. | d. |
|------------------------------------------------------------------------------|-----------|----|----|
| 140,000, of which there is outstanding - - - - -                             | 70,000    | -  | -  |
| 42,000                   "                   "                   " - - - - - | 30,600    | -  | -  |
| 50,000                   "                   "                   " - - - - - | 46,666    | 13 | 4  |
|                                                                              | £.147,266 | 13 | 4  |

And of two loans from the Bank of England, viz. :

| £.                                                  | £.         | s. | d. |
|-----------------------------------------------------|------------|----|----|
| 135,000, of which there is outstanding - - - - -    | 121,500    | -  | -  |
| 616,000, of which there has been received - - - - - | 106,000    | -  | -  |
|                                                     | £. 227,500 | -  | -  |

With respect to these loans, one instalment in repayment of each has been paid during the past year, amounting in the aggregate to 25,566 *l.* 13 *s.* 4 *d.*, which, together with the interest, was included in the amounts raised by the general precepts of the Board. The loan of 616,000 *l.*, already referred to, was contracted for on the 1st of December last, for the following works and improvements :

|                                 | £.         | s. | d. |
|---------------------------------|------------|----|----|
| Covering over Main Sewers - - - | 300,000    | -  | -  |
| Southwark Park - - -            | 80,000     | -  | -  |
| Whitechapel Improvement - - -   | 175,000    | -  | -  |
| Removal of Middle-row - - -     | 61,000     | -  | -  |
|                                 | <hr/>      |    |    |
|                                 | £. 616,000 | -  | -  |

The principal is to be repaid by equal annual instalments during 30 years, the interest, at the rate of 4½ per cent., being paid half-yearly. Of this amount the Board have received 106,000 *l.*, one-thirtieth of which, together with the interest, has been included in the amounts assessed by their precepts for the current year. The balance of the loan is to be advanced by instalments between the present date and 1st August 1867.

There is a further sum of 300,000 *l.*, the renewal of the balance of a loan of 400,000 *l.*, obtained from the Bank of England, for the purposes of the Covent Garden Approach and Southwark and Westminster Communication Act, the interest on which is also paid by the general account. The repayment will be due in December 1869, by which time it is hoped the sums received from rents, and the sale of plots in the line of those improvements, will go far to liquidate the outstanding amount.

Under the second head are loans on account of the northern and southern embankments and the new street to the Mansion House, which are chargeable against the coal and wine duties.

By the Acts 25th & 26th Vict. c. 93, and 27th Vict. c. 15 and c. 75, the Board have power to borrow 2,480,000 *l.*

At the date of the last Report, it had not become necessary to exercise this power, in consequence of the receipts from the coal and wine duties having been sufficient to meet the expenditure. During the past year, however, the acquisition of the property required for the new street to the Mansion House was proceeded with so rapidly that a loan became necessary, and the Board arranged with the Commissioners for the Reduction of the National Debt for a loan of 800,000 *l.*, at 3½ per cent., Her Majesty's Government giving their guarantee, as provided in the Acts referred to, for repayment of the same. £. 80,000 of the amount so borrowed has already been repaid, and a further loan of 1,000,000 *l.* is now under negotiation with the Bank of England on the same terms.

Under the third head are the main drainage loans of 4,200,000 *l.* The agreement for 3,000,000 *l.*, the first of these loans, was entered into in 1859, and, in consequence of the Government guaranteeing its repayment, it was obtained from the Bank of England at 3¼ per cent., and a further sum of 1,200,000 *l.* was subsequently obtained on the same terms. Instalments of 50,000 *l.* each were taken, as required, to meet the payments for property purchased and for the works executed. Up to the present time, 3,600,000 *l.* has been received, and 360 bonds of 10,000 *l.* each, given as security; of this sum, 350,000 *l.* was advanced during the past year, the sum repaid during that period being 80,000 *l.* The total amount repaid is 800,000 *l.*, leaving 280 bonds outstanding, representing the sum of 2,800,000 *l.* There remains 600,000 *l.* yet to be received to complete the loan. The interest on the bonds, together with the principal required for their redemption, is chargeable on the main drainage rate of 3 *d.* in the pound, the amounts received on account of which are paid into a public account at the Bank of England, in the joint names of the Chairman of the Board, and the Assistant Secretary of Her Majesty's Treasury, as provided by the Act. It is confidently expected that from the rapid spread of building operations, and the increase in the value of property in the metropolitan area, this loan will be repaid in a much shorter time than was originally anticipated.

The

The following is a summary of the receipts and expenditure on the various accounts of the Board, together with the cash balances, on the 25th March 1866 :

With respect to the sinking fund created for the repayment of mortgage debts incurred by the Board under the provisions of the Metropolis Local Management Act, the New 3 per Cents., amounting to 51,371 *l.* 10 *s.* 10 *d.*, standing in the name of the Board on the 25th March 1865, have been sold, and the proceeds, together with the sum of 8,000 *l.*, set aside for that purpose, have been applied to the repayment of mortgages.

On the 25th March last, the sums owing to the Board, in respect of their assessments on the several vestries and district Boards, and for improvement rates, &c., levied by the Metropolitan Commissioners of Sewers, amounted to 177,311 *l.* 2 *s.* 2 *d.*

The sum of 25,037 *l.* 13 *s.* 5 *d.*, included in the statement of receipts and expenditure, represents the sum of 25,000 *l.* deposited with the Board by the Metropolis Sewage and Essex Reclamation Company, as security for the due performance of their contract entered into with the Board, the difference (37 *l.* 13 *s.* 5 *d.*) being interest thereon, which is the property of the Company.

#### PETROLEUM ACT.

This Act renders it illegal to keep more than 40 gallons of petroleum within 50 yards of a dwelling-house, or of a building in which goods are stored, unless by a license granted by the Board, where the place of deposit is within the metropolitan area, or by the Corporation of the City of London, where such place is within their jurisdiction; and a penalty is imposed by the Act in case of any contravention of its provisions.

The Board, in their last Report, alluded to the fact that during the preceding 12 months they had received but one application for a license under the Act, notwithstanding that it appeared from the statistics of trade, that large quantities of petroleum and its products were continually in transit or storage, the owners disregarding those conditions and precautions which the Board had endeavoured, under the Act, to enforce. Only one application for the renewal of a license has been made to the Board during the past year, and their attention has recently been directed to the circumstances connected with a fire which took place at Bow Common, on premises where petroleum had been stored without a license. The Chairman, at the request of the Board, brought the facts under the notice of the Secretary of State for the Home Department, and represented to him the defective character of the law on the subject. Sir George Grey, after instituting an inquiry into these representations, communicated to the Board his opinion that, in the case in question, a prosecution

should be instituted under the Act, and that in such cases it was the duty of the Board to prosecute, and stated that the police would be directed to give every assistance in their power. The Board have referred this communication to one of their committee, with directions to act as they may be advised. The Board have already pointed out that the Act for the safe keeping of petroleum, which has been deemed by the Legislature necessary for the protection of the public, is non-effective, mainly from the difficulty that exists in determining precisely the material which properly comes within the definition of petroleum as given in the Act, and the Board cannot refrain from expressing their conviction that, unless the existing Act is amended in this and other particulars, its provisions must become, as is really now the case to a great extent, a dead letter.

#### DANGEROUS BUSINESSES.

The Board, in their last annual Report, referred to a question which had arisen under certain unrepealed sections of the Building Act of 1844, relating to the carrying on of dangerous and noxious businesses, as to whether the local authorities, or the Commissioners of Police, were the proper parties to take proceedings for enforcing the law; and they stated that, as the matter was involved in some doubt, they had referred it to one of their committees, for consideration, with authority to communicate with Her Majesty's Government thereon. By the sections in question, the rights of persons who had established trades of a dangerous or noxious character within 50 feet from other buildings, and 40 feet from public roads or grounds belonging to other owners, were saved for 20 years with regard to dangerous businesses and for 30 years in reference to those of a noxious character; the period granted in respect to dangerous businesses having expired on the 9th August 1864, it then became unlawful for any person to carry them on within the prescribed distances. A statement of the facts was laid before the Secretary of State for the Home Department, and that gentleman, after an attentive consideration of the law on the subject, intimated his opinion that, although the police might doubtless act as prosecutors, no special duty for that purpose was cast upon them by the Act, and that he therefore considered the inspectors of nuisances should, in cases where the law was contravened, institute legal proceedings under the direction of the local authorities, *i. e.*, the vestries and district boards. On the receipt of this communication, the Board addressed a letter to each of the vestries and district boards in the Metropolis, pointing out the state of the law, and explaining the views of the Home Secretary.

The businesses referred to in the Building Act of 1844 as "Dangerous," are the manufacture of gunpowder, detonating powder, matches, ignitable by friction or otherwise, or any other substance liable to sudden explosion, inflammation, or ignition, or of vitrol, turpentine, naptha, varnish, fire-works, painted table covers, and any other manufacture dangerous on account of the liability of the materials or substances employed therein to cause sudden fire or explosion; and the Act prohibited persons from establishing or newly carrying on, after that date, any such trades within the prescribed distances from buildings.

No informations appear to have been laid against persons for carrying on businesses contrary to the Act in question since August 1864. The attention of the Board has, during the past year, been called to several instances in which the Act was contravened, and in one case recently some premises at the East end of London, used as a lucifer-match manufactory, were destroyed by fire, but no active steps appear to have been taken by the local authority for preventing the re-erection of premises for a similar purpose on the same site.

#### METROPOLIS GAS ACTS.

On reference to the last year's Report, it will be found that the Board then stated they had reason to believe that the provisions of these important Acts were evaded by meter makers, gas companies, and others, who were in the habit of sending meters manufactured within the metropolitan area to be tested at testing houses beyond the jurisdiction of the Board. The effect of these evasions of the law has been to cause the expenses incurred by the Board, under these Acts, greatly to exceed the income derived from the fees paid for testing meters.

In November last, it was brought to the knowledge of the Board that Mr. Taunton, the inspector appointed by the corporation of Kingston, had established

an office at Camberwell, and was testing meters there, using the seal of the Corporation of Kingston, a course which appeared to the Board so entirely in contravention of the Gas Acts, that they instructed their solicitor to take such steps as might become necessary to protect their interests.

The solicitor, in pursuance of these instructions, summoned Mr. Taunton to appear before the police magistrate at Lambeth, and he was, after a patient hearing, convicted, and fined in the penalty of 5 *l*.

The Board, on receiving the report of the facts from their solicitor, directed copies to be sent to each of the gas companies and meter makers in the metropolis, with a view to prevent any further infringement of the law.

The Board also considered it right to summon Mr. Glover, the person for whom the meters had been tested by Mr. Taunton, for fixing the meters so stamped. After hearing evidence, the magistrate, however, was of opinion that the defendant was not, in the terms of the statute, the person fixing the meters, but that the companies who fixed them through their servants were the parties liable. He therefore dismissed the summons, but stated his willingness to grant a case, which course he recommended, on the ground that the subject was of too great importance to rest upon a magisterial decision.

A special case for the consideration of the Court of Queen's Bench was consequently drawn, and is now waiting the decision of that court.

The number of meters which have been tested at the testing houses of the Board during the past year, is 32,356, and the amount received for fees thereon is 1,281 *l*. 9 *s*.

In reference to the difficulty arising under the Metropolitan Gas Act, it may be stated that a Bill has been introduced into Parliament, by the Corporation of the City of London, for the purpose of obtaining the necessary powers to enable them to provide suitable works for the manufacture and supply of gas for the City of London and the liberties thereof, so as to meet the increased demand which has arisen, to secure its being supplied at a reasonable price, and to ensure proper quality and illuminating power.

This Bill was referred to a Select Committee of the House of Commons, with an instruction to "inquire into the operation and results of 'The Gas Metropolis Act, 1860.'"

The Select Committee gave considerable attention to the question, and they stated that they found the gas supplied to many large cities and provincial towns was not only purer, but also cheaper than that supplied to the metropolis; that the purification of gas in the metropolis was imperfect; that an excess of sulphur remained which was highly injurious; that since the passing of the Act 23 & 24 Vict. c. 125, the price of gas to the consumers had, until recently, been increased, whilst its illuminating power had diminished.

To remedy these evils, the Committee recommended that a Chemical Board, consisting of three members, should be appointed for the metropolis, by the Secretary of State, at the expense of the gas companies, to analyse and test the purity and power of gas supplied within the metropolis.

That each gas company should provide and maintain an office, and proper apparatus for testing the power and purity of gas by a public officer, which should be under the control and management of the local authority.

That the expenses incident to the appointment of such public officers should be paid by the local authorities.

That the Metropolitan Board of Works should be the local authority outside the City, and the Commissioners of Sewers within the City.

The Bill was subsequently lost.

The attention of the Board having been called to these recommendations, they at once referred the subject to a special committee for consideration and report, with authority to confer with vestries and district boards thereon. The committee are now obtaining information, previously to the question being discussed and dealt with at an early period by the Board.

It may be well here to mention that a Bill was introduced into the House of Commons during the present Session to amend "The Metropolis Gas Act,

1860," and the several Acts of companies for supplying the metropolitan districts and the City of London with gas, and to enable the Metropolitan Board of Works, and the vestries, in combination, or the City of London, to purchase the gas works, mains, pipes, machinery, and powers of all or any one or more of such companies. The promoters of this Bill did not consult the Board, neither was the scheme in any way submitted to them, and the Board, in considering the subject, felt that the purchase of the works and the proposed method of dealing with the question was not one to which they could, on behalf of the ratepayers, assent to; they therefore petitioned against the Bill, and it was subsequently withdrawn.

#### GARDENS IN TOWNS PROTECTION ACT.

The Board are authorised by this Act, under certain circumstances, to take charge of enclosed public gardens or ornamental grounds within the metropolis (exclusive of the City of London), and to remove encroachments thereon.

In their last Report, the Board stated that they had ascertained there were upwards of 180 public gardens or squares within the metropolitan area, comparatively few of which were in a neglected state, and that they were mostly regulated under the 239th section of "The Metropolis Management Act, 1855," or by private Acts.

There were, however, some cases in which it appeared desirable that the provisions of the Act should be put in force, and, Leicester-square being in a highly discreditable state, the Board adopted the prescribed steps for remedying its condition. They were however immediately met by opposition from parties who claimed to be owners of some property there, and legal difficulties arose which, for the time, effectually stopped the progress of the Board, and which resulted in an action against the Board for trespass. The question has been again raised, but nothing definitely settled, it having been arranged that a special case should be stated for the opinion of a superior court, when the construction of the Act, and the whole question of the powers of the Board will be fully argued. Pending the decision of the court, the Board have not thought it advisable to take steps for carrying the Act into effect with regard to any other gardens within their jurisdiction under the Act.

#### "METROPOLITAN HOUSELESS POOR ACTS, 1864 and 1865."

The first-mentioned of these Acts was a temporary one, and was passed for one half-year only. Its object was to make better provision for the relief of destitute wayfarers, between the hours of 6 p.m. and 8 a.m. during the winter half-year, and from 8 p.m. to 8 a.m. during the summer half-year, and authority was given to the Board to raise money by precepts on the several parishes within their jurisdiction, for the repayment of the moneys disbursed by the several boards of guardians, &c.; and having ascertained the probable amount to be expended, the Board included in their estimates for the last year the sum of 7,000 £.

The Act of 1864 having been found to work well, it was deemed expedient by the Legislature that the provisions of that Act should be made perpetual, and the Act of 1865 was passed for that purpose.

By the Act of 1864, guardians are authorised to render accounts for the fitting up and maintaining of wards for the reception of the houseless poor, and, upon the receipt of the certificate of the Poor Law Board, that suitable wards have been provided, and that the moneys claimed are, in respect of such wards, the amounts so certified are to be paid by the Board.

Under the provisions of these Acts, wards have been provided in most of the parishes and unions of the metropolis, and the accounts for the expenses incurred, both in providing and maintaining such wards, and in the relief of the destitute poor, have been received by the Board. The Board, in making their estimates for the present year, included the sum of 10,000 £. for the expenses under these Acts.

The

The following sums have, during the past year, been paid by the Board :

Amounts paid to Parishes and Unions for Expenses under the Houseless Poor Act, to 1st July 1866.

| Parishes, Districts, and Parts.                      | Relief.    | Fitting up Wards. | TOTAL.     |

#### ALTERATIONS IN THE NUMBER OF MEMBERS OF VESTRIES AND DISTRICT BOARDS.

Under the provisions contained in the 5th and 33rd sections of "The Metropolis Local Management Act, 1855," the Board are empowered, upon the application of the vestry or ratepayers of a parish, to alter the number of vestrymen assigned to the wards of that parish, and to alter the number of the members of the Board of Works for a district. Under these sections the following applications have been submitted to the Board, and are now receiving the consideration of a committee, with a view, should it be thought expedient, to pass the necessary orders for carrying out the wishes of the applicants, viz. :

The vestry of Hackney, for a re-adjustment of the number of vestrymen appropriated to the several wards.

The vestry of St. John the Evangelist, Westminster, for an increase in the number of vestrymen.

The vestry of St. Paul, Deptford, for an increase in the number of representatives of the vestry at the Greenwich District Board of Works.

The vestry of the parish of Greenwich, for an increase in the number of representatives of the vestry, at the Greenwich District Board of Works.

The vestry of Kidbrook, for an increase in the number of representatives of the vestry at the Plumstead District Board of Works.

The vestry of Plumstead, for a re-arrangement of the number of representatives at the Plumstead District Board of Works.

The Plumstead District Board of Works, for a separate representative for Plumstead, at this Board.

The ratepayers, &c., of the districts of Sydenham and Forest-hill, for an equitable division of the wards of the parish of Lewisham, and a re-apportionment of the number of vestrymen to the Sydenham Ward.

The ratepayers of Forest-hill, for attaching the Forest-hill district to the Sydenham Ward, instead of the Lewisham Ward.

The vestry of Penge, for an increase in the number of representatives of the vestry at the Lewisham District Board of Works.

The vestry of Kensington, for an increase in the number of representatives for each of the wards of the parish.

#### LINES OF BUILDING FRONTAGES.

The 75th section of "The Metropolis Management Amendment Act, 1862," and section 26 of "The Metropolitan Building Act," requires persons, before erecting buildings beyond the general line, in any street within 50 feet of the highway, or constructing porticos and verandahs or balconies to houses, to apply for and obtain the sanction of the Board to their plans.

Under the 75th section of the first-mentioned Act, 398 applications have, during the past year, been submitted to the Board, of which they have sanctioned 263, and refused the remainder.

One hundred and twelve applications, for the construction of porticos and other projections, under the last-mentioned Act, have, during the same period, been made to the Board; 94 of such applications have been granted and 14 refused.

#### FORMATION OF STREETS.

The Board are required by certain sections of "The Metropolis Management Amendment Act, 1862," to regulate the width of roads, &c., so as to secure a width of 40 feet for streets laid out for carriage traffic, and 20 feet for footways. Since their last Annual Report 206 applications have been submitted to the Board, 162 of which have been granted and 44 refused.

The question of the formation and making up of new streets has also, during the past year, occupied the attention of the Board, and they have been in communication with the several vestries and district boards, with a view to an arrangement by which owners of property in the metropolis may be required to form and make up the roads bounding their property. The Board consider that a new street should be rendered available for its purpose whenever the houses therein are finished and ready for occupation; and they are of opinion that if the ample powers given by law to the local authorities were strictly enforced, many of the complaints which are now made on this subject would not be made.

#### NAMES OF STREETS AND NUMBERS OF HOUSES.

The Board have, under the 87th section of "The Amendment Act, 1862," taken steps for regulating the numbering of houses in various parts of the metropolis, and for naming and re-naming streets. During the past year the Board have again had numerous applications for the re-naming of streets and the numbering of houses, and have passed orders in relation to 119 streets. These orders involved the abolition of 434 subsidiary names, and the regulation numbers of 10,249 houses; 197 new streets have also, during the same period, had names assigned to them. Since the formation of the Board, the names of 516 streets have been altered or otherwise dealt with; 46,879 houses have been re-numbered, 2,110 subsidiary names abolished, and 824 new streets named.

#### BUILDING ACTS OF 1855, 1860, AND 1861.

These Acts confer upon the Board numerous powers in reference to building operations within the metropolis.

#### SPECIAL BUILDINGS.

The 56th section of the Act of 1855 empowers the Board, where they see fit, to sanction works to which the rules of the Act do not apply. Applications

cations of this nature have, during the past year, been made to the Board, as follows—

For iron buildings, for temporary and other purposes, 105 were granted, and 10 refused.

For chimney-shafts for breweries, distilleries, and other buildings for manufacturing purposes, 125 have been granted, and one refused.

For open sheds and drying sheds requiring large openings, 25 were granted, and 19 refused.

Other matters of minor importance arise under the Building Acts, which require the attention of the Board. Thirty-nine cases of overhanging eaves to dwelling-houses, and other matters of roof construction, have received the sanction of the Board during the past year.

#### DISTRICT SURVEYORS.

The appointment and control of the 55 district surveyors who superintend the construction of buildings in the Metropolis is vested in the Board. During the past year only one vacancy has occurred in the staff.

The result of the operations of the several district surveyors during the past 12 months is shown in abstract in the following Table :—

| WORKS.                                                                                         | BUILDING<br>OPERATIONS. | FEES.                   |
|------------------------------------------------------------------------------------------------|-------------------------|-------------------------|
| New buildings in 1865, in respect of which fees have been received - - - - -                   | 7,059                   | £. s. d.<br>14,433 18 5 |
| Additions, alterations, and other works, in respect of which fees have been received - - - - - | 4,759                   | 5,599 10 3              |
| Arrears of former years received :—                                                            |                         |                         |
| New buildings - - - - -                                                                        | 4,800                   | 9,860 10 1              |
| Additions, alterations, &c. - - - - -                                                          | 2,633                   | 3,078 9 -               |
| Total Works and Fees thereon, during the year }<br>ending 31st December 1865 - - - - }         | 19,251                  | 32,972 7 9              |

During the year, fees to the amount of 1,842 *l.* 13 *s.* 3 *d.* were abated or lost through bankruptcy, and the office expenses paid by district surveyors amounted to 6,353 *l.* 7 *s.* 5 *d.*

In 25 districts the gross fees varied from 53 *l.* to 394 *l.*; seven being under 200 *l.* each, six under 300 *l.* each, and 12 under 400 *l.* each. In 30 districts the incomes varied from 422 *l.* to 2,104 *l.*

Under the 37th section of the Building Act, where a district surveyor is professionally employed in his private capacity to superintend building operations in his district, the Board are required to appoint a special surveyor to act as district surveyor, and they have, during the past year, exercised this authority in 29 instances.

#### DANGEROUS STRUCTURES.

The second part of "The Metropolitan Building Act, 1855," empowers the Board to appoint the fees to be received by the surveyor to the Commissioners of Metropolitan Police, and the district surveyors in the City of London, for services rendered in surveying structures in the Metropolis reported to be in a dangerous condition. The Board have already determined the scale upon which these fees are to be charged, and, since their last annual Report, fees, in accordance with such scale, have been allowed by them on 539 accounts submitted by the Commissioners of Police, and on 39 accounts submitted by the Commissioners of Sewers for the City of London.

Details of the business transacted in the department of the superintending architect are given in Appendix to this Report.

## AMENDMENT OF THE BUILDING ACT.

With reference to this subject the Board, in their last annual Report, stated that, by their direction, a Bill had been prepared with a view to remove the difficulties and supply several wants which had up to that time been experienced in the practical working of the Act, but that the measure could not then be completed in time for its introduction into Parliament in the Session of 1865. During the past year the Board have again given their attention to the subject, and it appearing to them that a revision of the Building Act, more complete than that contemplated by the Bill above referred to, was desirable, they have caused a measure to be prepared, which they have reason to think will successfully attain the object in view, namely, the more efficient administration of the law with regard to building matters in the Metropolis. The Bill is now nearly complete, and will be laid before Parliament at an early period of the next Session.

## APPEALS AGAINST ORDERS OF VESTRIES AND DISTRICT BOARDS.

The Committee appointed by the Board, under the 211th section of "The Metropolis Local Management Act, 1855," for the purpose of considering appeals against orders of the vestries and district boards, have disposed of eight cases during the past year. In three it was found that the Board had no jurisdiction: two were allowed, one was withdrawn, one dismissed, and one was adjourned at the request of the appellants.

## CLOSING STREETS.

By the 84th section of "The Metropolis Management Amendment Act, 1862," the vestries and district boards are required to apply for and obtain the sanction of the Board before closing any thoroughfare for the purpose of paving, sewerage, or other works: 58 of such applications have been made during the past year, which involved the closing of the whole or parts of about 130 streets and places, and, before giving their consent, the Board have been careful to satisfy themselves that arrangements have been previously made for avoiding any unnecessary interference with the traffic, and that the public interests have been properly provided for.

## ROADWAYS, &amp;c., IN MORE THAN ONE PARISH.

By the 140th section of "The Metropolis Local Management Act, 1855," and the 86th section of "The Amendment Act, 1862," the Board have power, where any street or line of street is situate in more than one parish or district, or where the street is in one parish or district, and the buildings abutting thereon are in another, to order that the roadway and footpaths be placed under the exclusive management of one vestry or district board, for the purposes of sewerage, drainage, paving, lighting, watering and cleansing, or any of them, and to determine the proportions in which the expense of construction and maintenance, in connection with the street, shall be borne by the local bodies concerned. Previously to the passing of the Metropolis Management Act, in the year 1855, public attention had been directed to the great inconvenience arising from one line of thoroughfare being under the control of two authorities, the result of the divided jurisdiction being that, in many localities in the Metropolis, one half of a street was properly paved, whilst the other was neglected. A similar state of things existed in regard to the cleansing and lighting. To provide a remedy, a clause was inserted in the Act of 1855, giving power to the Board to interfere in cases where it appeared to them desirable, and those powers were enlarged by the Act of 1862. Since the year 1855, the Board have, under the sections above referred to, dealt with several thoroughfares in the Metropolis. Amongst the more important may be mentioned the case of Oxford-street, the jurisdiction over which was exercised by four parishes; and the Board in this case caused the street to be placed under one. During the

past year the Board have considered two applications, one with respect to such parts of Piccadilly and St. James's-street as were in two parishes, and the other relative to a portion of the Fulham-road; the first of these applications was subsequently enlarged, so as to apply to portions of Regent-street, Burlington-gardens, Piccadilly, and Park-place, and the Board are now obtaining the necessary information to enable them to deal with these cases as provided by the Statutes.

#### BOARD AND COMMITTEE MEETINGS.

During the past year the Board have held 47 meetings, at which an average number of 33 members has attended. The Board, as constituted, consists of 46 members, inclusive of the chairman, and they have, in addition to the Board meetings, attended 189 meetings of the following committees—

|                                   |   |   |   |   |   |   |    |
|-----------------------------------|---|---|---|---|---|---|----|
| Main Drainage -                   | - | - | - | - | - | - | 34 |
| Streets -                         | - | - | - | - | - | - | 43 |
| Thames Embankment                 | - | - | - | - | - | - | 41 |
| Appeal -                          | - | - | - | - | - | - | 5  |
| Finance -                         | - | - | - | - | - | - | 32 |
| Works and Improvements -          | - | - | - | - | - | - | 6  |
| Building Act and General Purposes | - | - | - | - | - | - | 9  |
| Special Committees -              | - | - | - | - | - | - | 19 |

To the Main Drainage, Streets, Thames Embankment, and Appeal Committees, all the members of the Board are summoned; the remaining committees, with the exception of those specially appointed for particular objects, are composed of 15 members each.

#### CONCLUSION.

In concluding this their Tenth Report, the Board would refer to the very numerous topics and Statutes to which it has been necessary to advert in rendering an account of their year's administration, and as practically serving to indicate the important functions they have to perform in the public interests. It will be seen that the duties of the Board are not now, as formerly, confined to the operations referred to in the Local Management and Building Acts, but that they have been extended by the Legislature, from year to year, to other important municipal matters. Extensive metropolitan improvements, by the formation of large public thoroughfares; embankments of river frontages; new parks and the preservation of commons for the people's recreation and the promotion of their health; the prevention of the spread of fire; the licensing of the storage of dangerous goods; the raising of funds for the providing of shelter for the houseless poor; these and other matters which form the materials for this Report, and recur in the weekly, and almost daily, proceedings of the Board or its several committees, are evidences of the duties and responsibilities now devolving upon the Board.

By Order,

*John Pollard,*  
Clerk of the Board.

## APPENDIX (A).

(P. 11.)

## REPORT of an Inspection of the MANURE and CHEMICAL WORKS in the neighbourhood of the NORTHERN and SOUTHERN OUTFALLS.

To the Metropolitan Board of Works.

Gentlemen,

IN compliance with your Minute of the 28th April last (No. 3), "That it be referred to the engineer to report on the nuisances arising from certain works and manufactures carried on near the outlets at Barking Creek and Crossness Point, and that Dr. Letheby be requested to assist the engineer in the investigation; and that the engineer and Dr. Letheby do report any suggestions for the purpose of abating the nuisance," we have visited and inspected the manufactories in the neighbourhood of the sewer outfalls, and have to report, as follows:—

Firstly. In close proximity to the Northern Outfall, and on the eastern side of Barking Creek are the manure and vitriol works of Mr. Lawes. The most important operations at these works are the manufacture of a manure called superphosphate of lime. It is effected by the continuous mixture of oil of vitriol with ground coprolites and crushed bones; there being evolved large volumes of acrid vapour and gas, which escape freely into the atmosphere, through the short wooden shafts which pass from the receiving chambers through the roof of the factory. At the time of our visit, we were informed that about 80 tons of manure were manufactured daily; and, as far as we could perceive, there were no contrivances whatever in use for the absorption or neutralization of the evolved vapours and gases, in consequence of which the atmosphere is polluted to a great distance from the works.

The manufacture of oil of vitriol is carried on to the extent of about 200 tons per week. It is effected by the combustion of the sulphur in Spanish pyrites and in the spent oxide of iron from gas works; but although, at times, there may be an escape of acid vapours from the building, yet it is not generally so offensive as the manufacture of superphosphate of lime.

On the same side of the river, and at a short distance below the works of Mr. Lawes, are those of Mr. Crew, where, we were informed, gas liquor and gas tar are subjected to distillation; the former being converted into sulphate of ammonia, and the latter into naphtha, creosote, and pitch.

During the saturation of the ammoniacal liquor with sulphuric acid in forming sulphate of ammonia, a large quantity of sulphuretted hydrogen is set free, and when this escapes into the air it is a cause of great offence, and may be recognised at a considerable distance from the works.

The process of distilling the coal-tar is also to some extent offensive, but it is not nearly so serious, in this respect, as the preceding.

Secondly. On the southern bank of the Thames, about half a mile below the Southern Outfall, at a place called Belvedere-wharf, there are two manufactories for the utilization of refuse from the London tanneries. One of them belongs to Messrs. Proctor & Bevington, and the other to Mr. Brown.

At the first-named factory, the material called "scutch," which is the scraping of hides and skins, is converted into manure by boiling it for several hours, with a weak solution of oil of vitriol; and it is then run off into open pits, where it consolidates, by evaporation, and by the soakage of the liquid portion into the ground. This soakage finds its way into an open ditch, from which it is discharged into the river, by means of a sluice, at the time of low tide.

We remarked that there was a large accumulation of "scutch" and manure upon the works, both of which were evolving most offensive effluvia. There were four coppers being used in the manufacture of this manure, and three of them were at work; each copper being capable of holding a charge of nearly two tons. The vapours emitted from the boiling mixture are so offensive, that it is found necessary to guard the workmen against their action, by having wooden heads to the boilers, communicating with a short shaft or flue, which carries the vapours out of the building into the open air, and, as a further precaution, the roof of the building is loosely covered with tiles. The effluvia from these works was, at the time of our visit, remarkably offensive, and we have no doubt that in warmer weather, when the "scutch" is in a putrifying state, the odour must be still more disgusting, and must be perceived at a considerable distance from the works.

Adjoining the preceding works are those of Mr. Brown, which are devoted to the manufacture of glue, from the trimmings of hides and skins, and to the manufacture of manure, from the general refuse of tanneries; besides which, there is a considerable manufacture of oil of vitriol. The principal material received at the works is the clippings of skins. These are soaked for about 24 hours in water contained in large open butts. The clippings are then boiled for many hours in water, with a little sulphuric acid. By this means

means they are, in a great part, dissolved and converted into glue or size, which is further concentrated in other boilers. At the time of our visit we found four large vats, each of about two tons capacity, in full work, and the vapours evolved from them were, as in the last case, peculiarly offensive. There was no contrivance whatever for the condensation of these vapours, but they were permitted to escape, very freely, through the open roof of loose tiles.

All the insoluble matters of the preceding operations, as well as the horns and other refuse of the tanneries, were, as at Messrs. Proctor & Bevington's works, converted into manure by boiling with weak sulphuric acid; and the manure was received into open pits, where it consolidated in the way already mentioned.

Lastly, the manufacture of sulphuric acid was effected by the combustion of crude sulphur; but, except at certain times, this operation did not appear to be seriously offensive.

On the other side of the Thames, and almost immediately opposite the Southern Outfall, we found the newly erected works of Mr. Robert Hewitt. They are being constructed for the distillation of bone oil, which is a very offensive product of the burning, or rather, the carbonization of bones, in making animal charcoal. It is difficult to say, in the present state of the works, what may be their future condition, but if the utmost precaution is not taken in the distillation of the oil, they will be a very serious nuisance.

The results of these inspections are, that large and very offensive operations are carried on in the neighbourhood of both the Northern and Southern Outfalls; and that the putrid and other vapours, emitted from the works, are diffused into the atmosphere, and wafted to a considerable distance.

The two points which presented themselves to our consideration were: 1st. That these vapours, coming from the neighbourhood of the Outfalls, might very naturally be erroneously attributed to the sewage; and, 2nd. That the effluvia from the neighbouring factories may be a serious nuisance to the workpeople who will have to reside at the Drainage Outfalls. It is therefore of great importance that the character of these vapours should be identified, and that no false opinion should be entertained of them, as regards their connexion with the sewage, from the Outfalls.

The locality of these manufactories appears to be as well suited for such operations as any within easy reach from London; but it is a serious question whether, in any locality, the manufacturers are not bound to use every precaution in the conduct of their works, so as to prevent, as far as possible, the escape of noxious effluvia into the atmosphere. In the present instances, there is no doubt that no precautions whatever are in use, but, on the contrary, the vapours evolved from the materials, in all stages of the manufacture, are permitted to escape freely into the atmosphere.

We have, &c.  
(signed) *Hy. Letheby.*  
*J. W. Bazalgette.*

13 May 1865.

## APPENDIX (B.)

(p. 18, 19.)

Engineer's Department, Spring Gardens, S. W.,  
4 July 1866.

Gentlemen,

IN compliance with the requirements of the 200th section of the Metropolis Local Management Act, I beg to submit this, my Tenth Annual Report, on the several works executed, and the general business transacted in the department under the direction of your engineer, during the year ending the 25th March last.

In my last annual report I described fully the whole of the Main Drainage Works, which had then, with the exception of the Northern Low Level Sewer, and some minor works at Greenwich, been recently completed and brought into active operation. The construction of the western portion of the Low Level Sewer, between the Thames Embankment Works at Westminster Bridge, and Cremorne New-road, Chelsea, remains of necessity in abeyance; it being the intention of the Board to construct that portion of the sewer between Battersea Bridge and Chelsea Hospital in connexion with the proposed Chelsea Embankment, the Bill for which is now before Parliament. The continuous discharge of the sewage of the western districts is at present provided for by a temporary pumping station near Cremorne Gardens, but the sewage will eventually be lifted at a pumping station to be erected near the outlet of the Grosvenor Canal. Between Westminster Bridge and the Temple, the Low Level Sewer is being constructed as a part of the Embankment. The remaining portion of the sewer not yet in hand extends from the eastern extremity of the Temple to Tower-hill, and will be constructed in connexion with the works of the Metropolitan District Railway, and, consequently, awaits their commencement. From Tower-hill the main line of sewer is completed to the Abbey Mills Pumping Station, West Ham, with the exception of a length of about 300 feet crossing the East London Railway, and 70 feet passing under the River Lee. The total length of the main line, with its Homerton and Isle of Dogs branches, will be about 12½ miles, and the sizes of the sewers will vary from four feet to 10½ feet in diameter. The Homerton branch

branch is complete, and the Isle of Dogs branch is in course of construction. The contracts for the whole of the eastern portion of the line, and for the two branches, were taken by Mr. William Webster, for the sum of 308,700*l.* of which the value of the work done under both contracts, up to the 25th March last, is estimated at 214,457*l.*, or to the present time, 243,359*l.*; being 8,115*l.* for the past month's progress, and representing a total completed length of 5½ miles of sewers.

*The Abbey Mills Pumping Station* is in course of erection, and will be the largest pumping establishment on the Main Drainage Works, providing engine power to the extent of 1,140 horse-power, for the purpose of lifting the sewage and rainfall from the Low Level to a height of 36 feet.

The engine-power will be divided amongst eight engines, each being equivalent to 142 horse-power. Each engine will be furnished with two boilers, making 16 boilers in all. The engines are to be contained in one building, and arranged in pairs, the building being cruciform in plan, and containing two engines in each arm of the cross. These engines, as in all the other pumping establishments on these works, will be expansive, condensing, rotative beam engines, but somewhat more powerful than those used elsewhere, the cylinders being 4 ft. 6 in. in diameter, with a length of stroke of 9 feet. The pumps will differ also in being double-acting, a circumstance which admits of the air pump, &c., being worked from the main beam instead of from a distinct beam, as at the other stations. Each engine will work two pumps, having a diameter of 3 ft. 10½ in., and a length of stroke of 4½ feet. The boilers are each to be 8 feet in diameter and 30 feet long, with double furnaces. The engine-house will be divided in height into three compartments; the lower one being the pump well, into which the sewage from the Low Level Sewer is to be conveyed; the intermediate one being a reservoir for condensing water; and the upper will contain the engines. The lower portion and foundations of this building are bedded upon a stiff stratum of London blue clay, at a depth of 32 feet below the surface; the boiler-houses and other portions of the work will be founded upon a bed of hard gravel. As these deep foundations are situated in close proximity to the Northern Outfall Sewer, which is contained in an embankment above the general level of the ground, great caution is requisite to prevent any settlement in that sewer. The boiler-house and coal stores are to be built between the outfall sewer and the engine-house, keeping the deep excavations as far distant from the sewer as practicable. The coal stores will be built with their floors level with the stoke holes in the boiler-house, and tramways will be laid from one to the other; one side of the coal stores forming also the front side of the boiler-house. This floor will be only a trifle below the present surface of the ground, which is 6 feet below high water. Tramways will be laid from the top of the coal stores to the Abbey Mill River, adjacent to the works, where a wharf wall will be built for landing coals and other materials.

The sewage from the Low Level Sewer, before entering the pump wells, will pass through open iron cages, the bars of which will intercept any substances likely to interfere with the proper action of the pump valves; and the cages, when requisite, will be lifted above ground by proper gearing, and the intercepted matter be discharged into trucks, or otherwise removed. The sewage will then pass into the wells, and be lifted by the pumps through hanging valves into a circular culvert of cast-iron, and thence forced into any of the three culverts forming the Northern Outfall Sewers.

The getting out of the foundations of the building was undertaken by Mr. William Webster, under the schedule of prices attached to his Low Level Sewer contract, and the Board, for the reasons embodied in the following recommendation of the Main Drainage Committee, also entrusted to him the erection of the buildings under a similar schedule—  
 “ From the inquiries made by your Committee, it appears that if the work of erecting the  
 “ buildings were advertised, and the tender of some other contractor accepted, several  
 “ months must necessarily elapse before the work could be begun, as, in addition to the  
 “ time which would be occupied in advertising and in the preliminaries of getting the  
 “ plant, &c. on the ground by the now contractor, Mr. Webster would require some time  
 “ to remove his plant and clear the ground. It is, however, in the opinion of your com-  
 “ mittee, desirable that the work should be carried on with as little delay as possible, in  
 “ order to relieve the low-lying districts that will be drained by the Northern Low Level  
 “ Sewer from the sewage, which is at present a source of much inconvenience to the  
 “ neighbourhood. These districts have as yet received but little benefit from the works  
 “ of the Main Drainage, and it is therefore the more important that relief should be given  
 “ to them as soon as possible. Your committee have had Mr. Webster before them, and  
 “ he has stated that, if the work of erecting the pumping station were confided to him, he  
 “ would be able to complete it, externally, and have it roofed in within 12 months from  
 “ the date of his receiving the order to commence, while, if the work were let by public  
 “ tender, the engineer states that 18 months would have to be allowed for its execution,  
 “ which, in addition to the time which would elapse before the works could be commenced,  
 “ would extend to a period of nearly two years before they could be completed and ready  
 “ for the engines. Mr. Webster has further expressed his willingness to undertake the  
 “ work under a schedule of prices similar to those of his contract for the Northern Low  
 “ Level Sewer, which was obtained by public tender, and under which he has also con-  
 “ structed the foundation of the pumping station in a most satisfactory manner. The  
 “ engineer states it as his opinion that these terms would be more favourable to the Board  
 “ than those of a tender obtained at the present time. Under these circumstances, and  
 “ having regard to the nature of the work, and the desirability, as before stated, of the  
 “ same

“ same being executed without delay, your committee are of opinion it is advisable that the pumping station should be erected by Mr. Webster, under a schedule of prices, and they recommend that course for adoption.”

The foundations of the building have been successfully got in, and the walls and internal arrangements built up to an average height of 8 feet above the present surface of the ground, or on a level with the principal or engine-room floor. The foundations of the filth-hoist have also been got in, and the iron penstocks are fixed, and the brickwork brought up to within 5 feet of the ground line. The excavation for the boiler-house and chimney-shafts have been got out, and the concrete deposited. The total value of the work completed up to the 25th March last was 19,970*l.*, or 40,365*l.* to the present date; 8,165*l.* representing the progress made by Mr. Webster in the past month.

The tender of Messrs. Rothwell & Co., to construct and erect the engines and machinery required at this station, for the sum of 54,570*l.*, was accepted by the Board. In connexion with this part of the works, the iron standards, with the cross girders, are in their respective positions, the eight fly-wheel and crank races are built in and fixed permanently, and the iron cradles to carry the boilers are nearly all bedded in their respective places. Large quantities of other parts of the ironwork are upon the ground, ready for fixing as the building proceeds. The estimated value of the machinery fitted, and upon the works, is 20,000*l.*

*Greenwich and Deptford Sewer.*—This branch line of intercepting sewer, running from the eastern end of Greenwich to the Deptford Pumping Station, has been completed by Mr. William Dethick, at a cost, pending the adjustment of accounts, of about 23,800*l.* The works comprise a total length of nearly two miles of brick sewer, varying in size from 4 ft. 6 in. by 3 ft. to 4 ft. by 2 ft. 8 in., and about one mile of pipe sewer and drain connexions.

#### MAIN SEWER REPAIRS, &c.

The completion of the Main Drainage Works rendered it requisite that the Board should take into their consideration the general condition of all the main lines of sewers vested in them under Schedule (D.) of the Metropolis Local Management Act, 1855, with a view to the open and defective ones being either covered and deepened, or abandoned, and such of the shallow or otherwise imperfectly covered sewers being reconstructed, and the whole adapted to work in with the Main Drainage system. To this end, the following contracts have been entered into by the Board:—

#### NORTH SIDE OF THE RIVER.

*Ranelagh Sewer and Branch.*—The Board accepted the tender of Mr. Edward Thirst, for the execution of the work comprehended in this contract, for the sum of 30,449*l.* It comprises the construction of about 1 mile 2,830 feet of brick sewers, varying in size from 8 feet circular to 4 ft. by 2 ft. 8 in., and 1,100 feet of 12-inch pipe, with the requisite gullies, air-shafts, entrances, &c.; the former sewers to be constructed in and along Albion-street, Southwick-street, crescent, and place, Radnor-place, and Grand Junction-road, and the pipes to be laid in the bed of the open sewer at the back of the Kilburn Park road, the old channel being filled in. The works that have already been carried out comprise about 4,490 feet of sewers, of sizes varying from 8 feet barrel to 3 ft. 9 in. by 2 ft. 6 in. for the main line, and about 2,120 feet of 5 ft. by 3 ft. sewer for the branch, the total approximate value of which, including the numerous incidental works, is 17,000*l.*, or 11,500*l.* to the 25th March last.

*Stamford Brook.*—This contract comprises the construction of about 7,510 feet of 5-feet brick sewer, and 1,520 feet of 12-inch pipe, with all the requisite works incidental thereto, in and along King-street, New-road, to Acton Back Common, and between the Common and Webb's Land, and in and along certain fields and places by Longfield-walk to Old Oak Common-lane. The tender of Messrs. J. & S. Williams for the execution of these works, for the sum of 24,600*l.*, was accepted. To the present time, the work executed is 4,737 feet of 5-feet circular sewer for the diversion of the open brook between Acton Back Common and Hammersmith Creek, 23 feet of 3 ft. 9 in. by 2 ft. 6 in. sewer, and 906 feet of 12-inch pipe, the total approximate value of which is, including the minor works incidental thereto, 14,000*l.*; of which the sum of 9,000*l.* represents the work done to the 25th March last.

*The Grove, Hammersmith, and High-street, Fulham, Sewers.*—Messrs. J. & S. Williams's tender for the execution of the works for deepening and reconstructing the Grove Sewer, and for constructing a new sewer in High-street, Fulham, for the sum of 7,000*l.*, was accepted. The former sewer will be about 3,350 feet in length, and 4 ft. by 2 ft. 8 in. in internal dimensions; and the latter 950 feet in length, and 3 ft. 9 in. by 2 ft. 6 in. in internal dimensions, each with the requisite number of side entrances, air-shafts, gullies, &c. Of the Grove section, a length of about 1,600 feet of 4 ft. by 2 ft. 8 in. sewer has been constructed, and of that of the Fulham, 722 feet of 3 ft. 9 in. by 2 ft. 6 in. sewer, at a total estimated cost of about 3,500*l.*

*City-road, Finsbury-place, &c., Sewer.*—The contract for the construction of about 3,218 feet of 4 feet by 2 ft. 8 in. brick sewer, for the diversion into the Middle Level Line of a portion of the Main London-bridge Sewer, extending from Fore-street to Old-street, was taken by Mr. William Dethick, for the sum of 8,300*l.* To the present time

he has constructed about 2,746 feet of the 4 feet by 2 ft. 8 in. sewer, and laid down about 2,150 feet of 9-inch pipe drains, at an estimated cost of 10,170*l*.

Prior to the letting of this contract the Board had, upon the urgent representations made to them by the St. Luke's, Middlesex, Vestry, as to the necessity of immediately providing an outlet for the local drainage of Pickard-street, and its neighbourhood, directed that a length of about 3,000 feet of the City-road Branch of the Main London-bridge Sewer, extending from Providence-row, along a part of the City-road, York-road, and Macclesfield-street, to Pickard-street, should be forthwith re-constructed by Mr. William Dethick, under the general contract. This work was accordingly carried out at a cost of 4,827*l*. 10*s*. 5*d*.

*Counters Creek Sewer.*—The Board have recently accepted Mr. Edward Thirst's tender for the execution of the works requisite for the re-construction and deepening of this sewer from Royal-crescent, Uxbridge-road, to Bromley-road, a length of about 4,368 feet, for the sum of 18,000*l*., and the works have just been commenced.

*Globe-road, Swan-street, &c., Sewers.*—The works comprised in this proposed contract are the construction of about 1 mile 230 feet of 4 feet by 2 ft. 8 in. brick sewer, and the underpinning of a length of about 1,280 feet of existing sewer. The works are intended for the improvement of the Board's main sewers in several parts of the parish of Bethnal-green, and the tenders for their execution are to be opened by the Board on the 6th July instant.

*Hackney Brook.*—Upon a memorial from certain inhabitants at Hackney Wick, praying that the part of this brook in that locality might be filled up at once, several malignant cases of fever having occurred in its immediate neighbourhood, the Board directed the necessary works to be carried out forthwith by Mr. William Dethick, under the general contract. The work comprised the construction of about 1,097 feet of 5-feet brick sewer, and has cost, including the filling-in of the old channel, and forming side entrances, gullies, &c., to the new sewer, 1,949*l*. 5*s*.

#### SOUTH SIDE OF THE RIVER.

*Falcon Brook.*—The tender of the late Mr. William Moxon, for the execution of the works for covering over and diverting the line of the Falcon-brook Sewer, for the sum of 35,400*l*., was accepted by the Board. The contract comprises the construction of about 1 mile 3,720 feet of brick sewer, varying in size from 6 feet by 4 feet to 4 ft. 3 in. by 2 ft. 10 in., for the purpose of abolishing the open brook from the York-road, Battersea, to near Nightingale-lane, and the construction of about 1 mile 440 feet of sewer, 4 ft. 6 in. by 3 feet, and 5,250 feet of sewer, 4 feet by 2 ft. 8 in., for the purpose of diverting the line of the brook between the "Plough," Clapham Common, and Wheatsheaf-lane, Tooting. The progress of these works at their earlier stage was delayed, principally, by the death of the contractor, Mr. Moxon, which event necessitated fresh arrangements being made for the carrying out of the contract. The result of these arrangements was, that Messrs. Hiscox and Williams undertook the contract for the sum of 35,900*l*. To the present time, a total length of 2,718 feet of sewers, varying in size from 6 feet by 4 feet to 5 feet by 3 ft. 4 in., has been completed, the approximate value of which, with the other works incidental thereto, is 6,368*l*.; of which the sum of 3,450*l*. is due to the progress made to the 25th March last.

*Earl Sewer (White Post-lane Branch).*—The London, Brighton, &c., Railway Company having contributed the sum of 700*l*. towards covering the lower portion of this open sewer near Canterbury-row, Old Kent-road, the Board decided, as the cheaper and better course, to re-construct the sewer for its whole length of 2,036 feet, extending from the Grand Surrey Canal to the Low Level Sewer in the Old Kent-road. The size of the sewer is 4 feet by 2 ft. 8 in., and its cost is, as near as can be ascertained, pending the final settlement of the account, 3,236*l*.

*Woolwich Sewers.*—The contract for the improvement and diversion of the Rope-yard, Market-place, Trinity-street, Sun-alley, &c., Sewers, into the Southern Outfall Intercepting Line, comprised the construction of about 4,430 feet of sewers, of sizes varying from 4 feet by 2 ft. 8 in., internal dimensions, to a 12-inch pipe. The tender of Messrs. Hill and Keddell, to execute these works for the sum of 8,910*l*., was accepted by the Board. The whole of the works comprehended in the contract are complete, and have cost, as nearly as can be ascertained, pending the settlement of the account, 8,581*l*. 10*s*.

*Heathwall, Lord Spencer, &c., Sewers.*—The works in connection with the former sewer and its branch comprise the construction of about 2 miles 920 feet of brick sewers, varying in dimensions from 5 feet by 3 ft. 4 in. to 3 ft. 9 in. by 2 ft. 6 in., and extending from the Old Mill-pond, Battersea, to Hamilton-street, Wandsworth-road. Those for the Lord Spencer Sewer are the construction of about 3,120 feet of brick sewer, 4 feet by 2 ft. 8 in., along Battersea Bridge-road to Folly-lane, and those for the part of the Putney Boundary Sewer, dealt with in this contract, are the construction of about 1,320 feet of 3 feet by 2 ft. 6 in. brick sewer, extending from Wandsworth-lane to Upper Richmond-road, and in its course passing under the South Western Railway at the point where the existing sewer is carried across the line by an aqueduct. The work for the diversion of the sewage from  
a part

a part of the Wandle through Garratt-lane, consists of 1 mile 3,570 feet of brick sewer 4 ft. 6 in. by 3 feet, extending from the junction of High-street and Ram-lane, Wandsworth, to St. Mary's Church, Dunc-e-hill. The tender of the late Mr. William Moxon was originally accepted for the performance of these works, but, on account of his then failing state of health, he was permitted to withdraw the tender, and the Board accepted that of Mr. Thomas Pearson, for the execution of the works in question, for the sum of 45,600 *l.* To the present time he has completed about 1 mile 3,220 feet of sewers, varying in sizes from 5 feet by 3 ft. 4 in. to 3 ft. 9 in. by 2 ft. 6 in., the approximate value of which is 15,000 *l.*; the sum of 3,954 *l.* representing the estimated value of the work executed up to the 25th March last.

*Earl, Battle Bridge, Duffield, &c., Sewers.*—The works comprehended in the contract for improving these lines of main sewers are the construction of about 6 miles 240 feet of brick sewers, of various sizes, the largest being 6 feet clear in diameter, and the smallest 4 feet by 2 ft. 8 in., with all the requisite air shafts, gullies, side entrances, &c. These sewers pass through some of the most important thoroughfares on the south side of the river, such as the Kent-road, Deptford and Bermondsey Lower roads, Camberwell-road, Waterloo-road, &c., in the respective parishes of Lambeth, Newington, Camberwell, Bermondsey, and Rotherhithe. Mr. William Dethick's tender for the execution of the works for the sum of 88,500 *l.* was accepted. To the present time he has completed about 1 mile 1,723 feet of sewers, varying in size from 6 feet barrel to 4 ft. 6 in. by 3 feet, the value of which, with the numerous minor works incidental thereto, is 27,100 *l.*; 11,404 *l.* representing the amount of completed work to the 25th of March last.

#### THAMES EMBANKMENT, NORTH (CONTRACT NO. 1).

*Between Westminster and Waterloo Bridges.*—The principal works comprehended in this contract are, the construction of the river wall, about 3,740 feet in length, with a portion of the Low Level Intercepting Sewer, and Subway in connection therewith, the extension of the several main sewer outlets to discharge into the low level, the construction of about 3,200 feet of brick sewer 4 feet by 2 ft. 8 in., for the interception of the smaller sewers and drains hitherto discharging on the foreshore, and the formation of new and commodious steam-boat piers and landing-places, in lieu of those interfered with by the embankment. The Board accepted the tender of Mr. George Furness for the execution of the whole of the work contained in this contract, for the sum of 520,000 *l.* To the present time, the works that have been carried out comprise about 3,500 feet in length of timber coffer and iron caisson dams, either completed or in various stages of progress; 2,075 feet of the Low Level Sewer, varying in size from 7 ft. 9 in. to 8 ft. 3 in. in diameter; 1,767 feet of the Subway, for the reception of the gas and water mains; 2,625 feet of the 4 feet by 2 ft. 8 in. brick sewer, for the interception of the smaller drains, &c., and 284 feet of the Flushing Sewer. The Westminster Steam-boat Pier, for a length of 320 feet, has been brought up to a general level of 3½ feet above Trinity high-water mark, and the screen wall and parapet by and leading on to Westminster Bridge, with the steps from the lower to the high level, are in course of formation; 720 feet of the river wall adjoining have been brought up to heights varying from 1 foot below to 3½ feet above high-water mark. The sub-structure of the intended new York Gate has been executed to a level of 4½ feet below that mark, and 677 feet of the adjoining wall have been formed up to levels varying from 20½ feet below to 3½ feet above high-water mark. The Charing Cross new steam-boat pier, for a length of 45 feet, has been constructed to a height of 8½ feet below that mark, and 359 feet of the wall eastward of the Charing Cross Bridge have been formed to levels varying from 20½ feet to 9½ feet below the same datum. Excavations have also been made, and are progressing, for the reception of the concrete foundations, and concrete is being filled in for a further length of 467 feet of the river wall; and material has been filled in behind the walls, and in the Embankment generally, to the extent of about 447,800 cubic yards. The approximate value of the whole of the work done, and of the materials and plant upon the ground, was, up to the 25th March last, 281,588 *l.*, or 318,549 *l.* to the present date; 7,636 *l.* representing the progress in the past month. Of the total amount, the proportionate sum of 229,940 *l.* is for works, 48,044 *l.* for materials, and 40,565 *l.* for plant.

*Contract No. 2 (between Waterloo Bridge and Eastern End of Inner Temple Gardens).*—The principal works comprehended in this contract are, the construction of about 1,970 feet of river wall, with a portion of the Low Level Intercepting Sewer and Subway in connection therewith, and about 2,440 feet of 4 feet by 2 ft. 8 in. brick sewer, for the interception of the smaller sewers and drains hitherto discharging on the foreshore. Each of these works is in continuation of those respectively described in the No. 1 Section. The extension of the Main Essex-street and Norfolk-street Sewer Outlets into the Low Level Line, and the erection of a new and commodious steam-boat pier in the place of the Temple Pier, interfered with by the Embankment, are also provided for. The Board accepted the tender of Mr. A. W. Ritson, for the execution of the whole of the works comprised in this contract for the sum of 229,000 *l.* The coffer-dam, for its entire length, is completed and made water-tight, thus enclosing the works from the action of the tides. The Low Level Sewer and Subway have been completed for a length of 1,420 feet, and the river wall for the same length has been brought up to an average height of three feet

above Trinity high-water mark. A part of the dam having been removed from the finished works, 400 feet of this wall are now exposed to view. The remaining 550 feet of the Subway, Sewer, and wall are in course of construction. The small intercepting sewers on the foreshore are complete and in operation, and the filling-in over the same is also completed sufficiently for forming the roadway; six penstocks and four side-flaps are fixed ready for use. The approximate value of the whole of the work done, and of the materials and plant upon the ground, was, up to the 25th March last, 178,240 *l.*, or 187,239 *l.* to the present time; 5,485 *l.* representing the progress in the past month. Of the total amount, the proportionate sum of 159,336 *l.* is for works, 10,886 *l.* for materials, and 17,017 *l.* for plant.

*Contract No. 3.*—The drawings for this contract are approaching completion. The work will comprise the formation of a viaduct from the eastern end of the Temple Gardens to Blackfriars Bridge, and will complete the line between Westminster and Blackfriars Bridges. This contract will embrace the formation of the roadway for its own length, but the remainder cannot be completed until after the construction of the Metropolitan District Railway, which, for a very considerable distance, will be formed beneath its surface.

#### THAMES EMBANKMENT, SOUTH (CONTRACT No. 1).

*Between Westminster Bridge and Gun House-alley, Vauxhall.*—The principal works contained in this contract are, the construction of a river wall, about 4,300 feet in length, the formation of landing stairs near Westminster Bridge, and a paved roadway and footways, with sunk road approaches or subways to the dock and other properties severed by the works, and the construction of a short length of sewer for the drainage of a part of the road. The board accepted the tender of Mr. William Webster for the execution of the whole of the work contained in this contract, for the sum of 309,000 *l.* The works executed to the present time comprise the driving of about 2,245 feet of the dam, and 2,280 feet of the staging, to an average depth of 15½ feet. About 227,878 cubic feet of timber, 11,300 cubic yards of clay puddle, and 158 tons of cast and wrought iron, in shoes, tie-bars, bolts, &c. have been used in this part of the work. Within the dam about 2,800 cubic yards of earth have been dredged, 27,400 yards excavated, 27,000 yards filled in, 700 yards of concrete deposited for the foundations of the river-wall, and 12½ rods of brickwork laid for the head-walls to the land arches of Westminster Bridge. The total approximate value of the preliminary works executed to the 25th March last is 27,000 *l.* or 39,000 *l.* to the present time; of which the sum of 1,900 *l.* is due to the past month's progress.

#### TOTAL AMOUNT OF WORK DONE.

Tables Nos. 1 and 2, appended to this Report, give in detail all the engineering works executed by the Board in the year ending 25th March last, and the condition of the several contracts entered into, completed, or in course of completion, by them at the end of that year. The total sum expended on those works includes the cost of cleansing, maintaining, and, where requisite, repairing the several lines of main sewers, with their various flaps, penstocks, outlets, and other appurtenances.

#### LOCAL DRAINAGE.

Under the sections of the Acts which provide for submitting to the Board, for their consideration, the plans of the various local sewers, intended to be constructed by, or under the direction of, the several vestries and district boards, 26 of those bodies have, during the past year, so submitted plans for the construction of about 113¼ miles of sewers, of sizes varying from a brick sewer, 5ft. 3in. by 3ft. 6in., to a 9-inch pipe. All these plans received careful examination, and, where needed, were amended, with a view to their falling in with a uniform system of drainage. Table No. 3, appended to this Report, gives in detail the various lengths and sizes of those sewers. During the year, 458 branch sewers and drains have been connected with the Board's main lines, and all these connections have been duly superintended by their officers. In the past 10 years, the Board have received from the metropolitan vestries and district boards about 2,000 applications, with plans and sections, for the construction of local sewers. Some of these plans are for the drainage of a single street only, whilst others are for blocks, and many are for entire districts, and comprise a total length of over 400 miles of sewers. The Board, having regard to the importance, both on account of their own works and of those for the Underground Railway, and other schemes, that the exact position of these local sewers should be accurately laid down on their set of Ordnance sheets, have requested the several vestries and district boards to furnish a return of all the sewers laid down, specifying any deviations that may have been made from the plans originally sanctioned. Many of these returns have been received, and the positions of the sewers are being laid down on the sheets, as directed by the Board.

#### CLOSING STREETS.

Under the 84th Section of the Metropolis Local Management Amendment Act, it is requisite that the several vestries and district boards, before stopping up any street within their jurisdiction for the purpose of paving, sewerage, or other works, should obtain the sanction of the Board thereto. Fifty-eight of such applications have been made within the

the past year, proposing to close either the whole or parts of about 130 streets, and before the Board have sanctioned the same, they have been careful to ascertain what facilities existed for the temporary diversion of the traffic, and in those cases where the thoroughfare has been an important one, and there were no convenient bye-streets to take the traffic, they have required, when practicable, that one-half of the roadway should be kept open for the accommodation of the traffic.

#### LOANS.

Fourteen applications have been made in the past year to this Board, by certain vestries and district boards, for sanction to raise loans for defraying the cost of executing sewerage or paving works within their respective districts. Eight of these applications have been for the former work, and represent a sum of 151,550*l.*, and six have been for paving, and represent a sum of 85,500*l.*, making a total of 237,050*l.* for both classes of work. In each case the estimates have been carefully gone into, with a view to ascertain their reasonableness for the amount of work proposed to be executed.

#### PARLIAMENTARY BILLS.

Seventy-three plans and Bills for the present Session, having reference to new railways, buildings, and other improvements within the metropolis, have been deposited with the Board. The railway schemes were very heavy, comprehending as they did the formation of about 104 miles of railway, and with other proposed improvements, involving an expenditure of 26,000,000*l.* sterling, and providing for borrowing powers for a further nineteen millions. All the schemes proposed by the Bills have received careful examination at the hands of the Board, who, by counsel or otherwise, have appeared before the several Parliamentary Committees, with a view to procure the insertion of such clauses as were requisite for protecting the public interests; one very important clause being the rendering it incumbent upon the railway companies constructing, within the metropolis, bridges, either to carry the lines over public roads or the roads over the lines, to submit to this Board the plans, elevations, and other details of those bridges, for their approval, or, where found requisite, modification, with a view to securing the safety of the public, and maintaining a sufficient width and headway beneath the bridges for the convenience of the traffic. Under this clause, designs for several bridges have been submitted to the Board within the past year, and they have given the same the most careful consideration, and, when necessary, have required such alterations and modifications to be made in the designs as would, in their judgment, best meet the public interests.

#### VENTILATION OF SEWERS.

During the past year the attention of the Board has been directed to the consideration of the adoption of some mode for preventing the escape of noxious effluvia from sewers. With this view experiments have been made in the use of charcoal ventilating grates, the ventilation through chimney-shafts and furnaces, and the ventilation through pipes carried to the top of buildings, &c., and, in addition to these experiments the question of diluting the sewage with water has been considered, but, as the former are still being carried on, no definite results can yet be reported.

I have, &c.  
(signed) *J. W. Bazalgette*,  
Engineer.

TABLE, No. 1.

SUMMARY STATEMENT and REPORT of CONTRACTS entered into and completed by the

CONTRACTS FOR THE PERFORMANCE

| Date<br>of Contract.                          | LOCALITY AND NAME OF CONTRACT.                                                                                                                                            |                                                                                                                                     | Name<br>of Contractor.             | Quantity of Work<br>agreed to be Executed.                                                                                          |
|-----------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| As per Resolution of Board, 6 January 1865.   | London Bridge Main Sewer                                                                                                                                                  | - - City-road branch, commencing at Providence-row, along part of City-road, York-road, Macclesfield-street, to Pickard-street, &c. | William Dethick                    | - - About 3,000 feet of brick sewer, 3 ft. 9 in. by 2 ft. 6 in., and other works in connection therewith.                           |
| As per Resolution of Board, 24 February 1865. | White Post-lane Sewer                                                                                                                                                     | - - In line of the old Hackney Brook Sewer, at Hackney Wick.                                                                        | - - ditto                          | - - About 1,050 feet of brick sewer, 5 feet diameter, and other works in connection therewith.                                      |
| 12 July                                       | City-road, Finsbury-place                                                                                                                                                 | Diversion of London Bridge Sewer                                                                                                    | - - ditto                          | - - About 3,218 feet of brick sewer, and other works in connection therewith.                                                       |
| 13 July                                       | Falcon Brook Sewer                                                                                                                                                        | Covering and diversion of                                                                                                           | William Moxon                      | - - Certain intended brick sewers, about 3 miles 4,160 feet in length, of various sizes; and other works in connection therewith.   |
| 13 July                                       | Ranelagh Sewer and Branch                                                                                                                                                 | Covering, deepening, and re-constructing                                                                                            | E. Thirst                          | - - Certain intended brick sewers, 1 mile 2,830 feet in length, of various sizes, and other works in connection therewith.          |

## APPENDIX (C.)

(p. 21.)

Engineer's Department, Spring Gardens,  
6th January 1866.

## VENTILATION OF SEWERS.

EXTRACT from Main Drainage Committee Minutes, 1st August 1865.

RESOLVED, on the Motion of Major Lyon—"That the Engineer be authorised to "make such experiments as in his judgment may be necessary for testing the value of "charcoal, or other deodorising ventilators, and that he do report to the Committee "thereon."

It is necessary that all sewers should have free ventilation into the open air, or the gases generated in them escape through the untrapped house-drains into the houses, where they become dangerous and offensive. Moreover, without such ventilation, it would not be possible for men to enter the sewers to cleanse and repair them, or to form and attend to the numerous house-drain junctions.

The best mode of ventilating sewers has, for the last 20 years, engaged the attention of most persons who have taken an interest in improved drainage, and sanitary reform. It has formed the subject of special inquiry by Parliamentary Committees, and various experiments have been made, with a view to an improved mode of ventilating sewers. Up to 1850, the sewers were ventilated mainly through the gully-gratings, which are situated close to the foot pavements, and were, at times, most offensive to the foot passengers, and the residents of the adjacent houses. In that year, there was a general outcry for the trapping of those gullies, and I was directed to make a series of experiments, with reference to the comparative advantages of the system of ventilating sewers through the gullies, and by shafts in the middle of the streets, which led to the more general construction of the ventilating shafts, and the trapping of the street-gully drains. This alteration was attended with great advantage. Since 1850, I have, from time to time, experimented and reported upon this subject, and from amongst the numerous reports and suggestions which have, at different times, been made, I have selected from the records of the late Commissioners of Sewers, and of this Board, a few of those which appear to contain any useful plans or suggestions, and have appended copies of them to this Report.

In 1849, the trapping of gullies formed the subject of a paper by the Rev. Edward Murray, in which he treats of the nature of the gases in sewers, and the considerations which should govern the mode of dealing with them. Captain Veitch, R.E., also, in the same year, published a paper upon the effluvia from gully-gratings, and the currents of air in sewers; and repeated the recommendations made by him in 1842, that the effluvia from sewers should be neutralised by a copious supply of water rather than by ventilation. Both papers received the attention of Mr. Henry Austin, the Consulting Engineer of the Commissioners, who, in 1849, presented an elaborate report to them upon the whole subject, resulting in the following conclusions:—

- 1st.—That a system of ventilation of the sewers could not be dispensed with.
- 2nd.—That experience had shown that, to effect this object, unless simultaneous provision be made, the increased trapping of gullies would render the sewers unbearable and dangerous, and would tend seriously to increase the evils intended to be remedied.
- 3rd.—That trapping the gullies should be proceeded with, therefore, only in connection with means of ventilation.
- 4th.—That the system of ventilation by shafts and grates, discharging in the centre of the streets, was objectionable, and, in many instances, the smallest mitigation of the evil, and should, therefore, on the adoption of better means, be discontinued.
- 5th.—That any general system of ventilation, by connection with furnaces and chimney-shafts at considerable distances, would be attended with great difficulties, and much manual labour and current outlay, without promise of very satisfactory results.

6th.—That the experience obtained as to the draught of air through tubes carried to the tops of houses gave indication that, under proper management, a good system of self-acting ventilation might by these means be established, and warranted the recommendation that a more extensive and efficient trial should be made of it.

In

In October 1850, I made the examinations already adverted to, with reference to the comparative advantages of gullies and air-shafts, as ventilating media, and recommended the trapping of such gullies as were, with good reason, complained of, and the substitution of ventilators, where necessary, for the better ventilation of the sewers, and the safety of the men. In April 1853, I made a further report upon the relative merits of these two plans, and upon certain experiments that had been made on the south side of the river, by forming connections between the sewer and the chimneys of factories; and, in the same report, I dealt with a suggestion contained in a letter addressed to Lord Palmerston, that the sewers should be connected with the rain-water pipes from the houses. The former plan was tried in three cases—in two, its effect was beneficial; but in the third, viz., the connection of the Friar-street Sewer with the furnace of a soap factory, a jet of fire burst from the connecting pipe and caused an explosion in the sewer. The circumstances attending this case, were, however, very exceptional. Soon after this accident, Mr. Goldsworthy Gurney tried an experiment in the same sewer, having for its object the drawing off the gases by means of a steam jet. The correspondence between the Commissioners and Mr. Gurney, in reference to his experiment, became ultimately the subject of a Return to the House of Commons, dated 26th June 1850.

The suggestion to ventilate sewers by the agency of rain-water pipes was frequently made, and has been tried in various places, but, as stated in my report of April 1853, the principal objection to this plan is the risk of creating a greater nuisance by the removal of the lesser, and the difficulties experienced in making those trials show that the public would not, as a rule, voluntarily sanction these connections being made with their house-pipes, or with their flues, as has also been proposed.

A complex contrivance for embracing a general combined system of house and sewer ventilation is explained in a communication by Mr. D. White, and a somewhat similar plan was suggested by Mr. J. Jones.

Mr. Dowling, also, submitted models of a water-trap for gullies, and of a ventilating obelisk, with a drawer fitted therein, in which a supply of unslacked lime should be renewed weekly.

The destruction of the foul air generated in sewers by the agency of fire, has been frequently suggested. In March 1848 Captain Shrapnel proposed, in a letter to Lord Morpeth, the erection of lofty cast-iron cylinders over the sewers, with furnaces therein, feeding exclusively on the foul gases, the flame of which, from the top of the pillars, he asserted, would be as brilliant as that of the ordinary gas-lamp. A similar suggestion to this was made to the Board by Mr. T. A. Blake. Mr. Elliott proposed a plan for trapping all the gullies and house drains, and erecting, at intervals, shafts or chimneys for destroying the foul air, with lines of iron pipes charged with hot water to propel the air to the shafts. At the end of 1848 Messrs. Warr and Armstrong submitted a project for subterranean domes over the sewers, with pipes to a central effluvium reservoir, where, after purification, the gases might be employed for illuminating the metropolis. This, like the former plan, also proposed the trapping of all gullies, &c. Mr. Bloyd suggested the insertion of chafing dishes, supplied with live charcoal, at the bottom of the ventilating shafts; and Mr. Sicard the closing or trapping of all openings into the sewers, except the principal one, to which he could adapt the modification of the air-pump, destroying, either by a solution of chloride of lime or by fire, the foul gas pumped out. Mr. A. Rogers proposed the establishment of coke manufactories in convenient situations, and so adopting the ovens as to ventilate the sewers.

In 1865 Mr. George Mumby proposed the adaptation of the common gas pillars for ventilating the sewers, and the adoption of certain mechanical and other means for removing the impure air and flushing the sewers; and Mr. E. C. Robins forwarded a plan, by Mr. R. L. Roumieu, for carrying the vapours ascending from the sewers to pass over a surface of disinfecting matter, placed in shelves, in the street lamp-posts. Towards the end of that year Mr. James Lovegrove suggested the adoption of an air-trap, combining the "shackle" and "dip" traps, for the better ventilation of house drains, upon which plan I, at the time, made a favourable report.

In December 1856 the Vestry of St. Marylebone transmitted to the Board a copy of a report by their medical officer, Dr. Thompson, recommending the trapping of gullies and the construction of shafts up the faces of the houses at the ends of streets, for the purpose of ventilating the sewers. In October 1857 the Vestry of St. James's, Westminster, forwarded a report by their medical officer, Dr. Lankester, recommending the attainment of this object by means of furnaces in connection with the air-shafts.

In May 1858 the City Commissioners of Sewers transmitted a very comprehensive report by their engineer, Mr. Haywood, on the subject, in which he treats on most of the foregoing modes of ventilation, and in which occur the following very pertinent observations:—

"That a good system of ventilation has not been found and applied long since is evidently not owing to the want of suggestions, all of which, however, resolve themselves into the application of one or two well-known principles or modes of effecting it. It is, perhaps, not very singular that almost every one who has proffered evidence or made a suggestion has treated the matter as one of much ease and simplicity, but, at the same time, has evidently had but a slight knowledge of the difficulties to be overcome, arising from the actual nature of the channels to be ventilated. I can only, at this moment, call to mind one or two exceptions, among whom was the illustrious chemist, Mr. Michael Faraday, who, in the year 1834, before a Parliamentary Committee, alone, of all the witnesses,

"gave opinion that the subject was beset with great difficulties, an opinion which, in the year 1848, he still apparently retained." The City Commissioners inquired whether this Board would undertake the experiments suggested in Mr. Haywood's report for testing the cost of a system of ventilation of sewers by furnaces, but the Board determined that it was inexpedient that they should incur the expenditure thus involved. The City Commissioners of Sewers did not undertake the experiments, and the evidence given before a Parliamentary Committee, quoted hereafter, a few months afterwards, led to the conclusion that no practical benefit was likely to result therefrom. At the same period the Board received a report from Dr. Letheby, suggesting the adoption of certain precautionary measures for detecting the presence of dangerous gases in sewers, the constituent properties of which gases also formed the subject of an elaborate report by that gentleman to the City Commissioners in September 1858.

In June 1860 Mr. J. White recommended the use of a water-fan for the removal of foul air from the sewers, through shafts to be specially constructed.

Immediately upon receiving the instructions of the Committee to prepare this Report, I wrote to the surveyors of the several metropolitan vestries and district boards, asking them whether they had adopted any improvements in their system of ventilating the sewers under their charge, and whether they could favour me with any suggestions or plans upon the subject. From the majority of those who have replied to my letter I have received answers to the effect, generally, that they have made no improvements upon the ordinary modes of ventilation, and they suggest rather the keeping the sewers as cleanly and free from deposit as practicable. Mr. A. P. Howell, the Surveyor to the St. James's, Westminster, Vestry, forwards a letter setting forth what he has done to meet exceptional cases, and recommends, where the width of streets would permit, the erection in their centre of a large lamp to serve as a ventilating-shaft, with public conveniences, entrances to sewer, gullies, &c., at its base, and so combined as to form "one ornamental and useful public feature," in the manner shown by the plan accompanying his communication. Mr. John Douglas, Surveyor to the Vestry of Hampstead, sends a drawing and description of his improved ventilating grates for absorbing, by the agency of charcoal, impure gases from sewers, and preventing their escape into streets. This is a very ingenious contrivance, and is one of the best description of charcoal ventilators I have yet seen, and I recommend its adoption where that disinfectant is used.

Mr. Treverton, the Surveyor to the Lewisham District Board, states that he has, in two or three instances, connected the ordinary stack pipes of buildings with the ventilating-shafts, with good effect.

Mr. G. Legg, the Surveyor to the Vestry of Rotherhithe, suggests an illuminating lamp at the angle, or intersection, of the cross-ways, with a ventilating head above the traffic, so that the gas burner might consume the noxious gases.

Mr. R. Parker, the Surveyor to the Poplar District Board, suggests the carrying a pipe, connected with the house-drain, above the roof of the building, the drains next the sewer being untrapped. In cases of new buildings, he suggests a flue should be carried up above the roof, and the drain connected with it.

Mr. J. C. Reynolds, the Surveyor to the Vestry of Camberwell, had but lately fixed charcoal baskets in some of the ventilators, and was therefore unable to give an opinion as to their efficacy.

Mr. T. Buckham, one of the Surveyors to the Wandsworth District Board, sends a sketch of a cast-iron ventilator which he has used with success, charcoal being the deodorising agent.

Mr. C. W. Johnson, another of the Surveyors to the Wandsworth District, has carried pipes from the ventilators up the fronts of seven or eight houses above the highest windows, and proposes fixing more where he can get the consent of the owners or occupiers of the houses. He considers this plan would be more efficient if gas jets were fixed to intercept the current before it passes into the pipes. He further proposes to try the charcoal system in the ventilators.

Mr. A. Dobson, also a Surveyor to the Wandsworth District Board, considers charcoal may, for a time, lessen the smell arising through the ventilators, but that it soon becomes damp and useless. He is of opinion that the lamp columns might be advantageously used, by carrying a pipe into the lamp, the heat therein drawing the foul gas from the sewer.

The Hackney District Board have some experiments in progress, but are not in a position to state the result.

Mr. T. G. Browning, Resident Surveyor, St. Marylebone Vestry, considers charcoal purifies the foul gases passing into the air, but that it confines and intensifies the noxious air within the sewer. He recommends an increased number of ventilators, and the connection of one sewer with another for improving the currents therein, and for facilitating the flushing operations.

Mr. Stevens, the Surveyor to the Vestry of Paddington, makes similar recommendations, and states that the vestry have used M'Dougall's disinfecting liquid (carbolic acid), mixed with mile of lime, in some of their sewers and gullies, and that the results have been satisfactory.

In January 1855, Mr. Goldsworthy Gurney reported to the Office of Works, on his experiments for withdrawing and decomposing the noxious effluvia from the sewers in the neighbourhood of the Houses of Parliament.

In 1858, a Committee of the House of Commons was appointed to inquire into the  
state

state of the River Thames in the vicinity of the Houses of Parliament. In that Committee, Lord Palmerston, Lord John Russell, Lord John Manners, Sir Benjamin Hall, Mr. Robert Stephenson, and Mr. Tite, took active parts, collected evidence, and reported upon the subject of the ventilation of the Metropolitan Sewers by means of furnaces, and they also directed me to examine and report to them on the experiments instituted by Mr. Goldsworthy Gurney, with the furnace of the Clock Tower.

The following evidence was given before that Committee—

Mr. W. Haywood, the Engineer and Surveyor to the City Commissioners of Sewers, stated as follows—

“2576. Have you made any experiments yourself upon the burning of gases, and the ventilation of sewers?—No, I have not, but I have examined into all the experiments which have been instituted, both in this country and in France, and I have recently reported upon the subject of the ventilation of sewers.

“2577. What is the result of your experience?—My impression is, that there will be exceeding difficulty in doing it at all; but if it can be done, it will only be at an enormous annual expense. The difficulties to be overcome are gigantic, and there exist now no data of sufficient value to enable to be made more than an approximate estimate of what the cost will be, or, as to the number of the shafts that will be needed.

“2578. What would cause the great expense?—The great expense would be the traction of the air from the sewers; the quantity of air in them is very considerable, probably much larger than most persons are aware of. If it were merely the traction of that known quantity of air as in a main gangway of a colliery, the same data which have been obtained in the ventilation of collieries would apply precisely to the ventilation of sewers; it would become a simple question of how much coal, and how many furnaces would be necessary to exhaust that quantity of air, but the difference between a mine and a sewer is an essential difference; a mine has but one inlet and one outlet, or, if there are more, a mine is generally so arranged that there is, practically, but one inlet and one outlet for the purposes of ventilation; a sewer has thousands and tens of thousands, and probably there are not less than 1,000,000 inlets to the drains and sewers of the metropolis. In the City of London, the information obtained as to the number of the inlets will give you closely the figure to calculate the rest by.

“2580.

“There are 2,810 gullies, and the inlets of all descriptions, such as sinks, rain-water pipes, waste-water pipes, water-closets, and so on, amounting in all to 43,944; there are in the City of London 47,819 inlets of every description to the sewers, in 48 miles of sewers. If you take the length of the sewers in the City at about one-thirtieth of the whole metropolis (I am speaking quite in round numbers), call it 1,500 miles, that will give about 1,435,000 inlets, but allowing for some houses not being drained into the sewers, call it in round numbers 1,000,000, and it is this million of inlets which constitutes one of the difficulties in treating the sewers in the same way as you treat mines; because, unless you can insure that every one of those inlets shall be almost hermetically closed, which is impossible, because their particular object is to let things through, the leakage will be very considerable; there are no data upon which to calculate what it would be, but my impression is, that if it could be done at all, if the leakage did not beat you, 60,000*l.* a year would not pay the cost of ventilating the sewers. It might be 100,000*l.*, and I could not say that it would be effected then.

“2581. Then it comes to this, that it would be impossible to carry out the trapping to the necessary extent, and if it could be carried out the expense would be so great as not to make it worth while to resort to it?—That is my conclusion, in the absence of any well-made experiments.

“2582. From these many openings you cannot approximate in any way to what the expense would be?—It is impossible, for all these openings are continually varying in their condition, and you must bear in mind that, supposing you have got a certain length of sewers, and the exhausting power well arranged in relation to the work to be done, and that there was a decided down-draught established—a down-draught so complete as to be superior to the diffusive power of the gases, you cannot start with a velocity of less than two miles an hour; and suppose the whole district had been so arranged as to have a sufficient exhaustive power, the mere opening of a water-closet, or the enlarging or the putting in of a new drain into a sewer, or the making a hole a foot square, or a servant taking up a bell-trap in a sink, or a sewer-man lifting a side entrance covering, would very much destroy the power of the furnace; and unless you had a gigantic power sufficient to guard against all these casualties, the system could only be a failure. That you may do it there is no doubt, if the expense be a matter of no moment whatever.

“2666. *Mr. Percy.*] How do you propose to ventilate the sewers?—I am utterly at a loss to suggest any better means than are used at present. I have examined the question with the greatest care, and although I am compelled to state that the present

"system is very far from a perfect one, yet every proposition for improving the ventilation is met with hosts of difficulties which really look insignificant until you investigate them, when they become so formidable that you may call them invincible. I am afraid that we must let the stink out into the centre of the causeways, taking care that the sewers are kept in such a perfect condition that all the exuviae shall be hurried through them as quickly as possible. The smells from the gully-holes in the metropolis (not those from the Thames) in many districts, have been perceptibly lessened within the last few years, by greater attention being paid to the internal condition of the sewers, by better regulations of the water supply, and by a proper application of the water in keeping them clean.

"2667. I thought you spoke of a lofty chimney, and a ventilating shaft for the sewers?—As an experiment, it has been suggested that the rain-water pipes of the houses might all be carried up as ventilators, and to see whether it would answer, I carried them up in a few cases as an experiment, and they have been carried up in many of the provincial towns with the same object; they answer the purpose to this extent, that instead of your having the stink in the streets, you have it at the house tops; that is the whole difference; whether the transfer of the stench to the house tops would be any benefit to the health of the population, I must leave to others to decide. If there is any truth in what medical men say, I cannot see that there would be any, but if you take them up 200 or 250 feet, I can conceive that, with the diffusion that would take place, it might be. In all these considerations there are two or three simple facts, which seem to be dropped out of the question, and one is the enormous diffusion which takes place by the constantly moving atmosphere over London, which very much destroys the effect of any stink; thus if the whole bulk of the atmosphere of London is moving with a velocity of five miles an hour over us, say an atmosphere 500 feet high and 10 miles wide, that must have a wonderful effect upon any foul emanations; and if you carry up the shafts and discharge the atmosphere of the sewers, if you could do it at an altitude of 250 feet, it would be diffused, and no harm could take place; but to send the stink up just close to your sleeping apartments, I think cannot improve the health of the inhabitants; but you certainly might ventilate the whole of the sewers of a district by rain-water pipes, instead of by the present system of discharging it at the street level."

In the course of my examination before the Committee, the following questions were put to me:—

"2835. Do you think, before you calculate the expense or the efficacy of burning, you must get the whole length and breadth of your sewers, and all the ramifications?—No, I do not think that; I think I can form a very good general opinion, from what we know of the ventilation of mines, as to what the cost and the effect of such ventilation would be upon sewers. I directed a good deal of attention to that subject some years ago, for the Metropolitan Commissioners of Sewers, and the result of a very long investigation was, that the system of ventilation by furnaces, as a general rule, was altogether impracticable; and if it were practicable, its cost would be so great that it could not be generally used.

"2836. Why was it considered impracticable?—Because it is impossible so to arrange the sewers themselves as channels in mines are arranged with a view to ventilation, it being impossible so to trap the inlets to the sewers as to admit of a flow of sewage into them, and at the same time to prevent the escape of air from the nearest inlets to the furnaces. A furnace ventilating any large district would require to produce a very large volume of air, and to keep up a velocity sufficient to ventilate all the branch sewers, and the drag would consequently be so great through the main, that it would force open any house drain traps or water traps we could form before it would influence the remote branches; but putting those difficulties out of the question, which appeared to us insuperable, we found that the consumption of coal to extract the required quantity of air, supposing that the sewers could be laid out like the channels of mines, would be something enormous."

After having stated, in answer to a question, that I found that the furnace of the clock-tower of the Houses of Parliament was supposed to have been connected with the adjoining district, to the extent of about a quarter of a square mile, and with about six miles and a half of sewers in length, when added together, but that the ventilation had in reality been intercepted by a flap, so that the benefit supposed to be derived therefrom was purely imaginary, I was asked—

"You came to the conclusion that the effect was nothing in that quarter?—Nothing whatever; and having come to that conclusion, the next thing I directed my attention to was, supposing the whole of the air extracted by that furnace was produced from the sewers, and supposing that all the intermediate channels could be stopped, and that it could be directed from the most remote ends of each of the sewers, and distributed over those sewers with the most perfect theoretic accuracy, so as to have a uniform current passing throughout each of the sewers towards that chimney, still the effect upon those sewers would be nothing, and the way in which I prove my statements is this: the total area of the six and a half miles of sewers now connected with the furnace is 713 feet; the total area of the channel through which the air has to be brought from them is

"eight

"eight feet, that is about the 90th part of 713; the air was passing at the rate of 542 feet per minute through the eight feet area. Therefore, if I could divide that over the whole district, the velocity in all those sewers would be six feet per minute, or 1-15th of a mile per hour. But we have shown already that there exist in the sewers, from other causes, velocities amounting to 100 feet per minute upwards, and six feet per minute is, practically speaking, stagnation, and not ventilation."

"3312. Mr. *Stephenson*.] Did you take the velocities inversely to the areas?—Yes.

"3313. You are aware that that is not practically true; the friction in the small passages would be much greater in proportion?—Undoubtedly; but I have cast that overboard, although it is in favour of my argument; in fact, the statement is so glaring, as hardly to require to go into any refinements. Supposing you could obtain theoretic perfection, and all the air produced by this furnace was spread through this district, you would only then get up a velocity of 1-15th of a mile per hour, which is no ventilation whatever, but I have gone further with the inquiry. Whilst we were making our observations on Tuesday, the furnace being kept up was consuming at the rate of eight chaldrons of coke per day, but I will assume that the defective arrangements, that is, the chimney being stopped up, the circuitous connections, and so forth, necessitated a very much larger consumption of fuel to produce the same effect than could be produced, with better arrangements, with a less quantity. I will assume that four chaldrons of coke per day, or half the quantity actually used, would produce that current of air, and that when produced it would effectually ventilate the six and a half miles of sewers, which I think I have shown to be impossible; but supposing it were possible, then I find, that for 1,500 miles of sewers, 230 such furnaces would be required; and the cost of the coke at each of those furnaces would be 876 *l.* per annum, at four chaldrons per day.

"3314. For each furnace?—Yes; giving a total for the whole ventilation of the Metropolitan sewers of 201,480 *l.* per annum upon the consumption of coke, without any labour or incidental expenses. The prime cost of those 230 chimneys and furnaces, and establishments, I have put down at 2,000 *l.* a-piece; that would give 460,000 *l.* or half a million of money.

"3315. Sir *John Y. Buller*.] You said irrespective of labour?—Yes. I have only to add, that my inquiry on this occasion has led me to the same result to which I have been led by extensive inquiries on many previous occasions, namely, that the sewers of London can never be effectually ventilated by furnaces constructed for that purpose; and I am only sorry that Mr. Gurney was not with us to see these experiments tried. It would have been more satisfactory if his engagements had enabled him to be present."

Mr. Haywood and Mr. Hawkesley also took part in the experiments, spoke to their fairness, and confirmed the views above expressed; and the Committee, after careful consideration, reported in the following terms—

"11. Your Committee, however, thought it was desirable that they should investigate that part of Mr. Gurney's plan which relates to the burning of the gases in the sewers, and the more so, because that process has been practised by Mr. Gurney with success in regard to sewers in the immediate vicinity of the Houses of Parliament.

"12. But the inquiries made by your Committee have satisfied them that this process, though it may be successful as to sewers within a short distance of the furnace by which the gases are to be burnt, could not be successfully applied to the wide range of the Metropolis. There are such a vast number of unavoidable openings in the immense ramifications of the sewers of the Metropolis, and in the house-drains which communicate with those sewers, that the air which would be drawn out from any part of a great sewer over which a furnace might be erected, would be replaced, not by the offensive gases in the whole network of sewers and drains communicating with the sewer over which the furnace was placed, but in a great degree by atmospheric air rushing down through openings near to the furnace, and thus the gases in the further parts of the sewers and house-drains would remain unaffected by the action of the furnace.

"13. This furnace system, therefore, even with the improvements introduced by Mr. Gurney, though possibly efficacious for a particular and limited area, could not be relied upon for the general ventilation and purification of the sewers of the Metropolis at large."

By direction of the late Metropolitan Commissioners of Sewers, I had, in 1855, visited some of the best ventilated coal mines in the north of England, and in South Wales, with a view, if possible, to the application of some more perfect system of ventilation to the London sewers. I entered carefully into the comparative advantages of ventilating fans and furnaces, and into the expenditure of fuel requisite for the extraction of a given quantity of air under various conditions; but I found that, whilst it was not difficult to conduct a current of air through the continuous passages of a mine having but one inlet and one outlet, and a tolerably uniform sectional area,—I found that such a system could not be applied to sewers. The areas of the branch sewers discharging into any one main

sewer are probably much more than 100 times its capacity, therefore, even supposing it were possible that they could all be hermetically sealed at all points, excepting the extreme ends, a velocity of current equal to 100 miles an hour (which is next to impossible), would have to be obtained, in order to secure a current of one mile per hour in each of the branch sewers. But it is not possible to obtain such a condition of things, and this difficulty lies at the root of all proposed modes of ventilation by extracting the foul gases by furnaces, fans, or such other appliances, viz., that sewers have inlets at every house-drain, every gully, and every branch junction, and the quantity of air which may be extracted at the outlet is readily supplied at the nearest inlets, and the effect is, therefore, not felt in the sewer at any great distance from the point at which the air is exhausted.

The subject is one which has, from time to time, engaged the attention of most of the surveyors of London and provincial towns, and upon which so many suggestions have been made; many of these have effected some local improvement, but the reasons above stated have baffled the successful application of their inventions to any general system of sewers. I have *in extenso* the reports of my assistants, Messrs. Lovick, Grant, and Cooper, as those gentlemen have, for many years, devoted much attention to the subject, and I have thought it desirable that they should fully express their own views on a subject of so much importance.

Mr. Lovick has fixed 11 of the charcoal deodorizing boxes in the shafts of various sewers in different parts of his district, but he considers the period has been too short, and the weather not the best suited for the test, to enable him to judge of the effects that might be anticipated from a large adoption of the plan. He, however, fears that the condition under which the gases in the sewers have to be attacked has not been sufficiently taken into consideration, the reasoning upon the efficacy of charcoal having been founded upon experiments with dry charcoal introduced into dry gas, whereas, the sewer gases are always in a high state of saturation.

Mr. Grant is also of opinion that the charcoal trays have not been tried long enough to allow of a sound judgment being formed of their efficacy; and that, to arrive at the true value of the plan, he considers it would be necessary not only to test the air, chemically, both above and below the trays, but also the currents of air in the same sewer with and without the trays.

Mr. Cooper states his opinion that the charcoal has the effect of absorbing or neutralising the gases, but that it obstructs the free ventilation of the sewers, and that, consequently, to adopt the system to any extent, the number of shafts would have to be doubled to secure sufficient ventilation for the safety of the men in the sewers. In the opinion of all, the changing of the layers of charcoal, and the efficient maintenance of the framework, &c., would be costly.

#### CONCLUSIONS.

THE experience which has been obtained from the numerous experiments and investigations which have, at various times, been instituted on the subject of sewer ventilation, leads to the conclusions—

1st. That sewers cannot be ventilated like mines, which have but one inlet for the air at one end, and one outlet at the other, so that the current can be readily kept under control.

2nd. That whilst the connection of sewers with furnaces considerably improves the ventilation of the sewers in the immediate vicinity, it is questionable whether a large portion of the noxious gases evolved is actually consumed thereby; and that such a mode of ventilation is not applicable to the general ventilation of the metropolitan or any other extensive system of sewers.

3rd. That steam jets, fans, and other mechanical contrivances, worked by steam power, do not affect the ventilation as satisfactorily as furnaces with the same expenditure.

4th. That the connections of sewers with the rain-water or other pipes, carried to the tops of houses, have in some instances been attended with advantage, more particularly at the upper ends of sewers in the high districts, where the flow of water is not great, but that this should be done only where there is no fear of the gases descending again into the chimneys and windows of such houses, and cannot, therefore, be generally adopted.

5th. That ordinary gas pipes are not of sufficient bulk, and could not be constructed with a sufficient internal area to admit of free ventilation of the sewers through them, even were the lamps kept burning night and day.

6th. That charcoal ventilators have not yet been tried upon a sufficiently comprehensive scale to admit of a very decided opinion being pronounced with respect to them, but that present experience seems to indicate that they tend to retard the effective ventilation of the sewers, and should therefore be cautiously applied.

7th. That ventilation by air-shafts, from the top of the sewer into the centres of the streets, though not perfect, is a great improvement upon the old system of ventilation through the gully-gratings at the sides of the streets, as the gullies allow the accumulation of the foul gases in the upper portions of the sewer, which are driven in  
large

large masses, under certain changes of atmosphere, into the streets, whilst the air-shafts prevent such accumulations.

8th. That it is probable most of the above modes of ventilation may, under favourable circumstances, be applied with advantage in particular cases; but that the most efficacious and most universally applicable mode of preventing the escape of noxious gases, is so to construct the sewers that a continuous flow shall be kept up in them, and to provide them with a sufficiently copious supply of water, that the decomposing matter within them shall be diluted, and instantaneously removed, and not allowed to settle and ferment in the sewers. Much improvement has already been effected in the ventilation of the London sewers, by the abolition of the tide-locked and stagnant sewers, and much more may yet be accomplished by the introduction of a more copious supply of water; a desideratum also otherwise so greatly needed for the necessities and comfort of the inhabitants of the metropolis.

#### VENTILATION OF SEWERS.

EXTRACT from the Board Minutes, 27 April 1866 (No. 4).

RESOLVED, "That the engineer do report, in writing, what experiments have been made during the last 12 months, by himself and the assistant engineers, with respect to the ventilation of the sewers of the metropolis, and what has been the result of such experiments."

IN compliance with the above resolution, I beg to report that my attention, during the last 12 months, has been more particularly directed to the consideration of the four following modes of preventing the escape of noxious effluvia from sewers:—

- 1st. By the use of charcoal ventilating-grates.
- 2nd. By ventilation through chimney-shafts and furnaces.
- 3rd. By ventilation through pipes carried to the tops of buildings, &c.
- 4th. By diluting the sewage with water.

With a view of testing the efficacy of charcoal as a deodorising agent, I have had experiments made by fixing to the ventilating-shafts of certain of the main sewers, in lieu of the open and ordinary air-gratings, iron boxes having grated apertures in one half, and in each box are placed four iron trays with net-work bottoms, covered with layers of broken charcoal. Twenty-two of these boxes, with the requisite fittings, have been placed in shafts in the following streets, on the north side of the river:

|                                              |                                             |
|----------------------------------------------|---------------------------------------------|
| Grove End-road, St. John's-wood.             | Montague-street, by Russell-street.         |
| Albion-road, Hammersmith.                    | Stafford-street, by Marylebone-road.        |
| Tottenham Court-road, by Tudor-place.        | Albany-street, by Regent's-park Barracks.   |
| Ditto - ditto by Euston-road.                | Endell-street, by Castle-street, Long Acre. |
| Ditto - ditto by New Oxford-street.          | Horseferry-road, Westminster.               |
| Robert-street, by Hampstead-road.            | Pelham-street, by Pelham-crescent.          |
| Page-street, Westminster.                    | Hunt-street, Whitechapel.                   |
| Great Russell-street, by the British Museum. | King John's-court, Three Colt-street.       |
| Smith-street, by Queen's-road, Chelsea.      | Goswell-road, by Great Sutton-street.       |
| Cleveland-street, by Carburton-street.       | Ditto - by Pear-tree-street.                |
|                                              | Queen's-road, Dalston, by Lavender-grove.   |
|                                              | Ditto - ditto by Albion-road.               |

From observations made in Page-street, Westminster, steam and effluvia were found issuing from the sewer at one of the ordinary ventilating gratings, at the intersection of Johnson-street with Page-street, a short distance below the charcoal trays placed in the adjoining ventilating-shaft; whilst, through the charcoal, there was a very slight, if any, escape perceptible; but upon opening the side-entrance flap opposite the charcoal tray, the steam and effluvia escaped in considerable quantities. An examination within the sewer showed that it contained steam, mixed with foul gas, and that there was a decided air-current in the sewer, not through, but past the charcoal deodorizer, in a direction

contrary to the ordinary flow of the sewage. On lifting the charcoal trays out of the ventilator, so as to permit a free outlet for the gases in the sewer, a similar escape of steam and foul vapour was noticed, as in the case of the air-shaft at Johnson-street and the side-entrance above referred to. The air in the sewer in Tottenham-court-road, where three of the charcoal deodorizers have been placed, has also been observed from time to time, and, like that in the Page-street sewer, its ventilation was found to be imperfect. Similar observations, with the same results, have been made in the sewers in the Goswell-road and Queen's-road, Dalston.

On the south side of the river two of the charcoal boxes, with the trays and fittings complete, have been fixed in the ventilating shafts of the sewer in the Spa-road, Bermondsey. One has also been placed in a shaft of the sewer in Prospect-place, and one in that of the sewer in Drummond-road, Bermondsey. Upon the Low Level Main Inter-cepting line of sewer trays have been adapted to seven of the existing ventilating gratings, five being in High-street, Putney, one in Wandsworth-lane, by High-street, and one in the Old Kent-road, near Ossory-street. The results of the observations made in these were also similar to those obtained on the north side of the river, namely, that whilst there is no complaint of foul smell emanating through the grating, the charcoal appears to have the effect of diminishing the current of air through the ventilators, and of confining it to the sewers, so that if the system of ventilation by means of deodorizers were generally adopted, it would certainly become necessary, for the safety of the men working in the sewers, to greatly increase both the number and size of the shafts. It has been found requisite in wet weather frequently to renew the charcoal which, even though protected from the rain, is affected by the damp atmosphere.

In order the more satisfactorily to test the efficiency of this mode of ventilating sewers, I have, in conjunction with Dr. Miller, professor of chemistry, instituted a more complete and comprehensive experiment on a continuous line of sewer. Dr. Miller was of opinion that such an experiment could not be satisfactorily made except in hot weather, and, consequently, his observations were for a time delayed, and will probably extend over the present summer. The sewer selected for the purpose is that portion of the King's Scholars' Pond Sewer extending from Park-road, Regent's Park, along the Avenue-road, &c., to the "Swiss Cottage," Saint John's Wood, a length of between 4,000 and 5,000 feet. The whole of the gullies on this piece of sewer have been trapped, a valve has been fixed at its upper end, and deodorising boxes of an enlarged size, with the necessary trays and fittings, are placed in the several air-shafts. These preliminary operations completed, we have been, and are still engaged in, ascertaining the condition of the air in the sewer, the velocity and direction of its air-current, and its temperature, by daily observations. I am at present unable to report the result of these observations, but our object is to ascertain the effect of the charcoal upon the atmosphere within and above the sewer, both in its mechanical and chemical action.

Experiments in the plan of ventilation by means of an air-flue connecting the sewer with the high chimneys of factories, or other buildings, have been tried in two localities, namely, at Woolwich Dockyard and at the Deptford Pumping Station. At the former place the Southern Outfall Sewer is ventilated through air-flues connected with two of the furnace chimneys, and the same sewer is also connected by a flue with the chimney-shaft at Deptford Pumping Station.

These connections produce a considerable draft up the chimneys from the sewer, and the effect has been considered beneficial by those residing in the immediate locality; but we were unable to get air-shafts of sufficiently large diameter to command the full benefit which might otherwise have been obtained.

Another plan, namely, the connection of a sewer by means of air-flues with the catch-pits of furnaces, has been tried under similar conditions to the former plan, and with a like amount of success, at the Deptford Pumping Station, Crossness Pumping Station, Woolwich Dockyard, and at Mr. Lyon's Bleaching Works, Old Kent-road. This plan has the advantage over the former, of decomposing the foul air by passing it through the fire; but the draft in the sewer is not so strong as when the flue is connected directly with the shaft, and it is subject to interruption when the doors, or plates, in front of the ashpit are opened for the removal of ashes, or for other purposes. The most perfect examples of this plan are in operation at the Board's Deptford and Crossness Pumping Stations, for the ventilation of the Low Level and Outfall Sewers. At Woolwich Dockyard, and at Mr. Lyon's Works, a modification of the plan is adopted, at the former for ventilating the Outfall Sewer, and at the latter for the White Post-lane Sewer. Both of these connections are upon sufferance only; and great difficulty has been experienced in getting the consent of the owners of other factories to such connections being made with their furnace-shafts; moreover, in many parts of the metropolis there are no such factories.

Past experiments have demonstrated that the establishment of a sufficient number of furnaces for the purpose of ventilation, would be so enormously costly that this plan does not appear to be generally applicable, though it might be adopted with great advantage in localities where existing furnaces can be made available. A further experiment is now in hand, with a view to ascertain more definitively the cost and effect of sewer ventilation by gas-burners.

The third plan, the carrying to a considerable altitude up the sides of houses, or other buildings, pipes from the crown of the sewer, has been tried in the following localities on the

the south side of the river, advantage having been taken, in several cases, of favourably situated rain-water pipes:—

Canterbury-row, corner of Old Kent-road, 6-inch pipe carried above level of roof.

Canterbury-row, near White Post-lane, 6-inch pipe carried eight feet above top of parapet of railway arch.

White Post-lane, two 6 inch pipes 10 feet above the surface of the land in two places.

No. 19, White Post-lane, 6-inch pipe carried above level of roof.

No. 74, Albert-street, Deptford, 4-inch pipe carried above parapet wall.

|                             |       |                                                   |
|-----------------------------|-------|---------------------------------------------------|
| No. 47, Albert-street       | - - } | Pipes from sewer connected with rain-water pipes. |
| Baker's shop, Victoria-road | - - } |                                                   |
| Chapel, Victoria-road       | - - } |                                                   |

North Pole-lane, Greenwich, two 5-inch pipes carried up in angle of railway abutment, to within 18 inches of parapet wall.

Walton's Wharf, Ravensbourne-street, Greenwich, two 5-inch pipes carried above level of roof.

Nos. 2 and 12, Ravensbourne-street, two 5-inch pipes carried above level of roofs.

No. 2, Norway-street, Greenwich, two 6-inch pipes carried above level of roof.

Boiler Factory, Thames-street, Greenwich, two 5-inch pipes carried above shed in yard.

Thames-street, corner of Horseferry-road, two 5-inch pipes above level of roof.

Corner of Cross-street and Thames-street, two 5-inch pipes carried above level of roof.

Trinity College, Greenwich, two 6-inch pipes carried up side of garden wall.

Corner of Chester street and a new street, Greenwich, two 5-inch pipes carried above level of roof.

Corner of Chester-street and Pelton-road, two connections with rain-water pipes.

In carrying out this plan care has, in every case, been taken that the top of the pipe should be above the level, and at a distance from the attic or upper windows of the buildings, and in none of the foregoing instances has any complaint been made by the residents of smell or inconvenience arising therefrom. Great difficulty was, however, experienced in getting the consent of the majority of the occupiers of the houses to such an arrangement, arising from the fear that the foul gases, under certain conditions of the atmosphere, would descend the chimneys or enter the upper windows; and this fear would, in my opinion, render a universal adoption of the plan impracticable, otherwise the cost of maintenance would be trifling. The current of air through the pipes appears to be constant, having the same appreciable effect in the sewer as an ordinary ventilating-shaft. At the rear of the Bounty Office, Greenwich Hospital, a brick shaft, 30 feet high, 14' x 9' in the clear, has been erected over the sewer, producing in the latter a current of air equal in velocity to 300 feet in four minutes.

With regard to the fourth plan, the dilution of sewage with water, it is difficult to determine what minimum quantity of water will sufficiently dilute sewage to prevent the escape of the noxious gases therefrom, inasmuch as the products of the gases vary considerably in different sewers, and the varied conditions of the atmosphere, the rapidity of the currents, and other circumstances, more or less affect the process of decomposition, and the gravity of the sewer gases; but taking the sewage of the north side of the river at 62½ millions of gallons per diem, and assuming this to be diluted with an equal volume of water for 12 hours per diem (for six months in the year), in which time probably two-thirds of the sewage would pass through the sewers, the necessary addition to the present water-supply would be about 42 millions of gallons per diem.

I have endeavoured to ascertain how far this quantity could be obtained from the present London Water Companies, and have, with this object, communicated with them, and in reply to my inquiries I am informed that the Chelsea and the Grand Junction Water Works Companies estimate that they could each deliver, daily, during dry weather, one million gallons per diem, at the rate of 6 *d.* per 1,000 gallons: the West Middlesex Waterworks Company from 500,000 to one million gallons, at the same rate of charge, and the East London Water Works Company, one million gallons at 9 *d.* per 1,000. The New River Company state that they could afford no supply from their existing mains, but would be prepared to lay down new and separate mains, and fix their charge, as soon as they are informed of the exact points of discharge and the quantity required at each. The Regent's Canal Company state that, during the past year, they have erected five sets of pumping machinery, with a view to increase, on the lower levels of their navigation, the supply of water given by their reservoirs; and that by an extension of similar machinery along the line of the Canal to its summit at Paddington, the

Company would be enabled to deliver a large quantity of water at different points, and probably sufficient for the purpose of cleansing the metropolitan sewers, at a charge of not less than 3*d.* per 1,000 gallons. The Grand Junction Canal Company can afford no supply during the summer months.

It will thus be seen that, with the exception of the Regent's Canal Company, whose statement is very vague, and from whom I have at present been unable to get a more definite reply, but a small proportion of the quantity of water requisite for the general dilution of the sewage could be obtained from the existing Companies; and assuming that the Regent's Canal Company could supply the whole quantity required, unless it could also be used for domestic or other purposes, the cost would be too great to admit of its being purchased upon such terms for flushing sewers alone.

On the south side of the river, the Kent, the Southwark and Vauxhall, and the Lambeth Water Companies could supply a total daily quantity of about six million gallons of water, but the sewage there is so much less in quantity, and the sewers of the district are so favourably situate for getting supplied from the Thames and from the upper portions of the Effra and Falcon Brook, that the pumping necessitated at the outfalls forms almost the only limit to the means of flushing the greater portion of those sewers.

In order to perfect this mode of cleansing the metropolitan sewers much has already been done by rendering the flow in the main sewers continuous instead of intermittent, as heretofore; and much yet remains to be done in the way of removing deposit accumulated during many years, re-constructing old and defective sewers, and so connecting and arranging the local sewers as to form a complete network, through which the water could be under perfect command and made to flow, by various routes, to the outlets.

Engineer.

## APPENDIX (D.)

(P. 40.)

Metropolitan Board of Works, Spring Gardens, S.W.,  
24 March 1866.

Sir,

MY colleagues have taken note of the Thames Navigation Bill, brought in by the Board of Trade, by which it is proposed to extend the jurisdiction of the Conservators of the River, and they have requested me to submit their grounds for urging the propriety of this Board being represented on the Conservancy.

You are possibly aware that we applied, when "The Thames Conservancy Act, 1864," was in Committee, for such representation, but objection was taken to an increase in the number of the Commissioners, and we were unsuccessful. Her Majesty's Government having now proposed to increase the number of Commissioners, that objection falls to the ground.

I may observe that, passing as the River Thames does, through our whole territory, from west to east, and our flood-water outlets discharging into its bed, we have necessarily a concurrent, and sometimes a conflicting, interest in the government of the river.

I may further remind you, that the Legislature having entrusted to us the reclamation of the mud-banks on both sides, and the construction of an embankment wall, we are necessarily brought into contact with the Conservancy Commissioners on points on which our opinions are occasionally divergent. Considerable difference of opinion has prevailed between this Board and the Commissioners upon the construction of certain clauses in the Thames Embankment Act, and the manner in which practical effect should be given to those clauses by this Board and their contractors. A representation of this Board at the Conservancy Commissioners' would have very much tended to diminish the divergence of our views, and to have ensured more harmonious co-operation.

We have, moreover, a very direct and cogent interest in the drainage of the sewers on the banks of the stream above London. We have, at considerable expense, diverted all the sewage from flowing or passing into the Thames, within our jurisdiction, while at present no authority is exercised to prevent Richmond, Twickenham, Kingston, Brentford, Hounslow, Walton, Staines, Eton, Windsor, Reading, Oxford, and other places, from draining into the Thames, to the injury of the river and pollution of our water-supply. Surely, if the private interests of the wharfingers and boat companies are worthy of representation on the Conservancy Board, the three millions of metropolitan ratepayers, represented by the Metropolitan Board of Works, are deserving of some consideration. Nor can my colleagues conceive on what principle the City of London, covering one square mile, in area the smallest, and in population by no means the largest, of the several constituent bodies returning members to this Board, should have a very numerous representation at the Conservancy, and this Board itself be wholly ignored.

Our solicitor has drawn attention to sections 2 and 47 of the Bill, which he states might have

have the effect of limiting the control of the Conservators over the inflow of sewage to that part of the river which is between Staines and Cricklade. It may, perhaps, be worth while to call the draughtsman's notice to the point, in case a strict legal construction might unnecessarily limit the Conservators' authority.

I am, &c.  
(signed) J. Thwaites,  
Chairman of the Metropolitan Board of Works.  
Right Hon. Milner Gibson, M.P.,  
President of the Board of Trade.

Sir,  
Board of Trade, Whitehall, 7 April 1866.  
I AM directed by the Board of Trade to acknowledge your letter of the 24th March, on the subject of the Thames Navigation Bill, now before Parliament, and submitting the grounds upon which the Metropolitan Board of Works consider that they should be represented on the Conservancy; and in reply, I am to acquaint you that the suggestion contained in your letter will receive careful consideration from the Board of Trade; but that the point raised by your letter must be decided by the Select Committee to whom the Bill will be referred, and before whom the Metropolitan Board of Works will no doubt appear.

Sir John Thwaites,  
Chairman of the Metropolitan Board of Works,  
Spring Gardens.  
I am, &c.  
(signed) T. H. Farrer.

APPENDIX (E.)

(p. 57.)

METROPOLITAN IMPROVEMENTS.

Thames Embankment, North, and Mansion House Street.

Superintending Architect's Department, Spring Gardens,  
23 June 1866.

UNDER the statutes obtained in 1862 and 1863, for effecting these Improvements, the Board have made purchases of property and interests to 31st March last, as follows:

|                     | Claims.   |    |    | Settlements. |    |    |
|---------------------|-----------|----|----|--------------|----|----|
|                     | £.        | s. | d. | £.           | s. | d. |
| For the Embankment— |           |    |    |              |    |    |
| 11 Freeholds, &c.   | 153,370   | —  | —  | 124,258      | —  | —  |
| 29 Leaseholds, &c.  | 157,887   | 11 | 1  | 87,116       | 10 | —  |
| £.                  | 311,257   | 11 | 1  | 211,374      | 10 | —  |
| For the New Street— |           |    |    |              |    |    |
| 140 Freeholds, &c.  | 1,055,590 | 1  | 4  | 953,211      | 6  | —  |
| 52 Leaseholds, &c.  | 128,485   | 6  | 1  | 105,113      | —  | —  |
| 5 Yearly tenants    | 648       | —  | —  | 910          | —  | —  |
| £.                  | 1,184,723 | 7  | 5  | 1,059,234    | 6  | —  |

The Expenditure and Receipts to 25th March were as follows:

|                                          | £.        | s. | d. |
|------------------------------------------|-----------|----|----|
| Paid for property                        | 831,049   | 4  | 10 |
| Compensations                            | 80,011    | 14 | 8  |
| Professional charges                     | 26,467    | 1  | 8  |
| Wages                                    | 3,889     | 4  | 2  |
| Establishment charges and other expenses | 33,764    | 16 | 6  |
| Incidental expenses                      | 10,278    | 13 | 2  |
| Contractors                              | 401,858   | 4  | 5  |
| Interest on temporary loan               | 57        | 10 | 8  |
| Carried forward                          | 1,387,376 | 10 | 1  |

|                                                                               | £.        | s. | d. | £.        | s. | d. |
|-------------------------------------------------------------------------------|-----------|----|----|-----------|----|----|
| Brought forward - - -                                                         | -         | -  | -  | 1,387,376 | 10 | 1  |
| Coal and Wine Duties and interest to 1865 - -                                 | 710,526   | 6  | 6  |           |    |    |
| Ditto - - to 31st March 1866 - -                                              | 52,019    | 14 | 8  |           |    |    |
| Loan from National Debt Commissioners for Man-<br>sion House Street - - - - - | 200,000   | -  | -  |           |    |    |
| Ditto Embankment - - - - -                                                    | 500,000   | -  | -  |           |    |    |
| Imperial Assurance Office for damage by fire -                                | 1,201     | -  | 4  |           |    |    |
| Rents—                                                                        |           |    |    |           |    |    |
| Northern Embankment - - £. 4,295 14 2                                         |           |    |    |           |    |    |
| New Street - - - - 3,226 12 9                                                 |           |    |    |           |    |    |
|                                                                               | 7,522     | 6  | 11 |           |    |    |

| Interest from Southern Embankment Account, 1865                               | 205       | 8  | 10 |           |    |    |
| Sale of old materials - - - - -                                               | 301       | 6  | 6  |           |    |    |
| Plans sold to contractors - - - - -                                           | 110       | -  | -  |           |    |    |
|                                                                               | 1,474,386 | 3  | 9  |           |    |    |
| Return of prices of property by                                               |           |    |    |           |    |    |
| Court of Chancery - - - £. 18,125 - -                                         |           |    |    |           |    |    |
| Temporary loan from South Em-<br>bankment Account - - 50,000 - -              |           |    |    |           |    |    |
|                                                                               | 68,125    | -  | -  |           |    |    |
|                                                                               |           |    |    | 1,542,511 | 3  | 9  |
| Balance, 25th March 1866 - - - - -                                            | £.        |    |    | 155,134   | 13 | 8  |

The above abstract includes all the funds for the Northern Embankment and new street, as they are only separated in the present audit for 1866.

|                                                           | £.        | s.        | d.   |
|-----------------------------------------------------------|-----------|-----------|------|
| For the Northern Embankment, the payments amount to - - - | 1,105,885 | 14        | -    |
| For Mansion House Street, about - - - - -                 | 273,490   | 16        | 1    |
| For the Southern Embankment - - - - -                     | 8,000     | -         | -    |
|                                                           | £.        | 1,387,376 | 10 1 |

Besides other funds, to be settled by arbitration with the Metropolitan District Railway Company, for land required for stations on the Embankment, the Company is bound to pay to the Board, under their Act of 1864, a minimum sum of 200,000 £ in respect of the right given by that Act to carry the railway through and under the land acquired and made for the Thames Embankment and new street.

#### Thames Embankment, South.

The statutes for this improvement were obtained in 1863 and 1864, and the property and interests purchased since July 1865, to 31st March last, were as follows:—

|                                      | Claims. |         |      | Settlements. |    |    |
|--------------------------------------|---------|---------|------|--------------|----|----|
|                                      | £.      | s.      | d.   | £.           | s. | d. |
| 11 Freeholds and copyholds - - - - - | 26,666  | 4       | -    | 24,090       | -  | -  |
| 14 Leaseholds, &c. - - - - -         | 116,076 | 10      | 5    | 85,885       | -  | -  |
|                                      | £.      | 142,742 | 14 5 | 109,975      | -  | -  |

The Expenditure and Receipts to 25th March were as follows:—

|                                                                                     | £.      | s.     | d.  |
|-------------------------------------------------------------------------------------|---------|--------|-----|
| Reimbursement of loan from Thames Embankment, North, account and interest - - - - - | 10,205  | 8      | 10  |
| Transfer to ditto - - - - -                                                         | 50,000  | -      | -   |
| Establishment charges - - - - -                                                     | 2,175   | 17     | 10  |
| Professional charges - - - - -                                                      | 634     | 10     | 7   |
| Contractor - - - - -                                                                | 7       | 19     | 7   |
| Rent - - - - -                                                                      | 425     | -      | -   |
| Wages - - - - -                                                                     | 77      | -      | 6   |
| Incidental expenses - - - - -                                                       | 27      | 15     | 8   |
|                                                                                     | 63,553  | 13     | -   |
| Received loan from National Debt Commissioners - - - - -                            | 100,000 | -      | -   |
| Balance, 25th March - - - - -                                                       | £.      | 36,446 | 7 - |

*Whitechapel Improvement.*

The Act under which this work is to be accomplished was obtained in 1865; and, up to 31st March, the Board had agreed to settle the following claims for properties and interests:—

|                            | Claims. |    |    | Settlements. |    |    |
|----------------------------|---------|----|----|--------------|----|----|
|                            | £.      | s. | d. | £.           | s. | d. |
| 3 Freeholds - - - - -      | 28,666  | -  | -  | 26,438       | -  | -  |
| 4 Copyholds, &c. - - - - - | 19,042  | -  | -  | 16,380       | -  | -  |
| £.                         | 47,708  | -  | -  | 42,818       | -  | -  |

*Removal of Middle Row, Holborn.*

The same statute as for Whitechapel Improvement enabled the Board to widen Holborn where it is narrowed by the ancient block of buildings called Middle-row. The property is under purchase, and the following claims are settled:—

|                       | Claims. |    |    | Settlement. |    |    |
|-----------------------|---------|----|----|-------------|----|----|
|                       | £.      | s. | d. | £.          | s. | d. |
| 3 Freeholds - - - - - | 15,066  | 10 | -  | 13,750      | -  | -  |
| 1 Leasehold - - - - - | 2,500   | -  | -  | 2,200       | -  | -  |
| £.                    | 17,566  | 10 | -  | 15,950      | -  | -  |

*Southwark Street.*

During 6½ years, from 1858 to 1865, the amount expended on this new street, and the funds received, were as follows:—

|                                                                                  | £.      | s. | d. |
|----------------------------------------------------------------------------------|---------|----|----|
| Properties and interests purchased - - - - -                                     | 476,222 | 11 | 2  |
| The attendant expenses were—                                                     |         |    |    |
| Professional and law charges - - - - -                                           | 27,927  | 15 | 6  |
| Works for subway, sewer, paving, &c. - - - - -                                   | 60,644  | 2  | 9  |
| Sundry office expenses and wages - - - - -                                       | 2,355   | 2  | -  |
| Incidental expenses - - - - -                                                    | 805     | 2  | 3  |
| Interest paid on temporary loans - - - - -                                       | 341     | 19 | 2  |
| Establishment charges - - - - -                                                  | 14,333  | 18 | 6  |
|                                                                                  | 582,630 | 11 | 4  |
| The funds received were—                                                         | £.      | s. | d. |
| Loans - - - - -                                                                  | 370,000 | -  | -  |

There are still 29 plots of surplus land unlet. Those that are under leases for 80 years, and a few at shorter terms, yield a rental of 6,904 £.

Provision is made for the repayment of money borrowed, in the rating accounts of the Board; and a new contract was completed with the Bank of England in August 1865, by which 300,000 £. is advanced for four years, at 4½ per cent.

The balance of the above loan remaining due is 27,200 *l.* The annual instalments are paid out of general rates.

*The New Street from Oxford Street to Charing Cross.*

The Railway Companies interested in the Act of 1864, for the making of a railway from the North Western Railway to Charing Cross, and the opening up of the thoroughfare in continuation of Tottenham Court-road, 60 feet wide, have recently concurred in arrangements for the execution of the railway works. The street works will be subject to the approval by the Board.

*Thames Embankment, North, Approaches.*

During the present Session of Parliament, the Board have applied for several Improvement Acts, one of which proposes to amend the Embankment Act of 1862. By this Bill the Board propose to repeal certain enactments which restrained the disposal of surplus lands made up for the Embankment, and would substitute other powers for the making of the approaches.

The intended streets would connect with the Embankment—

1. Charing Cross, Strand.
2. An extension of Whitehall-place.      )
3. An extension of Craven-street, Strand.
4. A branch street to Whitehall-yard.
5. Another branch street to Scotland-yard.
6. The widening and extension of Northumberland-street.
7. A branch street under the Charing Cross Railway Bridge.
8. An extension of Villiers-street, Strand.
9. A new street to join the Strand, at Wellington-street intersection.
10. A new street from Beaufort Wharf, in the No. 9 street to Waterloo Bridge.

In all these streets there are to be subways and all other necessary works, and with the requisite powers for use and maintenance.

The estimate for these works is 542,275 *l.*, and the returns 262,575 *l.*, making the net cost 279,700 *l.*, and a Select Committee on Local Taxation in the Metropolis have reported favourably regarding the financial proposals, and that the Coal and Wine Duties should be continued for a further period of five years, aided by an Improvement Rate on the Metropolitan Rental.

*Thames Embankment (Chelsea).*

A second Bill would enable the Board to construct an Embankment from Chelsea Hospital to Battersea Bridge in continuation of the present Embankment in front of the gardens of the hospital, and to execute all necessary works, and form a roadway on the Embankment.

The estimate for this improvement is 251,000 *l.*, with returns 45,000 *l.*, and a net cost of 206,000 *l.*, and there would be power to borrow to the extent of 250,000 *l.*

*Park Lane Improvement.*

The Board have revised the proposal for widening Park-lane, Piccadilly, by the removal of certain houses on the western side, and setting back the garden boundary as far as Stanhope Gate.

The estimate for this work is 105,000 *l.*

*Kensington Improvement.*

By a fourth Bill, which has been passed into law, the Board have obtained powers to widen the High-street at Kensington, and to form certain new streets in that locality. Thus the narrow bend in the road, opposite the church, will be removed, King-street will be widened and extended, and a new street made from Young-street to King-street.

The estimate for this work is 154,750 *l.*, with a return of 66,750 *l.*, leaving a net cost of 88,000 *l.*

*New Parks.*

The Board have agreed upon the plans for laying out Finsbury Park, at Islington; and, under the powers conferred by the statute authorising the park, they have allotted 20 acres of the 120 acres purchased for the park, for the purpose of the erection of houses, on the western side, next the embankment of the Great Northern Railway. The expenses of the land, and the laying out and enclosure thereof, will thus be considerably lessened to the public, and a sufficient open space will remain for park purposes.

The expenses incurred under the Statute, and the funds received, have been as follows:—

|                                                                                 | £.     | s. | d. |

#### *Railway and other Bills in Parliament.*

The Bills of a local nature affecting the metropolis, during the Session of 1866, were referred to this Department by the Board for examination, in regard to interference with the lines of frontage of buildings in streets, and also the widths and gradients of streets. After a careful examination of all the Bills and plans, a report on the matters requiring attention was submitted to the Committee of the Board on the Bills, and by petition, and otherwise, the public interests were protected, as far as was practicable.

The General Railway Clauses Bill, referred to in the Report in 1865, was again introduced this year, and has been amended in Committee of the House to meet many of the requirements of the public. It is proposed by it to confer great powers on this Board in behalf of the public interests, and it is hoped that the delays arising from the changes of Ministers may not imperil the passing of this useful Statute.

By a further measure, promoted by private Members, but approved by a Select Committee of the House of Commons, it is proposed to give the Board large powers, to enable them to remove dilapidated and unhealthy houses, and erect, or concur with others in erecting, dwellings for artisans and labourers combining all the sanitary arrangements of healthy dwellings, and to open up close neighbourhoods where the working classes reside. A statute has also been passed to enable the Public Loan Commissioners to lend money at a low rate of interest for the promotion of such undertakings. The results hitherto shown by many years' experience of several societies and individuals prove that the public health is much enhanced by the improved arrangements in such dwellings, and that the finances give a profitable dividend on the undertakings. Such dwellings can be erected at from 40 l. to 46 l. per room, and let at 2 s. and 2 s. 6 d. per room, or 4 s. for two rooms, and 5 s. for three rooms, weekly.

Another measure is in progress in Parliament, and has been amended by a Select Committee, to extend the powers of local authorities for the removal of nuisances, and prevent the spread of infectious diseases under severe penalties.

*Local Improvements.*

The contributions of the Board in aid of local improvements during nine years have amounted to 54,474*l.*, or about one-third of the cost, exclusive of legal and other expenses. These grants are made mostly for the widening of thoroughfares of general traffic by setting back the fronts of buildings on the occurrence of the rebuilding of premises. During the past year the following were approved:—

| Whole Cost. |    |    |                                                                   | Contribution. |    |    |
|-------------|----|----|-------------------------------------------------------------------|---------------|----|----|
| £.          | s. | d. |                                                                   | £.            | s. | d. |
| 15,000      | —  | —  | Carey-street, Chancery-lane - - - - -                             | 5,000         | —  | —  |
| 8,000       | —  | —  | Lombard-street, City - - - - -                                    | 4,000         | —  | —  |
| 450         | —  | —  | Old Broad-street, Nos. 11 and 12, City - - - - -                  | 150           | —  | —  |
| 2,600       | —  | —  | Bridge over canal at Westbourne-green, Harrow-road, Paddington.   | 1,500         | —  | —  |
| 4,080       | —  | —  | Throgmorton-street, Nos. 8, 35, and 36, City - - - - -            | 1,360         | —  | —  |
| 1,400       | —  | —  | Throgmorton-street, No. 34, City - - - - -                        | 466           | 13 | 4  |
| 350         | —  | —  | Free School-street, St. Olave - - - - -                           | 116           | 13 | 4  |
| 455         | —  | —  | Rotherhithe-street, Rotherhithe - - - - -                         | 151           | 13 | 4  |
| 2,500       | —  | —  | Lower Wandsworth-road, Battersea - - - - -                        | 1,000         | —  | —  |
| 11,000      | —  | —  | Blue Coat-buildings, Little Britain, City - - - - -               | 3,666         | 13 | 4  |
| 421         | 3  | 4  | Bridge over the North Kent Railway in Burrage-road - - - - -      | 140           | 7  | 9  |
| 4,000       | —  | —  | Buck's Bridge, Camberwell - - - - -                               | 2,000         | —  | —  |
| 4,000       | —  | —  | Bridge over Regent's Canal, Green-street, Bethnal Green - - - - - | 2,000         | —  | —  |
| £. 54,256   | 3  | 4  | £.                                                                | 21,552        | 1  | 1  |

On the completion of the works a survey is made, and if found to be carried out according to the plan submitted, the fact is certified by the architect of the Board, and the contribution is then paid to the local authorities, who settle the claims of owners.

*Public Gardens Protection Act, 1863.*

The legal questions arising on the action for trespass relating to Leicester-square, are not yet settled; and the Board have deferred any other proceedings until it should be ascertained how far the statute enabled them to effect the purpose in view.

A Bill for the Protection of Commons and Open Spaces in and near the Metropolis is being considered by a Select Committee of the House of Commons.

*Safe-keeping of Petroleum Act, 1862.*

The renewal of one license has been granted during the year, but no new application was received. A large quantity of refined oil was burned in barrels stored in the Lime-house Cut, Bow Common, early in May last. The fire originated from a lucifer match manufactory adjoining, and some barges were burned on the water of the Cut. Subsequently specimens of refined rock oils were obtained from these premises and others, and submitted to the tests of Dr. Miller, Professor of Chemistry in King's College, to ascertain the temperature at which they gave off an inflammable vapour. He reported that the specimens all required a considerably higher temperature than 100 degrees, Fahr., which is the limit under the Statute.

Much of the imported oil is now refined abroad, and there are large quantities sold as British paraffin oil, and obtained from shale and coal in Yorkshire and other coal districts.

A Bill has been lately introduced by Government to place nitro-glycerine under the licensing process like petroleum, but without limitation as to quantity; and also to treat the carriage of the new compound as specially dangerous goods, subject to regulations to be made by Orders in Council.

The new compound was discovered in 1847, but has only recently been used for blasting purposes, for which it is well adapted, being without smoke, and 13 times more powerful than powder, yet it is probably not more dangerous if properly treated.

1. It is insoluble in water, and is one and a half times the weight of water.
2. It cannot explode in a liquid state until heated to 360 degrees, Fahr., and only then if confined.
3. It must be in a close vessel or confined space to explode by concussion.
4. Fire will not explode it, applied either as a lighted match or hot bar of iron. It will burn quietly away whilst in contact with a lighted stick or spark.
5. It is a poisonous compound.

*Lines of Frontage in Streets.*

The application for the consent of the Board, under the 75th section of the Metropolis Management Act of 1862, for the erection of buildings, or structures, beyond the general line of buildings in any street, place, and row of houses within 50 feet of the highway have been 398, of which cases 263 were granted and 135 refused.

Under the Building Act also the consent of the Board is required for the construction of porticoes, verandahs, and balconies. Of these there were 112 cases; 98 being granted and 14 refused.

The usual mode of proceeding in these cases insures a fair consideration of the circumstances of each application and locality. A plan is deposited in duplicate, with a statement in writing of the grounds of the application. A copy is immediately sent to the vestry or district board of the locality to which the case relates, and a notice is also sent to the member representing the locality. After 14 days a report is made to the Board, stating all the facts as verified or ascertained by the surveyor who visits the site, and, during the interval, communicates with the two nearest neighbours on each side of the premises referred to in the application. In each case the report contains such recommendations as may seem to be required, either for the public or private protection, and is usually either adopted or modified, or referred to a committee for consideration, as the Board may determine. In all cases where attempts are made to break a general line of frontage of buildings by the erection of some shop or other addition to premises occupying a central position in a block of houses, and where the objections of adjoining owners are well founded, or the appearance of the street would be prejudicially affected, the Board are careful to refuse such applications.

*Formation of New Streets.*

Under the bye-laws regulating the formation of new streets, and the 98th, 99th, and 112th sections of the Amending Act of 1862, the Board have to fix the widths of roads, passages, and ways, so as to secure at the least 40 feet of width for streets laid out for carriage traffic, and 20 feet for footways. During the year 206 applications were received, of which 162 were granted and 44 refused.

Some correspondence has arisen regarding the enforcement, by the local authorities, of their powers under the Metropolis Management Acts to require the formation of streets, and the time when the performance of that duty ought to be exacted from owners. It has been considered a convenient rule that a new street should be rendered available for its purpose, whenever the houses are finished and are ready for occupation; and if the ample powers given by the Statutes were duly enforced by the local authorities, the inhabitants and the general public would be freed from the annoyance arising from stagnant pools and accumulations of mud in suburban places where building operations have been in progress in the formation of streets.

One case relative to the width of an existing road at Tooting was taken before the magistrate on information, and he was asked to make an order for widening the road in front of two new houses, and other building ground adjoining, where there was less than 20 feet from the centre. The owner had put up a brick wall and iron rail along the front of the houses, which stood 27 feet back. The magistrate considered this a building up to the street within the meaning of the Statute, and made an order for penalty and costs; but a case being requested by the defendant, that was granted and afterwards adjusted and signed, and now awaits a hearing in a superior court.

*Naming Streets and Re-numbering Houses.*

About the usual progress in these operations is indicated by the result of the year. Orders have been made and transmitted to vestries and district boards, for re-numbering of 119 streets during the year. 434 subsidiary names are thereby abolished, 10,249 numbers of houses regulated, and 197 new streets have been named.

By returns recently made to the Board, and published, it is shown that in 10 years—

516 streets have been considered as to names and numbers.

2,110 subsidiary names abolished.

824 new streets named.

46,879 houses re-numbered.

Thus precision of reference is promoted to a large extent for commercial, social, sanitary, medical, and other purposes, to the great convenience of the public.

A very large number of streets still need revision, and, as the requisite operations are tedious, much time will be occupied in satisfying current demands.

*Building Acts of 1855, 1860, and 1861.*

One vacancy has occurred among the 55 district surveyors who supervise buildings under the control of the Board within the metropolis, and another surveyor was appointed, subject to the usual condition as to alteration of district, if requisite. An assistant was also appointed to an aged district surveyor.

The business of district surveyors is shown by an abstract of the Monthly Returns, made under the Statute, by each surveyor. This account is published yearly for the information

information of the Board, and gives details of fees received in each district, under the following heads:—

| WORKS.                                                                                         | Building<br>Operations. | Fees.       |
|------------------------------------------------------------------------------------------------|-------------------------|-------------|
|                                                                                                |                         | £. s. d.    |
| New Buildings in 1865, in respect of which fees have been received - - - - -                   | 7,059                   | 14,433 18 5 |
| Additions, alterations, and other works, in respect of which fees have been received - - - - - | 4,759                   | 5,599 10 3  |
| Arrears of former years received :                                                             |                         |             |
| New Buildings - - - - -                                                                        | 4,800                   | 9,860 10 1  |
| Additions, alterations, &c. - - - - -                                                          | 2,633                   | 3,078 9 -   |
| TOTAL Works and Fees thereon during the year }<br>ending 31st December 1865 - - - - }          | 19,251                  | 32,972 7 9  |

During the year the sum of 1,842*l.* 13*s.* 3*d.* was abated or lost through bankruptcy, and the office expenses paid by district surveyors amounted to 6,353*l.* 7*s.* 5*d.*

In 25 districts the gross fees varied from 53*l.* to 394*l.*, seven being under 200*l.* each, six under 300*l.* each, and 12 under 400*l.* each. In 30 districts the incomes vary from 422*l.* to 2,104*l.*

No informations have yet been laid against manufacturers for carrying on dangerous businesses contrary to the prohibitory provisions of the Building Act of 1844 since August 1864, notwithstanding the circular issued by the Board to local authorities on the subject. A lucifer-match manufactory took fire at Bow Common in May last, and the effect will be the removal to new premises, isolated according to law.

A large fire also burned down a floorcloth manufactory at Lambeth; and the surrounding inhabitants urged the Board to prevent the reconstruction of the works, as being both dangerous and noxious. But, on referring the matter to Dr. Miller, of King's College, for his opinion, he carefully examined several of the large works of that nature, and reported that he considered the materials so used as not to be dangerous, and the vapour given off in drying the oil cloth could not be considered noxious.

The Board have directed that the amending clauses, formerly prepared with a view to improve the administration of the Building Act, should be embodied in a revision and consolidation of the whole Building Act rules. A Bill to that effect is being prepared; but, under the pressure and exigencies of public business this Session, it could not be introduced, but will be in readiness for next year.

In 29 cases, where district surveyors had been employed to superintend works on their own private account, in their districts, the Board appointed special surveyors to supervise the works, as required by Section 37 of the Building Act.

Under Section 56 of the Building Act, the Board have sanctioned works of a special nature, which builders and others were desirous of erecting, and to which the rules of the Act were considered inapplicable. In regard to materials and construction of such applications, the following were received:—

For iron buildings, for temporary and other purposes, 115 were received, of which 105 were granted, and 10 refused.

For furnace chimney-shafts for breweries, distilleries, and other manufacturing purposes, 126 were received, of which 125 were granted, and one refused.

For open sheds, and drying sheds requiring large openings, 44 were received, of which 25 were granted, and 19 refused.

The approval of the materials of overhanging eaves to dwelling-houses, and other roof constructions, was granted in 39 cases.

Fees for special services in surveying dangerous structures, and other proceedings in relation to such buildings, were granted under the second part of the Building Act, on 539 accounts forwarded by the Commissioners of Metropolitan Police, and on 39 accounts by the Commissioners of Sewers of the City of London.

(signed) *George Vulliamy*,  
Superintending Architect.

(Presented pursuant to Acts 18 & 19 Vict. c. 120 ; 20 & 21 Vict. c. 115 and 150 ; 21 & 22 Vict. c. 38 and 104 ; 25 & 26 Vict. c. 93 and 102 ; 26 & 27 Vict. c. 45 and 75 ; 27 Vict. c. 4 ; 28 Vict. c. 121 ; and 28 & 29 Vict. c. 90.)

Ordered, by The House of Commons, to be Printed,  
12 February 1867.

## STATEMENT of the ALLOWANCE of the AUDITOR.

I, WILLIAM ANDOE, the Auditor appointed by the Right Honourable Sir George Grey, Bart., one of Her Majesty's Principal Secretaries of State, to audit the Accounts of the Metropolitan Board of Works for the year ended the 25th day of March 1866, having carefully examined the Accounts of the said Board for that year, and the Books and Documents in their custody relating thereto, do hereby certify and declare that I have this day audited the said Accounts, at their Office, Spring Gardens, in the County of Middlesex, in the presence of Sir John Thwaites, Chairman of the said Board, William Henry Doulton, Esq., A. N. Shaw, Esq., Francis Healey, Esq., J. S. Phillips, Esq., William Newton, Esq., James Pew, Esq., G. B. Richardson, Esq., Charles Harris, Esq., and George Peckett, Esq., and that the said Accounts are true and correct; and I do allow the same, and sign the Statements and Accounts required by the Acts 18 & 19 Vict. c. 120; 20 & 21 Vict. cc. 115 and 150; 21 & 22 Vict. cc. 38 and 104; 25 & 26 Vict. cc. 93 and 102; 26 & 27 Vict. cc. 45 and 75; 27 Vict. c. 4; 28 Vict. c. 121; and 28 & 29 Vict. c. 90, in token of such my allowance thereof.

Given under my hand this 30th day of May, in the year of our Lord 1866.

(signed) *William Andoe,*

## (OLD GENERAL ACCOUNT.)

SUMMARY STATEMENT OF THE ACCOUNTS, FROM 26th MARCH 1865  
TO 25th MARCH 1866.

## THE METROPOLITAN BOARD OF WORKS.

## METROPOLITAN BOARD OF WORKS.

---

RETURN to an Order of the Honourable The House of Commons,  
dated 15 May 1866;—for,

RETURN “from the METROPOLITAN BOARD OF WORKS of all Money received by them from each of the PARISHES within the METROPOLITAN LIMITS, from the first year of their holding office up to the 29th day of September 1865, stating what has been received each Year from each of the said Parishes (the Main Drainage Rate to be kept separate from any other Rates), stating what Arrears, if any, were due from either of the said Parishes on the said 29th day of September last:”

“ACCOUNT of all CONTRACTS entered into during the whole time the METROPOLITAN BOARD OF WORKS have been in existence, each Contract to be set out separately, with their Dates, and with the Amount Paid to the Contractor on each of the said Contracts, and the Amount Paid to the said Contractors for any Extras beyond the Amount of his Contract, stating the Names of Engineers, Architects, or Surveyors, under whom the said Works have been Executed, the Contracts and Extras Paid for the Main Drainage to form a separate Account:”

“COPY of the ESTIMATE made by the ENGINEER to the METROPOLITAN BOARD OF WORKS for the Total Costs for carrying out the Works of the MAIN DRAINAGE SCHEME previous to the said Scheme being entered into; also, the Total Sum Paid on Account of the said Scheme, stating what Contracts are completed and what Contracts are still in course of execution, such Contracts to be given separately, and what Amount of Money will be further required to completely finish the whole of the Works connected with the said Main Drainage Scheme, and when the said Scheme is expected to be finally completed; the Return for the Works on the North side of the Thames to be kept separate from those on the South side:”

“RETURNS of all MONEY Paid or agreed to be Paid for the PURCHASE of any LAND, HOUSES, &c. for the purpose of forming NEW STREETS or NEW SQUARES, or for the purpose of forming PUBLIC GARDENS, &c., the particulars to be kept separate, confining such statement to the particular Works for which any of such Money has been applied:”

“Of all MONEY now Due on MORTGAGE by the said BOARD OF WORKS, with the Date of each Mortgage and the Rate of Interest Paid thereon:”

“And, ACCOUNT of all MONEY received by them from the first Year of their holding office up to the present time, stating from what source each Amount has been received; also, stating the Total Amount of DEBT owing by the said BOARD OF WORKS to the 25th day of March last.”

---

Office, Spring Gardens, S.W., }  
26 March 1867. }

EDWARD HUGHES,  
Accountant of the Board.

26 March 1867.

J. W. Bazalgette,  
Engineer.

ESTIMATE made by the ENGINEER to the METROPOLITAN BOARD of WORKS for the Total Costs for carrying out the Works of the MAIN DRAINAGE SCHEME previous to the said Scheme being entered into.

£. 2,800,000.

The scheme was subsequently so enlarged and extended, that the original estimate had no reference to the works actually executed.

TOTAL SUM Paid on account of the MAIN DRAINAGE SCHEME to 31 December 1866.

| Sundries common to North and South - - - - - | 70,983  | 8  | 10 |
| TOGETHER - - - - £.                          | 701,791 | 4  | -  |

The works have cost more than was originally anticipated, by reason of considerable extensions, and the increased cost of labour and materials, and also in consequence of certain works executed by the late Commissioners of Sewers having been charged to this account.

When the Main Drainage Scheme is expected to be finally completed.

The Main Drainage is complete, with the exception of the Northern Low Level Sewer and works. Its completion is delayed in consequence of its passing through a dense area, and being interfered with by other public improvements: for instance, from the Tower to the Abbey Mills Pumping Station it is complete, with the exception of a short length which has had to be diverted to pass over the East London Railway near the London Docks, and has been delayed in consequence of the railway works.

The Abbey Mills Pumping Station is now in a forward state, and will be complete in the present year, and before the Low Level Sewer can be finished.

The Isle of Dogs Branch of the Low Level Sewer is completed, with the exception of a portion which has to be diverted across the entrances of the East and West India Docks.

The Low Level Sewer west of the Tower is still delayed, because it must be constructed in connection with the Metropolitan Districts Railway, the Mansion House Street, and the Thames Embankment; and also in connection with the Chelsea Embankment, a Bill for which is now before Parliament; and it is therefore impossible to fix a time for its completion.

J. W. Bazalgette.  
Engineer.

26 March 1867.

## METROPOLITAN BOARD OF WORKS.

Superintending Architect's Department, Spring Gardens, S.W.,  
February 1867.

RETURN of all MONEYS Paid or agreed to be Paid for the PURCHASE of all LANDS, HOUSES, &c., for the purpose of forming NEW STREETS or NEW SQUARES, or for the purpose of forming PUBLIC GARDENS, &c., the particulars to be kept separate, confining such Statement to the particular Works for which any of such Money has been applied, to 25th March 1866.

## NEW STREETS.

## SOUTHWARK-STREET.

In 1857 the Statute 20 & 21 Vict. c. 115 was passed, to enable the Metropolitan Board of Works to form a new street from the High-street, Southwark, to Stamford-street, Blackfriars-road, 1,124 yards long and 70 feet wide.

During seven and a half years, from 1858 to 25th March 1866, the sum of 582,630*l.* 11*s.* 4*d.* was expended in the purchase of land, houses, &c., and the formation of the street and sewers, subways, and other works.

The most of the plots of surplus land have been let for building, under leases for 80 years, and a few at shorter terms. The ground rental derived from these leases amounts to 6,904*l.* yearly, and when disposed of under the Statute will considerably reduce the debt of 300,000*l.* now outstanding till 1869 on a contract, at 4  $\frac{1}{2}$  per cent. interest.

## GARRICK-STREET (COVENT GARDEN).

By the same statute the Board were also empowered to form a small street from the end of Long Acre to King-street, Covent Garden, 140 yards long and 50 feet wide.

The whole expenses for the purchase of land, houses, &c., and the formation of the street, sewers, and subway, amounted, to 25th March 1866, to the sum of 185,353*l.* 13*s.* 11*d.* Part of the loan under the statute was apportioned to this street, to the amount of 90,000*l.*; and some portion of this will be repaid, under the statute, from the surplus of the coal duties, after allowance is made for the ground rents now payable, under leases for 80 and 50 years, to the amount of 2,255*l.* 10*s.*

## BURDETT ROAD (VICTORIA PARK APPROACH).

A communication, made partly by private owners, local bodies, and this Board, was authorised in 1858, from the East India Dock Road, Limehouse, towards Victoria Park, 1,682 yards long and 70 to 50 feet wide.

The properties acquired for this street, and the works for a bridge, and other expenses, have cost 43,424*l.* 12*s.* 5*d.*, and a loan was taken, repayable by instalments, of which 27,200*l.* remains due. Other liabilities, to the amount of 4,511*l.* 6*s.* 3*d.*, are also owing to the general account of the Board.

## WHITECHAPEL IMPROVEMENT.

This is a short street between Backchurch-lane and Leman-street, Whitechapel, and the Commercial-road, for which the statute was obtained in 1865. It will be 1,150 feet long and 70 feet wide. The net cost is estimated at about 115,364*l.* The claims adjusted for settlement amount to 42,818*l.*

## HOLBORN—MIDDLE ROW REMOVAL.

By the same statute power was obtained for the removal of Middle Row, at an estimated cost of 61,152*l.* The claims adjusted for settlement amount to 15,950*l.*

## THAMES EMBANKMENT, NORTH, AND NEW STREET TO MANSION HOUSE.

These improvements were authorised in 1862 and 1863, and taken together; being for the purpose of forming a leading thoroughfare from Westminster Bridge to the City, the financial operations have hitherto been combined.

The total expenditure to 25th March 1866 was 1,379,376*l.* 10*s.* 1*d.* for purchase of property, contractors' works for the embankment, and other charges. The claims adjusted for settlement have been to the amount of 211,374*l.* 10*s.* in respect of the embankment, and 1,059,234*l.* 6*s.* for the new street. Of these only about 911,061*l.* had been actually paid, and 369,547*l.* 16*s.* 6*d.* was in course of settlement on 25th March 1866.

By the Metropolitan District Railway Company's Act, 1864, it is provided that the Board is to receive a minimum sum of 200,000*l.* in respect of the right given to carry the railway under the land of the embankment.

THAMES EMBANKMENT, SOUTH.

The statutes for this work were obtained in 1863 and 1864, and the expenditure amounts to 13,553 *l.* 13 *s.* up to 25th March 1866. A loan of 100,000 *l.* was taken from the National Debt Commissioners. The claims adjusted for settlements amount to 109,975 *l.*

The Trustees of St. Thomas's Hospital are to pay 95,000 *l.* for a site for their new building on the embankment.

NEW PARKS.

FINSBURY PARK.

In 1857 the first statute for the formation of this park was passed, and time extended in 1862. The land acquired is 120 acres at Hornsey, lying northward of the Seven Sisters Road, and eastward of the Great Northern Railway. The total expenditure to 25th March 1866 has been 59,565 *l.* 19 *s.* 7 *d.*, and a loan of 50,000 *l.*, taken in 1864 for 30 years, at 4½ per cent., has an outstanding balance of 46,666 *l.* 13 *s.* 4 *d.* A sum of 8,000 *l.* is also owing to the general account of the Board.

SOUTHWARK PARK.

This park was authorised by statute in 1864, and the 60 acres of land for the purpose were obtained at Rotherhithe, and the expenditure has been 60,171 *l.* 16 *s.* 10 *d.* A loan of 80,000 *l.* for 30 years, at 4½ per cent., has been taken.

*George Vulliamy,*  
Superintending Architect.

| City of London. | Norwood, St. John's (addition to Churchyard). |
| St. Pancras.    | Battersea.                                    |
| Camberwell.     | Plumstead (addition to Churchyard).           |
| Westminster.    | Willesden (adjoining Churchyard).             |
| Charlton.       |                                               |
| Putney.         |                                               |

RETURNS of the ACREAGE of the several CEMETERIES within the METROPOLITAN DISTRICT; of the Number of FUNERALS in each before the Year 1852 and since the Year 1852; of the Number of DWELLING HOUSES situate within 200 Yards of each CEMETERY; of the Number of PERSONS permitted to be Interred in one GRAVE in each of the CEMETERIES; and, as to the DRAINAGE of the several CEMETERIES, and whether the Drainage is into the general Common Sewer or into the adjoining Lands, and what Provision has been made for Drainage so as to prevent it falling into the Brooks, Watercourses, Wells, and Springs in the Vicinity of the Cemetery.

ABNEY PARK CEMETERY.

ACREAGE of the above cemetery.—The cemetery is about 33 acres in extent.

Number of funerals in cemetery before the year 1852.—The number of funerals in the cemetery prior to the year 1852 was 7,342.

Number of funerals since the year 1852.—Since then, up to the 31st December 1866, 31,297.

Number of dwelling-houses situate within 200 yards of the cemetery.—About 190, the large majority of which have been erected since the opening of the cemetery.

Number of persons permitted to be interred in one grave in the cemetery.—About five.

Drainage.—The cemetery is drained into a covered sewer constructed by the Metropolitan Board of Works.

## BATTERSEA BURIAL GROUND.

1. Acreage.—8 A. 0 R. 35 P.
2. Number of funerals before 1852.—None.
3. Number of funerals since 1852.—Two thousand eight hundred and thirty-three.
4. Number of dwelling-houses within 200 yards.—Sixteen previous to the burial ground being used; 48 built since the burial ground was used.
5. Number of persons permitted to be interred in one grave.—Four in one family; one in a grave not belonging to the same family.
6. Drainage.—Into the main common sewer.

Lammas Hall, King-street, Battersea,  
7 November 1866.

*George Chadwin,*  
Clerk to the Board.

## BROMPTON CEMETERY.

The acreage of the cemetery is—38 A. 0 R. 20 P.

The number of burials in the cemetery before the year 1852 was 5,768.

The number of burials in the cemetery since the year 1852, inclusive, to 31st March 1867 has been 2,491.

The number of dwelling-houses situate within 200 yards of the cemetery is as follows:—

|                                                                                                                           |   |   |   |   |     |
|---------------------------------------------------------------------------------------------------------------------------|---|---|---|---|-----|
| Houses inhabited or fit for occupation                                                                                    | - | - | - | - | 291 |
| Houses in different stages of completion, the majority of which will be fit for habitation in three months from this time | - | - | - | - | 108 |
| St. Mark's College, with 130 residents                                                                                    | - | - | - | - | 1   |
| Total                                                                                                                     | - | - | - | - | 400 |

Under regulations received from the Secretary of State in February 1856, one body only is buried in a grave; no grave is to be re-opened in a less period than 14 years, if that of an adult; no grave is re-opened in a less period than seven years, if that of a child less than seven years old, except family graves, in which case one foot of earth is left between the coffins.

The cemetery is drained into the general common sewer, which is on the west of the cemetery, and parallel therewith, and under the West London Extension Railway adjoining. The north lodge of the cemetery is drained into a sewer in the Richmond-road, which sewer is connected with the before-mentioned sewer.

Brompton Cemetery Office, 12, Haymarket, S.W.,  
11 April 1867.

*J. H. Ruddick.*

## CHARLTON CEMETERY.

1. The Charlton Cemetery contains exactly five acres.
2. No burials previous to 1852. The cemetery was not opened till 1st August 1855.
3. The number of burials from the day of opening until the 1st August 1866 (11 years) amounted to 1461.
4. About 60 dwellings are situate within 200 yards of the cemetery.
5. Not more than one person is interred in any one grave (except in the case of a purchased family grave) until the period fixed by the Regulations of the Home Office has elapsed.
6. Under-draining has been considered quite unnecessary, the soil being to a great depth a perfectly hard, dry, sand; so dry that accumulations of water are never found in any re-opened grave. And there are no brooks or wells in the immediate neighbourhood.

Charlton, S. E.,  
5 February 1867.

*E. L. Burnett,*  
Clerk to the Charlton Burial Board.

CITY OF LONDON AND TOWER HAMLETS CEMETERY COMPANY.

\* Number of interments up to and including the year 1859, for details of which see Return made 17 August 1860, pages 12 and 13; printed by order of the House of Commons.

Acreage.—Consecrated, 25 A. 3 R.; unconsecrated, 7 A. 1 R.

Number of dwelling-houses.—There are about 150 small dwelling-houses, and most of them have been built within the last eight years.

Number interred in one grave.—This varies according to depth. There is about a foot of earth between every two coffins, and the last is not less than 4½ feet from the surface. Three or four infants considered as one adult.

Drainage.—The ground is kept dry by being pumped by steam into the common sewer. It is therefore more than probable that the flow will be towards the cemetery than otherwise.

*D. Shaboe*, Secretary.

ST. PAUL'S, DEPTFORD, BURIAL GROUND.

THE new burial ground of this parish (situate in the adjoining parish of Lewisham) contains 17 acres.

The first interment therein was on the 3rd February 1858, and the total number of interments therein up to the end of June last was 12,450.

There is no dwelling-house situate within 200 yards of the above ground.

Until about two years ago only one body was permitted to be interred in one grave, but since then three have been allowed, each grave being eight feet deep. This statement only applies to common interments, and not to the number of interments in purchased graves.

The ground is drained into the adjoining new burial ground belonging to the parish of Lewisham, and from thence through a barrel drain (constructed at the expense of both parishes) into the public sewer called the "Bell Green Sewer," under the management of the Metropolitan Board of Works.

*Thos. Marchant*,  
Clerk to the Board.

13 September 1867.

## FULHAM CEMETERY.

NAME and situation.—Fulham Cemetry, Hammersmith-road, Fulham, Middlesex.

Extent of cemetery.—5 A. 2 R. 22 P.

Number of funerals before 1852, and since.—The cemetery was not opened until 1st August 1865, from which time

|                                      |   |   |     |             |
|--------------------------------------|---|---|-----|-------------|
| Up to 25th March 1866 there were     | - | - | 161 | interments. |
| Thence to 25th March 1867 there were | - | - | 271 | „           |
| And since then up to 13th April 1867 | - | - | 18  | „           |

TOTAL Burials since 1852 - - - 450

Number of dwelling-houses within 200 yards of cemetery.—Except the cemetery lodge, used for the residence of the superintendent of cemetery, there is no dwelling-house within 200 yards; the nearest house at present is 220 distant.

Number of persons permitted to be interred in one grave.—Two adults (if of same family) in graves seven feet deep, and two children (under 12 years, and if of same family) in graves six feet deep.

Drainage of cemetery.—A large cesspool is constructed within the cemetery to contain the whole of the drainage thereof.

Fulham Burial Board,  
Offices, Berwick House, Walham Green,  
13 April 1867.

*James Parker,*  
Clerk to Fulham Burial Board.

## GREENWICH CEMETERY.

THE Greenwich Cemetery was consecrated in the year 1856, and contains 16 acres of ground.

Number of persons interred:—

|                  |   |   |     |                  |   |   |     |
|------------------|---|---|-----|------------------|---|---|-----|
| In the year 1856 | - | - | 403 | In the year 1862 | - | - | 731 |
| „ 1857           | - | - | 592 | „ 1863           | - | - | 819 |
| „ 1858           | - | - | 746 | „ 1864           | - | - | 982 |
| „ 1859           | - | - | 699 | „ 1865           | - | - | 819 |
| „ 1860           | - | - | 628 | „ 1866           | - | - | 897 |
| „ 1861           | - | - | 767 |                  |   |   |     |

There are no dwelling-houses within 200 yards of the cemetery.

Except in purchased graves, two bodies only are interred in each grave.

In accordance with the advice of an eminent engineer (Mr. Mylne), a deep well, 180 feet, has been sunk at the lowest level of the ground for the purpose of draining, which seems at present to answer the purpose intended.

*C. Harding,* Clerk.

Greenwich Burial Board Office,  
Church-street, 21 May 1867.

## HAMMERSMITH BURIAL BOARD.

No return can be made, as at the present time the Burial Board have only entered into the preliminary steps for the provision of a burial ground.

*Alfred Jas. Roberts,*  
Clerk to Hammersmith Burial Board.

18 April 1867.

CEMETERY OF ST. MARY, ISLINGTON (FINCHLEY).

---

ACREAGE.—Thirty acres.

Number of interments.—About 3,000 per year.

Dwellings within 200 yards.—None.

Number of persons in each grave.—From four to six, according to the depth of grave, always keeping at least four feet of earth over the last coffin placed in the grave.

Drainage of cemetery.—Drained into the ancient sewer or ditch which runs through the country till it finds its way into the North London Main Drain.

Vestry Hall, Upper-street, Islington,  
20 September 1866.

*James Taylor,*  
Clerk.

---

GENERAL CEMETERY COMPANY, KENSAL GREEN.

---

THE land belonging to this company is rather less than 80 acres, of which about 73 acres have been consecrated, and are occupied as a cemetery.

The number of funerals between the 1st January 1833 and the 1st January 1852 was 18,171, and the number between the 1st January 1852 and the 31st August 1866 was 25,363.

The cemetery abuts on the south side of the Harrow-road; the number of houses on the opposite side of the road, within 200 yards of the cemetery, is 95, and the number of houses on the south side is 16; but these houses are separated from the cemetery by gardens at the rear of the same.

Under the provisions of the Burials Amendment Act, and as arranged with Mr. Holland, who acted under Sir G. Grey, the Secretary of State, in the year 1857, the regulation of the company is not to restrict the number of interments in any grave, but to require that a layer of earth, of at least 12 inches in thickness, shall be deposited between each coffin; and that no coffin shall be nearer the surface of the ground than 4 feet 6 inches. Under this regulation, a grave 16 feet 6 inches in depth will receive six coffins; some graves are deeper, other graves of less depth.

As to drainage; drains have been made in the cemetery at depths varying from 10 to about 19 feet below the surface, according to the relative levels of different parts of the land; these carried through a culvert under the Paddington Canal, and from thence through land on the south side of the canal, under the Great Western Railway, into the public sewer constructed by the Metropolitan Board of Works, part of the High Level Sewer.

Offices,  
95, Great Russell Street, W.C.,  
28 September 1866.

*Frederick Riviere,*  
Secretary.

---

Burial Acts Office,  
Local Government Acts Office, Whitehall, S.W.,  
8 June 1867.

Sir,

It is not correct to describe the plan of burial followed at the Kensal Green General Cemetery as an arrangement made with me; I had no authority to make or agree to any arrangement. All I did was to suggest the precaution of separating the coffins by interposing a layer of earth between them, and to report to Secretary Sir George Grey the mode of burial that had been and would be followed should no interference with it be directed.

The Right Hon. H. Waddington,  
Home Office.

I have, &c.  
*P. H. Holland.*

---

## ST. MARY'S CEMETERY, KENSAL GREEN.

## RETURN of the above Roman Catholic Cemetery.

THE cemetery was opened 10th May 1858. The funerals are as follows:—

|      |   |   |   |   |       |                                |   |   |   |   |       |
|------|---|---|---|---|-------|--------------------------------|---|---|---|---|-------|
| 1858 | - | - | - | - | 453   | 1864                           | - | - | - | - | 1,957 |
| 1859 | - | - | - | - | 1,586 | 1865                           | - | - | - | - | 1,973 |
| 1860 | - | - | - | - | 1,249 | To 11th September 1866 - 1,340 |   |   |   |   |       |
| 1861 | - | - | - | - | 1,409 |                                |   |   |   |   |       |
| 1862 | - | - | - | - | 886   |                                |   |   |   |   |       |
| 1863 | - | - | - | - | 1,708 | TOTAL - - - 12,561             |   |   |   |   |       |

The cemetery consists of 30 acres of land. There is one dwelling-house within 200 yards of the cemetery.

The general regulation is to bury one coffin in each grave; but there are many instances in which three or four of the same family are buried in one grave.

The cemetery is drained into the common sewer without communication with any other wells, brooks, or watercourses.

*Jas. Can. O'Neal*, Administrator.

## KENSINGTON CEMETERY.

ACREAGE.—Eleven acres; eight only being at present used for burial purposes.

Number of interments since the year 1852.—Seven thousand two hundred and forty-eight.

Cemetery opened 30th November 1855.

Number of dwelling-houses within 200 yards.—Fifteen dwelling-houses.

Number of bodies buried in one grave.—One; except in vaults or private graves.

As to drainage, &c.—By the Board's own sewer into the River Brent, and from thence to the Thames.

Vestry Hall, Kensington,  
3 September 1866.

*W. J. T. Blackwell*,  
Clerk to the Burial Board for the  
Parish of Kensington.

## CEMETERY OF ST. MARY, LAMBETH, AT TOOTING (SURREY).

ACREAGE of cemetery.—Thirty acres.

Number of funerals in each year before 1852.—Nil. The cemetery was not opened until the year 1854.

Number of Funerals in each Year since 1852:—

|      |   |   |   |   |       |                    |   |   |   |   |       |
|------|---|---|---|---|-------|--------------------|---|---|---|---|-------|
| 1854 | - | - | - | - | 1,154 | 1862               | - | - | - | - | 2,292 |
| 1855 | - | - | - | - | 1,544 | 1863               | - | - | - | - | 2,413 |
| 1856 | - | - | - | - | 1,771 | 1864               | - | - | - | - | 2,874 |
| 1857 | - | - | - | - | 1,777 | 1865               | - | - | - | - | 2,903 |
| 1858 | - | - | - | - | 2,075 |                    |   |   |   |   |       |
| 1859 | - | - | - | - | 2,037 |                    |   |   |   |   |       |
| 1860 | - | - | - | - | 1,949 | TOTAL - - - 24,713 |   |   |   |   |       |
| 1861 | - | - | - | - | 1,924 |                    |   |   |   |   |       |

Number of dwelling-houses situate within 200 yards of cemetery.—Two; both of which are more than 100 yards distant.

Number of persons interred in one grave.—Average number about four. This depends entirely upon the depth of the grave; but in no case is a corpse interred within four feet of the surface, and all the required regulations are strictly carried out.

Drainage of the cemetery.—The drainage of the cemetery falls into an open ditch, which flows into the Wandle. No provision has been made to prevent it falling into the watercourses adjoining, because there is no public sewer in the vicinity which would accomplish that object. The Metropolitan Board are now, however, constructing a sewer in Garrett-lane to connect with the Southern Low Level Sewer, and the Lambeth Burial Board are making arrangements for constructing a sewer to intercept the present drainage of the cemetery so as to discharge the same into the common sewer in Garrett-lane.

Vestry Offices, Kennington Green,  
27 September 1866.

*A. E. T. Worley*,  
Clerk to the Lambeth Burial Board.

LONDON CEMETERY COMPANY (HIGHGATE AND NUNHEAD).

RETURN with reference to HIGHGATE CEMETERY.

THE acreage comprises 38 acres.

The number of interments which took place prior to the 1st January 1852, was 8,431; from that date to 25th September 1866, was 25,739.

The number of dwellings situate within 200 yards of the cemetery walls is 44, but most of these have been erected since the opening of the cemetery.

In a large number of the graves of long standing there is but one body interred; in some graves there are as many as six; the average number of bodies interred in one grave is  $2\frac{1}{2}$ .

The drainage is connected with the main common sewer, constructed by the Metropolitan Board of Works.

RETURN with reference to NUNHEAD CEMETERY.

THE acreage comprises 50 acres.

The number of interments which took place prior to the 1st January 1852, was 5,060, from that date to the 25th September 1866, 20,930.

The number of dwellings situate within 200 yards of the cemetery walls is 82, all of which have been erected since the opening of the cemetery.

In a large number of the graves of long standing there is but one body interred; in some of the graves there are as many as six; the average number of interments in one grave is  $2\frac{1}{2}$ .

The drainage is connected with the main common sewer, constructed by the Metropolitan Board of Works.

*W. Walton, Secretary.*

29, New Bridge-street, Blackfriars,  
London, 31 October 1866.

ST. MARYLEBONE CEMETERY

(Situate at EAST END, FINCHLEY).

1. CONSISTS of 27 acres.

2. Cemetery first opened 14th March 1855.

3. Number of funerals since cemetery opened, including all classes, 28,092.

4. There is only one dwelling-house within 200 yards of the cemetery.

5. The graves for common interments are on an average 13 feet deep, in which bodies are buried one on another, with a layer of earth between each coffin, with five feet of earth above the last coffin.

6. Four-inch or two-inch drain pipes are laid at the bottom of each grave for common as well as other interments, with a fall in general of one inch in four feet. They enter a main drain, which discharges into a ditch at the south corner of the cemetery; the said ditch discharges into a small stream that takes the sewage from the north part of Highgate, &c. The superintendent states that for the last four years little or no water has passed out of the cemetery except from the gullies in the roads when it rains, for in consequence of nearly every grave having a tree or shrub planted on it every drop of moisture in the ground is absorbed by the roots of the trees. Common interment graves are never opened when once they are closed, but private graves on being reopened for another member of the family show roots of the trees more than 16 feet deep, and the earth is dry and hard. Several kinds of willow and poplar trees planted on graves have this year made from four to six feet of wood.

*W. E. Greenock, Clerk to Burial Board.*

26 August 1867.

## SOUTH METROPOLITAN CEMETERY (NORWOOD).

1. ACREAGE:—40 acres 28 perches.

2. Number of interments to the 31st of December 1852 - - - - 6,044  
Ditto - - - - ditto - 1865 - - - - 19,472

TOTAL - - - 25,516

3. Number of houses within 200 yards:—Four when the cemetery was consecrated; near 15 houses from 100 to 200 yards distant; 213 houses since built within 200 yards.

4. Number of graves, 10,378; interments, 25,516; average,  $2\frac{1}{2}$  in each grave.

Many graves are from 20 to 25 feet deep; all under the control of the company have a foot of earth placed before a second coffin is put into the grave, and a strict rule of the company that under no circumstances shall any body be placed within four feet of the surface.

5. The whole of the drainage enters into the new metropolitan sewer, each brick grave having a separate drainage into the common one.

*Griffith Thomas*, Chief Clerk.

## PADDINGTON CEMETERY, WILLESDEN LANE.

RETURN of the Annual Number of INTERMENTS, &c., since the Opening of the Cemetery, 1st September 1855.

ACREAGE.—Twenty-five acres.

| Number of Interments. |                |         | Number of Interments. |                |         |
|-----------------------|----------------|---------|-----------------------|----------------|---------|
| From 1 September      | To 1 September | Number. | From 1 September      | To 1 September | Number. |
| 1855 - - -            | 1856 - - -     | 1,021   | 1861 - - -            | 1862 - - -     | 2,297   |
| 1856 - - -            | 1857 - - -     | 1,106   | 1862 - - -            | 1863 - - -     | 2,793   |
| 1857 - - -            | 1858 - - -     | 1,338   | 1863 - - -            | 1864 - - -     | 2,498   |
| 1858 - - -            | 1859 - - -     | 1,780   | 1864 - - -            | 1865 - - -     | 2,670   |
| 1859 - - -            | 1860 - - -     | 2,034   | 1865 - - -            | 1866 - - -     | 2,828   |
| 1860 - - -            | 1861 - - -     | 2,286   |                       |                |         |

Number of dwelling-houses within 200 yards of the cemetery.—About 20.

Number of persons permitted to be interred in one grave.—Eight, on an average.

As to drainage.—The cemetery is well drained throughout. The drainage empties itself through one outlet under the southern wall of the cemetery into an open ditch, and thence into the sewer under the London and North Western Railway.

*Robt. Ford*,

23 October 1866.

Clerk to the Paddington Burial Board.

## CEMETERY OF THE PARISH OF ST. PANCRAS.

1. THE burial ground of St. Pancras, situate at Finchley, occupies 50 acres, and was not opened till July 1854. The number of interments which has taken place up to Sunday last, the 23rd September, from that period, have been 37,034.

2. The number of dwelling-houses situate within 200 yards of the cemetery.—Eight.

3. Number of persons permitted to be put in one grave. Grave for one body, seven feet. If a family grave, according to its depth, allowing 15 inches for each body, extra beyond the depth of seven feet.

4. As to drainage.—Surface drainage all over cemetery; 42 feet between each drain. There are also three main drains and two culverts, which the other drains run into; the culverts opening into a brook which passes the Colney Hatch Lunatic Asylum.

Offices, St. Pancras Vestry Hall,

*Charles Greene*, Clerk.

Camden Town, N. W., 26 September 1866.

PUTNEY CEMETERY.

---

ACREAGE.—Four acres.

Number of funerals before 1852.—None; no cemetery.

Number of funerals since 1852.—One thousand two hundred and eighty-four; commencing 7th September 1855.

Number of dwelling-houses within 200 yards.—One; being a small cottage on the road side, with gate dividing the parishes of Putney and Barnes.

Number of persons permitted to be interred in one grave.—One in a common grave five feet deep. In a private grave according to depth of ground purchased.

Drainage.—The cemetery is situated on an open common. No brooks, water courses, wells, &c., near. The soil is gravel, and dry, and the drainage percolates through it. The sexton informs me there is very little moisture found when digging.

*Chas. Skerry,*  
Clerk to the Burial Board.

---

WOOLWICH CEMETERY

(Situate in the Parish of PLUMSTEAD, in the County of KENT.)

---

NUMBER of acres.—Thirteen.

Number of funerals before 1852.—None. First interment 4th January 1856.

Number of funerals since 1852.—Nine thousand three hundred and twenty-three to 31st July 1866.

Dwelling-houses within 200 yards.—Twenty-six. Several of these have been built since the cemetery was opened. There are only eight other houses within 600 yards of the cemetery.

Number of persons permitted to be buried in one grave.—One person only, unless members of the same family.

As to drainage.—Drainage is provided for the surface water only, which is carried into a drain in the road outside the cemetery, and finds its way ultimately through a ditch into the River Thames. There is no general common sewer anywhere near the locality.

Office, Town Hall, Woolwich,  
14 October 1867.

*Andrew C. Reed,*  
Clerk of the Woolwich Burial Board.

---

METROPOLITAN CEMETERIES.

---

RETURNS of LICENSES granted under "The METROPOLITAN INTERMENTS ACT, 1852," by the Secretary of State for New Burial Grounds and Extension of the Old Burial Grounds within the METROPOLITAN DISTRICT; of ACREAGE of the several CEMETERIES within the METROPOLITAN DISTRICT; of Number of FUNERALS in each before the Year 1852 and since the Year 1852; of the Number of DWELLING HOUSES situate within 200 Yards of each CEMETERY; of the Number of Persons permitted to be Interred in one GRAVE in each of the CEMETERIES; &c.

(Mr. Berkeley.)

# THAMES EMBANKMENT AND METROPOLIS IMPROVEMENT.

---

RETURN to an Order of the Honourable The House of Commons,  
dated 25 February 1867 ;—for,

ACCOUNTS “ of the THAMES EMBANKMENT and METROPOLIS IMPROVEMENT FUND, &c.; showing the amounts received to the credit of the said Fund, and the payments out of the same to the Metropolitan Board of Works, &c., under the Acts 24 & 25 Vict. c. 42 and 25 & 26 Vict. c. 93 :”

“ The further amounts received to the credit of the said Fund to be applied under the Act 27 & 28 Vict. c. 61, to the payment of the Principal and Interest of sums borrowed by the Metropolitan Board of Works under the guarantee of the Treasury, and the payments made out of the same by the Treasury under the said Act :”

“ The amounts borrowed by the Metropolitan Board of Works (under the Acts 25 & 26 Vict. c. 93, 26 & 27 Vict. c. 45, and 26 & 27 Vict. c. 75), on the security of the said Fund, and guaranteed by the Treasury under the Act 27 & 28 Vict. c. 61 :”

“ And, the manner in which the Metropolitan Board of Works have applied the sums paid to them out of the said Fund (as shown in first above Account), under the several heads specified in the Acts 25 & 26 Vict. c. 93, 26 & 27 Vict. c. 45, and 26 & 27 Vict. c. 75.”

(*Mr. Goschen.*)

---

*Ordered, by The House of Commons, to be Printed,*  
*7 June 1867.*

---

## — 1. —

ACCOUNT of the amounts received to the credit of the THAMES EMBANKMENT and METROPOLIS IMPROVEMENT FUND, and the payments out of the same to the Metropolitan Board of Works, &c., under the Acts 24 & 25 Vict. c. 42, and 25 & 26 Vict. c. 93.

| RECEIPTS:                                                                                                                                                                                                                                                                                                                                                                                |                  |       |                           | £.      | s.      | d.  |

## A P P E N D I X.

MEMORANDUM of certain provisions of the under-mentioned ACTS, so far as they relate to the foregoing ACCOUNTS.

24 & 25 Vict. c. 42.—London Coal and Wine Duties Continuance Act, 1861:—

Continues wine and coal duties until 5th July 1872 (sects. 1, 2); the wine duty and a certain part of the coal duty to be paid to account of the Thames Embankment and Metropolis Improvement Fund, at the Bank of England (in the name of the Lords Commissioners of the Treasury), and to be applied to the improvement of the Metropolis as Parliament may direct (sect. 5).

Moneys, stocks, &c., of Metropolis Improvement Fund (per 8 & 9 Vict. c. 101), and London Bridge Approaches Fund, to be transferred to the above account (sect. 9).

25 & 26 Vict. c. 93.—Thames Embankment Act, 1862:—

The Metropolitan Board of Works may borrow 1,000,000 *l.*, under conditions to be approved by the Treasury, on the security of the Thames Embankment and Metropolis Improvement Fund, and other moneys and lands coming into their possession, and appropriated to the purposes of this Act (sect. 42).

A sum to be set apart out of the fund for payment of charges on the London Bridge Approaches Fund; and the balance and other moneys received to the credit of the fund to be paid to the Metropolitan Board of Works (sect. 45).

The amounts paid to the Metropolitan Board of Works to be applied by them in paying, (1) Interest, and (2) Principal of sums borrowed under this Act; (3) expenses of the works of the Thames Embankment, and (4) such other improvements of the Metropolis as Parliament may direct (sect. 45).

26 & 27 Vict. c. 45.—Metropolis Improvement Act, 1863 (Thames Embankment, North Side):—

The Metropolitan Board of Works may borrow 2,000,000 *l.*, instead of 1,000,000 *l.* as above (sect. 22).

[Sect. 23 specifies the appropriation of the moneys received to the credit of the fund, and to be paid to the Metropolitan Board of Works, after satisfying the charges on the fund created by the Act of 1862.]

26 & 27 Vict. c. 46.—London Coal and Wine Duties Continuance Act, 1863:—

Continues coal and wine duties until 5th July 1882 (sect. 1).

26 & 27 Vict. c. 75.—Thames Embankment Act, 1863 (South Side):

The Metropolitan Board of Works may borrow 480,000 *l.* for expenses of the Thames Embankment (South Side), on and subject to the security and conditions prescribed by the Act of 1862 (sect. 26).

[Sect. 29 appropriates the fund, after payment of the charges created by prior Acts.]

27 & 28 Vict. c. 61.—Thames Embankment and Metropolis Improvement (Loans) Act, 1864:—

The Treasury may guarantee money borrowed by the Metropolitan Board of Works under the above Acts (sect. 1); and may advance money out of the Consolidated Fund for this purpose, if necessary (sect. 3); such advances to be repaid out of the Thames Embankment and Metropolis Improvement Fund (sect. 4), or out of rates to be levied by the Metropolitan Board of Works (sect. 5).

So soon as the Treasury has guaranteed any money under this Act, and during the operation of such guarantee, the Treasury shall apply the Thames Embankment and Metropolis Improvement Fund to the payment of principal and interest of moneys borrowed under the Treasury guarantee (sect. 6).

The National Debt Commissioners may lend Savings Banks' moneys to the Metropolitan Board of Works, with the Treasury approval and guarantee (sect. 7).

— No. 1. —

Mr. *Alfred Austin* to Mr. *E. M. Barry*.

Sir,

Office of Works, &c., 5 June 1860.

THE First Commissioner of Her Majesty's Works, &c., having understood from you that you are willing to superintend the completion of the works at the New Palace at Westminster, which have received the sanction of this Board and for which Parliament has made grants of money, I am directed to inform you that the First Commissioner requests that you will undertake that service, the rates of your remuneration being the same as those paid to your late lamented father.

I am, &c.

E. M. Barry, Esq.

(signed) *Alfred Austin*, Secretary.

---

— No. 2. —

Mr. *E. M. Barry* to Mr. *Alfred Austin*.

Sir,

1, Old Palace Yard, 8 June 1860.

I HAVE to acknowledge your letter of the 5th instant, requesting me to superintend professionally the completion of the works now in progress at the New Palace at Westminster, and I beg you will convey to the Chief Commissioner my best thanks as well for the intimation of his wishes, as for the manner in which he has been pleased to convey to me an appointment in every way so gratifying to my feelings.

I am unwilling to enter into any question connected with my remuneration for services which I would willingly have rendered gratuitously, if necessary, for the satisfaction of knowing that the views of my late lamented father, respecting the great work upon which his reputation will principally rest, and in respect of which I have so long had the privilege of assisting him, were likely to be carried out in their integrity; but if it were not for considerations of this nature, I should have felt bound on public grounds and in justice both to myself and the architectural profession, to have called the attention of the Chief Commissioner to the fact that the remuneration forced upon my father's acceptance by the Treasury Minute of the 29th January 1856 (against the injustice of which he always protested) is, (1), less than is customary with architects of standing and less than is adequate in the case of the New Palace; (2), less than has been and is now paid to architects employed by the Government on other works; and, (3), less than was recently offered by the Government to architects of all Nations in the public competition for designs for the new Government Offices.

It might also be observed, that if any arguments could heretofore have been deduced from the exceptional character of the works at the New Palace, as regards either largeness of outlay or private agreement, they have now necessarily ceased to be applicable to present circumstances.

Feeling bound to allude to the above-mentioned facts, I beg you will, notwithstanding, assure the Chief Commissioner that from the peculiar feelings with which I approach the work he has been good enough to entrust to my hands, I do not wish in any way to introduce pecuniary considerations, and I, therefore, accept readily the proposition conveyed to me in your letter, as far as it applies to the works at the New Palace, which have received the sanction of the Board, and for which Parliament has made grants of money.

Alfred Austin, Esq.

I remain, &c.  
(signed) *Edward M. Barry.*

— No. 3. —

*Mr. E. M. Barry to Mr. Alfred Austin.*

Sir,

1, Old Palace Yard, 14 November 1863.

I ENCLOSE to-day with other accounts a memorandum of the balance of my commission as architect for my services at the New Palace at Westminster, in respect of the various works placed by the First Commissioner of Her Majesty's Works under my professional superintendence.

The account is made out at the rate of 4 per cent. on the expenditure, according to the arrangement prescribed by your letter of 5th June 1860, and agreed to by me as far as it applied to the works which had at that time received the sanction of the Board and for which Parliament had then made grants of money.

I have already, in my letter to you of the 8th June 1860, stated my views respecting that arrangement and my reason for accepting the same, and will not, therefore, recur to that portion of the subject.

I think it right, however, to state that when that arrangement was made it was supposed that the works remaining to be finished were simple in character and small in extent, and the necessity for a further vote of upwards of 20,000 *l.* was not foreseen. I had, moreover, no reason to suppose that I should be called upon to prepare quantities for lump-sum contracts as well as settle extras and omissions upon them, and also to furnish the Board with detailed measurements of work that would have been done by Mr. Szerelmey, had his engagement continued; but which in consequence of the termination of his contract has never been executed, and upon which no commission has consequently been charged.

In consequence of these circumstances and the peculiar character of the works, my expenditure of time, money, and labour, in superintendence during a period of three years and a-half has been much larger than is usually the case with architects, and my remuneration under the agreement above referred to (after deducting the expense of measurement) has been little more, and as to some parts of the work even less, than half the customary amount.

It is not, however, my intention to make any claim on the Government in respect of the above-named services, as I have already in my letter of 8th June 1860, stated my reasons for treating the completion of my father's work as an exceptional matter. Lest, however, my acceptance of an inadequate remuneration should be misunderstood and referred to as a precedent in my profession, I have thought it due to myself to lay the particulars of the case frankly before the First Commissioner, and to leave it in his hands with the assurance of my high appreciation of the confidence with which he has honoured me during my official relations with him in respect of the New Palace at Westminster.

Alfred Austin, Esq.

I am, &c.  
(signed) *Edward M. Barry.*

— No. 4. —

The First Commissioner of Works to the Lords Commissioners of the Treasury.

My Lords,

Office of Works, &c., 11 December 1863.

I BEG leave to send to your Lordships herewith, copy of a letter dated the 14th ultimo, which I have received from Mr. E. M. Barry, on the subject of the remuneration for his services as architect at the New Palace at Westminster, and to state that the considerations which induced the Government to fix the payment to Sir Charles Barry at 4 per cent. on the expenditure incurred on the New Palace under his superintendence, do not appear to me to apply to the circumstances under which Mr. E. Barry has been employed during the years 1862-63 and 1863-64.

The recollection of the labour that has devolved upon Mr. Barry, with reference to the contracts I have made for a lump sum, and to the contract with Mr. Szerelmey, induces me to press upon your Lordship's attention the consideration of whether Mr. Barry is not fairly entitled to receive the usual commission of 5 per cent. on the expenditure voted during the present and the last financial years.

I am, &c.

(signed) *W. Cowper*

The Right Hon. the Lords Commissioners  
of Her Majesty's Treasury.

— No. 5. —

The Secretary to the Treasury to the First Commissioner of Works.

Sir,

Treasury Chambers, 29 December 1863.

THE Lords Commissioners of Her Majesty's Treasury have had before them your report of the 11th instant, enclosing copy of a letter from Mr. E. M. Barry, architect to the New Palace at Westminster, and their Lordships desire me to request that they may be furnished with copies of the correspondence referred to in Mr. Barry's letter with reference to the remuneration he was to receive as architect to the New Palace, and with some more detailed information regarding the lump contracts alluded to as justifying in your opinion an increase of that remuneration.

I am, &c.

The First Commissioner of Works, &c.

— No. 6. —

Mr. *Alfred Austin* to Mr. *E. M. Barry*.

Sir,

Office of Works, &c., 2 January 1864.

WITH reference to your letter of the 14th November last respecting your commission as architect at the New Palace of Westminster, I am directed by the First Commissioner to request that you will furnish him with a statement of the "contracts for lump sums" on which you consider that your commission should not be limited to 4 per cent., mentioning the names of the contractors, services, amount of contract, and sums paid.

I am, &c.

E. M. Barry, Esq.

(signed) *Alfred Austin*, Secretary.

— No. 7. —

Mr. *E. M. Barry* to Mr. *Alfred Austin*.

Sir,

1, Old Palace Yard, 9 January 1864.

I HAVE to acknowledge the receipt of your letter of the 2nd instant, referring to my letter of the 14th November 1863, and requesting me to furnish the First Commissioner of Her Majesty's Works, &c., with a statement of the contracts for lump sums on which I consider that my commission should not be limited to 4 per cent., mentioning the names of contractors, services, amount of contract, and sums paid.

I stated, in my letter of the 14th November 1863, that it was not my intention to make any claim on the Government, but that I should leave the matter in the hands of the First Commissioner, and I had, therefore, no expectation of further correspondence; I beg, however, to express my thanks to the First Commissioner for requesting further information from me respecting my views on this subject.

In my letter of the 14th November 1863, referring to the circumstances under which I had undertaken the professional charge of the New Palace at Westminster, I stated that at the time I did so I supposed, in common with the First Commissioner, that the works to be completed were of a trifling character, and the offer of commission, at the rate of 4 per cent., conveyed in your letter of the 5th June 1860, was only accepted by me on special grounds, and as far as it applied "to the works at the New Palace which had received the sanction of the Board, and for which Parliament had made grants of money."

As the First Commissioner will doubtless remember, the above expectation was not realised, and it was found necessary to apply to the House of Commons, in the Session of 1861, for a further vote of 20,895 *l.* 3 *s.* The circumstances rendering the application necessary are fully detailed in my correspondence with the Board, and particularly in my letter of the 13th August 1860, which was printed with the Votes. The sum of 20,895 *l.* 3 *s.* was voted by Parliament, and has been expended under my directions, without any extras, and my letter to you of the 14th November 1863 explained the course which I had adopted to prevent the expenditure from exceeding the authorised amount.

The larger proportion of the expenditure above referred to was incurred under Mr. Jay's contract for a Schedule of prices, and the remaining portion was paid in lump sums to different contractors as follows: Mr. Field, 2,301 *l.* 19 *s.* 10 *d.*; Messrs. Hardman, 2,243 *l.* 2 *s.*; and Mr. Crace, 2,526 *l.* 2 *s.* 5 *d.* In the former case I was called upon to measure Mr. Jay's works, and in the latter to supply quantities on which the three contracts referred to were based. It is not usual for architects to undertake either of these services, even when they receive their full commission of 5 per cent., and as such duties require the services of a surveyor, his remuneration is not ordinarily deducted from the commission of an architect.

I do not desire to put forward any claim upon the Government, but it has always appeared to me that if I had been unable or unwilling to complete the New Palace, and an independent architect had been consequently employed, the First Commissioner of Her Majesty's Works would not have expected any such architect to have rendered his services except on the terms generally accepted in his profession. In my late father's case the course taken by the Treasury was avowedly based on special grounds not applicable to me or to any independent architect who might succeed him; and as the justice of that course has never been admitted by him or by my profession at large, an unexplained acceptance by me of less remuneration than is now given by the Government to other architects employed by them on public works might be construed as implying a professional inferiority which I am unwilling to admit.

My reasons for accepting your offer of the 5th June 1860 have already been fully explained, but as that acceptance was limited to the works for which moneys had then been voted, a different arrangement might perhaps have been not unfairly made when a further Vote was found necessary, and the customary rate of remuneration might have been reasonably adopted for all works executed under that Vote.

If, therefore, I were disposed to put any claim before the Government, it would probably be for an allowance of 5 instead of 4 per cent. on the sum of 20,895 *l.* 3 *s.* voted by Parliament in the Session of 1861. I wish, however, to

repeat

repeat that I leave the whole question to the First Commissioner to be dealt with or not as he may think right, feeling sure that he will do me the justice to believe that it has been raised by me from professional considerations alone.

Alfred Austin, Esq.

I am, &c.  
(signed) *Edward M. Barry.*

— No. 8. —

The First Commissioner of Works to the Lords Commissioners of the Treasury.

My Lords,

Office of Works, &c., 18 January 1864.

By Mr. Peel's letter of the 29th ultimo, your Lordships were pleased to request me to furnish your Lordships with copies of the correspondence referred to in Mr. E. M. Barry's letter which accompanied my report of the 11th ultimo, with reference to the remuneration he was to receive as architect to the New Palace at Westminster, and with some more detailed information regarding the lump contracts alluded to as justifying in my opinion the increase of that remuneration.

The information your Lordships desire about the contracts is contained in the letter from Mr. Barry, of which I enclose a copy. I also enclose copies of the letter written by my direction to Mr. Barry on the 5th June 1860, and of his reply, dated the 8th of that month, being the correspondence referred to in Mr. Peel's letter, and I beg leave to state that when I employed Mr. Barry in 1860 to complete the works begun by his father, I thought it natural that he should be placed under the same conditions of remuneration; but that the duties performed by him in 1862 and 1863 differed in no important respect from those ordinarily performed by professional architects, and I can find no satisfactory reason why he should be required to be bound by his father's agreement, instead of being paid according to the ordinary scale of remuneration.

The Right Hon. the Lords Commissioners  
of Her Majesty's Treasury.

I am, &c.  
(signed) *W. Cowper.*

— No. 9. —

Mr. G. A. Hamilton to the First Commissioner of Works.

Sir,

Treasury Chambers, 16 February 1864.

THE Lords Commissioners of Her Majesty's Treasury have had before them your further Report of the 18th ultimo, relative to the remuneration to be awarded to Mr. E. M. Barry for his professional services as architect at the New Palace of Westminster for the present and last financial years; and I am to acquaint you, that, under the circumstances explained, my Lords approve of Mr. Barry's being paid at the ordinary rate of 5 per cent. on the expenditure.

First Commissioner  
of Her Majesty's Works, &c.

I am, &c.  
(signed) *Geo. A. Hamilton.*

— No. 10. —

Mr. Alfred Austin to Mr. E. M. Barry.

Sir,

Office of Works, &c., 1 March 1864.

WITH reference to your letter of the 9th January last, I am directed by the First Commissioner of Her Majesty's Works, &c., to inform you that he has been authorised by the Lords Commissioners of Her Majesty's Treasury to pay

to you a commission of 5 instead of 4 per cent. upon the expenditure, for your professional services as architect at the New Palace at Westminster, for the present and the last financial years, and I am to request that you will send in a statement of the amounts which you claim to be entitled to for that service, in order that they may be examined and paid before the 31st instant, the end of the present financial year.

E. M. Barry, Esq.

I am, &c.  
(signed) *Alfred Austin*,  
Secretary.

— No. 11. —

Mr. *E. M. Barry* to Mr. *Alfred Austin*.

Sir,

1, Old Palace Yard, 2 March 1864.

I HAVE to acknowledge the receipt of your letter of the 1st instant, informing me that the First Commissioner of Her Majesty's Works, &c., has been authorised to pay me a commission of 5 instead of 4 per cent. for my professional services as architect at the New Palace at Westminster, for the present and the last financial years, and requesting from me a statement of the amounts which I claim to be entitled to for that service.

In reply, I have, in the first place, to express my best thanks to the First Commissioner of Her Majesty's Works, &c., for the fair and liberal manner in which he has approached this question. As regards the amount which I may claim to be entitled to in accordance with the terms of your letter, I have to state that during the present and the financial year immediately preceding it (to which two years I understand the concession of 5 instead of 4 per cent. to be limited by your letter), I have received from Government the sum of 367 *l.* 0 *s.* 1 *d.* for my professional services as architect at the New Palace at Westminster. This sum has been computed at 4 per cent. on the expenditure, and I am now therefore entitled, according to the terms of your letter, to a further payment of 91 *l.* 15 *s.*, which will increase my commission to 5 per cent. for services rendered during the two financial years ending 31st March 1863 and 31st March 1864.

Alfred Austin, Esq.

I am, &c.  
(signed) *Edward M. Barry*.

— No. 12. —

Mr. *Alfred Austin* to Mr. *E. M. Barry*.

Sir,

Office of Works, &c., 29 March 1864.

I AM directed by the First Commissioner of Her Majesty's Works, &c., to transmit to you herewith an order on Her Majesty's Paymaster General for the sum of 70 *l.* 14 *s.* 3 *d.*, being the balance of your remuneration for professional services as architect at the New Palace at Westminster, during the present and last financial years, making 5 per cent. commission for services actually rendered in those years.

Your professional services in respect of the works certified on 25th March 1862, amounting to 2,206 *l.* 15 *s.* 4½ *d.*, are excluded from the increased rate of remuneration, having been actually rendered before 31st March 1862.

E. M. Barry, Esq.

I am, &c.  
(signed) *Alfred Austin*,  
Secretary.

— No. 13. —

Mr. *E. M. Barry* to Mr. *G. Russell*.

Sir,

21, Abingdon-street, 15 October 1866.

I HAVE received your letter of the 11th instant, in which you enclosed the schedule of prices which forms the basis of Messrs. Smith's contract to enable me to judge with accuracy whether any estimate for the proposed alterations in the Ladies' Gallery will be sufficient.

Some experience in the working of schedules of prices, particularly in respect of the New Palace at Westminster, has induced me to form a strong opinion that in cases like the present the course of requiring an estimate for a gross sum, before the works are commenced, is that which is likely to prove most satisfactory in its results.

I may add that all the works hitherto entrusted to me at the New Palace at Westminster, have been executed under this system, and that in no case have my estimates been exceeded.

I have ascertained that Messrs. Smith are willing to submit an estimate for a gross sum, according to the terms specified in my letter of the 11th instant, and I should be glad if such a course could be adopted, although I shall be happy to carry out the instructions of the First Commissioner of Her Majesty's Works as to any other mode of proceeding. Having considered the schedule of prices, I see no reason to doubt the sufficiency of my estimate; but as the greater part of the work will consist of day work, the amount of which will depend greatly on the supervision exercised over it by the clerk of works, I am not able to speak with full confidence as to the result.

According to the terms of the contract, it will be necessary that I should have the services of a measurer and a clerk of works, neither of which will be needed if the work is carried out under a tender for a gross sum.

Geo. Russell, Esq.

I am, &c.  
(signed) *Edward M. Barry*.

— No. 14. —

Mr. *G. Russell* to Mr. *E. M. Barry*.

Sir,

Office of Works, &amp;c., 17 October 1866.

I AM directed by the First Commissioner of Her Majesty's Works, &c., to acknowledge the receipt of your letter of the 15th instant, further respecting the proposed alterations in the Ladies' Gallery of the House of Commons, and I am to inform you that notwithstanding the willingness, as stated by you, of Messrs. Smith & Co., to send in an estimate for the work at a gross price, the Board are of opinion that the terms of the contract with them should be abided by, and that the work should be done by them according to the scheduled prices. If, therefore, on further consideration, you are satisfied that you having the assistance of a clerk of the works, the work can be done within the amount of your estimate at those prices, I am to authorise you to cause the same to be proceeded with by Messrs. Smith.

I am directed to add that the Board will provide a clerk of the works; but that they consider that the duty of measuring the work belongs to you, as your commission of five per cent. on the outlay covers any expense which you may incur in preparing and making out the accounts.

E. M. Barry, Esq.

I am, &c.  
(signed) *George Russell*,  
Assistant Secretary.

— No. 15. —

Mr. *E. M. Barry* to Mr. *G. Russell*.

Sir,

21, Abingdon-street, 18 October 1866.

I HAVE received your letter of the 17th instant, informing me of the decision of the First Commissioner of Her Majesty's Works, &c., that the alterations in the Ladies' Gallery of the House of Commons should be done by Messrs. Smith & Co., according to their schedule of prices.

I have every reason to believe that the work can be done within the amount of my estimate at those prices.

I am unable to concur in the opinion expressed by the Board respecting the duty of measuring, and will communicate my views on the subject in a separate letter.

As, however, it is important not to lose time in commencing the works, I have requested Messrs. Smith & Co. to proceed at once with the same, and am content to leave the question of my remuneration to the decision of the First Commissioner of Her Majesty's Works, &c., after he has considered the representations I shall feel it my duty to make on the subject.

I am, &amp;c.

George Russell, Esq.

(signed) *E. M. Barry*.

— No. 16. —

Mr. *E. M. Barry* to Mr. *Alfred Austin*.

Sir,

21, Abingdon-street.

ADVERTING to my letter of the 18th October, I have to call the attention of the First Commissioner of Her Majesty's Works, &c., to the question of measuring the work of the Ladies' Gallery.

In your letter of the 17th of October, an opinion is expressed on the part of the Board that the duty of measuring the work devolves on me, as my commission of 5 per cent. on the outlay covers any expense I may incur in preparing and making out the accounts.

I am unable to concur in this opinion, and I do not think it can be supported by the practice of any architect of eminence at the present time. I enclose a printed list of rules drawn up by the Royal Institute of British Architects for the regulation of architects' remuneration, which rules are considered binding by my profession. Clause 15 defines the duties of an architect, as included in the charge of 5 per cent., and expressly excludes therefrom the obligation to measure and make out extras and omissions.

An architect's duty may be described as that of designing and superintending the erection of the work. Taking out the quantities at the commencement or measuring the work on completion, are duties entrusted to a surveyor. There is no difference in principle between these two operations. Measurement is in reality taking the quantities of a work when finished from the work itself, while taking out the quantities at the commencement differs only in that the quantities are in that case taken from drawings in the absence of the work.

I am not aware that it has ever been contended that an architect should pay the surveyors for taking out the quantities at the commencement of the work, and I must respectfully submit that no reason can exist for calling upon him to do so for measuring or taking the quantities on the completion of the work. The system of taking out quantities has been repeatedly recognised by the Board, and architects employed on Government works have received their full commission of 5 per cent. for their services, exclusive of taking out the quantities.

I am unable to perceive any reason which would justify the reduction of the architect's remuneration for no other cause than that the work is to be done under a schedule of prices rather than for a gross sum under a contract. The question as regards the Ladies' Gallery is of so trifling a character that I

must

must beg the First Commissioner of Her Majesty's Works, &c., to understand that I would gladly have waived it had it not involved a question of principle, to abandon which would have exposed me to the charge of unprofessional conduct on the part of the members of my profession.

I may add that no charge which I could make in accordance with the ordinary practice, would really remunerate me for such works as the Ladies' Gallery, and many other works at the New Palace at Westminster, which involve responsibilities and demands on my time and attention out of all proportion to my fee of 5 per cent. on the outlay.

I have to apologise for the length of this letter, and now leave the question in the hands of the First Commissioner of Her Majesty's Works in the full confidence that he will come to a decision which shall be just and honourable both to the Board and myself.

I am, &c.  
(signed) *E. M. Barry.*

#### Enclosure in No. 16.

(Printed List of Rules referred to in Mr. Barry's Letter.)

#### PROFESSIONAL PRACTICE AND CHARGES OF ARCHITECTS,

Being those now usually and properly made, as confirmed at the SPECIAL GENERAL MEETINGS of the ROYAL INSTITUTE of BRITISH ARCHITECTS, held 13th and 27th January 1862.

#### NEW BUILDINGS, &c.

1. The usual remuneration for an architect's service, except as hereinafter mentioned, is a commission of 5 per cent. on the total cost of the works executed from his designs; besides which, all travelling and other incidental expenses incurred by the architect are paid by the employer, who is also chargeable under certain conditions, as hereafter mentioned, for time occupied in travelling.
2. But for all works in which the art required is of a high kind, and the expenditure mainly for skilled labour and not for materials, *e.g.* in designs for the furniture and fittings of buildings, for their decoration with painting or mosaic, for their sculpture, for stained glass, and other like works, the architect's charge is not made by way of commission on the cost, nor does it depend upon the time employed in making the design, but is regulated by special circumstances, and varies according to the skill and artistic power of the architect.
3. A commission of  $2\frac{1}{2}$  per cent. is to be charged upon such works as sculpture, stained glass, and others of a similar nature, for which the architect does not give the design, but arranges with the artists or with the tradesmen, and directs the work generally.
4. In works under 500 *l.* in amount, 5 per cent. is not fairly to be considered as remunerative, and in such cases it is just to the employer as well as to the architect, to charge by time or by a scale, varying from 10 per cent. for works under 100 *l.*, to 5 per cent. on amounts above 500 *l.*
5. The commission is reckoned upon the total cost of the works, valued as if executed entirely by labour and of new materials provided by the builder.
6. The commission is to be charged upon the whole value of the work executed, with the addition of  $2\frac{1}{2}$  per cent. upon any omissions.  
This is exclusive of the charge for measuring extras and omissions.
7. The architect is entitled during the progress of the building to payment on account at the rate of 5 per cent. on the instalments paid to the builder, or otherwise to half the commission, on the signing of the contract, and the remainder by instalments as above.

|                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| TRAVELLING - - -          | <p>8. All travelling expenses are to be charged extra.</p> <p>9. These rules suppose the work to be executed within an easy distance of the architect's office; but if the work be executed at a considerable or inconvenient distance from it, an allowance beyond the 5 per cent. ought to be made for the time occupied in travelling, in addition to the actual expenses.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| EXTRA SERVICES -          | <p>10. The per-centage does not cover professional services in connection with negotiations for site, arrangements respecting party walls, or right of lights, nor services incidental to arrangements consequent upon the failure of builders whilst carrying out work; but all such services are charged for in addition, the basis for charge being the time employed.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| ALTERATIONS IN DESIGN.    | <p>11. Supposing that the employer, after having agreed to a design, and had the drawings prepared, should have material alterations made, an extra charge may be made according to the time occupied.</p> <p>12. If the architect should have drawn out the design complete, with plans, elevations, sections, and specification, ready for estimate, the charge is half the usual commission above-named.</p> <p>13. If the architect should have, in addition, procured tenders in accordance with the instruction of his employer, the charge is one-half per cent. extra to the above.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| ALTERATIONS OF BUILDINGS. | <p>14. For works in the alteration of premises, the remuneration may be increased according to the time, skill, and trouble involved.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| DUTIES OF THE ARCHITECT.  | <p>15. All of the following requirements for buildings are included in the ordinary charge of 5 per cent.</p> <p>Preliminary sketches.</p> <p>Working drawings and specifications sufficient for an estimate and contract.</p> <p>Detailed drawings and instructions for execution.</p> <p>General superintendence of works (exclusive of Clerk of Works).</p> <p>Examining and passing the accounts, (exclusive of measuring and making out extras and omissions).</p> <p>16. No additional remuneration is due for making such a rough estimate as may be obtained, for instance, by cubing out the contents. If a detailed estimate be framed, additional remuneration is due from the employer.</p> <p>17. An architect is bound, under the 5 per cent. charge, to provide one set of drawings and one set of tracings, with duplicate specification; it being understood that the architect is paid for the use only of the drawings and specification, and that they remain the property of the architect.</p>            |
| ESTATES - - -             | <p>18. The charge for taking a plan of an estate, laying it out, and arranging for building upon it, should be regulated by the time, skill, and trouble involved.</p> <p>19. For actually letting the several plots (in ordinary cases) a sum not exceeding a whole year's ground rent, may be charged.</p> <p>20. For inspecting the buildings during their progress (so far as may be necessary to ensure the conditions being fulfilled) and finally certifying for lease, the charge should be a per-centage not exceeding one-half per cent. up to 5,000<i>l.</i>, and above that by special arrangement.</p> <p>21. All the above fees to be exclusive of travelling expenses, and time occupied in travelling, as before-mentioned.</p> <p>22. The charge for the above does not include the commission for preparing specification, directing, superintending, and certifying the proper formation of roads, fences and other works executed at the cost of the employer, nor for putting the plans on the leases.</p> |

|               |   |   |                                                                                                                                                                                                                                                                                                                                                                                                   |
|---------------|---|---|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| VALUATIONS    | - | - | 23. The following definite charges are recognised for valuation of property:<br>The charge throughout is 1 per cent. on the first 1,000 <i>l.</i> , and one-half per cent. on the remainder up to 10,000 <i>l.</i> Below 1,000 <i>l.</i> , and beyond 10,000 <i>l.</i> , by special arrangement. These charges do not include travelling expenses, nor attendance before juries, arbitrators, &c. |
| PER DAY       | - | - | 24. The charge per day which may be made by architects depends upon their professional position, but the minimum charge is three guineas per day.                                                                                                                                                                                                                                                 |
| DILAPIDATIONS | - | - | 25. The charge for estimating dilapidations is 5 per cent. on the estimate, and in no case less than 2 <i>l.</i> 2 <i>s.</i>                                                                                                                                                                                                                                                                      |
| QUANTITIES    | - | - | 26. It is not desirable that an architect should supply to builders quantities on which to form tenders for executing his design; but in case of such being done it should be with the concurrence of the employer, and the architect should be paid by him, and not by the builder.                                                                                                              |

By Authority of the Council,

(signed) *John P. Seddon,*  
*Chas. Forster Hayward,* } Hon. Secs.

— No. 17. —

*Mr. E. M. Barry to Mr. Alfred Austin.*

Sir,

21, Abingdon-street, 6 March 1867.

MESSRS. GEO. SMITH & Co. have applied to me to have the work done by them in the Ladies' Gallery of the House of Commons measured and paid for.

I have already brought the question of measuring before the First Commissioner of Her Majesty's Works, &c., by my letter of the 20th December 1866, and I should be glad to be favoured with a reply to that letter before I answer the application of Messrs. Geo. Smith & Co.

Alfred Austin, Esq.

(signed) *Edward M. Barry.*

— No. 18. —

*Mr. Alfred Austin to Mr. E. M. Barry.*

Sir,

Office of Works, &c., 19 March 1867.

I AM directed by the First Commissioner of Her Majesty's Works, &c., to acknowledge the receipt of your letter of the 6th instant relative to the measurement of the works performed by Messrs. Smith & Co., in altering the Ladies' Gallery of the House of Commons, and I am to acquaint you that his Lordship sees no reason to alter the opinion expressed in Mr. Russell's letter to you of the 17th October 1866, namely, that the duty of measuring the work belongs to you, your commission of 5 per cent. on the outlay covering any expense which you may incur in preparing and making out the accounts.

I am further directed to remind you that when you were appointed as architect to the New Palace at Westminster it was upon the understanding that you were to be remunerated at the same rate as the late Sir C. Barry, namely, 4 per cent. commission, including the measuring. This rate or scale was, on the 1st March 1864, increased to 5 per cent.; and your letter of the 2nd March 1864, confirms that arrangement, from which the First Commissioner is not now prepared to depart.

E. M. Barry, Esq.

I am, &c.  
(signed) *Alfred Austin, Secretary.*

— No. 19. —

Mr. E. M. Barry to Mr. Alfred Austin.

Sir,

21, Abingdon-street, 25 March 1867.

I HAVE received your letter of the 19th instant, and regret that the First Commissioner of Her Majesty's Works, &c., should not have thought it right to reply to the arguments used in my letter to you of the 20th December last, which are consequently still unanswered.

As regards your statement that I was appointed architect to the new Palace at Westminster on the understanding that I was to be remunerated at the same rate as the late Sir C. Barry, namely, 4 per cent.; I have to remind you that in my letter of 8th June 1860, accepting the appointment, I expressly limited my acceptance to the case of the works which had then received "the sanction of the Board, and for which Parliament had then made grants of money."

I stated at the same time my views as to the nature of that arrangement, but as it has now terminated with the consent of the Board, and has therefore no connection with the present case, I need not do more than refer you to my previous correspondence with the Board to prove its exceptional character. With reference to your letter of the 1st March 1864, and my answer of the 2nd March 1864, to which you refer as constituting the present arrangement with me, from which the First Commissioner is not now prepared to depart, I have to call your attention to the fact that in neither of those letters is there any allusion whatever to measuring; I have also to remind you that the system of measurement under a schedule of prices had been finally abandoned as regards the works at the New Palace at Westminster for a considerable period before those letters were written, and that I have never during the three years that have since elapsed been called upon to perform that duty, but that, on the contrary, I have always received the customary professional remuneration of 5 per cent. on the cost of the works entrusted to my superintendence.

The demand now made upon me is therefore virtually a new one, and involves a duty which I never intended to undertake, and do not consider I have ever undertaken.

As, however, I stated in my letter of the 18th October last, that I was willing to leave the question of my remuneration in the hands of the First Commissioner, and as he appears to consider that I have agreed by implication, to undertake that which I never intended to do, I am prepared to waive my view of the agreement, and to abide by his expressed decision, as far as it relates to the present case of the works that have lately been completed in the Ladies' Gallery of the House of Commons, but in so doing I must not be understood as admitting its justice, or as agreeing to regard it as a precedent on any future occasion.

It has been with much regret that I have felt myself drawn into a controversy respecting my remuneration. The present question between myself and the Board, refers to a sum of less than 10 *l.*, but I could not admit the justice of the views expressed in your letters, without exposing myself to a charge of unprofessional conduct by accepting less than the recognised remuneration of my profession, and departing from the rules laid down for its guidance by the Royal Institute of British Architects, to whom I have felt it my duty to communicate the substance of this correspondence, referring as it does to an important point in professional practice.

I am, &amp;c.

Alfred Austin, Esq.

Royal Institute of British Architects to the First Commissioner of Works.

Royal Institute of British Architects, incorporated 7th Wm. 4.

Sir,

9, Conduit-street, Hanover-square, W.,  
26 March 1867.

WE are desired by the Council of this Institute to inform you that on the 23rd instant Mr. E. M. Barry, Fellow, brought before them the circumstances under

under

under which the Government insist on the commission of 5 per cent. paid him being made to include the charge for measuring, together with a protest on his part against such an interpretation of the agreement between them, and that after a careful consideration of the subject, the Council came to the resolution of which we have the honour of forwarding you a copy.

To the Right Honourable  
The First Commissioner of Works.

We have &c.  
(signed) *John P. Seddon,* } Hon.  
*C. F. Hayward,* } Secs.

*P. S.*—We take the opportunity of enclosing a copy of the rules for the remuneration of architects laid down by the Institute. (See page 9.)

Royal Institute of British Architects.

COPY of RESOLUTION passed by the Council *re* Architect's Remuneration,  
New Palace at Westminster, 23rd March 1867.

Resolved,

THAT the Council do not feel called upon to express an opinion as to whether any private arrangement made or implied, may justify Mr. Barry in acceding to such a mode of remuneration on the present occasion, but they beg to state distinctly that such an arrangement is contrary to the practice of the profession, and protest against its being drawn into a precedent on future occasions.

The rules for the remuneration of architects laid down by the Institute have been generally accepted by the public, and are considered binding on the profession, and the Council feel sure that the Board of Works would not wish to adopt a scale of remuneration lower than that accepted by private individuals.

Mr. *Alfred Austin* to the Royal Institute of British Architects.

Gentlemen,

Office of Works, &c., 5 April 1867.

I AM directed by the First Commissioner of Her Majesty's Works, &c., to acknowledge the receipt of your letter of the 26th ultimo, transmitting copy of a resolution passed by the Council of the Royal Institute of British Architects, in reference to the remuneration of Mr. E. M. Barry, the Architect of the New Palace, Westminster, and also of the enclosure contained in your letter.

John P. Seddon, Esq.,  
C. F. Hayward, Esq.,

Mr. *Alfred Austin* to Mr. *E. M. Barry*.

Sir,

Office of Works, &c., 9 April 1867.

I AM directed by the First Commissioner of Her Majesty's Works, &c., to acknowledge the receipt of your letter of the 25th ultimo, relative to your remuneration for professional services at the New Palace at Westminster, in which you state that you are prepared to abide by his Lordship's decision.

sion as far as it relates to the present case of the works that have lately been completed in the Ladies' Gallery of the House of Commons, and I am at the same time to acquaint you, that in order to prevent any future misunderstanding, your remuneration for all works entrusted to your superintendence by this Department, whether at the Palace at Westminster or elsewhere, will be calculated by the Board at a commission of 5 per cent. on the outlay, which commission is, according to the practice of this Department, to cover all expenses of measuring and superintendence, except the charge for the clerk of the works.

E. M. Barry, Esq.

I am, &c.  
(signed) *Alfred Austin*, Secretary.

Proceedings have been taken to recover the arrear.

- - - ditto.

Paid by the parishioners out of the Poor's Rate.

Given up on account of poverty of the Collector.

Given up on account of poverty of the Collector.

SCOTLAND:—There has been no loss to the Revenue by the defalcations of Collectors of Taxes in Scotland within the last twenty years.

Inland Revenue Office,  
30 March 1868.Fred. Gripper,  
Accountant and Controller General.

TAX COLLECTORS (GREAT BRITAIN).

RETURN of the Number of DEVALUATIONS which have occurred on the part of the PAROCHIAL COLLECTORS of TAXES in *Great Britain* within the last Twenty Years, the different Sums so Lost, and the Number of Cases in which the Treasury did and did not Compel the Parishes concerned to be Re-assessed.

(*Mr. Buss.*)

---

*Ordered, by The House of Commons, to be Printed,*  
*14 August 1807.*
